1. That births and deaths were registered in these Municipalities in the proportions per 1,000 of population of 21· and 23·2, respectively; as opposed to 18·4 and 21·9 per 1,000, respectively, in the preceding week ending 11th February, indicating an improvement in the registration of both.

2. That these events were recorded in the highest proportions by the following Municipalities :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Bali	52·6	Bali	84·2
Darjiling	52 1	Suburbs of Calcutta	35·4
Narainganj	45·5	Gya	32·1
Comillah	42·3	Purneah	31·1
Arrah	34·7	Howrah	30 3
Midnapore	31·0	Serampore	29·4
Ranaghat	29·9	Beau'eah	28·9
Monghyr	29·8		

3. That in comparison with the results of the preceding week, there was a sensible reduction in the death-rate from fever, no variation in fatality from injury, the fatal results from the other diseases exhibiting only fractional differences, and small-pox presenting no death ; *vide* subjoined table :—

	Ratio per *mille* during the weeks ending—	
	18th Feb. 1888.	11th Feb. 1888.
Cholera	2·7	1·8
Small-pox	......	·03
Fever	9·1	10·1
Bowel-complaints	4·3	3·6
Injury	·2	·2
Other causes	6·9	6·1

4. That, referring to the diseases mentioned above, eliminating small-pox, from which, as before stated, no death was reported to have occurred, bowel-complaints and injury, the casualties from which were nowhere noticeably large, cholera, fever, and the maladies coming under the head of "Other causes" caused the greatest loss of life in the following Municipalities :—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Bali	52·6	Beauleah	23·6	Gya	16·4
Howrah	11·4	Purneah	20·8	Puri	12·6
Chittagong	9·4				
Suburbs of Calcutta	4·1				

5. That the mortality referable to *Sex, Class* and *Age,* stood as exhibited below :—

According to Sex.	Ratio per *mille.*
Males	24·0
Females	22·3
Ratio of male deaths to every 100 female deaths	121

According to Class.	Ratio per *mille.*
Christians	21·7
Hindus	23·7
Mahomedans	22·3

According to Age.	Ratio per *mille.*
Under 1 year	173·2
1 and under 5 years	24·6
5 „ 10 „	13·5
10 „ 15 „	13·1
15 „ 20 „	14·6
20 „ 30 „	10·0
30 „ 40 „	15·9
40 „ 50 „	17·2
50 „ 60 „	28·4
60 years and upwards	76·9

R. LIDDERDALE, M.D., *Deputy Surgeon-General,*
Sanitary Commissioner for Bengal.

The 3rd March 1888.

Statement showing the Results of the Registration of Births and Deaths in the Principal Municipalities in Bengal during the week ending 18th February 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

The HON. C. H. MOORE.
The HON. DR. GOOROO DAS BANERJEE.

CALCUTTA AND SUBURBAN MUNICIPALITIES AMALGAMATION BILL.

The Hon. Sir Henry Harrison presented the final Report of the Select Committee on the Bill to consolidate and amend the law relating to the municipal affairs of the Town and Suburbs of Calcutta. He said:—In presenting this report, I owe it to the Committee to state that they have devoted much care and time to the consideration of the many suggestions with which they have been favoured by the several Associations and other Public Bodies who reported on the Bill. We wished we could have presented this report at an earlier period, in order that the public might have had a longer time to consider it before it must be taken up again by the Council. But the time which we have taken to give adequate consideration to all the material points laid before us has been such that, though we have made every speed consistent with due care, we have not been able to complete our work at an earlier date. As regards the report itself and the Bill which accompanies it, I may perhaps be permitted to let them speak for themselves. It will suffice to say that the main alterations we have made are connected with the system of levying the rates with the water-supply, and above all with the building regulations. I may observe that the whole of these come, if not in the latter part of the Bill, at least towards the middle of it, and therefore if the Bill is taken into consideration, say three weeks from the present time, it should not be inferred that only three weeks are therefore allowed for the consideration of the most important changes in the Bill. The earlier chapters of the Bill have been very little altered indeed, and substantially these have been before the public for the whole space of a year. Consequently, before we reach in Council those portions of the Bill in which material changes have been made, a considerably longer period will have elapsed. With these remarks I ask the Council to accept the Report.

The Hon. Sir Henry Harrison then moved that the Bill as further amended, with the final Report of the Select Committee thereon, be published in the *Calcutta Gazette*.

The Hon. Baboo Kally Nath Mitter moved that the words "for at least six weeks" be added to the motion.

The Hon. the President said:—The motion before the Council is to publish the Report of the Select Committee and the Amended Bill. No time is fixed. The Hon. Member can bring forward his proposal as a separate motion if he thinks fit.

The Hon. Sir Henry Harrison's motion was put and agreed to.

The Hon. Baboo Kally Nath Mitter then moved that the Bill be published for at least six weeks. He said the changes which have been made in the Bill are so numerous and so important that it is absolutely necessary that the public should be afforded a reasonable time to consider them before the Bill is taken into consideration by the Council, and I think six weeks is a reasonable time to give for the purpose. Anything short of that would be too little. Not having been furnished with a copy of the Bill as altered by the Select Committee, it is impossible for me to point out the various and numerous changes made in the Bill. Besides, as far as I am concerned, the Bill has now been presented in a form which is far more objectionable than what it was when last reported upon. Many of the alterations which have been made are such that I am entirely opposed to them, and knowing, as has been hinted, that the people of Calcutta intend to hold a public meeting to consider the provisions of the Bill, I think it is better that they should be afforded an opportunity of submitting their representations, so that, before the Bill is taken into consideration by the Committee, we should have the views of the public put before us in an intelligent and proper manner.

The Hon. Mr. Macaulay said:—I submit it is quite unnecessary to give such a long period for the consideration of this Report and Bill. The Select Committee, sitting about twice a week, have taken only three months to

consider and report upon the Bill in detail, yet the hon. member asks that one-half of that period may be given to enable the public to make up their minds on the Bill, and to submit their views in an intelligent and proper manner. I am far from underrating the value of intelligent public discussion; but I venture to think that opinions of any value can easily be laid before the Council within the period of three weeks for which, I understand, my hon. friend who is presiding proposes to adjourn the Council. I think that to give an interval of six weeks will be simply to suggest an increase of the delay which has already formed the subject of public criticism. We have nothing to gain by it, and it will only obstruct the course of legislation.

The Hon. Sir Henry Harrison said:—My own view of this matter, as the Member in charge of the Bill, is that, if we had an unlimited time at our disposal, I should be glad if the six weeks which have been asked for could be given; but the function of a reasonable person is to balance considerations on opposite sides. What we have to consider is what will be the effect of giving six weeks' time before commencing to consider the first section of the Bill in Council. Six weeks will bring us to the end of April. We have not only to consider what time we should give the public, but also what would be reserved for the Council. Suppose the legislative session to be carried on even into July, we shall deprive ourselves of a very considerable portion of the time before us if we postpone all action for six weeks. Now, as I mentioned in my former remarks, the parts of the Bill which come first are precisely those parts which have been before the public for a whole year. I do not think any change of any importance at all comes before section 100 of the Bill. On a reference to the report of the Committee, I find that the first of the important changes comes in section 99. I cannot call the sections relating to petroleum an important change, though it may be an important question: the proposal has been before the public for a very long time. We have therefore before us some weeks of important discussions regarding the constitution of the Town Council and various other matters which have been untouched by the Committee; and during the time we discuss these matters, the public will have an opportunity of expressing an opinion on the important alterations in the Bill So that, looking from both points of view, the time left to the Council, as well the convenience of the public, I am bound to say I think we shall consult the convenience of both parties if we allow a period of three weeks before commencing to discuss the Bill in Council. I feel pretty confident that we shall hardly reach the new portions of the Bill under six weeks. For these reasons I think it will be a pity if we wait for a longer time than three weeks before we begin to consider the Bill in Council.

The Hon. Baboo Kally Nath Mitter said:—I find that the first section of the Bill which has undergone considerable change is section 37—the very first section which will come up for discussion. The duties of the Corporation are enumerated in that section, and those duties were numbered in the Bill as before amended from Nos. 1 to 5, but now clauses (*a*) to (*k*) have been added to those duties. This of itself may not be of much concern, but under the very next section a power of control has been given to the Local Government in reference to the performance by the Commissioners of any of the duties enumerated in section 37. I am not prepared at present to say whether there are any other important changes in the early sections of the Bill; but it seems to me that this is hastening unduly the consideration of the measure. The Hon. Mr. Macaulay has complained of the delay which has taken place in Select Committee, but who was responsible for such delay? [The Hon. Mr. Macaulay:—"My hon friend is under a misapprehension. I made no complaint of delay, and I made no reference to any delay on the part of the Select Committee. I said that the Bill had already been for two years before the Council, and yet you want to give six weeks more for public critics to give their opinion upon it in what you describe as an intelligent and proper manner. I did not say that there had been any unnecessary delay, but I said that the delay which had taken place had been made the subject of public criticism."] The delay had been brought about by the important changes which had been suggested by the Hon. Member in charge of the Bill, and therefore, as far as the Committee is concerned, they

were not responsible for the delay. I do not see why the public should not have a reasonable time to consider the important alterations made in the Bill which affect their interest.

The Hon. the President said:—Before putting the motion, I should like to say a few words on the subject. This Council would as a matter of course on all occasions regard public convenience; but the question is whether convenience in respect of other matters should not also be taken into consideration. The question is whether the proposal is a reasonable one. Now, when we come to consider the fact pointed out by the Hon. Mr. Macaulay that the task of preparing this report has taken three months, I apprehend the request to have six weeks time to consider the work which has been done by the Committee in three months seems relatively a long period of time. Nor can I believe the public to be altogether ignorant of the main provisions of the Bill. From my own experience I have found that when any important subjects are made public we have within a week in the public prints criticisms of every description. I cannot therefore help thinking six weeks an unreasonable time to ask, and I have no doubt that two or three weeks will be more than sufficient, especially when it is remembered, as observed by the Hon. Member in charge of the Bill, that many portions of it are taken from the old Bill with some amendments, but containing no new principle. All these portions of the Bill may be considered in Council while the public are discussing the effect of the radical changes which have been made, and there will be ample time for the public to submit all their representations to the Council. Bearing in mind that the Bill has been before the public for a long time, I am opposed to the extension of time for the publication of the Bill to six weeks.

The Hon. Baboo Kally Nath Mitter's motion was then put and negatived.

The Council was adjourned for three weeks.

WORKS OF PUBLIC UTILITY CONSTRUCTED IN 1886.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Miscellaneous Public Improvements.

No. 2202M.P.I., *dated Calcutta, the 17th December* 1887.

READ—

Statement of works of public utility constructed by private individuals in the several districts of Bengal during the year 1886.

Read again—

Statement of similar works constructed during 1885 and the Resolution thereon.

REMARKS.—The following works of public utility were constructed by private individuals in 1886:—

	Number of works.	Cost. Rs.	A.	P.
Public Buildings...	9	18,290	0	0
Roads	7	3,185	13	3
Bridges	4	8,200	0	0
Embankments or bunds	103	6,137	8	0
Ghâts	3	3,800	0	0
Tanks	293	2,03,280	5	0
Wells	80	19,090	0	0
Miscellaneous	4	3,840	0	0
Petty works	......	60,499	9	6

2. The total number of works costing more than Rs. 200 each, which were constructed during the year under review, and the amounts contributed, including donations for petty works, as compared with those of the previous two years, are shown below:—

YEAR.	Number of works costing between Rs 200 and Rs. 500 each.	Number of works costing more than Rs 500 each.	Total number of works costing Rs 200 and upwards each.	Total expenditure on works costing Rs. 200 and upwards each. Rs. A. P.	Add cost of petty works under Rs. 200. Rs. A. P.	Total contribution. Rs. A. P.
1884	345	217	562	4,21,336 0 0	90,519 0 0	5,11,855
1885	434	192	626	3,85,484 0 0	92,966 0 0	4,78,450 0 0
1886	381	122	503	2,65,823 10 0	60,499 9 6	3,26,323 3 9

3. The number of works costing over Rs. 200 each carried out in the different districts, and the amounts contributed for their construction, are given in the following statement:—

Name of district.	Number of works.	Total cost. Rs.	A.	P.
Burdwan	4	2,325	0	0
Bankoora	3	1,900	0	0

Balasore	10	5,147 0 0

4. Taking them according to the classification adopted in paragraph 1, the following works are specially noted:—

Public buildings.—The total of Rs. 18,290 under this head includes the contributions of Baboo Banamali Roy who gave Rs. 7,500 for the Rivers Thompson Town Hall in the town of Pubna, and Rs. 2,000 for additions to the Serajgunge Higher Class English School; Abdus Soban Chowdhuri contributed Rs. 5,000 for a library in the town of Bogra; and Srimati Saroda Soondari Dasi paid Rs. 1,097 for a charitable dispensary at Nabadwip.

Roads.—The sum of Rs. 3,185-13-3 contributed under this head is made up of small amounts.

Bridges.—Under this head Rs. 8,200 were contributed. Of this amount His Highness the Maharajah of Cooch Behar gave Rs. 2,500 for the repairs to the bridges on the central Emigration Road in the district of Julpigoree, and Baboo Srikissen Agarahri, Rs. 5,200 for the construction of a bridge at Gurhia in the Mozufferpore district.

Embankments or bunds.—The sum of Rs. 6,137-8, appears under this head. The ghatwals and ryots of Saruth Deoghur spent Rs. 4,244 on the construction of 21 new bunds and the repairs of 80 existing ones in the sub-division of Deoghur, and Mr. W. M. Grant made a bund at Bhaski in the Sonthal Pergunnahs district at a cost of Rs. 1,618.

Ghâts.—Of the sum of Rs. 3,800 subscribed under this head, Nawab Khaja Ahsunollah of Dacca gave Rs. 2,000 for a ghât on the river Titas, in the station of Muradnagar. Baboos Baroda Kanta Roy, Brojo Kanta Roy and others gave Rs. 1,000 for a masonry ghât at Patuakhali.

Tanks.—Rs. 2,03,280 were spent in constructing tanks. The widow of Saligram Sahai gave Rs. 16,351; Srimati Jasada Chowdhurany Rs. 13,000; Baboo Lali Ram Marwari Rs. 9,000. Baboo Harangi Missir Rs 8,000; Rajah Krishnendra Roy of Balihar, Rajshahye, Rs. 5,000; Baboo Gopal Sahu Kalwar Rs. 4,000; Baboo Lachmi Pershad Rs. 3,000; Baboo Iswar Chunder Dass Rs. 2,300; and Mussamut Golat Komar Rs. 2,231. Baboos Taraprosad Chatterjee, Boyanuddin Sarkar, Thakur Das Pal, Rajendra Chandra Roy Chowdhuri, Upendra Nath Kundu, Bhukha Sahu Teli, gave Rs. 1,500 each. Baboo Thakur Bania

Rs. 1,400, and the ghatwals and ryots of Deoghur gave Rs. 1,400; and Sheik Meherali Akbarali Rs. 1,300. Baboo Pachu Pramanik, Munshi Mahboob Ally, and Baboo Jadab Hari gave Rs. 1,200 each. Baboo Porai Pramanik gave Rs. 1,125. Srimotya Gooni of Brojonath Chak, and Baboo Mathura Nath Saha, contributed Rs. 1,100 each, and Baboos Umrita Lall Mookerjee, Umesh Chandra Sunyal, Ananta Deb Mookerji, Saik Chowdhuri, Jafal Mirdha, Mastaran Sarkar, Kaloo Sirkar, Dighapatia Raj, Kharee Sardhar, Parmeshar Teli, Mehera Mandal, and Sreemati Kristo Mayee Debya, Sreemati Jannobi Chaudhurani, Mussamut Sarsath Bahuria and Mussamut Jagpati Kuer each Rs. 1,000.

Wells.—The amount of the contributions under this head is Rs. 19,090. Of this sum, Rs. 3,895 were contributed in the district of Shahabad for the construction of 13 wells; Rs. 1,010 in the district of Durbhunga for 4 wells; Rs. 3,625 in the district of Sarun for 17 wells; and Rs. 5,000 in the district of Monghyr for 20 wells. The remaining 26 wells constructed during the year are distributed among the districts of Nuddea, Rungpore, Julpigoree, Patna, Gya, Mozufferpore, Chumparun, Purneah, and Cuttack.

Miscellaneous.—Rupees 3,840 were contributed. Mr. J. D. Beglar constructed a jheel at Chagdah at a cost of Rs. 3,000.

RESOLUTION.—Compared with the corresponding figures for the previous two years, there has been a large falling off in the contributions made for works of public utility during the year under review, but looking to the many wants which are constantly being brought to notice from all parts of the Province, it may be expected that the decrease is only temporary. To those who have contributed towards such works during 1886, the Lieutenant-Governor tenders his acknowledgements for their public spirit and liberality.

Letters of acknowledgment will be forwarded by Government to those who have constructed important works. The contributors of works costing Rs. 500 and under will, as usual, receive an acknowledgment from the Commissioner or the Magistrate of the Division.

ORDER.—Ordered that a copy of this Resolution, and of the statement, be forwarded to the Board of Revenue, Lower Provinces, and to all Commissioners of Divisions, to the Commissioner of Chota Nagpore, and to all Superintending Engineers of Public Works Circles in Bengal, for information.

Ordered also, that a copy of this Resolution, and of the statement, be forwarded to the Revenue and Judicial Departments of this Government for information.

Ordered also, that this Resolution and the statement be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

C. M. BROWNE, *Col.*, R.E.,

Offg. Secretary to the Govt. of Bengal,
P. W. Dept.

NOTE.—The Collector of Burdwan remarks: "The Dowager Moharani and the younger Moharani of Burdwan gave donations of Rs. 200 and Rs. 300 respectively during the year for the defence of undefended prisoners in the Sessions Court. As it does not appear that instances of munificence like this should be shown in the body of the return, they have been noted separately.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 10*th March* 1888.

	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.					
		Western Districts.			
BURDWAN DIVN.	1	Burdwan,	Mar. 10, '88	Nil	Weather—seasonable. *Rubbi* harvest is turning out a very fair one. Ploughings have been extensive and prospects are good. Common rice stands at about 20 seers per rupee on the average.
	2	Bankoora	" 10, '88	Nil	Weather—days hot and nights cool. Pressing of sugarcane continues. Mustard, *arhar* and barley being gathered. Wheat ripe for cutting. Prices stationary.
	3	Beerbhoom	" 10, '88	0·10	Weather—cooler since the rain of 9th. *Rubbi* harvest going on; outturn good.
	4	Midnapur	" 10, '88	......	Weather—warm, but seasonable *Boro* crop progressing well; also *rubbi* in west and south of the district.
	5	Hooghly	" 10, '88	0·20	Weather—normal. State and prospects of crops good.
		Howrah	" 12, '88	0·62	Strong south winds. Reaping of sugarcane continues.
		Ooloobheriah	...	0·16	
		Central Districts.			
PRESIDENCY DIVN.	6	24-Perghs.	Mar. 13, '88	0·95	Weather—hot with heavy showers of rain. Prospects of crops satisfactory. Sugarcane is still being cut. Lands are being tilled for rice crop.
	7	Nuddea	" 10, '88	0·11	Great heat in daytime. Light rain on the 9th. All unharvested winter crops good; general outturn of those harvested good. Ploughing and sowing in good progress.
	8	Khoolna	" 10, '88	1·09	Weather—was getting warm until the 8th, when a thunder-storm cooled the air. Cold-weather crops, as also the mango crop, promise well. Transplanting of *boro* rice going on
	9	Jessore	" 10, '88	Nil	Weather—days warm, nights still cool. Ploughing of rice lands in progress. Rain much wanted. Linseed, barley, *masuri* and *kalai* being gathered.
	10	Moorshedabad	" 10, '88	0·03	Weather—getting warmer. State of *rubbi* crops good. They are being cut and threshed.
		Lalbagh	...	0·06	
RAJSHAHYE DIVN.	11	Dinagepur	Mar. 10, '88	Nil	Weather—seasonable. Prospects of *rubbi* and other crops satisfactory. Lands are being ploughed for *bhadoi* crops. Price of rice stationary.
	12	Rajshahye	" 10, '88	Nil	Weather—seasonable. Prospects of *boro* paddy and spring crops generally good.
	13	Rungpur	" 10, '88	Nil	Weather—hot with west wind until Thursday (8th), when it became cloudy and cool. Tobacco and pulses are being cut. *Aus* rice and jute are being sown. Rain is much wanted.
	14	Bogra	" 10, '88	0·16	Weather—very hot up to the 8th, when clouds and a high wind arose, and slight rain on the 9th. State and prospects of crops satisfactory.
	15	Pubna	" 10, '88	0·06	Slight rain on the 9th. Weather cooler. Prospects of crops good.
	16	Darjeeling	" 10, '88	Nil	Weather—cloudy; rain expected. Rain wanted for spring crops. Prospects otherwise favourable.
	17	Julpigoree	" 10, '88	Nil	Weather—bright and warm in the early part of the week; latterly cloudy. Prospects of *rubbi* crops good. Tobacco is being cut. Pressing of sugarcane in progress.
		Eastern Districts.			
DACCA DIVISION.	18	Dacca,	Mar. 10, '88	Nil	Weather—fine and getting hot. Ploughing for early rice and jute going on. Pulses are being harvested. Prospects continue good
	19	Furreedpur	" 10, '88	......	A slight shower on the 9th. Weather slightly cooler. Harvesting of *rubbi* crops proceeding with good outturn. Lands are being ploughed for jute and early rice.
	20	Backergunge	" 9, '88	Nil	Weather—seasonable. Prospect of crops good.
	21	Mymensingh	" 9, '88	Nil	Weather—sultry. State and prospects of crops good.
CHITTAGONG DIVN.	22	Chittagong	Mar. 13, '88	0·95	Weather—seasonable. Prospects of winter crops good. Prices stationary.
	23	Noakholly	" 9, '88	Nil	Weather—getting warm. *Rubbi* crops are doing well. Land is being prepared for *aus* crop.
	24	Tipperah	" 8, '88	Nil	Weather—gradually getting hot; nights and mornings cool. Harvesting of sugarcane and pulses nearly completed. Prospects of standing crops excellent.
	25	Chittagong Hill Tracts.	" 6, '88	Nil	Weather—dry and hot during the day Thick fog still continues in the mornings. Tobacco and other winter crops doing well. *Jum* cutting progressing.
		Hill Tipperah	" 7, '88	Nil	Weather—unsettled. Cutting of sugarcane and tobacco nearly over. Sowing of *til* oilseeds and transplanting of *boro* paddy still going on. Chillies doing well.

No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR.				
Patna Divn.				
26	Patna	Mar. 10, '88	Nil	Weather—clear and getting hot. Prospects of spring crops and opium continue favourable. Harvesting of *rubbi* crops and gathering of opium going on.
27	Gya	„ 10, '88	Nil	Weather—seasonable. *Rubbi* being harvested and opium extracted.
28	Shahabad	„ 10, '88	Nil	Weather—getting hot. Harvesting of *rubbi* crops in progress. Weather continues favourable for poppy; the drug is being collected and the produce is reported to be very good.
29	Durbhunga	„ 10, '88	Nil	Weather—getting warm. *Rubbi* harvest has commenced Opium is being collected. Mango trees are in blossom. Indigo sowing in progress. Price of common rice averages 21 seers per rupee.
30	Mozufferpur	„ 10, '88	Nil	Weather—warm. Harvesting of *rubbi* crops commenced. Indigo seeds are being sown. Collection of opium is being pushed on; one-half the drug housed; produce adequate; weather favourable.
31	Sarun	„ 10, '88	Nil	Weather—warmer than the preceding week. Harvesting of *rubbi* crops in full progress. Collection of opium is being made. Indigo sowings going on.
32	Chumparun	„ 10, '88	Nil	Weather—fair; days warm; nights cool. East wind blowing. *Rubbi* crops ripening. Peas being collected. Extraction of opium progressing with fair outturn.
Bhagulpore Divn.				
33	Monghyr	Mar. 10, '88	Nil	Weather—seasonable; getting warm. Harvesting of *rubbi* crops has commenced in places. Collection of opium going on. Indigo sowings in progress with the best prospects.
34	Bhaugulpur	„ 10, '88	Nil	Weather—still pleasant. *Rubbi* harvest commencing with outturn below the average. Peas and *rahar* are best crops. Rain wanted for indigo cultivation.
35	Purneah	„ 10, '88	Nil	Weather—seasonable. Tobacco is being cut; a fair crop.
36	Maldah	„ 10, '88	Nil	Weather—seasonable. *Rubbi* crops doing well except in thana Rahia and outpost of Tulsihatta where some damage has been done for want of rain Transplantation of *boro* paddy continues. Common rice selling at an average of 23 seers per rupee.
37	Sonthal Perghs.	„ 10, '88	Nil	Weather—getting warm and rather cloudy. Sugarcane planting and indigo sowing going on.
ORISSA.				
Orissa Divn.				
38	Cuttack	Mar. 9, '88	Nil	Weather—fair. *Dalua* rice is coming into ear. Prospects of *dalua* and mango good. *Dalua* is partially suffering from drought at Banki. Tobacco and wheat being reaped. Price of common rice unchanged.
39	Pooree	„ 8, '88	Nil	Weather—seasonable Land is being ploughed. *Dalua* rice is ripening. *Rubbi* is being gathered. Common rice 24 seers 2 chittacks per rupee in the Sudder sub-division, and 23 seers 8 chittacks in the Khorda sub-division.
40	Balasore	„ 9, '88	0·40	Weather—seasonable. Recent rain very favourable to cultivation. *Dalua* rice promises well.
CHOTA NAGPORE.				
South-West Frontier Agency.				
Chota Nagpore Divn.				
41	Hazaribagh,	Mar. 9, '88	Nil	Weather—seasonable; getting hot. *Rubbi* has yielded about 8 annas. Sugarcane has been a full crop in most places. Collection of opium is approaching completion and the outturn has been good so far. Prices stationary. Cattle-disease in a few villages.
42	Lohardugga	„ 10, '88	0·01	Weather—cloudy and warm. Harvesting of *rubbi* going on Prospects of mango good. Prices steady.
43	Singbhoom	„ 9, '88	Nil	Weather—getting warm; cloudy during the last two days. *Rubbi* being harvested; expected outturn 12 annas. There is a rise in the prices of food-grains.
44	Manbhoom	„ 10, '88	Nil	Weather—hot with clouds hanging about. Prospects of *mohua* and mango are good so far. Spring crops doing well.

Published for general information.

* Means for six days.

Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12 station in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday the 9th of March 1888.

Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. RAINFALL. Of week. Mean for district.	Of week. Normal mean.	Since 1st of February. Mean for district.	Since 1st of February. Normal mean.	Since 1st of February. Variation.	Since 15th May 1887. Mean for district.	Since 15th May 1887. Normal mean.	Since 15th May 1887. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	DISTRICT.	METEOROLOGICAL DIVISION.

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the* 13*th March* 1888.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 9TH MARCH 1888.

AT the beginning of the present week conditions were those which generally accompany the commencement of the hot season in Bengal. Westerly winds prevailed over a large part of the province, temperature and pressure were high, while humidity was low; skies were clear and rainfall was entirely absent. Wind directions gradually became more southerly at the southern stations during the earlier part of the week, bringing up moderate amounts of moisture; but still the general conditions remained unaltered up till the 7th, when a slight but distinct low pressure area was formed over West Bengal. On the 8th the feeble barometric depression was well marked over Bengal, and in the wind directions of Northern India, a general indraught was noticed towards the depression, while on the 9th there was a distinct tendency to a cyclonic circulation of winds over Bengal. The formation of this depression caused weather over South-West, East and North Bengal, and Orissa to become disturbed, and on the 9th, or in some cases on the last two days of the week, local showers became numerous, the showers being heaviest in South-West Bengal. With the exception therefore of the last two days of the week, when the slight disturbance commenced, the weather in Bengal has been of ordinary hot season character, and calls for no particular remark.

Pressure—The variations of pressure during the earlier part of the week were very small; for the first two days a rise of two or three hundredths of an inch took place, which was followed by a slight fall on the 5th of almost equal amount. A feeble increase then took place on the 6th, and in some places on the 7th as well; but on the 8th a rapid fall of the barometer took place attending the development of the depression, which amounted at some stations to about a tenth of an inch. A further fall of about a twentieth of an inch also took place on the 9th, thus slightly intensifying the feeble depression. For the whole week, taking into consideration only those stations which have recorded observations for a series of years, and which therefore yield reliable averages, the mean pressure of the province is only 0 005 inch above the normal.

Temperature—Has on the whole steadily risen throughout the week, and some decidedly high temperatures were recorded towards its close. The average mean temperature of the whole province for the week ending 2nd March was 72 9°, while the average mean temperature for the whole of Bengal for the present week has been 76 1°, there has therefore been an increase in the mean temperature equal to 3 2° during the week; the mean temperature of the province for this period has, however, been 1 2° in excess of the normal, but the excess is to a great extent confined to Chutia Nagpur, North Bengal and Behar, where in the last-named district the excess varies from 2° to 3°.

The actual temperatures recorded, and their variation from the normal, are best seen from the figures given in the table below where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The day or maximum temperatures at these stations show an excess of no less than 2 9°, while the minimum or night temperatures show an excess of only 0 9°.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending the 9th March 1888.

	Normal mean maximum temperature for the week ending 9th March	Actual mean maximum temperature for the week ending 9th March 1888	Variation of actual mean from the normal	Normal mean minimum temperature for the week ending 9th March	Actual mean minimum temperature for the week ending 9th March 1888	Variation of actual mean from the normal	Normal mean daily temperature for the week ending 9th March	Actual mean daily temperature for the week ending 9th March 1888	Variation of actual mean from the normal

Rainfall—Was confined to the last day or two of the week, and then usually accompanied local storms. The average rainfall has, however, been small, and in South-West and East Bengal, where the largest amounts fell, it has only equalled 0 20 inch. In Orissa and North Bengal the falls have only equalled 0 07 inch. Elsewhere rainfall has been practically absent.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 9th of March 1888:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1887.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h. 10h. 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, p passing temporary showers, lr lightening reflection, K thunderstorm, ▲ hail, ≡ fog, ⌓ dew.

JOHN ELIOT,
Offg. Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 12th March 1888.

MEMORANDUM.

DURING the week ending 25th February 1888, births and deaths were registered in the principal Municipalities in Bengal at the rates, respectively, of 21·3 and 23·4 per 1,000 of population, as opposed to very nearly the same proportions, viz. 21 and 23·2 per 1,000, respectively, during the preceding week ending 18th February.

2. The following Municipalities returned the highest proportions of births and deaths :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Comillah	88·5	Comillah	46·2
Utterpara	47 2	Suburbs of Calcutta	42·0
Beauleah	39·4	Serampore	37 3
Serampore	37·3	Naraingunj	37·3
Naraingunj	37·3	Gya	34·8
Durbhanga	34·6	Purneah	34·6
Gya	30·8		

3. In comparison with the results of the preceding week, there was a sensible reduction in the death-rate from bowel-complaints, no variation in fatality from fever, the fatal results from the other diseases exhibiting only fractional increases; *vide* subjoined table :—

	Ratio per *mille* during the weeks ending—	
	25th Feb 1888.	18th Feb. 1888.
Cholera	3·4	2·7
Small-pox	·03	...
Fever	9·1	9·1
Bowel-complaints	2·8	4·3
Injury	·5	·2
Other causes	7·5	6·9

4. Eliminating fever and bowel-complaints, which proved notably fatal, the former only in the Purneah town, viz., at the rate of 34·6 per 1,000 of population, and the latter in the Serampore Municipality, viz. at 11·8 per 1,000, and small-pox and injury, which did not exhibit any local exacerbation in fatality, cholera and the maladies returned under the head of "Other causes" manifested exceptional mortality in the following Municipalities :—

Cholera.	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Suburbs of Calcutta	11·6	Comillah	34·6
Chittagong	9·4	Gya	17·8
Howrah	6·8	Naraingunj	16·6
		Serampore	13·7
		Mozufferpore	12·2
		Suburbs of Calcutta	10·5
		Bhagulpore	10·0

5. The casualties in relation to *Sex, Class* and *Age*, were returned at the rates indicated below :—

According to Sex.

	Ratio per *mille.*
Males	26·3
Females	20·0
Ratio of male deaths to every 100 female deaths	149

According to Class.

	Ratio per *mille.*
Christians	30·4
Hindus	24·5
Mahomedans ...	20·4
Other classes ...	36·4

According to Age.

	Ratio per *mille.*
Under 1 year ...	176·6
1 and under 5 years ...	25·1
5 " 10 " ...	11·5
10 " 15 " ...	11·3
15 " 20 " ...	15·2
20 " 30 " ...	15·9
30 " 40 " ...	17·5
40 " 50 " ...	15·6
50 " 60 " ...	26·2
60 years and upwards ...	64·0

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

General remarks on the fluctuation of principal staples carried over the East Indian Railway during month ended 28th January 1888.

INCREASES.

Coal and coke.—There was an increase in the weight of upward traffic attended with a decrease in the earnings; the downward traffic showed increases both in weight and earnings. The increase in the upward traffic was due to despatches for Foreign Railways, and that in the downward despatches is attributable to the same cause as mentioned in the remarks for December last.

Jute, raw—Due to despatches from the Eastern Bengal State Railway *viâ* the Jubilee Bridge.

Other grains.—*Gram and Pulses*—As in December, the increases in these staples were due to scarcity in the North-West Provinces.

Minerals.—This increase was principally in lime from Raneegunge, Jukehi and Katni.

Rice (husked and unhusked).—There was a decrease in the weight carried attended with an increase in the earnings; the former was due to decreased despatches to Howrah for export, and the latter to long lead traffic carried up-country.

Oil.—Due principally to despatches of kerosine oil from Howrah.

Seeds.—The increase was principally in linseed to Howrah for export.

Spices.—The increase was chiefly in chillies from Mokameh and Mokameh ghât to Howrah.

DECREASES.

Cotton.—Due to the traffic being diverted to Bombay owing to prices being higher there than in Calcutta.

Piece-goods, European.—This decrease was in long distance traffic from Howrah to stations in the North-West and the Punjab owing to the scarcity prevailing in those provinces.

Indigo.—Due to the dye having been carried earlier this season than last.

Turmeric.—This is a recurrence of the decrease shown in December last, and was entirely in the despatches from Howrah owing to a poor demand.

Gunny.—Due to a lull in the market after the heavy despatches in December last.

Other fibres, raw.—This was principally in hemp, for which the Calcutta market this year has been unfavourable.

Wheat.—Due to want of stocks.

Brass and copper. The decrease under this head is attributed to a rise in the price.

Opium.—Due to Government arrangements for despatch.

Railway material, Foreign.—Due to a decrease in the long distance despatches from Howrah.

Sugar, refined and unrefined.—The long distance traffic from stations in the Dinapore district was poor.

Salt.—The decrease was nominal.

Tobacco.—Due to ordinary fluctuation of trade; the decrease was principally in despatches from Patna ghât and the Tirhoot State Railway.

ALLEN MEARS, *Deputy Traffic Manager.*

TRAFFIC MANAGER'S OFFICE, JAMALPUR, *the 9th March* 1888.

Excludes local traffic of the Dacca Northern Bengal, and Kaunea and Dharlla Railways during 1886.

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of December 1887.

INCREASES.

	Tons.
Coal ...	7,205
From the East Indian Railway for railway and flotilla purposes and for the public.	
Grain ...	10,958
Good crops and a favourable market.	
Jute ...	8,155
Goalundo contributed about half the above quantity and Serajganj and the Northern section the remainder.	
Tobacco ...	538
Increases in despatches from Rungpur, Kaunia and Domar principally.	

DECREASES.

Metals ...	369
This decrease can only be attributed to ordinary trade fluctuations.	
Salt ...	1,425
Decrease in despatches of hide salt to Dacca and other hide-exporting-stations.	
Firewood ...	549
Falling off in despatches from the Southern section, Champahati and Bansra principally.	

CALCUTTA, *the 12th March* 1888.

CONTENTS.

EXTENSION OF THE REVENUE MONEY ORDER SYSTEM.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 20th March 1888.

RESOLUTION.

READ—

A memorial from Zemindars of the Chittagong district, received 28th March 1884, praying to be permitted to remit the Government revenue, cesses, &c., by postal money-orders.

A letter dated 1st August 1886, from the Tirhoot Landholders' Association, and a petition dated 6th March 1887, from a Zemindar of Sheiepore in Tirhoot, praying as above.

A petition from Messrs. Bird and Company, dated the 15th December 1884, suggesting that a postal money-order may be treated as equivalent for money or Government securities under section 15 of Act XI of 1859.

A letter No. 62, dated 23rd December 1887, from the Honorary Secretary to the East Bengal Landholders' Association, urging that the present maximum limit for revenue money-orders be raised to Rs. 100.

THE Government of Bengal has from time to time received memorials from zemindars representing the inconvenience which they experience in having to

pay their land revenue at district head-quarters, often situated at a great distance from their residences, and requesting permission to transmit such dues by postal money-orders. The Board of Revenue and Collectors, when first consulted as to the proposed arrangement, represented that the difficulties would be very considerable; but afterwards, on considering a complete scheme framed by the Postmaster-General, Bengal, for giving effect to the wishes of those concerned, they viewed the suggestion with greater favour. In October, 1886, the system of payment by postal money-orders was accordingly introduced experimentally in the Dacca and Burdwan Divisions for land revenue demands of less than fifty rupees a year, and, having proved successful within these local limits, it was extended in 1887 to all the districts of Lower Bengal. It is understood that the concession thus made has been generally appreciated, and the Lieutenant-Governor has now much pleasure in providing, at the suggestion of the Board of Revenue and the Postmaster-General, that from the first day of April it shall extend to all demands on account of land revenue, of whatever amount, and also to Zemindary Dâk, Road, and Public Works cesses. The rules upon the subject given below are published for general information.

2. Other public demands may be paid at the option of the payer by ordinary postal money-orders, provided that the particulars given in the accompanying letters are sufficient for the department concerned.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

RULES RELATING TO REVENUE MONEY ORDERS.

These rules are divided into five parts:—

PART I.—Form of Revenue Money Order.
PART II.—Issue of Revenue Money Orders.
PART III.—Payment of Revenue Money Orders.
Section A.—Payment from Disbursing Offices at the Head quarters of districts.
Section B.—Procedure to be followed in the Collectorate.
PART IV.—Treatment of Revenue Money Orders not accepted by the Collector.
PART V.—Disposal of Acknowledgements.

PART I.

THE FORM OF REVENUE MONEY ORDERS.

1. The Revenue Money Order form is divided into four parts, viz.—
(*a*) the Money Order,
(*b*) lower portion of Money Order or the Receipt,
(*c*) the Coupon or Challan,
(*d*) the Acknowledgment.

2. Parts (*a*) and (*b*) require no description as they are exactly like the corresponding portions of the ordinary inland Money Order form. Parts (*c*) and (*d*) are considerably larger than the Coupon and Acknowledgement of an ordinary Money Order. Part (*c*) contains on one side all the particulars required by the Treasury and on the reverse instructions for remitters of Revenue Money Orders. Part (*d*) is on one side a duplicate of the Challan and is returned to the remitter as his receipt; on the reverse of this part are the remitter's name and address.

3. This form is to be used for remittances of land revenue, Road and Public Works Cess and zemindari dâk cess, and for no other purpose.

4. The forms of Revenue Money Order should be freely distributed among the revenue-paying classes, and no restrictions whatever should be placed in the way of zemindars obtaining these forms.

5. Every Postmaster, Sub-Postmaster and Branch Postmaster will be personally responsible that a sufficient supply of Revenue Money Orders is always available in his office. In cases of emergency, supplies may be obtained by telegraph direct from the Stock Depôt of the Circle. Divisional Superintendents and Inspectors, when visiting Offices, will see that a sufficient supply of Revenue Money Order forms is available, and mention in their diaries and inspection reports that they have done so.

PART II.

Issue of Revenue Money Orders.

6. Revenue Money Orders are issued from every Head, Sub and Branch Post Office under the rules which govern the issue of ordinary Indian Money Orders. The following paragraphs contain additional instructions which relate solely to the issue of Revenue Money Orders.

7. The Rules in the Postal Guide fixing the limit of value of a single ordinary Inland Money Order and the limit of the aggregate value of the money orders issued in one day by the same remitter to the same payee apply to Revenue Money Orders. The rule prohibiting the inclusion of pies (fractions of an anna) in the amount of a Money Order is not applicable to Revenue Money Orders, which may be for amounts including any fraction of an anna not less than one pie.

8. The Office of Issue will help the remitter in making the requisite entries, and, if necessary, will make entries for him in the form of a Revenue Money Order, but no fee or any other gratification whatsoever is to be demanded or accepted, either directly or indirectly, by any official of the Postal Department for this service. Disregard of this order will be punished by dismissal of the official in fault, who will, moreover, be liable to any further penalties provided by law.

9. The Office of Issue is responsible that no Revenue Money Order is issued of which the Coupon (Challan) is blank or is not completely filled up. The Post Office has no means of ascertaining the correctness of the information supplied by a remitter: all that it is necessary to see is that entries are made against every printed item in the Coupon (Challan), and that the Money Order is not for a larger sum than is allowed by the rules for ordinary Inland Money Orders. The spaces in the Acknowledgment and challan for the entry of interest and expences (khuracha) are intended to meet the requirements of remitters, who are in arrears as regards the payment of their cesses and have incurred liabilities for interests, process fees, or other costs of proceedings.

10. The letter "R" should be written before the number of every Revenue Money Order, and this mode of distinguishing Revenue Money Orders should be adopted wherever the number is entered.

11. The number assigned to a Revenue Money Order by the Head Office or Sub-office of Issue will also be entered at the top of the Coupon (Challan) acknowledgement by the Money Order Clerk of the Head Office or the Sub-Postmaster of the Sub-office of Issue as the case may be.

12. On the 5th of every month Head and Sub-offices will prepare a return (Form $\frac{4}{R.M.O.}$) of all Revenue Money Orders issued during the last month, and forward the same to the Disbursing Postmaster who will compile a General District Return and submit it to the Head of the circle not later than the 15th of the month following that to which it relates. Branch Offices will not submit returns, as Revenue Money Orders issued from such offices will be included in the returns of the Account Offices to which they are attached. The district return submitted by the Disbursing Postmaster will be in Form $\frac{5}{R.M.O.}$

PART III.

Payment of Revenue Money Orders.

Section A.—*Procedure in the Disbursing Office.*

13. When the Revenue Money Orders are in all respects ready to be handed over to the Postman, a list in duplicate (Form $\frac{2}{R.M.O.}$) should be made out by the Money Order Clerk, and the entries in the money column of the list should be carefully totalled. The date of stamp of the office of payment should be impressed in the space provided for it on the Coupon (Challan) of each Money Order.

14. The Money Orders, both copies of the list, and a slip receipt (Form $\frac{1}{R.M.O.}$) duly filled up, should then be made over to the Postman for delivery at the Collectorate, the Postman's receipt for the documents being taken in the usual manner in the Register of Money Orders received.

15. The Postman will deliver all the documents mentioned in paragraph 14 to the treasury officer (or other responsible official authorized by the Collector, in writing, to receive Revenue Money Orders and whose name has been communicated by the Collector to the Postmaster) and will take back to the Post Office the slip receipt duly signed by the officer receiving the Money Orders. The slip receipt will be kept by the Money Order Clerk under lock and key.

16. When the original list, duly signed by the treasury officer or other authorized officer, is received back, along with the refused Money Orders (if any), the Postmaster will give in exchange for the list a treasury voucher (Form AC—17) representing the value of the Money Orders accepted, as shown in the certificate at the foot of the list. The Money Order Clerk will report to the Postmaster if the original list (with any refused Money Orders) is not received back at latest on the day following that on which it was sent to the Collectorate.

17. The Postmaster should on no account give a treasury voucher, in payment of Revenue Money Orders, without receiving the original list with the certificate of acceptance written at the foot thereof.

18. The Postmaster will be responsible always to have sufficient funds at his credit in the district treasury to meet Revenue Money Order demands, and it will be his duty, when giving a treasury voucher, to see that there are funds in the district treasury to meet it.

19. The original list and the slip receipt will be filed together by the Money Order Clerk. The refused Money Orders (if any) will be dealt with in accordance with the instructions laid down in Part IV of these rules.

20. On receipt of the Money Orders, together with the receipts and acknowledgments duly signed, the Money Order Clerk will examine and compare all the documents with the original list already in his possession, and with the duplicate presented to him along with these documents, and, if all are found correct, will sign the duplicate list and return it to the Collectorate official who brought back the documents to the Post Office.

21. The Money Order Clerk should be particularly careful to see that he receives from the Collectorate an acknowlegment for every Money Order accepted, and that every acknowledgment which he receives is in acknowledgment of the *full* amount of the Money Order to which it appertains.

22. The Money Orders received back from the Collectorate, with their receipts, will be entered in the Journal of Money Orders paid, and be disposed of in the usual manner. The acknowledgments will be returned to the remitters in the manner described in Part V of these rules.

23. The amount of the treasury voucher will be entered in the Post Office and Treasurer's cash day books and the cash account on the receipt side opposite the item "Drawn from District Treasury," and will be included in the sum entered on the disbursement side under the head "Amount of Money Orders paid." All these entries must be made on the same date. The amount will also appear in the Treasury account as money drawn from the District Treasury, and if the date of entry in the Treasury account differs from that of the entries mentioned above, the difference must be explained in the Treasury suspense account.

24. Before the duplicate list is finally returned to the Collectorate, the Money Order Clerk will carefully compare it with the original, and see that they are exactly alike, any remark recorded in the one list (either in the Collectorate, or by the Money Order Clerk, or the Postmaster) being copied in the other list.

25. It will be the duty of the Money Order Clerk to report to the Postmaster if the receipted Money Orders, with the acknowledgments and the duplicate list, are not returned to him on the day on which the Treasury voucher was sent to the Collectorate.

26. The Money Order Clerk will report to the Postmaster every case in which the Coupon (Challan) of a Revenue Money Order received by him is blank or is imperfectly filled up. Whenever a Revenue Money Order is refused through any fault or omission on the part of the office of issue, the matter should be reported by the Postmaster to the Superintendent.

27. On the 5th of every month the Money Order clerk will prepare a return (Form $\frac{6}{\text{R. M. O.}}$) of all Revenue Money Orders received during the last month, and this return will be submitted by the Postmaster to the head of the circle along with the District Return of Revenue Money Orders issued.

SECTION B.—*Procedure to be followed in the Collectorate.*

28. On receipt of the Money Orders, with other documents, in the Collectorate, the treasury officer, or other responsible official authorised as above (see rule 15) to receive Revenue Money Orders, will carefully compare the entries in the list with the Money Orders, and, when satisfied of their correctness, will sign the slip receipt and hand it over to the postman who has brought the documents to the Collectorate, retaining the other papers for subsequent disposal.

29. The next business to be done in the Collectorate will be the careful examination of the Money Orders to see that the necessary particulars of remittance are given in each case and that the Money Orders can be accepted. This examination should be made by the Towji Navises of the Land Revenue and Cess offices and by the Certificate Department if a certificate has issued on account of Road and Public Works Cess. If the amounts due on account of any cess, interest and expenses are wrongly distributed by the remitter in the Money Order, the Cess Department will correct the distribution. It is not necessary at this stage that the Money Orders should be sent to or examined by the Magistrate's office even when they contain remittances of zemindari dâk cess. No Money Order should be refused provided that the remittance is one to which the system applies, and that the particulars required by the rules and form are given. The fact that the amount is remitted is less or more than is due is not a ground for refusal. If more than is due is remitted, the excess should be credited as a payment in advance; if less than is due is remitted, it should be treated as a payment on account. When a Money Order is refused, the ground of refusal must be endorsed on the Money Order.

30. The original list, together with the refused Money Orders (if any), must be returned to the Post Office, and a treasury voucher be obtained immediately on the certificate of acceptance being signed. The officer signing the certificate will be responsible that the check prescribed in paragraph 29 has been carried out, and that the original list, with the certificate duly endorsed, is returned to the Post Office on the day of receipt, or at latest on the following day.

31. On receipt of the treasury voucher from the Post Office, the treasury officer will to the same day credit the amount thereof under the appropriate heads of account as remittances received by means of Money Orders from the persons concerned, and will charge the amount against the monthly letter of credit of the Postal Department as money paid to the Disbursing Postmaster.

32. After the amount of the treasury voucher has been credited and debited in the Treasury accounts, the acknowledgments will be signed by the Accountant.

33. The Money Orders will then be signed by the Treasury officer or other officer authorised as above to receive them, and that officer, after detaching the Coupons (Challans) from the Money Orders, will return the original orders, with the receipts, acknowledgments, and the duplicate list, to the Post Office and retain the Challans in the Collectorate. The Challans should then be sent to the Land Revenue, Road Cess and Zemindary Dâk offices in the order named so that the remittances may be entered in the departmental registers. The Challans should be initialled by a responsible officer of each department and then be returned to the Collectorate.

34. The original Money Orders, with their receipts and acknowledgments, must be returned by the Collectorate on the day on which the Treasury voucher is received. This period is on no account to be exceeded.

35. When the duplicate list, with the Postmaster's acknowledgment for the documents returned to him written thereon, is received back from the Post Office, it should be attached to the challans and filed in the Collectorate.

PART IV.

Treatment of Revenue Money Orders not accepted by the Collectorate.

36. If the Collector or the officer to whom he delegates authority in this matter declines to accept a Money Order, because of the omission of necessary particulars in the Coupon (Challan) or other cause, the Money Order will be treated as refused and be disposed of in the usual manner.

PART V.

Disposal of Acknowledgments.

37. The acknowledgments appertaining to Revenue Money Orders received from the Collectorate will be sorted separately for each Office of Issue and enclosed in envelopes (Form $\frac{9}{\text{R. M. O.}}$) addressed to the Postmasters of those offices; the numbers of the Money Oders to which the acknowledgments appertain being detailed on the back of the envelopes.

38. These envelopes will be entered in detail in a special memorandum book (Form $\frac{7}{\text{R. M. O.}}$) and be despatched as letters registered on Postal Service. The total number of acknowledgments closed in each envelope will be the registered number assigned to that envelope.

39. On arrival in the Office of Issue, the envelopes will be opened and the acknowledgments contained in each envelope compared with the entries on the back thereof. The acknowledgments will then be stamped with the Money Order Stamp and be sorted for distribution to Postmen. The numbers of all acknowledgments to be given to each Postman will be detailed separately in a special memorandum book (Form $\frac{8}{\text{R. M. O.}}$) and the Postman's signature obtained against the entry. The acknowledgments will then be handed over to the Postmen. The envelopes will be retained for 12 months, sorted in daily and monthly bundles, and will be destroyed after the expiration of that period.

40. The Postmen will enter the acknowledgments in detail in their books and will obtain the remitter's signature or mark when delivering each acknowledgment.

41. Acknowledgments which cannot be delivered in consequence of the remitter not being found will be returned by the Postman to the Money Order Clerk, Sub-Postmaster or Branch Postmaster (as the case may be), who will sign for them in the Postman's Book.

42. Undelivered acknowledgments will be kept in the Office of Issue (if a Head Office) for a period of 12 months, and, if still unclaimed, will be destroyed.

43. In Sub-offices and Branch Offices undelivered acknowledgments will be retained for a period of three months, and, if still unclaimed, will be forwarded to the Head Office under a Postal Service Registered cover. Such acknowledgments will be kept in the Head Office for a further period of nine months, and, if then still on hand, will be destroyed.

44. Postmasters, Sub-Postmasters, and Branch Postmasters of the Offices of issue will be responsible that acknowledgments are delivered to remitters of Revenue Money Orders without any unnecessary delay and *free of charge*. Enquiries as to the punctual and free delivery of acknowledgments should be made from time to time from zemindars who may call at the Post Office to have Revenue Money Orders issued.

List of Forms appertaining to Revenue Money Orders.

No. of each Form.	Name of each Form.	Remarks.
1 / R. M. O.	Revenue Money Order ...	Loose form.
2 / R. M. O.	List	Loose form—Is supplied to all Post Offices at the Head-quarters of Districts.
3 / R. M. O.	Slip Receipt	Ditto ditto ditto.
4 / R. M. O.	Monthly Return of Revenue Money Orders issued.	Loose form—To be used by every Head and Sub-Office.
5 / R. M. O.	District Monthly Return of Revenue Money Orders issued.	Loose form—To be used by Post Offices at the Head-quarters of Districts.
6 / R. M. O.	Monthly Return of Revenue Money Orders received.	Ditto ditto ditto.
7 / R. M. O.	Special Memorandum book of acknowledgments received from the Treasury.	Bound in books of 100 pages—To be used by Post Offices at Head-quarters of Districts.
8 / R. M. O.	Special Memorandum book of acknowledgments delivered.	Bound in books of 50 pages—To be used by every Head, Sub and Branch Office.
9 / R. M. O.	Acknowledgment Envelope.	To be printed in black ink on red paper—To be used by Post Offices at Head-quarters of Districts.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 17th March 1888.

Division	No.	District and date of return	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
		Western Districts.		
BURDWAN DIVN.	1	Burdwan Mar. 17, '88	Nil	Weather—seasonable. Prospects of crops good. There has been a general fall in the price of rice. Common rice is now at about 24 seers per rupee.
		Culna ...	1·13	
		Cutwa ...	0·75	
		Raneegunge ...	0·11	
	2	Bankoora „ 17, '88	Nil	Weather—seasonable; occasionally cloudy. Wheat, mustard and *matar* are being gathered. Pressing of sugarcane still continues. Cotton, *boro dhan* and indigo are thriving. Prices stationary.
	3	Beerbhoom „ 17, '88	1·15	Weather—cool. *Rubbi* crop 13 annas.
	4	Midnapur „ 17, '88	.... ..	Slight rain in some parts of the district. *Rubbi* fair and *boro* likely to be a good crop
	5	Hooghly „ 17, '88	Nil	Weather—normal. Prospects of crops favourable so far.
		Serampur ...	0·55	
		Jehanabad ...	0·37	
		Howrah „ 19, '88	0·57	Weather—seasonable. Sugarcane and *rubbi* crops are being cut. *Boro* crop is promising.
		Ooloobcria ...	0·55	
		Central Districts.		
PRESIDENCY DIVN.	6	24-Perghs. Mar. 20, '88	1·70	Weather—hot; storms with hail and rain; winds variable. The crops that are on the ground are doing well. Ploughing is in progress.
	7	Nuddea „ 17, '88	0·61	Weather—fair. Harvesting of cold-weather crops nearly completed. Prospects of indigo in Sudder good.
		Kooshtea ...	3·73	
		Meherpur ...	2·78	
		Chooadanga ...	1·84	
	8	Khoolna „ 17, '88	2·05	Several thunder-showers successively have cooled the air and moistened the ground. Prospects of *boro* rice and cold-weather crops good. Mango crop has suffered from wind and rain.
	9	Jessore „ 17, '88	1·9	Weather—rainy and stormy for a part of the week. There was a hail-storm in the Magura and Narail sub-divisions. In the Mohamedpore station the storm has done slight damage to houses and trees. The rainfall of the week was considerable. It will be of great avail to the sowing of paddy, indigo and *til* The prospects of *boro* have also been bettered by it.
		Jhenidah ...	3·01	
		Magoorah ...	2·76	
		Narail ...	2·06	
		Bongong ...	0·82	
	10	Moorshedabad „ 17, '88	1·17	Weather—getting warmer. Harvesting of *rubbi* crops has commenced.
		Kandi ...	0·25	
		Jungipur ...	0·1	
		Lalbagh ...	0·29	
RAJSHAHYE DIVN.	11	Dinagepur Mar. 17, '88	0·66	Weather—cloudy and cool in the early part of the week; latterly seasonable. Rain has done considerable good to the cultivation of *bhadoi*. Prospects of *rubbi* and other crops continue good. Price of rice stationary.
		Thakurgaon ...	0·14	
	12	Rajshahye „ 17, '88	0·96	Weather—seasonable. Rain has done considerable good to standing crops and has facilitated preparation of lands for early sowings.
		Nattoro ...	1·40	
	13	Rungpur „ 17, '88	3·08	Weather—cool with storms and showers. Rain is very favourable for the sowings of *aus* and jute which are now in progress.
		Kurigram ...	3·02	
	14	Bogra „ 17, '88	Nil	Mornings misty. Days cloudy and windy. Ploughing for *aus* and jute going on. Prospects continue favourable.
		Sherpur ...	0·51	
		Nowkhila ...	0·33	
	15	Pubna „ 17, '88	2·06	Rain on three days. Storm and 1·65 inches of rain at Sudder on 13th. Weather seasonable. Prospects of crops good.
		Serajgunge ...	1·40	
	16	Darjeeling „ 17, '88	0·91	Weather—stormy until the last two days: now fine, but not yet settled. Land is being ploughed for early rice in the Terai. Prospects of crops everywhere favourable. Price of Indian-corn has increased considerably in the hills, owing to large demands made by the Commissariat Department for the Sikkim Field Force.
		Silliguri ...	2·85	
	17	Julpigoree „ 17, '88	3·35	Heavy showers on the 11th and 13th. Weather cloudy. Ploughing of rice lands in progress. Prospects continue good.
		Eastern Districts.		
DACCA DIVISION.	18	Dacca. Mar. 17, '88	5·32	Weather—cloudy and stormy throughout the week. Pulses and mustard are being gathered Ploughing of land for jute and early rice going on, but temporarily stopped in places by excessive rain. Some damage done to the standing crops; but on the whole prospects good.
		Manickgunge ...	2·06	
		Munshigunge ...	4·76	
		Narsingunge ...	6·09	
	19	Furreedpur „ 17, '88	5·80	Stormy weather with heavy rain on the 11th, 12th, 13th and 14th. Temperature cooler The rain has facilitated ploughing for jute and rice, but the cold weather crops now being harvested have suffered.
		Goalundo ...	3·92	
		Madaripur ...	1·56	
	20	Backergunge „ 16, '88	1·16	Weather—seasonable. Prospect of crops good.
	21	Mymensingh „ 16, '88	1·99	Weather—cool. Rain all over the district Prospects of crops good. Ploughing has commenced. The recent rain has done much good.
		Jamalpur ...	0·37	
		Kishoregunge ...	1 53	
		Attia ...	0·55	
		Netrokona ...	4·09	
CHITTAGONG DIVN.	22	Chittagong Mar. 20, '88	0·60	Weather—seasonable. Winter crops nearly harvested. Prices steady
	23	Noakholly „ 16, '88	2·56	Weather—cloudy and rainy. Some of the *rubbi* crops are being harvested; outturn good.
		Fenny ..	3·71	
	24	Tipperah „ 15, '88	2·67	Weather—rather wet. Rain has enabled preparation of lands. Standing crops give promise of good outturn.
		Chandpur ...	4·50	
	25	Chittagong Hill Tracts. „ 13, '88	1·66	Weather—variable; alternating between rain, cloud and storm. Rain has retarded *jum* cutting to some extent. Tobacco and other crops on the ground doing well.
		Hill Tipperah „ 15, '88	3·80	Weather—stormy. Prospects of *boro* paddy and chillies fair.

No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR.				
PATNA DIVN.				
26	Patna	Mar. 17, '88	Nil	Weather—seasonable. Harvesting of *rubbi* crops proceeding. Gathering of opium going on. Prices of food-grains almost stationary.
27	Gya	„ 17, '88	0·08	Weather—seasonable. *Rubbi* being harvested. Opium extraction nearly finished in some places. Sugarcane being planted.
28	Shahabad	„ 17, '88	Nil	Weather—getting hot gradually; west wind prevails. Harvesting of *rubbi* crops is almost over. Opium collection is in progress with excellent outturn.
29	Durbhunga	„ 17, '88	1·05	Weather—getting warm. Harvesting of *rubbi* in progress. Rain has done good to *moong* and paddy sowings. It has done some injury to mango blossoms and to indigo lately sown. Collection of opium nearly over. Price of common rice averages 21 seers per rupee.
30	Mozufferpur	„ 17, '88	0·23	Weather—overcast and cloudy in the beginning of the week; a storm with slight rain on 12th, since which it has been clear and cool. Harvesting of *rubbi* crops progressing. Gathering of opium almost over.
	Hajipur	...	0·3	
	Sitamarhi	...	0·40	
31	Sarun	„ 17, '88	0·28	Weather—seasonable. *Rubbi* being harvested; outturn favourable. Collection of opium in full progress; weighment will shortly commence. Indigo sowings going on.
32	Chumparun	„ 17, '88	Nil	Weather—warm; mornings cool. Harvesting of *rubbi* commenced. Extraction of opium in full operation. Indigo sowings begun. Prospects of all standing crops good.
BHAGULPORE DIVN.				
33	Monghyr	Mar. 17, '88	Nil	Weather—seasonable; westerly wind prevailing. *Rubbi* harvest going on. Collection of opium nearly finished. Mango trees are abundantly in blossom.
34	Bhagulpur	„ 17, '88	Nil	Too much east wind to be seasonable. Rain in the north will help preparation of lands, but that and the east wind have damaged mango blossoms. *Rubbi* harvest in progress; outturn poor.
	Madehpura	...	1·24	
	Sopool	...	0·83	
35	Purneah	„ 17, '88	0·65	Weather—clear and cooler. Tobacco harvested. Wheat doing well.
	Kishengunge	...	0·65	
	Arrareah	...	1·50	
36	Maldah	„ 17, '88	0·01	Weather—cloudy and foggy in the beginning of the week; but latterly warm with strong west wind. Reaping of *rubbi* crops has begun with good outturn, except in thana Ratua and outpost Tulsihatta, where some damage was done for want of rain. Slight showers of the week have done no material good to standing crops, but have caused much damage to mango blossoms. Transplantation of *boro* paddy still going on. Sowing of *bhadoi* paddy has begun. Common rice selling at an average of 23 seers per rupee.
	Chanchal	...	0·56	
	Shibgunge	...	0·3	
	Gazol	...	0·30	
37	Sonthal Perghs.	„ 17, '88	Nil	Weather—stormy with rain; west winds setting in. *Mohua* and mango crops look good, but slightly damaged by storms.
	Deoghur	...	0·58	
	Pakour	...	0·16	
ORISSA.				
ORISSA DIVN.				
38	Cuttack	Mar. 16, '88	Nil	Weather—fair. Threshing of *sarad* rice going on in some places and completed in others. *Dalua* rice is flowering and partly ripening. Wheat is being gathered. Price of rice stationary. Cattle-disease has appeared in some places in the interior.
39	Pooree	„ 15, '88	Nil	Weather—seasonable. Land is being ploughed. *Dalua* crop is being harvested. *Rubbi* is being gathered. Mango crop suffering for want of rain. Common rice 23 seers 15 chittacks per rupee in the Sudder sub-division and 24 seers in the Khoorda sub-division
40	Balasore	„ 16, '88	Nil	Weather—getting warmer with strong south wind. Few crops on the ground; such as there are promise well. *Dalua* rice in ear.
CHOTA NAGPORE.				
South-West Frontier Agency.				
CHOTA NAGPORE DIVN.				
41	Hazaribagh,	Mar. 16, '88	Nil	Weather—seasonable; rather cooler than last week. Sugarcane is being planted. Prospects of mango and *mohua* good so far. Poppy is still being collected; yield good. Condition of agricultural stock good.
42	Lohardugga	„ 17, '88	Nil	Weather—getting hot. *Rubbi* being harvested. Prices steady. Cattle-disease reported.
43	Singbhoom	„ 16, '88	Nil	Slight rain during the week; weather getting very warm. *Rubbi* being harvested. Cotton doing well. Sugarcane being planted. Prices slightly higher than at this time last year.
44	Manbhoom	„ 17, '83	Nil	Weather—getting rapidly hotter with clouds and high wind. Prospects of spring crops good. *Mohua* is doing well, though it has been damaged slightly by wind in Govindpur.
	Govindpur	...	0·35

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF FEBRUARY 1888.

THE normal meteorological conditions obtaining in the Province of Bengal during the month of February show clearly the commencement of the transition from the cold to the hot season, and the most important feature is undoubtedly the rapid increase of temperature, which usually commences this month, and which is continued during the following two or three months. The rapid increase in temperature is due to the rapidly increasing elevation of the sun, and this heating effect is much more pronounced over the land area than over the sea, so that the dry northerly winds at the southern stations commence to be replaced by moist southerly winds blowing from the sea. The normal conditions in Bengal during February are therefore comparatively simple. Temperature increases steadily, and winds are light, being usually west and north-west at the inland stations, though at the southern stations they alternate between north-west and south-west. The sky is clear and little or no rain falls; and humidity, except when the sea breezes are blowing, is low. These conditions are, however, liable to be disturbed by two or three causes; the first is due to the formation of barometric depressions over Northern and Central India, which drift eastwards and southwards giving heavily clouded skies, a moist atmosphere, and rain. The second class of disturbances is due to the interaction of the dry land winds and moist southerly winds, which sometimes produces the local storms known as nor'westers, and which are frequently accompanied by heavy rain. The third class of feeble disturbances are probably produced by ascensional air motion, and, with the rising of the moist winds, cloud is formed, and in some cases rain also occurs.

The whole of the rainfall in February is therefore brought about by these abnormal conditions, and it is generally irregularly distributed and small in amount, though larger than in January. The normal fall averages about an inch in South-West and East Bengal; it is somewhat smaller in amount in Orissa, where it averages about five-sixths of an inch; in Chutia Nagpur the fall averages about three quarters of an inch, and in North Bengal and Behar the fall equals about half an inch.

Meteorology of the month.—The chief features in the meteorology of February 1888 in Bengal have been—

1. Pressure has been in very slight excess of the normal over the greater part of the Province, the average excess, however, only equalling 0·009 inch. Some parts of East and Central Bengal have, however, shown pressures slightly below the normal.

2. Temperature has been decidedly above the normal in all districts, the excess being rather considerable in Orissa, North Bengal and South Behar, where it has ranged from 1° to 2°. The average excess over the whole Province has been 0·9°.

3. Humidity has been generally below the normal, the defect averaging about 5 per cent. over the whole Province.

4. Cloud proportion has been distinctly larger than usual, though the excess is not very considerable.

5. During the middle of the month two very feeble low-pressure areas drifted across Bengal in an easterly direction, giving a period of unsettled weather, which lasted in some districts from the 9th to the 15th or 17th, but which gave the most general disturbance on the 9th and 10th of the month.

6. Comparatively heavy rainfall has been received in Orissa; falls equal to about the normal amount have been received in East, South-West and North Bengal and in Chutia Nagpur, but in Behar rainfall has been almost absent.

At the commencement and during the first week of February, the meteorological conditions in Bengal call for no particular comment, except that the weather was of typical north-east monsoon character, temperature being exceedingly low and decidedly below the normal. On the 8th instant, however, pressure became rather low over parts of the Central Provinces and Orissa, and on the 9th a distinct low pressure area existed over Orissa, and this depression on the 10th was distinctly marked over Central and East Bengal, but it shortly afterwards disappeared. A second feeble area of low pressure was also formed over the Central Provinces, the North-West Provinces, and the western parts of the Province of Bengal on the 14th, but this did not concentrate into a definite depression. The combined effect of these two disturbances was to give unsettled weather with rain over Orissa from about the 9th to the 15th, over South-West Bengal from about the 9th to the 18th, and to East Bengal from the 10th to the 17th. The disturbed conditions scarcely reached North Behar at all, and in South Behar the disturbance was mainly confined to the Sonthal Pergunnahs district on the 9th and 10th, while in North Bengal and Chutia Nagpur weather was also slightly disturbed on the same two days. After the disappearance of these two disturbances, weather became of ordinary north-east monsoon character for the remainder of the month, and the only point noticeable was the steady rise of temperature and some remarkable oscillations of humidity, the cause of which is explained in the summary of the normal meteorology of the month.

Pressure.—The variations of pressure during the month have been rather considerable, but the mean pressure for this period has not been very far removed from the normal; and thus, taking into consideration only those stations from which observations have been received for a series of years, and which therefore yield reliable averages, the mean pressure of the province for February has only been 0·009 inch in excess of the normal. Almost all

the stations in Bengal show an excess pressure, but in East Bengal one or two show slight defects. In Assam pressure has been below the normal by 0·005 inch, the largest defect being at Dhubri, where it has equalled 0·016 inch.

Temperature.—The variations of temperature during the month have been large, and during the early part very low temperatures were recorded. For the whole month the mean temperature of the province has been 0·9° in excess of the normal.

The actual variations and oscillations of temperature for the month are best shown in the following table, where the average maximum, minimum, and mean temperatures at nine typical stations in the province are given, week by week, and compared with the normals for the same periods. Speaking broadly, it may be said that temperature was very largely (from 4° to 6°) below the normal at the commencement of the month, while for the remainder it has been rather above it, or almost normal.

Monthly variation table of temperature from the weekly comparison table during February 1888.

	WEEK ENDING 3RD FEBRUARY 1888			WEEK ENDING 10TH FEBRUARY 1888			WEEK ENDING 17TH FEBRUARY 1888			WEEK ENDING 24TH FEBRUARY 1888

In Assam the mean temperature has been almost absolutely normal, the variation being an excess of only 0·2°.

Rainfall.—Has averaged 1·66 inches at the stations in Orissa, which is nearly twice as large as the normal amount; the fall in South-West Bengal has averaged 1·29 inches or about a quarter more than the normal; in Orissa the fall has averaged 1·10 inch or about the normal fall; and the same is the case in Chutia Nagpur, where the actual fall has averaged 0·73 inch. In North Bengal the fall has only equalled 0·42 inch, which is about four-fifths of the normal amount, while rainfall has been practically absent in Behar.

The rainfall in Bengal during February has been decidedly heavy in the following districts:—Cuttack, Balasore, South-West Midnapore and South 24-Pergunnahs, Midnapore, 24-Pergunnahs, Howrah, Hooghly, Chittagong, Dacca, Pubna, Rajshahye, and Singbhoom.

In Assam, Sibsagar has received 2·95 inches during the month, Silchar 1·17 inches, and Dhubri only 2·06 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven Meteorological Divisions of the province for the month of February 1888:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE						RAINFALL							
			Averages for month				Of month			Rainy days			Since May	
	Highest observed during month	Lowest observed during month	Of highest of each day	Of lowest of each day	Of mean for each day	Average mean of month above or below normal mean of month	Average	Normal average	Variation	Average number in month	Normal average number in month	Variation	Average	Normal average

* Mean for six days. † Mean for 5 days.

Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten
The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number
are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12
station in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

or the week ending Friday, the 16th of March 1888.

Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. RAINFALL. Of week. Mean for district.	Of week. Normal mean.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1887. Mean for district.	Since 15th May 1887. Normal mean.	Since 15th May 1887. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	DISTRICT.	METEOROLOGICAL DIVISION.

Explanation.—...... Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the* 21*st March* 1888.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 16TH MARCH 1888.

THE weather conditions during the past week have been more or less unsettled. The barometer was low and below its normal height at the commencement, and was also irregular in its movements. There was also a tendency to a slight but distinctly marked depression in North and Central Bengal. The barometric changes of the 10th brought it into greater prominence on the 11th, and a strong inrush of southerly winds set in over South Bengal into the area of low pressure. Thunderstorms occurred on the 10th and 11th in North and East Bengal and the eastern districts of South-West Bengal, and some very heavy showers fell, more especially in the Dacca, Rungpore and Julpigoree districts. A very rapid rise of the barometer occurred on the 12th, but it fell again rapidly on the 13th. Strong southerly winds continued to blow on the 12th and 13th notwithstanding the rapid barometric changes, and a second series of thunderstorms occurred on the 13th and 14th which were more general, and gave even a larger amount of rain than the first series. They extended over East and North Bengal, and nearly the whole of South-West Bengal and North Behar. The rainfall during this series of storms was especially heavy in the Dacca, Furreedpore, Nuddea, Jessore, Mymensingh, Julpigoree and Cooch Behar districts. The barometer moved irregularly but slightly during the remainder of the week, but the southerly winds fell off in strength on the 15th and 16th, and the weather became somewhat less unsettled. Local thunder-showers occurred, chiefly in East Bengal and the northern districts of North Bengal, but the amounts registered were generally small.

Pressure.—The general character of the variations of pressure has been stated in the previous paragraph. The most remarkable feature of the week was the rapid rise of pressure which followed the first series of thunderstorms on the 11th and 12th. It varied from one to two-tenths of an inch. It was followed by nearly as rapid a fall of pressure on the 14th, which immediately preceded the more violent thunderstorms, and the heaviest rainfall of the second series. A reference to the general table will show that the mean pressure variations for the week differed considerably for different parts of the province. Pressure was on the whole slightly above the average in East and North Bengal, which received by far the largest amount of rain, and below it in South-West Bengal, Orissa, Behar (except Purneah), and Chota Nagpur. The deficiency of pressure was actually greatest at Calcutta and Burdwan, where it was very nearly ·04″

Temperature.—The temperature variations of the week depended mainly upon the occurrence and amount of the rainfall. Thus in East and North Bengal the mean temperature of the week was considerably below the normal, the deficiency averaging 3° in North Bengal and 2½° in East Bengal. In the remainder of the province the temperature of the week was above the average, the excess being 3° in Chota Nagpur and 2° in South Behar and Orissa. Cuttack registered the highest day temperatures during the week, the maximum being 101·9° on the 16th.

The following table gives a comparative statement of the temperature data of the week at nine typical stations:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 16th March 1888.

	Normal mean maximum temperature for the week ending 16th March	Actual mean maximum temperature for the week ending 16th March 1888	Variation of actual mean from the normal	Normal mean minimum temperature for the week ending 16th March	Actual mean minimum temperature for the week ending 16th March 1888	Variation of actual mean from the normal	Normal mean daily temperature for the week ending 16th March	Actual mean daily temperature for the week ending 16th March 1888	Variation of actual mean from the normal
Cuttack	96·3	98·0	+1·7	71·9	73·4	+1·5	84·1	85·7	+1·6

Darjeeling	56·4	52·8	−3·6	41·9	41·6	−0·3	49·4	47·4	−2·0

Rainfall.—An unusually large amount of rain has fallen during the week, chiefly in connection with two extensive series of thunderstorms and nor'westers. The first series occurred on the 10th and 11th, and was almost entirely confined to East and North Bengal and the southern and eastern districts of South-West Bengal (including the 24-Pergunnahs and Jessore). Rainfalls exceeding two inches were received at a large number of stations in the Dacca and Furreedpore districts on the 11th. Some local showers fell on the 12th, but were generally of little importance. The second series of thunderstorms commenced on the 13th and lasted until the end of the week, but were most general on the 13th and 14th. They extended over the whole of North and East Bengal, and the greater part of South-West Bengal and North Behar, in which districts moderate to heavy rain was

generally received. A few light local showers were also received in other districts, more especially in the Sonthal Pergunnahs. The rainfall of the 13th was very heavy in the Dacca, Furreedpore and Nuddea districts, where the majority of the stations received over two inches, and in the northern districts of North Bengal.

The following districts received an average rainfall for the week exceeding two inches:—Dacca 4·49 inches, Commillah 4·1 inches, Furreedpore 3·8 inches, Noakholly 3·38 inches, Darjeeling 2·77 inches, Rungpur 2·34 inches, Julpigoree 2·18 inches, and Nuddea 2·05 inches.

The rainfall of the week was very considerably in excess in the whole of Bengal and North Behar, and was below the average in Orissa, South Behar and Chota Nagpur. The following table gives a comparative statement showing the character of the rainfall of the week in each of the seven meteorological divisions of the province:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1887.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 56, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain gauge is one foot above the ground.

o overcast, g gloomy, p passing temporary showers, t thunder, < lightning, K thunderstorm, ▲ hail, dew.

JOHN ELIOT,
Offg Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 19th March 1888.

MEMORANDUM.

THE principal Municipalities in Bengal returned, during the week ending 3rd March 1888, the birth and death-rates of 19·3 and 21·7 per 1,000 of population, respectively, as opposed to 21·3 and 23·4 per 1,000 in the preceding week ending 25th February, indicating a retrogression in the registration of both births and deaths.

2. These events were returned in the highest proportions by the following Municipalities :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Beauleah	57 8	Suburbs of Calcutta	38·7
Comillah	42 3	Utterpara	37 8
Bhagulpore	32 6	Bali	31 6
Durbhanga	32 3	Comillah	30 8
Monghyr	30 7	Burdwan	30 5
Serampore	29 4	Gya	30 1
Naraingan]	49·7	Puri	29·4

3. Referring to the specific diseases, there was a sensible abatement in the mortality from the maladies returned under the head of "Other Causes," while the fatal results from other diseases exhibited only fractional differences :—

	Ratio per *mille* during the weeks ending— 3rd March 1888	25th Feb 1888.
Cholera	3·6	3 4
Small-pox	1	03
Fever	8 7	9·1
Bowel-complaints	2 9	2 8
Injury	·2	·5
Other causes	6·2	7 5

4. The following Municipalities returned conspicuously high mortality from cholera and fever, and no Municipality exhibited any noticeably high suffering from the other diseases mentioned in the foregoing table, excepting Suburbs of Calcutta, where 10 8 per 1,000 of population died from the unspecified diseases coming under the head of "Other Causes":—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*
Naraingan]	41 4	Purneah	24 3
Suburbs of Calcutta	9 5	Comillah	23 1
Howrah	7 4		
Hughli	5 4		
Gya	4 1		

5. The death-rates according to *Sex*, *Class* and *Age* stood as shown below—

According to Sex.

	Ratio per *mille.*
Males	22 6
Females	20·6
Ratio of male deaths to every 100 female deaths	124

According to Class.

	Ratio per *mille.*
Christians	17 4
Hindus	22·7
Mahomedans	19·5

According to Age.

	Ratio per *mille.*
Under 1 year	138 9
1 and under 5 years	25·6
5 " 10 "	11·9
10 " 15 "	13 6
15 " 20 "	22 5
20 " 30 "	14·2
30 " 40 "	13·4
40 " 50 "	16·9
50 " 60 "	30·6
60 years and upwards	46 5

K. P. GUPTA, M.B., F.R.C.S., *Surgeon-Major,*
Offg. Sanitary Commissioner for Bengal.

The 19*th March* 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

CONTINGENT EXPENDITURE.

FINANCIAL DEPARTMENT—FINANCE.

Calcutta, the 22nd March 1888.

RESOLUTION.

READ—

Resolution, dated the 20th August 1885.
Circular No. 5, dated the 17th October 1886.
Replies to the Circular.

The Resolution recorded by the Government of Bengal on the 20th August 1885 prescribes the system under which contingent expenditure is at present incurred in Bengal. The expenditure is divided into three classes, viz., *Special,* for which the previous sanction of Government or of some controlling officer is required; *Countersigned,* in which sanction is not required, but the bills have to be countersigned by the controlling officer; and *Contract,* in which a lump sum is placed at the disposal of the disbursing officer, who spends it at his discretion, subject only to the condition that his allotment is not exceeded. By these orders, however, certain items of expenditure, which are not really within the control of the disbursing officer, were included in the Contract allotment; and suggestions for an amendment of the system in this and other directions were made in Government Circular No. 5T—F, dated the 17th October 1886.

2. The reports received from the officers consulted show that there is a consensus of opinion in favour of the general proposals contained in the circular. The first object aimed at was the entire removal from the Contract system of items which do not depend on the discretion of the controlling officer, and in which, therefore, saving can bring him no credit and

excess should bring him no blame. The second was to enlarge interest and responsibility by allowing the saving of lump grants and the utilization of savings on objects other than contingencies. As regards the first point, it was proposed to follow the Bombay system, and to allow such expenditure to proceed without audit, the order passing the amount being accepted as a voucher by the Accountant-General. This would, however, reduce to only a few items the expenditure classed under "Countersigned Contingencies," and the question was therefore raised whether it would not be expedient to abolish this class altogether. The whole subject was considered at the conference of Commissioners recently held at Calcutta, and it has been decided to abolish this class and to substitute a class to be called *Regular* contingencies, in which the charges as they arise will be incurred by the disbursing officer in accordance with the scales laid down by Government, without sanction of superior authority, and without reference to budget provision. The new class will contain the following items :—

1. Fees to pleaders in criminal cases.
2. Fees to pleaders in civil suits.
3. Diet and travelling allowance to witnesses.
4. House allowances.
5. Charges for remittance of treasure to other districts.
6. Escort charges.
7. Remuneration to copyists.
8. Section-writing.
9. Process-serving charges.
10. Keep of elephants.
11. Diet of insane persons.
12. Boarding charges.
13. Diet of patients, &c.
14. Municipal rates and taxes.
15. Rewards for the destruction of venomous snakes.
16. Rewards for the destruction of wild animals.
17. Compensation for land taken up for public purposes.

Charges on account of *Regular* Contingencies will be budgeted for in the ordinary manner, and the charges as they arise will be incurred by disbursing officers in accordance with fixed scales without sanction of superior authority and irrespective of budget provision.

3. This enables Government to provide for two classes only of fixed grants for contingencies—(1) *Special*, in which the controlling officer is allowed to sanction up to a certain amount, receiving a contract allowance up to that amount; (2) *Contract*, in which he sanctions all, receiving similarly a lump grant.

The following table shows the items to be placed under each head :—

Special Contingencies.	Contract Contingencies.
1. Purchase of boats.	1. Purchase of tents.
2. Ditto of elephants.	2. Purchase of books and publications.
3. Repairs to steamers and schooners.	3. Petty construction.
4. Cost of supplying provisions.	4. Country stationery.
5. Other items of large amount and unusual character.	5. Remittance of treasure within district.
	6. Hot and cold-weather charges.
	7. Printing at private presses (without grant).
	8. Tour charges.
	9. Treasury charges.
	10. Repairs to tents.
	11. Purchase and repair of furniture.
	12. Purchase of clothing.
	13. Office and ground rent.
	14. Rewards.
	15. Petty repairs.
	16. Law charges.
	17. Postage and telegram charges.
	18. Office expenses.
	19. Miscellaneous.
	20. Process fees advanced.
	21. Repairs of boats.
	22. Country medicines.
	23. Maintenance of strangers and indigent persons.
	24. Burial of paupers.
	25. Support of pilgrims.
	26. Subsistence allowance to vagrants.
	27. Purchase of accoutrements.
	28. Rewards for marksmanship.
	29. Cost of photographs.
	30. Passage and diet money of insanes on release.
	31. Purchase of raw materials for manufactures in lunatic asylums.
	32. Charges for deportation of vagrants.
	33. All other items of expenditure not specially included in Regular or Special Contingencies.

This classification is similar to that proposed in paragraph 12 of the circular, but a few changes have been made. The headings "Compensation

for land taken up for public purposes," "Municipal rates and taxes," "Rewards for the destruction of venomous snakes," and "Rewards for the destruction of wild animals," are classed under *Regular* Contingencies, as the expenditure on these items cannot be controlled. The headings "Petty construction" and "Purchase of tents" are classed under *Contract* Contingencies, and a new item, "Printing at private presses," has been included in this class. Subject to the sanction of the Government of India, "Section-writing" and "Purchase of books" will be included under *Regular* and *Contract* Contingencies respectively.

4. Under the class of *Special* Contingencies, a lump allotment will be made to each controlling officer to meet all expenditure for which the previous sanction of Government is not required. From this grant Commissioners of Divisions will have power to sanction expenditure up to Rs. 250, the Inspector-General of Police up to Rs. 1,000, and other controlling officers up to Rs. 100. The grants will be calculated on the basis of the expenditure of the past four years. The procedure in respect of *Contract* Contingencies will remain unchanged.

5. Commissioners of Divisions will have the disposal of the whole grants for their divisions on account of *Special* and *Contract* Contingencies, and will allot the grants annually at their discretion. Savings accruing in the grants will be re-granted at the close of the year, and may be spent on contingencies or on temporary establishments without reference to higher authority. This permission to spend savings on temporary establishments is, however, subject to the sanction of the Government of India. Savings may also be spent by Commissioners of Divisions, or under their authority, on grants to local bodies. As soon as possible after the close of each year, the Accountant-General will report to the controlling officers and to Government the savings effected in the grants.

6. The Accountant-General will be asked to issue specific instructions on all questions of detail. The allotment to be made to each officer will be fixed in communication with the Accountant-General, and will be based on the actuals of past years. When fixed, it will remain unaltered for three years, after which it will be subject to revision.

7. The orders contained in this Resolution will have effect from the beginning of the year 1888-89.

ORDER.—Ordered that copies of the Resolution be forwarded to the Board of Revenue, Commissioners of Divisions, District and Sessions Judges, Inspectors-General of Civil Hospitals, Police, and Registration, Sanitary Commissioner, Director of Public Instruction and Accountant-General.

Ordered also that copies of the Resolution be forwarded to all Departments of this Government, except the Public Works Department.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Government of Bengal.

DISCOVERY OF A PROCESS FOR MANUFACTURING PURE SULPHATE OF QUININE AT MUNGPOO.

RESOLUTION.

Dated Calcutta, the 26th March 1888.

APPREHENSIONS of the extermination, in their native forests, of the Quinine-yielding Cinchona trees having reached an acute stage about thirty years ago, the Government of India decided to take effectual steps to introduce their cultivation into India. The collection of seed and seedlings in the wide tract of difficult country over which the best medicinal sorts are naturally scattered was no easy task. But it was successfully accomplished by Messrs. Markham, Pritchett, Spruce and Cross. Contemporaneously with these efforts on the part of the English Government, the Dutch authorities were at work on behalf of their Malayan Colonies, and by the year 1862 Cinchona cultivation had been successfully initiated in India and Malaya. The localities selected for the experiment of Cinchona growing in India were the Nilgiris and British Sikkim. And the excellence of this selection has been proved by the fact that the original nurseries in both localities have developed into large plantations which still remain in the hands of Government. From these two centres, seed and seedlings have been freely distributed to planters, and large tracts of land, especially in Southern India and Ceylon, have been covered with Cinchona trees by private enterprise.

2. The Cinchona trees thus introduced into India are practically of two sorts: (1) *Quinine* yielders and (2) *Mixed alkaloid* yielders. Of the Quinine yielders there are two kinds, viz., *Yellow* or *Calisaya* (including *Ledgeriana*) and *Crown* or *officinalis*, barks. Of the mixed alkaloid yielders there are also two kinds, viz., *red* or *succirubra*, which has been in cultivation from the beginning, and a kind which has come into prominence during the past few years, and which in Annual Reports has been referred to as *Hybrid* bark. Red bark contains a comparatively small proportion of Quinine with large proportions of Cinchonidine and Cinchonine. It had been chiefly used by druggists in the preparation of decoctions and tinctures, and had not been used by Quinine makers as a source of Quinine. This red-bark tree was, however, the kind which in the early days of the cultivation it was found most easy to propagate; and in all plantations, both public and private, it greatly preponderated over the other sorts.

3. The cultivation of Cinchona trees having been pushed beyond the region of experiment, the next problem that presented itself was the utilization of their bark. For the private grower, the most lucrative course up to the present time has been to sell the crude bark in London. The object of Government was not, however, to secure a financial success, but to provide the people of the country, at the lowest possible rate, with an efficient remedy for the most prevalent of all the diseases of the country. The first step for Government to take was therefore to discover whether it was really a fact that Quinine is the only alkaloid worth extracting separately from Cinchona bark, and whether Cinchonidine and Cinchonine might not each be an efficient febrifuge. It was true that Quinine alone had got into use as a febrifuge, and that it alone of the Cinchona alkaloids had found a place in the British Pharmacopœia. On the other hand, tinctures, decoctions and various pharmaceutical preparations of red bark, into the constitution of which all three alkaloids must undoubtedly enter, had for many years borne the reputation of excellent remedies for fever. The presumption therefore appeared to be that the position claimed for Quinine as the only real febrifuge yielded by Cinchona bark would prove, on careful examination, to be untenable; and that the other two alkaloids would also be found

to have value as febrifuges. For the purpose of investigating this point, Commissions of medical officers of all three Presidencies were formed during the years 1866 to 1868. These Commissions were furnished with supplies of the three alkaloids, pure and unmixed, and after very extensive trials, their unanimous verdict was that Cinchonidine and Cinchonine are both excellent febrifuges, the former not much less efficient than Quinine itself.

4. Having thus established the value of Cinchonidine and Cinchonine, the next point to be settled was how best to utilize the large stocks of these alkaloids contained in the bark of the trees growing in the Government plantations. To do this, Messrs. Broughton and Wood, two professional chemists, were engaged in England and were located as Government Quinologists on the Nilgiri and Sikkim plantations respectively. Mr. Broughton (the Nilgiri Quinologist), as the result of his labours, invented a preparation of red bark which he called *Amorphous Quinine*, and which contained all the alkaloids of red bark in the form of a non-crystalline powder. Of this Amorphous Quinine no large amount was ever manufactured; and its preparation ceased when Mr. Broughton resigned the service of Government. Mr. Wood, who did not arrive at the Sikkim plantation until 1873, concluded, after much observation and experiment, that the best way of utilizing the red bark was to make from it the preparation now so well known as Cinchona Febrifuge. This, like Mr. Broughton's, is in the form of a powder, and contains the three chief alkaloids of red bark mixed in the proportions in which they naturally occur in the bark. Cinchona Febrifuge was then a perfectly new product, unknown to Pharmacy, and it was not clear how it might be accepted by the medical profession.

Mr. Wood therefore adopted for its manufacture on a small tentative scale a simple and inexpensive acid and alkali process, requiring only the rudest apparatus. He intended, should the product be favourably accepted by the medical profession, to replace this simple process by one more efficient, but more complicated, and involving the extensive use of spirit. During the first year of its manufacture (1874-75), only 48 pounds of this new drug were issued. At first, and chiefly owing to a misapprehension as to the proper dose in which it should be given, some prejudice existed against this drug. In 1875-76, however, 1,940 pounds of it were consumed, and its consumption so materially increased during succeeding years that, up to the present date, no less than 87,704 pounds have been issued from the factory. A preparation similar to, and avowedly an imitation of, Cinchona Febrifuge is now made and sold in London under the name of *Quinetum*, but until Cinchona Febrifuge had first been manufactured in India, no similar preparation existed. It is therefore a remedy for which the world at large is indebted to India. Cinchona Febrifuge has been used in India as a substitute for Quinine. It has been so used by Government in its own medical institutions, and it has been freely offered to the Indian public. Its sale has, however, been restricted to the limits of India. From the beginning, and until now, its price has uniformly been sixteen rupees eight annas per pound, and in this respect it has presented a contrast to Quinine, the price of which has fluctuated considerably, rising at one time as high as 16*s*. 6*d*. per ounce. According, however, to statistics prepared by an English pharmacologist, the average price of Quinine in London from 1875 to 1887 (the period during which Cinchona Febrifuge has been in use) has been 8*s* 4½*d*. per ounce. The sterling value (calculated at this average rate) of 87,704 pounds of quinine would be £587,616, while this quantity of febrifuge has actually been delivered to the Indian consumer for the sum of Rs. 14,17,116. The actual saving to India has therefore been very great, and the capital account of the plantations (about eleven lakhs of rupees) has been covered several times.

5. The preponderance of red-bark trees in the Sikkim plantation, while he was attached to it, naturally induced Mr. Wood to give his attention first to the utilization of their bark. But he by no means neglected the Quinine barks. Of these barks only one,—*Calisaya* and its variety *Ledgeriana*,—really thrives in Sikkim, the Crown bark, or *Cinchona officinalis*, tree having proved a

comparative failure. Mr. Wood made many experiments in the manufacture of pure Sulphate of Quinine; but, up to the time of his retirement, for private reasons, from the service of Government in 1879, he had not succeeded in discovering an efficient process. Mr. Wood was of opinion that good Quinine barks could be grown in Sikkim, and that it might be possible to extract the Quinine from them on the plantation. Dr. King, the Superintendent of the Plantation, was very strongly of this opinion, and in 1875 he recommended that all further planting of red-bark trees should cease. This recommendation was not acted upon for some time. Full effect has, however, been given to it of recent years, and *succirubra* has been supplanted by *Calisaya* to the extent of about a million trees. The retirement of Mr. Wood did not put an end to the experiments on the manufacture of Quinine. Mr. Gammie, the Resident Manager, took the matter up with energy, and, encouraged and assisted by Dr. King, he carried on a long series of experiments on an acid and alkali process of manufacture by which he succeeded in producing excellent Quinine. He never, however, succeeded in recovering much more than half of the amount contained in the bark upon which he operated. The acid and alkali process had therefore to be abandoned as wasteful and inefficient. A process depending on the maceration of the bark in spirit was next tried; but, after much experiment, it was in turn abandoned. During a visit which he paid to Holland in 1881, Dr. King acquired some hints as to a process of extraction by means of oil. And now, benefiting by the advice of some chemical friends, Mr Gammie has been able to perfect this process, with the result that the whole of the Quinine in yellow bark can be extracted in a form undistinguishable, either chemically or physically, from the best brands of European manufacture. This can be done so cheaply that, as long as the supply of bark is kept up, Quinine need never cost Government much above twenty-five rupees per pound. It is true that, at the present moment, Quinine is obtainable in the open market at rates not very different from this; but that is due to entirely exceptional causes For some time back the Ceylon planters have been up-rooting their Cinchona trees, both to save them from disease, and to make way for tea planting which appears now to be becoming the principal industry of that Colony; and Cinchona bark has actually been sold in London below the cost of its production in Ceylon. Indeed, so far has the fall in price gone, that South American bark has been practically driven out of the market. This is a state of matters which cannot continue very long, and which is not likely to recur. In the ordinary course, therefore, Quinine might be expected soon to rise to what may be considered its normal price. The object of making public the process now discovered is to check this rise in the price of a drug of such general utility.

6. The cordial thanks of Government are due to Dr. King and his coadjutors—and especially to Mr. Gammie —for the patience, energy and resource displayed by them in their long search for the best method of utilizing these valuable medicinal barks. The Government has no desire to make a profit by the discovery, and the details are now produced in order that private growers of Cinchona may be enabled to take full advantage of the process, and that a permanent reduction in the price of Quinine may ensue.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Government of Bengal.

Method of extraction of the alkaloids from Cinchona Bark by cold oil as used at the Government Cinchona Factory in Sikkim

In order that the oil may speedily and effectually act on the Cinchona bark, the latter is reduced to a very fine powder by means of Carter's Disintegrator; and to get the powder of a uniform fineness, it is passed through a scalper, which is a machine commonly used for sifting flour. The scalper is in the form of a box enclosing a sloping, six-sided, revolving

chamber, covered with silk of 120 threads to the lineal inch. It is driven at the speed of about thirty revolutions to the minute. Any particles of the powder which may be too coarse to pass through the silk meshes drop out at the lower end of the revolving chamber and are again passed through the Disintegrator.

2 A hundred parts of the finely-powdered bark are then set aside to be mixed with 8 parts of commercial caustic soda, 500 parts of water, and 600 parts of mixture composed of one part of fusel oil to four parts kerosine oil. If the caustic soda be of inferior quality, a little slaked lime (about 5 parts) may be used in addition to the eight parts of caustic soda; or caustic soda may be altogether omitted, and 15 parts of slaked lime may be used instead of it. The caustic soda is dissolved in the water and mixed with the bark. Then the oil is added, and the whole is kept thoroughly intermixed in an agitating vessel. Should lime be used, it is mixed in fine powder with the dry bark before adding the water and oil.

3. The agitating vessels in use at Mungpoo are barrels with winged stirrers revolving in them vertically, and with taps on the sides for drawing off the fluids. The first stirring is carried on for four hours, and then the whole is allowed to rest quietly in order that the oil may separate out to the top of the watery fluid. When the oil, which has now taken up the greater part of the alkaloids, has cleared out, it is drawn off by a tap placed just above the junction of the two fluids. The oil is then transferred to another agitator, and is there thoroughly intermixed with acidulated water for five or ten minutes, the mixture being again allowed to rest for the separation of the oil. It will now be found (if sufficient acid has been used and the stirring has been thorough) that the alkaloids have been removed from the oil to the acidulated liquor. The oil is again transferred to the bark mixture, and is kept intermixed with it for two or three hours; the oil is again drawn off in the same way, washed as before in the same acidulated liquor; and this process is repeated a third or a fourth time or until it is found, by testing a small quantity of the oil, that the bark has been thoroughly exhausted of its alkaloids. Each stirring subsequent to the second, need not be continued for more than an hour. The quantity of acid required to take up the alkaloids from the oil will entirely depend on the quality of the bark operated on. If the bark contains 4 per cent of alkaloids, about 2lbs of either sulphuric or muriatic acid mixed in twenty gallons of water should be sufficient, and so on in proportion.

4. The after-treatment of the acidulated water containing the alkaloids depends on the product desired, and on the kind of acid that has been used. Should sulphate of quinine be desired and sulphuric acid have been used, the liquor is filtered (if necessary), heated and made neutral by adding a very weak solution of either caustic soda or liquor ammonia. It is then allowed to cool, and as it cools the crystals form out. These crystals are afterwards separated from the mother liquor by draining through a cloth filter. After they have been thus obtained, the crystals are dried. They are next dissolved in about fifty times their weight of boiling water. The resulting liquor is filtered hot through a little animal charcoal. On cooling after filtration the crystals again form out, and they are separated as before from the mother liquor by filtration through a cloth. The crystalline mass obtained by filtration is then placed in small lumps on sheets of white blotting paper stretched on slabs of plaster of Paris. By this means they are practically dried. They are afterwards thoroughly dried by being laid on blotting paper in a room heated to about 10 degrees above the temperature of the open air.

5. If Cinchona febrifuge is wanted, the alkaloids are exhausted from the oil by muriatic acid, the solution being neutralized and filtered in the same way. On an excess of caustic soda solution being added, the alkaloids are precipitated. After standing some hours the whole bulk of liquor and precipitate is passed through cloth filters; and when the alkaline liquor has drained off, the precipitate is washed with a little plain water, dried, and powdered. The powder is Cinchona Febrifuge ready for use.

The 24th March 1888. J. A. GAMMIE.

CUSTOM HOUSE REGULATIONS.

FINANCIAL DEPARTMENT—CUSTOMS.

Calcutta, the 27th March 1888.

RESOLUTION.

SOME correspondence has lately passed between Government and the Chamber of Commerce regarding the existing Custom House Regulations. The points which, in the opinion of the Committee of the Chamber require attention, are—

(1) The number of holidays.
(2) The charges for overtime working.
(3) The system of passes and the general routine of Custom House business.

The first two points are within the competence of the Local Government to determine. The third, however, can only be usefully discussed in connection with proposals for the amendment of the Imperial Act for the Regulation of Sea Customs (Act VIII of 1878). Before deciding whether any representation should be made to the Government of India on this subject, the Lieutenant-Governor considers it desirable that the question should be thoroughly investigated and reported upon by a Committee. The following Committee is accordingly appointed for this purpose:—

PRESIDENT:

1. Hon'ble Colman Macaulay, C.I.E., Secretary to the Government of Bengal.

MEMBERS:

2. Hon'ble Robert Steel.
3. E. D. Wylie, Esq.
4. J. Scobell Armstrong, Esq., Collector of Customs.

The Committee will be requested to consider the first and second points mentioned above as well as the third. They will also be invited to favour Government with their opinion on certain memorials which have been submitted by members of the Preventive Service.

By order of the Lieutenant-Governor of Bengal,

L. P. SHIRRES,

Under-Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 24th March 1888

Division	No.	District and date of return		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops
BENGAL.		*Western Districts.*			
BURDWAN DIVN.	1	Burdwan	Mar 24, '88	Nil	Weather—seasonable. State and prospects of crops good. Sugarcane outturn excellent. Common rice is now selling at 22 seers per rupee. There is severe cholera at Raneegunge affecting cooly emigrants. There have been over 150 fatal cases.
	2	Bankoora	„ 24, '88	Nil	Weather—hot and dry. Pressing of sugarcane nearly finished; yield will be 14 annas in the Sudder sub-division. Wheat, barley and mustard are being reaped. Prices continue unaltered.
	3	Beerbhoom	„ 24, '88	Nil	Weather—warm; west winds. Wheat is being harvested.
	4	Midnapur	„ 24, '88	Nil	Weather—hot, west wind. *Boro* crop doing well.
	5	Hooghly	„ 24, '88	Nil	Weather—normal. Prospects of crops continue good
		Serampur		0 03	
		Howrah	„ 26, '88	Nil	Weather—seasonable. *Boro* crop promising.
		Central Districts.			
PRESIDENCY DIVN.	6	24-Perghs.	Mar. 27, '88	Nil	Weather—very hot and bright. Morning fogs for part of the week. All standing crops flourish. Ploughing continues.
	7	Nuddea	„ 24, '88	Nil	Weather—seasonable; temperature rising. Wind westerly. Great activity in indigo sowing. Tillage for early rice in progress. Gram, wheat and barley good. Outturn of winter crops good.
	8	Khoolna	„ 21, '88	Nil	Weather—considerably warmer. *Boro* rice promises well.
	9	Jessore	„ 21, '88	Nil	Hot weather has set in, and the heat is rather severe. The rainfall of the last week has facilitated the sowing of paddy and indigo. Prospects of *boro* good.
	10	Moorshedabad	„ 21, '88	Nil	Weather—getting warmer. *Rubbi* crops are still being harvested.
RAJSHAHYE DIVN.	11	Dinagepur	Mar. 24, '88	Nil	Weather—rather hot. Sugarcane is being planted and jute sown. Prospects of *rubbi* good. Price of rice stationary.
	12	Rajshahye	„ 21, '88	Nil	Weather—getting hot. Spring crops are being reaped. Lands are being prepared for early sowings.
	13	Rungpur	„ 24, '88	Nil	Weather—clear and warm. Sowing of *aus* and jute commenced. Tobacco is being cut. Prospects of wheat and tobacco good.
	14	Bogra	„ 21, '88	Nil	Weather—seasonable. Rain would be useful for early sowings. Prospects continue good.
	15	Pubna	„ 21, '88	Nil	Weather—hot with strong wind. Prospects of crops good.
	16	Darjeeling	„ 24, '88	Nil	Weather—still unsettled; only slight rain here and there. Ploughing continues in the Terai. Prospects of crops favourable.
	17	Julpigoree	„ 24, '88	Nil	Weather—seasonable; at times cloudy. Standing crops doing well. Ploughing for *aus* and jute continues. Prices stationary.
		Eastern Districts.			
DACCA DIVISION	18	Dacca	Mar. 24, '88	Nil	Weather—hot and stormy. Pulses are being gathered, outturn good. Ploughing for rice and jute going on. Early rice plants doing well
		Naraingunge		3 39	
	19	Furreedpur	„ 24, '88	Nil	No rain during the week. Weather dry and hot. Harvesting of cold-weather crops continues
	20	Backergunge	„ 24, '88	0 20	Weather—seasonable. Prospect of crops good
	21	Mymensingh	„ 23, '88	Nil	Weather—hot. Prospects of crops good
		Jamalpur	..	0 19	
		Kishoregunge	...	0·88	
		Attia	...	0 76	
		Netrokona		Nil	
CHITTAGONG DIVN.	22	Chittagong	Mar. 27, '88	Nil	Weather—seasonable. Outturn of winter crops fair. Prices steady.
	23	Noakholly	„ 23, '88	0·29	Weather—seasonable. Some of the pulses are being harvested. Cultivation of *aus* progressing
		Fenny	..	0 91	
	24	Tipperah	„ 22, '88	0·90	Weather—more moist than is usually experienced at the time of the year. Good crops are being harvested where they have arrived at maturity. Those that are not ripe yet are coming on very nicely. The lands are being prepared for fresh cultivation. Both state and prospects are excellent.
		Brahmanbariah	.	5·09	
		Chandpur	...	1·05	
	25	Chittagong Hill Tracts.	„ 20, '88	0 81	Weather—rainy and stormy during the first four days of the week; hot and sultry since. *Jum* cutting has re-commenced after the rain. Tobacco and other crops doing well.
		Hill Tipperah	„ 22, '88	2·22	Weather—warm. *Boro* paddy and chillies doing well.

	No	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR					
Patna Divn.	26	Patna	Mar. 24, '88	Nil	Weather—sultry with high west wind. *Rubbi* crops are still being harvested; fair outturn expected. *Masoor* and peas extensively damaged by insects in the Barh sub-division. Sugarcane pressing and opium collection almost completed.
	27	Gya	„ 24, '88	Nil	Weather—seasonable. Harvesting of *rubbi* and extraction of opium nearly finished. Sugarcane being irrigated.
	28	Shahabad	„ 24, '88	Nil	Weather—hot with strong west wind. Harvesting of *rubbi* nearly over; threshing has commenced. Collection of opium almost completed; prospects very good, better than for many years past both as to quantity and quality.
	29	Durbhunga	„ 24, '88	Nil	Weather—getting warm. *Rubbi* harvest in progress. *Moong* and early rice are being sown. Collection of opium still going on. Indigo has germinated in places. Price of common rice averages 21 seers per rupee.
	30	Mozufferpur	„ 24, '88	Nil	Weather—warm; west wind. *Rubbi* harvest progressing; threshing commenced. Paddy. *moong* and *china* are being sown; earlier sowings have already germinated.
	31	Sarun	„ 24, '88	Nil	Weather—getting hot gradually. Harvesting of *rubbi* crops progressing. Gathering of opium almost over in many places. Indigo sowings going on. Prospects of all standing crops good.
	32	Chumparun	„ 24, '88	Nil	Weather—dry with high west wind. *Rubbi* crops are being reaped. Extraction of opium in full swing and approaching completion; produce good. Indigo sowings progressing.
Bhagulpore Divn.	33	Monghyr	Mar. 24, '88	Nil	Weather—seasonable; strong north-westerly wind blowing at the time of report. *Rubbi* harvest in progress; outturn fair. Opium collection finished with good outturn.
	34	Bhagulpur	„ 24, '88	Nil	Weather—seasonable. *Rubbi* harvest in progress. Rice and *moong* being sown in low lands in the north.
	3	Purneah	„ 24, '88	Nil	Temperature rising; west wind prevails. In the Sudder sub-division wheat and oats are light crops, but in other sub-divisions they are good. Other cold-weather crops fair. Land is being prepared for *bhadoi* and jute.
	3	Maldah Chanchal	„ 24, '88 ...	Nil 0·05	Weather—days warm, mornings and evenings cool. Harvesting of *rubbi* crops continues. *Boro* paddy is being transplanted. Common rice is selling at 22 seers per rupee at English Bazar.
	37	Sonthal Perghs. Deoghur	„ 24, '88 ...	Nil 0·05	Weather—hot with strong west wind. Harvesting of wheat, barley, and linseed still going on; outturn below the average. Prospects of *mohua* crop good. Prices stationary.
ORISSA.					
Orissa Divn.	38	Cuttack	Mar. 23, '88	2·13	Weather—fair. Threshing of *sarad* going on in some places and completed in others. *Dalua* is flowering and partly ripening. Price of rice stationary.
	39	Pooree Khoorda	„ 22, '88 ...	Nil 0·04	Weather—seasonable. Land is being ploughed for the ensuing *sarad* crop. *Rubbi* crop is being gathered. *Dalua* crop is being harvested. Mango suffers for want of rain. Common rice 24 seers 4 chittacks per rupee in the Sudder sub-division and 23 seers 8 chittacks in the Khoorda sub-division.
	40	Balasore	„ 23, '88	0·50	Weather—days hot, but nights still cool. Rainfall beneficial to cultivation, but some damage to fruit and vegetables by hail in the Bhudruck sub-division.
CHOTA NAGPORE.					
		South-West Frontier Agency.			
Chota Nagpore Divn.	41	Hazaribagh,	Mar. 23, '88	Nil	Weather—seasonable; very warm. Stormy winds. Prospects of mango and *mohua* continue good. Gathering of opium almost completed. Condition of agricultural stock fair.
	42	Lohardugga	„ 24, '88	Nil	Weather—getting warmer. Harvesting of *rubbi* crops continues. Prospect of *mohua* good.
	43	Singbhoom	„ 23, '88	Nil	Weather—clear and getting very warm. *Rubbi* being harvested. Cotton coming into blossom. Sugarcane being planted. Mango and *mohua* promising.
	44	Manbhoom	„ 24, '88	Nil	Weather—hot with strong west wind. Wheat, barley and oats are being harvested; outturn varies from 6 to 12 annas. *Mohua* is mostly doing well.

The total fall from 1st January to 24th March 1888	4·89
The average fall of the corresponding period for 24 years, S. G.'s Office ..	2·68

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, ⌓ dew, ‿ fog.

* Mean for six days. † Mean for 5 days.

Explanation,—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12 station in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 23rd of March 1888.

Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Rainfall. Of week. Mean for district.	Of week. Normal mean.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1887. Mean for district.	Since 15th May 1887. Normal mean.	Since 15th May 1887. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—...... Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA. *the 27th March* 1888.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 23RD MARCH 1888.

THERE is little that calls for notice in the meteorology of the past week. The barometer was low at the commencement of the week, but was beginning to rise rapidly, and the showery, thundery weather of the previous week ceased on the 17th or 18th over the whole province. Thunder-storms occurred on the 17th in Orissa and the eastern and southern districts of East Bengal, and one or two local showers of little importance on the 18th. After that date the weather was fine throughout the week. The barometer rose until the 20th, when it was a tenth of an inch higher than on the 16th. On the 20th temperature commenced to increase rapidly in the interior, and the westerly winds down the Gangetic plain extended further and further eastwards into Bengal. These changes accompanied a rapid decrease of pressure during the remainder of the week, which varied in amount from ·12″ to ·2″. On the 23rd the sea winds at the head of the Bay began to increase in strength, and slightly decreased the temperature and increased the humidity in South Bengal Hot dry weather with clear skies prevailed over nearly the whole of the provice from the 18th to the end of the week.

Pressure.—The barometric changes of the past week formed a single oscillation of the kind that are due mainly to increasing heat and temperature in Northern India. The barometer rose about a tenth of an inch from the 16th to the 20th and fell a sixth of an inch on the average of the whole province between the 20th and 23rd. The mean pressure of the week varied little from the normal, and was slightly in excess in all districts except Central Bengal, and Central and South Behar, where there was a small deficiency (nowhere exceeding 02″).

Temperature.—The temperature changes of the week corresponded closely to the pressure changes. The mean daily temperature was steady or increased slowly during the first-half of the week, but afterwards increased much more rapidly. The increase was in many cases shown more largely in the night than in the day temperatures. The highest temperatures of the week wer in the great majority of cases recorded on the 23rd. The hottest part of the province during the past week, as defined by maxima temperatures exceeding 101½°, included the stations of Cuttack, Midnapore, Burdwan, Bankoorah and Raniguni. The mean temperature of the week, both night and day, was in excess. The mean daily temperature was on the average 2° in excess in South-West Bengal, Chutia Nagpur and South Behar; 1½° in Orissa, East and North Bengal, and was normal only in North Behar.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 23rd March 1888.

	Normal mean maximum temperature for the week ending 23rd March.	Actual mean maximum temperature for the week ending 23rd March 1888.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 23rd March.	Actual mean minimum temperature for the week ending 23rd March 1888.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 23rd March.	Actual mean daily temperature for the week ending 23rd March, 1888.	Variation of actual mean from the normal.

Darjeeling	58·7	54·3	−4·4	44·4	45·3	+0·9	51·6	49·8	−1·8

Rainfall.—The only important rainfall of the week occurred as local thunder-showers on the 17th and 18th in Orissa and the east and south-east districts of East Bengal. Orissa received an average of 0·34 inch (·09 inch more than the average rainfall of the week) and East Bengal an average of ·29 inch, almost exactly half the normal mean rainfall of the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province the week ending Friday the 23rd of March 1888 :—

Meteorological Divisions.	Temperature. Highest observed during week.	Temperature. Lowest observed during week.	Temperature. Averages for week. Of highest of each day.	Temperature. Averages for week. 	Inches.
The total fall of rain from 18th to 24th March 1888	Nil

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;
The 26th March 1888.

JOHN ELIOT,
Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

THE birth and death returns of the principal Municipalities in Bengal, for the week ending 10th March 1888, exhibit the following results :—

1. That births were registered in the above Municipalities at the rates of 19· per 1,000 of population, as opposed to very nearly the same proportion, viz. 19·3 per 1,000 in the preceding week ending 3rd March, and deaths at 26 1 against 21·7 per 1,000, indicating a considerable improvement in their registration.

2. That the undermentioned Municipalities returned the highest proportions of births and deaths :—

Births.	Ratio per mille	*Deaths.*	Ratio per mille.
Beauleah	49 9	Suburbs of Calcutta	54·8
Monghyr	31 6	Serampore	43 2
Durbhanga	29 9	Beauleah	34 2
		Durbhanga	31 5
		Puri	31·5
		Purneah	31·1
		Comillah	30 8

3. That the rates of mortality from the principal diseases, contrasted with the similar information for the preceding week, stood as follows :—

	Ratio per mille during the weeks ending—	
	10th March 1888.	3rd March 1888.
Cholera	5 1	3·6
Small-pox	1	·1
Fever	10 3	8 7
Bowel-complaints	2 8	2·9
Injury	·2	·2
Other causes	7·6	6·2

indicating chiefly that the mortality from cholera, fever and the maladies classed under the head of "Other causes," had increased to a noticeable extent.

4. That of the abovementioned diseases, cholera, fever and "other causes" proved conspicuously fatal in the following Municipalities, the other diseases exhibiting no special local severity :—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille	*Other causes.*	Ratio per mille.
Suburbs of Calcutta	20 5	Beauleah	28 9	Serampore	17·7
Narainganj	16 6	Kishnaghur	24 6	Puri	16·8
Serampore	7 8	Hughli	22 8	Suburbs of Calcutta	11·8
Howrah	5 7	Purneah	20 8		

5. That the death-rates in relation to *Sex*, *Class* and *Age* were returned at the rates indicated below :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males	28 5	Christians	21·7	Under 1 year	205 8
Females	23 5	Hindus	24 7	1 and under 5 years	28 0
Ratio of male deaths to every 100 female deaths	137	Mahomedans	29 7	5 " 10 "	13·1
		Other classes	36 4	10 " 15 "	15 8
				15 " 20 "	17·8
				20 " 30 "	14·8
				30 " 40 "	21·0
				40 " 50 "	15·9
				50 " 60 "	27·3
				60 years and upwards	74·9

K. P. GUPTA, M.B., F.R.C.S., *Surgeon-Major,*
Offg. Sanitary Commissioner for Bengal.

The 26th March 1888.

Statement showing the Results of the Registration of Births and Deaths in the Principal Municipalities in Bengal during the week ending 10th March 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

RESOLUTION ON THE OPIUM ADMINISTRATION REPORT FOR 1886-87.

REVENUE DEPARTMENT—MIS. REVENUE.

Calcutta, the 29th March 1888.

RESOLUTION.

READ—

A letter No. 61B, dated 30th January 1888, from the Officiating Secretary to the Board of Revenue, submitting the reports of the Opium Agents of Behar and Benares for the year 1886-87.

Settlements.

As there was a considerable stock of opium in hand at the commencement of the year, the Agents were requested to refrain from increasing production by adding to the area under cultivation. The present report shows that these instructions have been duly carried out, the land engaged for, 919,852 bighas, corresponding as nearly as possible with that entered in the returns of 1885-86. The Agents took advantage of the cessation of the work of extension to concentrate their operations in the districts where most profit can be obtained, to get rid of outlying stations, to weed out unsatisfactory cultivators, including those who have engaged to sow indigo on the land they also offer for opium, and in some instances to stop cultivation in the immediate neighbourhood of towns, where exceptional opportunities exist for smuggling. This is a subject to which the Lieutenant-Governor desires to draw the special attention of the Board and of officers of the Opium Department, with a view to the more general introduction of the methods which have been applied with success in some localities. When the main object was to increase the reserve, exhausted by the meagre results of indifferent years, it was impossible to insist upon the selection for opium of the best land, or of that most conveniently situated.

But now that officers have time to devote to the subject, every effort should be made to effect the settlement to the greatest advantage by the judicious selection of areas and of cultivators. The ryots are eager to enter into engagements, and there is thus an opportunity of exercising a choice by expanding cultivation in one place, while contracting it in another. There is also a considerable margin for the increase of production generally, should this be found desirable. The notes of Mr. Cadell, lately officiating as the Benares Agent, show that he rendered valuable services in this matter, to which Mr. Rivett-Carnac has also paid intelligent attention.

Quantity of opium obtained.

2. The outturn was not altogether satisfactory, being 1,07,577 maunds against 1,21,499 maunds in the previous year, and 1,33,803 maunds in 1884-85. The decrease appears due in the Benares Agency to the fact that about 2·34 per cent. of the area for which settlements were concluded was never in fact cultivated, the ryots being discouraged by the failure of the first sowings; while in the Behar Agency the yield was small, the hot winds having dried up the poppy juice. The average produce per bigha was 5 seers 3 chittacks and 2 katchas in Benares; 4 seers 5¼ chittacks in Behar. The deficiency in Behar was to some extent a surprise, as the plants were well grown; it was not discovered until the lancing of the poppy disclosed the scantiness of the juice.

Quality of opium

3. The low consistence of Benares opium having been a subject of comment in the Resolutions on the annual reports of the last two years, it is satisfactory to observe that during the last season a great improvement has been effected. The Agent states that the quality of the drug, as shown by the factory assay, was good, and that in no year, except the exceptional season of 1883-84, has the proportion of good serviceable opium been larger. This statement is altogether borne out by the following figures, which show how the opium has been classified:—

Seasons	Class XXX.	Class XX	Class X	Class I	Class II	Class III.	Class IV.	Class V.	Class VI
	M s c	M s c	M s c	M s. c.	M s. c	M. s c	M s c	M. s c	M s c
1885-86 .	515 6 6¼	7 082 11 1	5 208 38 6	9,836 29 10	14 502 16 18	18 669 23 9¼	9,433 39 3	5 800 35 8	3,181 17 3
1886-87 .	270 31 18	2,709 35 11½	9,041 5 8	16,387 15 2	15 840 2 10¾	8,571 8 6¼	5,040 24 8	702 30 12	159 6 15

The following remarks of the Officiating Opium Agent are commended to the attention of officers of the department as indicating what improvement can be effected by attention to the quality of the opium produced:—

"The greatest improvement has taken place in Basti where, owing to Mr Luard's successful administration, the quality of opium sent up this year has been better than in any previous year, and it may be hoped that Basti, so long notorious for the poor quality of its opium, has now finally emerged from the list of divisions which habitually send up opium of indifferent quality The history of this division and of its neighbour Gorakhpur, shows what care and knowledge can achieve. In former days Gorakhpur was distinctly below the average of the Agency, it now stands *facile princeps* in the quality of its opium Indeed, as the great bulk of it is of a higher consistence than the provision standard of this Agency, it seems to be worthy of consideration whether the Gorakhpur opium, which comes to Ghazipur *viâ* Bankipur, should not be sent direct to Patna

The general quality of the opium sent up for manufacture is not discussed in the Behar report—an omission which may with advantage be supplied in future years. It appears, however, that unusual strictness was exercised in assaying opium at the factory.

Balances.

4 The outstanding balances amount to Rs. 16,435, a sum which must be considered small as compared with the magnitude of the advances made, which exceed two hundred lakhs of rupees a year. The success of Opium Officers in effecting realizations deserves commendation, and compares favourably with the results obtained in other branches of the administration. But there are some exceptions to the good results generally obtained in this respect, and further explanation is required of the statement that "the heavy balance in Tirhoot, aggregating Rs. 9,635-9-1, has not been recovered owing to a misunderstanding of Mr. D'Oyly's orders by the Sub-Deputy Opium Agent, and may be irrecoverable."

Breaches of Opium Laws.

5. There were 1,134 prosecutions under the opium laws during the year, against 1,265 in 1885-86 and 1,928 in 1884-85. The falling off has been in the Behar Agency, where new rules were introduced under the orders of Government to

prevent malicious or frivolous accusations. Three important cases of smuggling from Nepal were detected. The subject received special attention in the Benares Agency, and the remarks of Mr Cadell, who has had very exceptional opportunities for observation, will doubtless receive the careful consideration of the Board. He observes—

"The most notable instance of restriction round large towns is the closing of poppy cultivation in the outskirts of Lucknow. The Commission has expressed the opinion that this measure was 'an unnecessary step,' but the effect of it on the consumption of licit opium has been unquestionable, for the sales have increased from less than 40 maunds in 1876-77 to more than 124 maunds in 1885-86; and where the average outturn is insufficient, there can be little question that cultivation near large cities should be closed at once, and further measures in the same direction have been taken during the year under report in the neighbourhood of Benares, Cawnpur, and Moradabad, while the abandonment of poppy cultivation in the Muttra district and in the neighbourhood of Agra has necessarily rendered smuggling into these towns more difficult than before. And even where the outturn was good, as it unquestionably was round Lucknow, there seems to be no advantage in maintaining it when land yielding an equally good outturn can be got elsewhere.

"A very satisfactory proof that the evil of smuggling is largely restricted in these provinces is furnished by the substantial revenue from opium excise obtained in the revenue divisions, which are worst in this respect, when compared with that of Patna—the only division in the Lower Provinces with which, for obvious reasons, comparison is possible:—

Division.	Total population.	Mahomedan population.	Licit opium consumed.	Total excise revenue from opium.
			Mds. s. c.	Rs. A. P.
Benares	9,820,728	1,056,851	232 31 0	1,48,976 0 0
Faizabad	3,2 0,393	436,337	35 33 0	22,928 0 0
Rai Barielly	2,756,864	262,886	19 39 0	12,784 0 0
Total ...	15,807,985	1,755,574	288 23 0	1,84,688 0 0
			Mds. s. c.	Rs.
"Patna ...	15,063,944	1,730,093	69 2 8	44,200

"If the excise revenue in Patna could be raised to the same standard which has been achieved in the worst divisions of these provinces, an increase of Rs. 1,00,000 to the excise revenue would be obtained, and it is probable that this measure could be got without any injury to the opium administration."

6. That considerable loss accrues to the revenue from the practice of licensed cultivators, whose number always exceeds a million, keeping back a small portion of their produce for domestic consumption or illicit sale, has always been admitted, and is indeed proved by the inadequate excise income obtained in the producing districts. It seems almost certain that this form of smuggling must be more prevalent near great towns, and that some gain would therefore accrue from restricting cultivation in such areas. When circumstances permit the Agent to select the places in which opium should be grown, there would, therefore, appear to be a reason for excluding urban tracts, and the counterbalancing disadvantages of adopting such a rule, if any exist, are not apparent. On this subject the Board will be requested to make a separate report.

7. The question of altering the form in which engagements are made with cultivators in order to obviate an objection which has been taken to their validity has been considered since the close of the year at a conference of Opium Officers, and orders will soon be passed upon the subject by Government.

Conduct of officers.

8. The thanks of the Lieutenant-Governor are given to the Board and to the Opium Agents for their efficient administration of the department during the year. The death of Dr. Whitwell, whose valuable services were commended in the Resolution of 1885-86, is recorded with regret. The favourable remarks of the Board and of the Agents as to the conduct of several officers subordinate to them are noticed by Sir Steuart Bayley with pleasure, and will be communicated to the Appointment Department. The work done by Surgeon-Major Weir, Messrs. Tytler, Drake, Luard, and Hobson was of special value.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 31st March 1888.

Division	No.	District and date of return	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops
BENGAL.				
		Western Districts.		
Burdwan Divn.	1	Burdwan Mar 31, '88	Nil	Weather—seasonable. Prospects of all crops good. Sugarcane harvest excellent. Common rice stands at 22 seers per rupee on an average.
	2	Bankoora „ 31, '88	0·04	Weather—hot and occasionally cloudy. Pressing of sugarcane is finished. Wheat and barley are being reaped and mustard threshed. Transplanting of *boro* paddy going on. No change in the rice market.
	3	Beerbhoom „ 31, '88	Nil	Cool nights. Weather seasonable. *Rubbi* harvest almost over; outturn good. Sugarcane excellent.
	4	Midnapur „ 31, '88	Nil	Weather—slightly cooler *Boro* paddy in ear and doing well.
	5	Hooghly „ 31, '88	Nil	Weather—normal. State and prospects of crops good so far.
		Howrah Apl. 2, '88	Nil	Strong southerly breeze. All prospects good.
		Central Districts.		
Presidency Divn.	6	24-Perghs. Apl 3, '88	Nil	Weather—hot and bright. Mornings and evenings cool. No crops on the ground except sugarcane, which promises well Ploughing progresses. Prices stationary.
	7	Nuddea Mar. 31, '88	Nil	Weather—hot and fair. Tillage for *aus* and indigo in progress.
		Kooshtea ...	0·13	
	8	Khoolna „ 31, '88	Nil	Weather—warm and clear, mostly with southerly breeze. *Boro* rice promises well. Ploughing going on.
	9	Jessore „ 31, '88	Nil	Weather—cooler than last week. Tillage for early rice in progress. Prospects of standing crops good.
	10	Moorshedabad „ 31, '88	Nil	Weather—getting warmer. *Rubbi* crops are still being harvested.
Rajshahye Divn.	11	Dinagepur Mar. 31, '88	Nil	Weather—moderately hot. Lands are being ploughed for *bhadoi* crops.
	12	Rajshahye „ 31, '88	Nil	Days hot, nights fairly cool. Rain with hail in Nowgong has benefited land under preparation, but has somewhat injured *til* and jute plants. Rain wanted elsewhere. Cutting of spring crops continues; outturn generally good.
		Nowgong ...	0·48	
	13	Rungpur „ 31, '88	Nil	Weather—warm and cloudy. *Aus* up and doing well. Jute is being sown. Tobacco and wheat are being gathered with good outturn.
		Gaibanda ...	0·11	
	14	Bogra „ 31, '88	0·12	Weather—extremely hot up to 27th, since which slight rain has somewhat cooled the atmosphere. Prospects good. Ploughing for *aus* and jute going on.
		Sherpur ...	0·42	
		Nowkhilla ...	0·20	
	15	Pubna „ 31, '88	0·07	Strong south-westerly winds. A destructive storm at Mothura on afternoon of 27th. Prospects of crops favourable.
		Serajgunge ...	0·17	
	16	Darjeeling „ 31, '88	0·06	Weather—cloudy: fairly warm: very little rain. Ploughing for *bhadoi* rice and jute continues. In the hills Indian-corn and potatoes are progressing favourably, but more rain is wanted elsewhere. Tea-plucking has begun.
	17	Julpigoree „ 31, '88	Nil	Weather—unsettled; east wind. Sowing of *bhadoi* has commenced in places. Prospects of crops good. Tobacco is said to have been injured by hail-stones.
		Eastern Districts.		
Dacca Division.	18	Dacca Mar. 31, '88	0·25	Weather—hot. *Rubbi* crops are being gathered. Ploughing for *aus* paddy and jute continues, and sowing is being pushed on. *Boro* paddy doing well. Prospects of crops continue favourable.
		Munshigunge ...	0·6	
		Naraingunge ...	0·13	
	19	Furreedpur „ 31, '88	Nil	Weather—hot; slight rain here and there. Ploughing continues. Cold-weather crops are being harvested.
		Madaripur ...	0·40	
	20	Backergunge „ 29, '88	Nil	Weather—seasonable. Prospects of crops continue good.
	21	Mymensingh „ 30, '88	Nil	Weather—sultry. Prospects of crops good.
		Netrokona ...	0·17	
Chittagong Divn.	22	Chittagong Apl. 3, '88	Nil	Weather—seasonable. Prospects of standing crops fair. Prices stationary.
	23	Noakholly Mar. 30, '88	Nil	Weather—seasonable. *Rubbi* crops are being harvested. Betel and cocoanuts flowering. Cultivation of *aus* progressing and sowing begun in low lands.
	24	Tipperah „ 29, '88	Nil	Weather—seasonable; rather cloudy. State and prospects of crops good. There was rain last week, but a little more would not come amiss. However, there is no room for complaint.
	25	Chittagong Hill Tracts. „ 27, '88	Nil	Weather—excessively hot; cloudy on the 26th. *Jum* cutting nearly finished. Tobacco and chillies doing well.
		Hill Tipperah „ 28, '88	Nil	Weather—windy and occasionally cloudy. Prospects of standing crops continue to be fair.

Division	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR.					
PATNA DIVN.	26	Patna	Mar. 31, '88	Nil	Weather—getting hot gradually. *Rubbi* crops are being reaped. Threshing has commenced. A good prospect of mango crop. Prices of food-grains almost stationary.
	27	Gya	„ 31, '88	Nil	Weather—seasonable. Threshing of *rubbi* commenced. Extraction of opium finished. Sugarcane being irrigated.
	28	Shahabad	„ 31, '88	Nil	Weather—dry and hot. Threshing of *rubbi* crops in progress. Opium collection almost over with excellent outturn.
	29	Durbhunga	„ 31, '88	Nil	Weather—cold mornings and hot days. Harvesting of *rubbi* crops not yet over. Sowing of *moong* and early rice in progress. Collection of opium completed. Price of common rice averages 20 seers per rupee.
	30	Mozufferpur	„ 31, '88	Nil	Weather—seasonable; warm. *Rubbi* harvest nearly completed; threshing commenced. Opium weighment will shortly commence.
	31	Sarun	„ 31, '88	Nil	Weather seasonable. *Rubbi* is being harvested. Gathering of opium over. Prospects of all standing crops good.
	32	Chumparun	„ 31, '88	Nil	Weather—mornings foggy, days hot with variable winds. *Rubbi* harvesting still going on; average yield estimated. Extraction of opium finished; weighment commences from the 5th proximo. *Cheena* is coming on well.
BHAGULPORE DIVN.	33	Monghyr	Mar. 31, '88	Nil	Weather—hot and dry. Harvesting of *rubbi* crops still going on; outturn fair. Mango crop promises well.
	34	Bhagulpur	„ 31, '88	Nil	Weather—seasonable. *Rubbi* harvest yielding about 8-anna outturn. *Mohua* crop also poor. Rain wanted.
	3[illegible]	Purneah	„ 31, '88	Nil	Weather—seasonable. Wheat below the average. *Bhadoi* and jute cultivation beginning.
	3[illegible]	Maldah	„ 31, '88	A few drops.	Weather—days warm, but nights still fairly cool. Winds slight and variable. Harvesting of *rubbi* crops still going on; outturn generally good except in the north, where some damage has been due to want of rain. Most of the *boro* paddy has been transplanted, and the sowing of *bhadoi* paddy is going on. Rain is much wanted for these crops. Common rice is selling at an average of 23½ seers per rupee.
	37	Sonthal Perghs.	„ 31, '88	Nil	Weather—dry with west winds. Sugarcane harvest going on. Rain wanted for indigo. *Mohua* crop is being gathered.
ORISSA.					
ORISSA DIVN.	38	Cuttack	Mar. 30, '88	Nil	Weather—fair. *Dalua* paddy is flowering and partly ripening. Price of rice stationary.
	39	Pooree	„ 29, '88	0·06	Weather—seasonable. Land is being ploughed for the next *sarad* crop. *Dalua* crop is being harvested. Common rice 24 seers 7 chittacks per rupee in the Sudder sub-division and 23 seers in the Khoorda sub division.
	40	Balasore	„ 30, '88	Nil	Weather—getting gradually warmer. Land is being tilled for rice. *Til* and other crops promise well. Sugarcane is being planted.
CHOTA NAGPORE.					
South-West Frontier Agency.					
CHOTA NAGPORE DIVN.	41	Hazaribagh,	Mar. 30, '88	Nil	Weather—seasonable; warm. Sugarcane is being planted and doing well. Prospects of *mohua* and mango good so far. Gathering of opium completed. Condition of agricultural stock fair.
	42	Lohardugga	„ 31, '88	Nil	Weather—hot. Harvesting of *rubbi* continues. Prices steady.
	43	Singbhoom	„ 30, '88	Nil	Weather—cool and misty in the mornings, but very warm during the daytime. *Rubbi* harvest continues; a 12-anna outturn expected. Mango and *mohua* so far satisfactory. Cattle-disease on the increase.
	44	Manbhoom	„ 31, '88	Nil	Weather—getting hotter every day. Spring crops doing fairly well. Good outturn of *mohua* expected except in Govindpore, where the flowers have been injured by rain and wind.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten. The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12 station in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 30th of March 1888.

Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. RAINFALL. Of week. Mean for district.	Of week. Normal mean.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1887. Mean for district.	Since 15th May 1887. Normal mean.	Since 15th May 1887. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	DISTRICT.	METEOROLOGICAL DIVISION.

Explanation.—...... Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA *the* 3*rd April* 1888.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 30TH MARCH 1888.

AT the commencement of the week pressure was very low and considerably below the average of the period in Bengal. Strong westerly winds were blowing across Behar into West Bengal, and unusually strong winds across the Bengal coast into Orissa, South and East Bengal. Pressure began to increase on the 25th, on which day the dry hot winds blowing across Behar gave very high temperatures in West Bengal. Pressure steadily increased until the 29th, when it was from one-sixth to a quarter of an inch higher than on the 24th. With the rise of the barometer the winds in Behar decreased in strength, and the day temperatures in Western Bengal as well as in South Behar decreased several degrees. On the 27th and 28th a few local thunder-showers occurred at several stations in East and North Bengal. The amounts of rain registered were very small, and the slight disturbance which gave rise to these thunder-storms apparently passed away on the evening of the 28th. At this time an unusually rapid rise of the barometer was in progress in Upper India. This caused on the 28th a very considerable and rapid extension of the westerly winds across Behar into Central and North Bengal as far east as Jessore, Rampore Beauleah, Bogra, Serajgunj and Dinagepore. These dry winds gave unusually low humidities to Central Bengal on the 28th and morning of the 29th, after which they retreated, and were replaced by the usual damp southerly winds of the season. The barometer began to fall on the 30th, on which day (the last of the week) fine settled weather with clear skies prevailed over the whole province.

Pressure.—As stated above, the barometer rose steadily and continuously from the 23rd to the 29th, when the return downward movement commenced. The rise varied from ·15″ to ·25″ in amount, and was greatest in North Bengal and Behar. Pressure was so low at the commencement of the week that, notwithstanding the large rise, the mean pressure for the week was below the average over the greater part of the province. The deficiency for the week was ·025″ in amount in South-West Bengal, ·02″ in North Bengal and Behar, and ·01″ in Orissa.

The mean pressure of the week was almost identical with the average of the period in East Bengal and Chutia Nagpur.

Temperature.—The conditions at the beginning of the week gave very high day temperatures to Behar, South-West and Central Bengal, and Chutia Nagpur. This culminated on the 25th, when the highest temperatures of the week and month were observed. The following are amongst the most remarkable :—

	Maximum temperature during week.
Midnapore	107·3° on the 25th.
Bankoora	106·1° ditto.
Raneegunge	105·8° ditto.
Chyebassa	104·8° ditto.
Burdwan	104 7° ditto.
Gya	103 0° ditto.
Jessore	103 3° ditto.

The temperature fell considerably on the 26th and varied from day to day during the remainder of the week within moderate limits.

The mean temperature of the week was above the average for all divisions except North Behar. The excess averaged 3·2° for East Bengal, 2·6° for South-West Bengal, 2° for Chutia Nagpur, and 1 7° for South Behar and Orissa.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 30th March 1888.

	Normal mean maximum temperature for the week ending 30th March.	Actual mean maximum temperature for the week ending 30th March 1888.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 30th March.	Actual mean minimum temperature for the week ending 30th March 1888.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 30th March.	Actual mean daily temperature for the week ending 30th March 1888.	Variation of actual mean from the normal.

Purneah	94 3	94 2	−0 1	65 4	64 1	−1 3	79 9	79 2	−0 7
Hazaribagh ..	93·0	95·0	+2 0	66 0	68 0	+2 0	80 0	81·9	+1 9
Darjeeling ..	57 7	60 5	+2 8	44 0	49 2	+5 2	50 9	54 9	+4 0

Humidity.—The air has been drier than usual in Behar and Chutia Nagpur during the week. The only remarkable feature in this element of observation during the week was the

very large and sudden decrease of humidity in West and Central Bengal on the morning of the 28th, caused by the extension of westerly dry winds into that area. No change occurred in Behar, where the air was on the whole slightly damper than on the 27th. The following examples will illustrate the magnitude of the change :—

	Humidity at 10 a.m.		Decrease in 24 hours.
	27th March.	28th March.	
Bancoora	62	20	42
Raniguuj	75	11	64
Berhampore	74	18	56
Krishnaghur	70	16	54
Burdwan	68	14	54
Calcutta	74	24	50
Jessore	78	39	39
Bogra	69	29	40
Serajgunj	72	36	36
Rampore Beauleah	67	21	46
Maldah	50	19	31
Dinagepore	42	22	20

The humidity increased with almost equal rapidity in Bengal on the afternoon of the 29th and morning of the 30th.

Rain.—A few light local showers of little importance fell on the 23rd in the Darjeeling Hills, and on the 27th and 28th in some districts of East and North Bengal. The amounts registered were in all cases small, and averaged less than a tenth of an inch for these meteorological divisions.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 30th of March 1888 :—

Meteorological Divisions.	Temperature.						Rainfall.									
			Averages for week.				Of week.			Rainy days.			Since 1st of month.		Since 15th May 1887.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, ⩍ dew.

JOHN ELIOT,
Offg. Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
The 2nd April 1888.

JOHN ELIOT,
Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

THE chief incidents in connection with the vital statistics of the principal Municipalities in Bengal, for the week ending 17th March 1888, are the following:—

1. That during the week in question births and deaths were registered in the proportions, respectively, of 21·3 and 29·7 per 1,000 of population, as opposed to 19 and 26·1 per 1,000, respectively, during the preceding week ending 10th March, indicating a considerable improvement in the registration of both the casualties.

2. That births and deaths were recorded in the highest rates from the following Municipalities:—

*Births.**	Ratio per *mille*.	*Deaths.*	Ratio per *mille*.
Beauleah	55·2	Comillah	84·7
Kishnaghur	45·4	Suburbs of Calcutta	61·4
Hughli	43·0	Naraingunj	41·4
Naraingunj	41·4	Gya	32·8
Comillah	38·5	Darjiling	32·6
Durbhanga	37·8	Midnapore	32·5
Bhagulpore	31·7	Burdwan	32·0
Monghyr	30·7	Durbhanga	30·7
		Hughli	29·5

3. That the specific diseases, as noted below, proved fatal at the rates exhibited opposite them:—

	Ratio per *mille* during the weeks ending—17th March 1888.	10th March 1888.
Cholera	8·2	5·1
Small-pox	·1	·1
Fever	9·9	10·3
Bowel-complaints	3·4	2·8
Injury	·2	·2
Other causes	7·8	7·6

indicating chiefly, that the mortality from cholera was much higher during the week under notice than during the preceding week.

4. That while bowel-complaints proved fatal only in Hughli Municipality at the high rate of 10·7 per 1,000 of population, and the deaths from small-pox and injury were nowhere noticeably large, the other diseases enumerated above caused the highest mortality in the Municipalities mentioned below:—

Cholera.	Ratio per *mille*.	*Fever.*	Ratio per *mille*.	*Other causes.*	Ratio per *mille*.
Comillah	53·9	Comillah	26·9	Gya	20·5
Suburbs of Calcutta	29·6	Burdwan	25·9	Midnapore	17·0

5. That the mortality of the week, classified under the heads of *Sex*, *Class* and *Age*, stood as shown below:—

According to Sex.	Ratio per *mille*.	*According to Class.*	Ratio per *mille*.	*According to Age.*	Ratio per *mille*.
Males	31·8	Christians	21·7	Under 1 year	190·4
Females	27·3	Hindus	28·6	1 and under 5 years	38·4
Ratio of male deaths to every 100 female deaths	132	Mahomedans	32·8	5 " 10 "	16·3
				10 " 15 "	13·1
				15 " 20 "	19·3
				20 " 30 "	26·1
				30 " 40 "	21·2
				40 " 50 "	23·7
				50 " 60 "	32·8
				60 years and upwards	60·7

K. P. GUPTA, M.B., F.R.C.S., *Surgeon-Major*,
Offg. Sanitary Commissioner for Bengal.

The 2nd April 1888.

Statement showing the Results of the Registration of Births and Deaths in the Principal Municipalities in Bengal during the week ending 17th March 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

INCREASE. Tons.

Coal 240

This increase is due to less import during the previous month.

Cotton, raw 9

This increase is due to greater demand.

Cotton piece-goods —(1) European... 22

There being no sufficient water in the River Bhagiruttv, the steamer service between Calcutta and Jeaganj is stopped, and the merchants are bringing their goods by rail; hence the increase.

Grains—(2) Rice 385

This increase is due to greater despatches from the intermediate stations owing to good crops and favourable demands this year.

(5) Others 129

The increase under this head is due to greater demands for coolie.

Oilseeds.—(1) Linseed 37

The river communication being stopped, the merchants are bringing their goods by rail; hence this increase.

(2) Mustard and rape 57

The river communication being stopped, the merchants are bringing their goods by rail; hence this increase.

Sugar.—(1) Drained 14

This increase is due to river communication being stopped, the merchants are bringing their goods by rail.

DECREASE.

Jute—(1) Raw 38

This decrease is due to dull market.

Provisions.—(3) Others 46

This decrease is due to potatoes being less imported during the month.

Railway plant and Rolling-stock 31

This decrease is due to less materials being carried during the month.

Silk, raw (Indian) 81

This decrease is due to less import of tusser cocoons this year.

Sugar—(2) Undrained 18

This decrease is due to less demand.

R. G. MOOKERJEE, *Manager, Nalhati State Railway.*

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 7th April 1888.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.		*Western Districts.*		
BURDWAN DIVN.	1	Burdwan Apl. 7, '88	0·03	Weather—seasonable. There are no crops but sesamum and sugarcane. Prospects good. Common rice 22 seers per rupee.
		Culna ...	0·06	
	2	Bankoora " 7, '88	0·11	Weather—seasonable. Indigo, cotton, *til* and *boro* paddy coming on well. Lands are being prepared for sugarcane. Prices stationary.
	3	Beerbhoom " 7, '88	Nil	Weather—warm. Sugarcane pressing nearly over; outturn good.
	4	Midnapur " 7, '88	Nil	Weather—moderately warm. Crops doing well.
	5	Hooghly " 7, '88	Nil	Weather—very hot. Rain now much wanted for *boro dhan* and mangoes and for ploughing.
		Howrah " 9, '88	Nil	Weather—normal. *Boro* crop promises well.
		Central Districts.		
PRESIDENCY DIVN.	6	24-Perghs. Apl 10, '88	Nil	Weather—hot and dry. No crops on the ground except sugarcane, which flourishes. Ploughing continues.
	7	Nuddea " 7, '88	Nil	Weather—very sultry; nights foggy and damp. *Rubbi* harvest over; outturn fair throughout the district. Tillage for early rice in good progress. Indigo sowings large.
		Ranaghat ...	0·28	
	8	Khoolna " 7, '88	Nil	Weather—hot in daytime, cool south breeze at night. *Boro* rice promises well. Ploughing going on. Rain wanted.
	9	Jessore " 7, '88	Nil	Weather—very hot, but cool mornings and evenings. Rain wanted for sowing of paddy and indigo. Prospects of *boro* in Narail good.
	10	Moorshedabad " 7, '88	Nil	Weather—getting warmer. Sowing of *bhadoi* paddy going on. Reaping of *rubbi* crops over.
RAJSHAHYE DIVN.	11	Dinagepur Apl. 7, '88	Nil	Weather—hot with strong west winds. *Kouni*, jute and *bhadoi* are being sown.
	12	Rajshahye " 7, '88	Nil	Weather—very hot. Cutting of spring crops continues. Preparation of land for jute and paddy going on. Rain wanted.
	13	Rungpur ...	...	Report not received.
	14	Bogra " 7, '88	Nil	Weather—very hot and dry. High winds all day. State and prospects of crops good. Rain would be acceptable.
	15	Pubna " 7, '88	Nil	Weather—hot. Rain wanted. *Khesari, matar*, linseed, gram and wheat almost harvested with poor outturn. Paddy and jute are being sown.
	16	Darjeeling " 7, '88	Nil	Weather—fine. Rain much wanted for the growing crops in the hills. Ploughing for early rice continues in the plains. Prices steady.
	17	Julpigoree " 7, '88	Nil	Weather—hot and bright. Ploughing for early rice in progress. Sugarcane is being planted. Common rice sells at 21 seers per rupee at the Sudder station.
		Eastern Districts.		
DACCA DIVISION.	18	Dacca Apl. 7, '88	Nil	Weather—hot. *Rubbi* crops are still being gathered. Cultivation of land for paddy continues. *Aus* paddy and jute are being sown.
	19	Furreedpur " 7, '88	Nil	Weather—hot. Prospects of crops satisfactory.
	20	Backergunge " 6, '88	Nil	Weather—seasonable. Prospects of crops good.
	21	Mymensingh " 6, '88	0·75	Weather—hot and sultry. Prospects of crops good.
		Kishoregunge ...	0·42	
CHITTAGONG DIVN.	22	Chittagong Apl. 10, '88	0·04	Weather—seasonable. Prospects of standing crops fair. Prices uncharged.
	23	Noakholly " 6, '88	Nil	Weather—seasonable. *Rubbi* crops mostly harvested; outturn fair. Sowing of *aus* has begun.
	24	Tipperah " 5, '88	Nil	Weather—seasonable; cloudy and cool. Rain wanted. Standing crops getting on nicely. Preparation of lands and sowing of jute and paddy going on briskly.
		Brahmanbariah ...	1·07	
	25	Chittagong Hill Tracts. " 3, '88	Nil	Weather—hot with fogs again in the early morning and late at night. *Jum* cutting nearly finished. Tobacco and chillies doing well.
		Hill Tipperah " 4, '88	1·10	Weather—hot and windy. Lands are being propared for early rice. Prospects of *boro* paddy and chillies fair.

Division	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR.					
Patna Divn.	26	Patna	Apl. 7, '88	Nil	Weather—hot and dry. *Rubbi* threshing and opium weighment in progress. Fields are being prepared for *cheena* crop. Prices of food-grains stationary.
	27	Gya	„ 7, '88	Nil	Weather—seasonable. *Rubbi* being threshed. Weighment of opium begun. Sugarcane being irrigated.
	28	Shahabad	„ 7, '88	Nil	Weather—hot with strong west wind generally at midday. Threshing of *rubbi* crops still in progress. Sugarcane being planted. Opium collection is over; weighments have begun; outturn expected to be excellent this year.
	29	Durbhunga	„ 7, '88	Nil	Weather—hot. Threshing of *rubbi* crops progressing. Early rice and *moong* are being sown, and have germinated in parts. Indigo looks well. Prices remain stationary.
	30	Mozufferpur	„ 7, '88	Nil	Weather—warm with west winds at midday. Harvesting of *rubbi* crops approaching completion. Rice, *moong* and *cheena* having germinated are thriving.
	31	Sarun	„ 7, '88	Nil	Weather—seasonable. *Rubbi* crops all cut; outturn estimated at 13 annas. *Cheena* is being sown. Indigo is coming up well.
	32	Chumparun	„ 7, '88	Nil	Weather—fair and moderately hot; very strong wind prevails. Harvesting of *rubbi* crops almost finished; they are mostly on threshing floor. Weighment of opium commenced. Indigo sowings are above ground. Fields are being prepared in the Bettiah sub-division for *bhadoi* and *aghani* sowings.
Bhagulpore Divn.	33	Monghyr	Apl. 7, '88	0·02	Weather—hot and dry; west wind prevailing. Harvesting of *rubbi* crops nearly finished. Threshing has commenced. Prospects of mango crop continue good.
	34	Bhagulpur	„ 7, '88	Nil	Weather—seasonable. *Rubbi* harvest nearly complete. Rain wanted for cultivation and sowing. Sugarcane seedlings doing well.
	35	Purneah	„ 7, '88	Nil	Weather—warm. West wind prevails. *Rubbi* crops nearly harvested. *Bhadoi, moong* and jute being sown. Rain would do good.
	36	Maldah	„ 7, '88	Nil	Days very hot, but nights still fairly cool. High west winds. The long-continued drought is becoming rather serious, especially for the *boro* and *bhadoi* paddy. The harvest of *rubbi* crops is nearly over. The outturn would have been good but for the drought, and is now probably not more than 12 annas. Common rice selling at an average of 23½ seers per rupee.
	37	Sonthal Perghs.	„ 7, '88	Nil	Weather—hot with high west winds. Rain wanted for sugarcane. Want of rain has spoilt indigo and *rubbi* crops except wheat and linseed, which are good. Mango and *mohua* doing well.
ORISSA.					
Orissa Divn.	38	Cuttack	Apl. 6, '88	Nil	Weather—hot. Ploughing for *beali* and *sarad* rice going on, but rain wanted. Cotton in flower. Rice is sold at 20 seers per rupee in town.
	39	Pooree	„ 5, '88	Nil	Weather—seasonable; occasionally cloudy with high winds. Ploughing for *sarad* crop going on. *Dalua* crop being harvested. *Rubbi* being gathered. *Dalua* and miscellaneous crops including mango are in want of water in the Khoorda sub-division. Common rice 24 seers 12 chittacks per rupee in the Sudder sub-division and 25 seers 4 chittacks in the Khoorda sub-division.
	40	Balasore	„ 6, '88	0·44	Weather—seasonable. Cultivation going on. Few crops on the ground.
CHOTA NAGPORE.					
South-West Frontier Agency.					
Chota Nagpore Divn.	41	Hazaribagh,	Apl. 6, '88	Nil	Weather—seasonable; very warm. *Mohua* yielding indifferently in parts of the district. Prospects of mango generally good. Condition of agricultural stock fair on the whole. Prices steady.
	42	Lohardugga	„ 7, '88	Nil	Weather—hot. *Mohua* crop good. Harvesting of *rubbi* going on. Prices steady.
	43	Singbhoom	„ 6, '88	0·08	Weather—variable. Slight rain during the week. *Rubbi* being harvested with fair results. Cotton yielding well. Sugarcane being planted.
	44	Manbhoom	„ 7, '88	Nil	Weather—hot and dry; considerably hotter than last year. Wheat and barley being harvested; ten annas outturn expected. Sugarcane being planted. *Mohua* and lac expected to do very well.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF MARCH 1888.

The transition from the cold-weather conditions to those of the hot season in Bengal, which usually commences at the close of February, becomes complete in March. The normal features of the meteorology of March are therefore rapidly increasing temperature, gradually decreasing pressure, a general increase in the air motion, winds becoming westerly at the inland stations and south-westerly at the southern stations, while the northerly component in the wind directions almost disappears except in Behar; the air is also generally very dry, skies are clear, and there is an almost complete absence of rain, unless the normal weather conditions are disturbed by the occurrence of the local storms known as nor'-westers. These storms are believed to be brought about by the interaction of the more or less opposing wind systems which obtain to a certain extent over Bengal in this month, for at the western stations, winds are strongly westerly, at the southern stations strong moist southerly winds usually blow, while easterly winds continue to blow down the Assam Valley, and sometimes penetrate as far as Purneah and Durbhunga. From the nature of the formation of these nor'-westers and their local character, the rainfall brought by them, which is sometimes decidedly heavy, is very irregularly distributed. Occasionally also the normal conditions in March are disturbed by the formation of depressions over Northern India, which extend and travel in a south-easterly direction, and give unsettled weather and perhaps rain to Behar, Chutia Nagpur, and North Bengal, but these barometric depressions are usually less numerous and less influential in character than they are in the previous cold-weather months.

By these irregular actions a moderate amount of rain is brought to Bengal during March. The normal rainfall is heaviest in East Bengal, where it averages about 2·8 inches. In South-West Bengal, North Bengal, Chutia Nagpur, and Orissa the fall ranges from about one to one and a half inches, while in Behar it is rather less than half an inch.

Meteorology of the month.—The chief features in the meteorology of March 1888 have been—

1. A mean pressure over the whole province which has been almost absolutely normal, though the western stations in the province have shown very slight defects while the other stations show corresponding excess pressures. The mean pressure of the whole of Bengal has not varied from the normal by more than about two thousandths of an inch, while in Assam there has been a defect of about six thousandths of an inch only.
2. The average temperature of the whole province has been 0·8° in excess of the normal, the largest excess being confined to the districts Chutia Nagpur, South Behar and South-West Bengal, where it has varied from about two to one and a half degrees.
3. Humidity has been below the normal at almost all stations, the general defect being equal to about 4 per cent.
4. Cloud proportion has been also slightly smaller than usual over the greater part of the province.
5. Two slight periods of disturbance have occurred, the first accompanying the movement of a very feeble area of low pressure over Bengal, and which gave rise to local rain with storms on about the 9th and 10th, and the second period of disturbance, during which nor' westers were numerous, lasting from the 12th to the 15th, and which latter series gave even a larger amount of rain than the first, the rainfall during the second period being particularly heavy in parts of the East, South-West, and North Bengal districts.
6. Rainfall for the month has been decidedly above the normal in East and North Bengal, and in North Behar; it has been about half to two thirds the normal in Orissa and South-West Bengal, while rainfall has been almost absent in South Behar and Chutia Nagpur. In Assam decidedly heavy rain has been received during the month.

The weather conditions call for no particular comment during the early part of the month up till about the 7th, when a slight but distinct low pressure area was formed over West Bengal. On the 8th the feeble depression over Bengal was clearly marked, and in the wind directions over Northern India a general indraught was noticed towards the depression, while on the 9th there was a distinct tendency to a cyclonic circulation of winds over Bengal. The formation of this depression caused numerous showers, frequently accompanying local storms on the 8th and 9th in South-West, East, and North Bengal and Orissa, but the rainfal was heaviest in South-West Bengal. Rainfall then to a certain extent ceased, but still the barometer was low and below its normal height, and it was also irregular in its movements. There was also a tendency to a slight but distinctly marked depression in North and Central Bengal. The barometric changes of the 10th brought this into greater prominence on the 11th, and a strong inrush of southerly winds set in over South Bengal into the area of low pressure. Thunderstorms occurred on the 10th and 11th in North and East Bengal and the eastern districts of South-West Bengal, and some very heavy showers fell, more especially in the Dacca, Rungpore, and Julpigoree districts. A very rapid rise of the barometer occurred on the 12th, but it fell again rapidly on the 13th. Strong southerly

winds continued to blow on the 12th and 13th, notwithstanding the rapid barometric changes, and a second series of thunderstorms occurred on the 13th and 14th which were more general, and gave a larger amount of rain than the first series. They extended over East and North Bengal, and nearly the whole of South-West Bengal and North Behar. The rainfall during this series of storms was especially heavy in the Dacca, Furreedpore, Nuddea,* Jessore, Mymensingh, Julpigoree and Cooch Behar districts. The barometer continued to move irregularly but slightly for some days longer, but the southerly winds fell off in strength on the 15th and 16th, and the weather became somewhat less unsettled. Conditions then became fairly normal, with rather strong westerly winds blowing across Behar into Bengal and rather strong winds across the Bengal coast into Orissa, South and East Bengal, and with increasing pressure. A few local showers again occurred at several stations in East and North Bengal on the 27th and 28th, but the amounts of rain registered were small. At this time an unusually rapid rise of the barometer was in progress in Upper India, which caused a very rapid and considerable extension of westerly winds across Behar into Central and North Bengal, as far east as Dinagepore, Serajgunge, and Jessore, and which gave unusually low humidities to those districts for two days, but after this time the westerly winds retreated and were replaced by moist southerly winds. From this time to the end of the month there was no change of importance to record.

Pressure—At the commencement of the month was slightly above the normal, but with the setting in of the disturbed conditions, the pressure oscillations became large, and in some cases the changes were as large as one and two-tenths of an inch. The average pressure of the province, however, for the first-half of the month was distinctly but only slightly above the normal, though in different districts the variations were much larger, decidedly deficient pressure being recorded in West and South-West Bengal. For the third week in the month the general pressure was again slightly in excess of the normal, but during the last week, over the greater part of the province, pressure was decidedly below the normal, the deficiency equalling 0·025 inch in South-West Bengal, 0·02 inch in North Bengal, and 0·01 inch in Orissa. The mean pressure of the province for the whole month has therefore been almost normal, and the average variation is not larger than about two thousandths of an inch. In the west of the province as represented by such stations as Calcutta, Burdwan, and Gya pressure has been distinctly below the normal, but at the eastern and northern stations pressure has been in excess, and the excess is very noticeable in the higher strata of the atmosphere, the largest excess being 0·021 inch at Darjeeling. In Assam pressure was in slight excess at Sibsagar, while it has been in defect at Dhubri and Silchar, the defect equalling 0·018 inch at the latter station.

Temperature.—There has been a steady and in some districts a rather rapid rise of temperature during almost the whole of the month, the rise being most rapid in such districts as South Behar and Chutia Nagpur. Comparing the average mean temperatures of each of the large meteorological districts of the province for the week ending 2nd March with those of the week ending 30th March, it is found that in South Behar there has been a rise of 11·2° in the mean temperature in the month, in Chutia Nagpur the rise has been 10·3°, in East and North Bengal it has been between 9° and 10°, in North Behar the mean temperature has risen 8·6°, in Orissa 6·4°, and in South-West Bengal 5·1°. There has therefore been an increase in the mean temperature of the province of 8·7° during the month. Comparing the average temperatures of the whole province with the normal for the month, the actual has been in excess by 0·8°, but in Chutia Nagpur the excess is no less than 2·1°.

Some particularly high maximum temperatures were recorded towards the close of the month, the hottest day being the 25th, and on this day the maximum temperature at Midnapore was 107·3°, at Bankoora 106·1° and at Raneegunge 105·8° while temperature of from 103° to 105° were recorded at Chyebassa, Burdwan, Gya, and Jessore.

The following table gives a comparative statement of the temperature variations for the four weeks of March at nine typical stations:—

Monthly variation table from the weekly comparison table during the month of March 1888.

* Heavy rain.

Rainfall.—The periods of rainfall during the month have already been referred to under the general summary, and it only remains to state the amounts and the distribution. The heaviest falls have occurred in the districts of East Bengal, which have received an average amount of 8·65 inches, which is about 20 per cent. larger than the normal fall. North Bengal has received an average rainfall of 1·47 inches, which is also rather more than 20 per cent. in excess of the normal, while North Behar has received an average fall of 0·50 inch or about 30 per cent. in excess of the usual amount. In all other districts the falls have been below the normal. South-West Bengal has received an average amount of 1·01 inches or only two-thirds of the normal fall. In Orissa an average amount of 0·48 inch of rain has been recorded, which is, however, only a little over 40 per cent. of the normal fall, while in South Behar and Chutia Nagpur the falls have been so small in amount that they only average a few hundredths of an inch.

Taking up the rainfall rather more in detail, in Orissa the Pooree district has been almost rainless, while the Cuttack and Balasore districts have received moderate amounts of rain. In South-West Bengal the districts which have received very little rain are South-West Midnapore and South 24-Pergunnahs, and Bankoorah, while Midnapore, 24-Pergunnahs, Howrah, Hooghly, Burdwan, Beerbhoom, Moorshedabad, Jessore, and Khoolna districts have received moderate amounts, and Nuddea has received a fall in excess of the normal. In East Bengal, Noakholly, Furreedpore, Dacca, and Commillah districts have received decidedly heavy rain, considerably larger than the normal; Mymensingh has received a fall about equal to the normal, and Chittagong, Chittagong Hill Tracts, and Backergunge falls below the normal. In North Bengal, Darjeeling, Cooch Behar, Julpigoree, Rungpore, Rajshahye, and Pubna districts have received falls above the normal; Dinagepore a fall equal to the normal, and Bogra a fall decidedly below it. In North Behar the only districts which have received moderate rain are Purneah, North Bhagulpore and Durbhunga, while all the remaining districts in Behar and Chutia Nagpur, except the Sonthal Pergunnahs, have received very small amounts of rain, or in the case of Patna, South Bhagulpore, Monghyr, and Chyebassa districts no rain at all.

In Assam heavy rain has been received, and at Silchar during the month no less than 8·98 inches were received; at Sibsagar 6·41 inches were also recorded, while at Dhubri the fall was smaller and only equalled 2·78 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven Meteorological divisions of the Province for the month of March 1888:—

Meteorological Divisions.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 15th May 1887.

METEOROLOGICAL OFFICE, BENGAL,
The 10th April 1888.

ALEXANDER PEDLER,
Offg. Meteorological Reporter to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of March 1888.

	Inches.	Date.	Hour.
The mean pressure of the month	29·847		
The average pressure of March from 24 years' registers ...	29·869		
The highest pressure in the month	30·012	1st	10h.
The lowest pressure in the month	29·635	24th	16h.
The range of pressure*	0·377		
	Hours.		
The total number of hours of bright sunshine during the month	272·7		
The maximum possible number of hours of sunshine ...	371·3		
	°		
The mean temperature of the month	80·1		
The average temperature of March from 24 years' registers	80·6		
The highest temperature in the month	98·9	24th	
The lowest temperatue in the month	59·1	1st	
The range of temperature during the month	39·8		
The mean daily range of temperature	21·0		
The greatest range of temperature in one day	29·8	3rd	
	Per cent.		
The mean humidity of the month	70		
The average humidity of March from 24 years' registers ...	66		
	Inches.		
The mean vapour tension of the month	0·702		
The average vapour tension of March from 9 years' registers	0·702		
The mean cloud proportion of the month	2·86		
The average cloud proportion of March from 11 years' registers	2·31		
	Inches.		
The total rainfall of the month	2·37		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	2·26		
The average fall of March from 48 years' registers ...	1·34		
The greatest fall in 24 hours	1·41	14th	
	Days.		
The number of rainy days in the month	3		
The average number of rainy days in March from 24 years' registers	4		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	146·5		
The mean difference of sun and air temperatures	55·1		
The greatest sun temperature	151·9	23rd	
The greatest excess of sun over air temperature	59·6	13th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	63·7		
The mean depression of the noctural radiation thermometer below the minimum air temperature at 4 feet above the ground	6·6		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	11·1	3rd	
	Miles.		
The mean movement of the wind per day	110·5		
The greatest movement of the wind in one day	224·0	13th	
The greatest movement of the wind in one hour	19·0	13th, 1 to 2 P.M.	

The number of hours with winds from each of the 8 points—

N. 15, NE. 7, E. 13, SE. 44, S. 185, SW. 249, W. 86, NW. 50, Calm 75.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1·0° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

JOHN ELIOT,

Offg. Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;

Calcutta, the 9th April 1888.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten. The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12 station in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 6th of April 1888.

Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Rainfall. Of week. Mean for district.	Of week. Normal mean. CALCUTTA, *the* 10*th April* 1888.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 6TH APRIL 1888.

The meteorological conditions and changes in Bengal during the past week call for little or no comment. Over the greater part of the Province weather has been of the normal hot weather character; dry westerly and south-westerly winds have generally obtained, temperature has been very high, while pressure has oscillated in the usual manner, and there has, at the great majority of stations, been a complete absence of rain, though, in a few instances, owing to slightly disturbed conditions, local storms occurred on one or two days. On the 31st March and 1st April a few small storms gave rain to some of the stations in North Bengal, close to the hills, and to the Mymensingh and Tipperah districts in East Bengal. These were probably connected with disturbed conditions over Assam and Cachar, for a slight barometric depression was reported over this area, which gave rise to moderate rain. Again, on the 3rd and 4th, a few showers were reported in Orissa and at some stations in South-West Bengal and Chutia Nagpur, but the amounts were generally small. These latter unsettled conditions were apparently connected with a rather rapid fall of pressure which took place over South Bengal at this time. With these exceptions, fine settled weather has obtained throughout the week.

Pressure.—A rather rapid fall of pressure took place on 31st March, on which day slightly disturbed conditions existed over East and North Bengal. On the 1st April, however, an almost equal rise of pressure took place, but this was followed by a fall which lasted for three days, and on the 4th instant the fall was decidedly rapid. Disturbed conditions again set in with the falling pressure, but on the 5th and 6th pressure rose steadily and again weather became settled. During the greater part of the week, therefore, pressure has been falling, and the average pressure for the period has been decidedly below the normal, the mean for the whole week for the Province being 0·045 inch in defect. The defect has been fairly equally distributed over the whole Province.

Temperature.—Has again been very high almost throughout the week, and maximum temperatures in excess of 100° have been reported on one or more days at no less than 21 out of the 39 reporting stations in the plains. The following very high maximum temperatures have been registered:—

At Chyebassa,	on the 3rd April	...	107·9°
„ Raneegunge	„ 3rd „	... ...	106·5°
„ Bankoorah	„ 3rd „	... ...	106·1°
„ Midnapore	„ 6th „	.. ..	105·4°
„ Dehree	„ 2nd „	... ...	105·2°
„ Burdwan	„ 4th „	... ...	104·6°

The mean temperature for the week has consequently been above the normal in all districts, and the general temperature for the whole Province shows an excess of no less than two degrees, while in Chutia Nagpur the excess equals the large amount of 3·3°.

The actual temperatures recorded and their variation from the normal are clearly seen in the following table where the temperature data at eight typical stations in the Province are given:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 6th April 1888.

	Normal mean maximum temperature for the week ending 6th April.	Actual mean maximum temperature for the week ending 6th April 1888.	Variation of actual mean from the normal. Rainfall.—The only meteorological divisions which have received an average rainfall exceeding a tenth of an inch are Orissa and East Bengal. South-West and North Bengal and Chutia Nagpur have received very small falls, but so small as to be of little importance, while Behar has been practically, if not absolutely, rainless. The largest rainfall has been received in the Comillah district, the stations in which average rather more than half an inch, while in the Balasore, Julpigoree, and Cooch Behar districts the falls average from a quarter to half an inch of rain.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 6th of April 1888 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of March.		Since 15th May 1887.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, ⌓ dew.

JOHN ELIOT,
Offg. Meteorological Reporter to the Govt. of India.

	Inches.
The total fall of rain from 1st to 7th April 1888	Nil.

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;
The 9th April 1888.

JOHN ELIOT,
Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

FROM the annexed table exhibiting the mortuary statistics of the districts in Bengal (excluding Hariharganj outpost in Lohardugga, from which no return has yet been received) for the month of January 1888, it appears—

1. That the deaths of 138,749 persons were registered among a population of 66,163,884, or at the rate of 25·08 per 1,000 per annum, against 26·28 per 1,000 in the preceding month, and 26·88 per 1,000 in the corresponding month of the past year, indicating, as compared with both the periods, a retrogression in the number of deaths recorded.

2. That the undermentioned districts furnished the highest proportions of deaths:—

Districts.	Ratio per *mille.*	*Districts.*	Ratio per *mille.*
Dinajpur	42·72	Nuddea	31·80
Rajshahye	41·88	Hughli	30·72
Maldah	39·96	Howrah	29·88
Julpaiguri	39·84	Balasore	29·40
Bogra	38·28	Burdwan	29·28
Rungpore	35·52	Pubna	29·16
Khulna	35·16	Noakhali	28·32
24-Pergunnahs	34·32	Monghyr	27·96
Puri	33·72	Darjiling	27·72
Birbhum	33·36	Midnapore	26·76
Purneah	33·24	Murshidabad	26·76
Backerganj	32·52	Jessore	26·16
Mymensing	32·40		

3. That the mortality from the specific diseases mentioned in the appended table is shown below. The figures indicate that cholera prevailed with considerably less fatality during the month under notice as compared with the corresponding month of the preceding year, and that the fatal results from the rest of the diseases exhibited only fractional variations, excepting injury, which maintained the same death-rate:—

	Ratio per *mille* during— January 1888.	January 1887.
Cholera	·84	3·00
Small-pox	·08	·04
Fever	19·08	18·96
Bowel-complaints	·84	·96
Injury	·12	·12
Other causes	3·96	3·60

4. That the following districts returned conspicuously high mortality from cholera and fever, and that no districts exhibited any noticeable high death-rate from the other diseases mentioned in the foregoing table, excepting in Puri, where 20·88 per 1,000 of the population died from the diseases coming under the head of "Other causes":—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*
24-Pergunnahs ...	6·12	Dinajpur	40·44
Mymensing ...	5·16	Rajshahye	39·84
Howrah ...	3·36	Maldah	38·28
Midnapore ...	2·76	Julpaiguri	37·56
Balasore ...	2·40	Rungpore	33·84
Chittagong ...	2·28	Bogra	33·36
Puri ...	2·16	Purneah	32·40
		Khulna	28·44
		Pubna	27·48
		Nuddea	27·36
		Birbhum	26·64
		Murshidabad	24·12
		Burdwan	24·00
		Mymensing	22·92
		Hughli	22·80
		Noakhali	22·80
		Jessore	22·44
		Monghyr	22·44
		Darjiling	21·72
		24-Pergunnahs ...	21·12

5. That in relation to *Sex, Class* and *Age*, the mortality of the month stood as follows:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	27·00	Christians	19·20	Under 1 year ...	169·08
Females ...	23·16	Hindus	23·04	1 and under 5 years...	25·20
Ratio of male deaths to every 100 female deaths ...	114	Mahomedans ...	29·64	5 " " 10 " ...	10·92
		Budhists	22·82	10 " " 15 " ...	9·60
		Other classes ...	20·28	15 " " 20 " ...	15·12
				20 " " 30 " ...	17·40
				30 " " 40 " ...	19·32
				40 " " 50 " ...	25·92
				50 " " 60 " ...	38·64
				60 years and upwards ...	68·04

K. P. GUPTA, M.B., F.R.C.S., *Surgeon-Major,*
Offg. Sanitary Commissioner for Bengal.

The 9th April 1888.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,
The 9th April 1888

K. P. GUPTA, M.B., F.R.C.S., *Surgeon-Major,*
Offg. Sanitary Commissioner for Bengal.

MEMORANDUM.

The birth and death returns from the principal Municipalities in Bengal furnish the following results for the week ending 24th March 1888.

1. That births and deaths were registered at the rates, respectively, of 22·5 and 29·3 per 1,000 of population, as opposed to 21·3 and 29·7 per 1,000, respectively, during the preceding week ending 17th March, showing an improvement in the registration of births.

2. That the highest proportions of births and deaths were returned from the following Municipalities:—

Births.

	Ratio per mille.
Naraingan j	57·9
Beauleah	49·9
Comillah	42·3
Arrah	41·9
Bhagulpore	31·7
Monghyr	30·7

Deaths.

	Ratio per mille.
Comillah	80·8
Suburbs of Calcutta	58·7
Utterpara	47·2
Serampore	43·2
Kishnaghur	39·8
Gya	32·8
Howrah	31·5
Beauleah	31·5
Puri	31·5
Burdwan	30·5

3. That in comparison with the results of the preceding week, there was a noticeable enhancement of mortality from cholera, and only small differences in the casualty-rates from the rest of the death causes, *vide* figures given below:—

	Ratio per *mille* during the weeks ending— 24th March 1888.	17th March 1888.
Cholera	9·3	8·2
Small-pox	·2	·1
Fever	9·8	9·9
Bowel-complaints	2·6	3·4
Injury	·4	·2
Other causes	7·0	7·8

4. That of the diseases abovenamed, cholera, fever and the maladies coming under the head of "other causes" proved conspicuously fatal in the following Municipalities, the other diseases exhibiting no special local severity:—

Cholera.

	Ratio per mille.
Comillah	38·5
Suburbs of Calcutta ...	30·7
Serampore	23·6
Howrah	20·0
Kishnaghur	15·1
Puri	8·4
Gya	2·7

Fever.

	Ratio per mille.
Comillah ...	26·9
Beauleah ...	23·6
Kishnaghur ...	22·7

Other causes.

	Ratio per mille.
Puri	14·7
Gya	11·6
Dacca	11·0
Suburbs of Calcutta ...	10·3

5. That the mortality in relation to *Sex*, *Class* and *Age*, stood as noted below:—

According to Sex.

	Ratio per mille.
Males	31·9
Females	26·3
Ratio of male deaths to every 100 female deaths	137

According to Class.

	Ratio per mille.
Christians	13·0
Hindus	28·9
Mahomedans ...	30·8
Other classes ...	36·4

According to Age.

	Ratio per mille.
Under 1 year ...	198·9
1 and under 5 years ...	45·5
5 " 10 " ...	18·3
10 " 15 " ...	12·7
15 " 20 " ...	17·2
20 " 30 " ...	22·3
30 " 40 " ...	22·8
40 " 50 " ...	20·4
50 " 60 " ...	36·0
60 years and upwards ...	51·7

K. P. Gupta, M.B., F.R.C.S., *Surgeon-Major*,
Offg. Sanitary Commissioner for Bengal.

The 9th April 1888.

Statement showing the Results of the Registration of Births and Deaths in the Principal Municipalities in Bengal during the week ending 24th March 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

INCREASE. Tons.

Cotton piece-goods 11

There being no sufficient water in the river Bhagiratty, the steamer service between Calcutta and Jeaganj is stopped, and the merchants are bringing their goods by rail; hence the increase.

Grains—(2) Rice 666

The increase under this head is due to greater despatches from the intermediate stations owing to good crops and favourable demands this year.

Provisions—(3) Others 28

The increase under this head is due to potatoes being carried by rail this year.

Railway plant and rolling-stock 31

This increase is due to greater materials carried during the month.

Salt 11

The river communication being stopped, the merchants are bringing their goods by rail; hence the increase.

Oilseeds—(1) Linseed 22

The increase under this head is due to river communication being stopped; the merchants are bringing their goods by rail.

(2) Mustard and rape 253

Ditto ditto and to favourable demands.

Stone and lime 13

This increase is due to more materials carried this year for building purposes.

Sugar—(2) Undrained 10

This increase is due to favourable demand.

DECREASE.

Coal 465

This decrease is due to increase in previous month.

Cotton, raw 15

This decrease is due to increase in previous month.

Jute—(1) Raw 14

This decrease is due to dull market.

Silk, raw—(2) Indian 45

This decrease is due to less import of tussar cocoons this year.

R. G. MOOKERJEE, *Manager, Nalhati State Railway.*

CONTENTS.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

The Council met at the Council Chamber on Wednesday, the 4th April, 1888, at 11 A.M.

Present:

The HON. SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding*.

The HON. H. J. REYNOLDS, C.S.I.

The HON. C. P. L. MACAULAY, C.I.E.

The HON. T. T. ALLEN.

The HON. SIR HENRY HARRISON, KT.

The HON. SIR ALFRED CROFT, K.C.I.E.

The HON. MOULVIE ABDUL JUBBAR.

The HON. BABU KALI NATH MITTER.

The HON. DR. MAHENDRA LAL SIRCAR, C.I.E.

The HON. C. H. MOORE.

The HON. DR. GOOROO DASS BANERJEE.

The HON. H. PRATT.

NEW MEMBER.

The HON. MR. PRATT took his seat in Council.

CALCUTTA AND SUBURBAN MUNICIPALITIES AMALGAMATION BILL.

The HON. SIR HENRY HARRISON moved that the final Report of the Select Committee on the Bill to consolidate and amend the law relating to the municipal affairs of the Town and Suburbs of Calcutta be taken into consideration in order to the settlement of the clauses of the Bill.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON also moved that the clauses of the Bill, as further amended, be considered for settlement in the form recommended by the Select Committee.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON said :—We have already considered the first 36 sections of the Bill, and therefore I move that we begin with section 37. The first amendment on the list of business belongs to the chapter of definitions, and will naturally come on for discussion when that chapter is considered. As we have only to-day seen the exact line which the Hon. Member wishes to take, we shall be able to consider it at another meeting.

HIS HONOUR THE PRESIDENT said :—The Hon. Dr. Gooroo Dass Banerjee may explain to-day what his motion is, and we may postpone the discussion to another day.

The HON. DR. GOOROO DASS BANERJEE said :—The amendment of which I have given notice regarding the definition of "Calcutta" differs only in one respect from definition No. 7 in the Bill. It excludes from the Suburban area which the definition in the Bill proposes to include only a portion on the south side, namely the portion bounded on the north by the line of roads commencing from the east with the Tiljullah Road, and going along the Ballygunge Circular Road, the Puddopookur Road, the Pakoortollah Road, and the Chaoollputty Road, till it comes to a point where Tolly's Nullah turns south; and the portion excluded in my amendment has, for its western boundary, Tolly's Nullah. This is how it appears on the map. The line marked blue is the northern boundary of the portion I propose to exclude; and the other line, which is Tolly's Nullah, is the western boundary. The parts of the portion excluded, which are in the immediate vicinity of the northern and western boundaries, are, it is true, populous; but as we proceed further on towards the south from the northern boundary and towards the east from the western boundary, we come to places which are scarcely suburban, and which are of a rural character, and may safely be excluded from the operation of the Bill. I have no objection to postpone the discussion of the question now, but in that case I will ask permission to come back to any part of the Bill which may involve any question as to the extent of area involved, if such part is disposed of before the question of the definition is finally settled. I do not however think there is any important part of the Bill, which will render this necessary, now that we have disposed of the question of the number of wards.

The HON. DR. MAHENDRA LAL SIRCAR said :—I have to request that maps showing the proposed boundaries be circulated to the members; otherwise it will be impossible to come to any definite conclusion as to what the boundaries should be. This is what I have been insisting upon from the beginning, as I have not been able to procure a map which gives the correct boundaries in the plan.

HIS HONOUR THE PRESIDENT said :—I think that the map which the hon. mover of the amendment has will show very distinctly what he proposes. I do not wish to postpone the discussion till the end of the Bill, but I thought that if the hon. member explained to-day what he proposes, we may give ourselves till the next meeting to consider his proposals after

having seen his map, instead of merely trying to follow the printed description of the boundaries. I think we might be able to meet the hon. gentleman to a certain extent. The portion of country which he wishes to exclude is no doubt distinctly of a rural character, but I should have preferred if he took the Bhowanipore and Kallighat road as the western boundary, instead of the Tollygunge road, because the part of country between them is distinctly of an urban character, and very thickly populated. If we could come to an agreement on these lines, I shall be glad to try to meet him We can discuss the matter at our next meeting after the hon. gentleman has seen on the map the boundaries which the hon. mover of the amendment proposes to prescribe.

The further discussion of the amendment was postponed on this understanding.

The HON. BABU KALI NATH MITTER moved that (c), (d), (e), (f), (g), (h), (i), (j) and (k) of clause 5 and clause (6) of section 37 be omitted. He said:—When this Bill was before the Council on the last occasion, the section which is now No. 37 was then section 30, and in the latter certain matters only were included as the duties of the Corporation. Take for instance the naming of streets and the numbering of premises. If general default is made by the Commissioners in the numbering of streets, they are to be superseded. I do not think it was ever intended that such should be the case, nor is it very likely to happen. The construction and maintenance of public latrines, urinals, and other public conveniences. These matters depend very much upon the funds at the disposal of the Commissioners as to the extent to which they may be in a position to carry out such works; but if these are put in the section as duties to be performed by the Commissioners, they would have to be performed irrespective of the question whether funds are available or not. The section which has already been passed (section 36) declares the purposes to which the Municipal Fund may be applied, and I think that should be sufficient, leaving it to the discretion of the Commissioners to carry out those objects as far as might be practicable. Then, with regard to the watering and lighting of streets. The whole of the town at the present moment has not been lighted. It would depend very much on the state of the funds as to what parts can be lighted and what cannot be lighted; and therefore it is essentially necessary to leave it as a matter of discretion as at present and not to convert it into a duty. Then, again, as regards the abatement of nuisances. There is a section of the Bill (section 389) which shows that the Commissioners have to be satisfied that there is real necessity for taking up a case before they can be called upon to take it up. But if it is to be a duty, then as soon as a complaint is made they will have to take it up as a duty; there is no discretion left. Under these circumstances, I move that the clauses which I have mentioned be omitted from section 37. I wish it to be distinctly understood that I do not for a moment mean that by the exclusion of these clauses, I intend that the Commissioners are not to give these matters their very best consideration; but having regard to the large area to be included in the town it is very difficult to foresee what the Commissioners will be able to do.

The HON. SIR HENRY HARRISON said:—I wish to ask whether it will be possible to consider amendments Nos. (2) to (5) together, voting upon them of course separately, because the Hon. Member who has just moved amendment No. (2) has admitted that the objection does not lie to the clause itself, but only when it is read with section 38. It seems to me that substantially the question involved by amendments Nos. (2) to (5) is an alteration in the framework of section 37 as read with section 38. I think it would shorten and simplify our procedure if these amendments are all considered together. Suppose section 38 were altered. Suppose we omit the clauses of section 37 mentioned in amendment No. (2), and the Hon. Member then suggests a very different control section, the position of Hon. Members will be a a very difficult one. It will therefore be far more convenient if the whole of these amendments are treated as involving one large question.

The HON. BABU KALI NATH MITTER said:—I agree with my hon. colleague that it will be very desirable to discuss all these amendments together. If

I succeed in having section 38 substantially altered, the objection to section 37 will be very much minimised. I have therefore not the slightest objection to the course proposed.

HIS HONOUR THE PRESIDENT on that understanding asked the Hon. Babu Kali Nath Mitter to proceed with his next amendment No. (5).

The HON. BABU KALI NATH MITTER said:—My objection to section 38 of the Bill is this, that when the Act of 1876 was under consideration a similar objection was taken by various public bodies, and thereupon this and some other sections of the Bill were referred back to the Select Committee for further consideration. After a good deal of discussion, after hearing delegates and counsel on behalf of several public bodies, the section which stands in the Act was adopted, and the then Lieutenant-Governor expressed his fullest concurrence in the alteration made by the Select Committee. When the present Bill was laid before the Select Committee in the first instance no change was proposed in the section. It was only at the very last moment that the Hon. Mr. Macaulay thought fit to produce the present section 38 in lieu of the section in Act IV of 1876. The reason assigned by him was, that the provision as it stands in the Act is cumbrous and unworkable. As far as it is cumbrous and unworkable, no doubt it will be necessary to remodel it; but I do not think that because it is cumbrous and unworkable, therefore the law should be materially altered so as to give uncontrolled power in the hands of the Local Government. The powers under the present law are these. In the first place the power is to be exercised only in a few cases, that is in cases where adequate provision is not made for the conservancy and cleaning of the town so as not to secure its healthiness. In the second place if the Commissioners failed to take steps to improve the bustees of Calcutta, and thus to secure the healthiness of the town, then the law authorises the Local Government to step in. But before the Commissioners can be superseded in any way, the present law provides as the most important matter that there should be an independent enquiry, and unless in the course of that enquiry it appears that default has been made within the terms of the law, the Commissioners cannot in any way be superseded. This safeguard does not appear in section 38 of the present Bill. I was told in the Select Committee that due enquiry would mean after hearing the Commissioners. If that is so, why should it not be stated in the law that, before this power is exercised, the Commissioners shall be heard? Again it was said that the wording of the present law makes the provision unworkable. I have, therefore, thought fit to alter the wording of the section, and I am confident that the section, as I have framed it, cannot be said to be unworkable. If there is complaint made, the Commissioners are to be heard, and if the Government is then satisfied that default has been made, there is to be a Commission appointed. The Sanitary Commissioner or any one acting for him is to be one of the arbitrators; the second arbitrator is to be appointed by the Commissioners, and the third by the Local Government; and these three arbitrators are, within a time to be fixed by the Local Government, to find whether any such default as has been complained of has been made. If they find that default has been made, then they are to state what, in their opinion, should be further required to be done in regard to such matter. After the Commission makes its report, the Local Government is entitled to call upon the Commissioners to carry out what the members of the Commission have awarded; and if they fail to do so, the Chairman of the Corporation is to supersede the Commissioners. That is how the section I have framed will practically work; it will substantially leave the law in the same position as at present. No outsider is to supersede the Commissioners; the supersession will be by the Chairman under the special authority of the Local Government, but this supersession would not take place until after a proper inquiry. It is said that such an enquiry will take time. No doubt it will take some time, but time should not be objected to in a matter of this kind. It is entirely in the hands of the Local Government to fix the time within which the report is to be submitted by the Commission. If the complaint is in respect of a matter of very urgent importance, which can be enquired into within two or three days, the Local Government might fix a very short time. If, on the other hand, it is a matter of a complicated nature in which there is no great urgency, the Local Government may fix a longer time for

the members of the Commission to make enquiry and submit its report. Therefore, as far as the objection goes that the procedure is cumbrous and unworkable, I submit that the section framed by me will not be open to that objection. Then, again, I have limited the enquiry to one of the duties enumerated in clauses (3) and (4) and (*a*) and (*b*) of clause (5). These are the most important matters. Clause (3) refers to completing and extending the drainage works throughout Calcutta, and the opening out and improving of bustees, and to the expenditure annually of not less than two lakhs of rupees for these purposes. Clause (4) refers to the maintaining of a water-supply; and (*a*) and (*b*) of clause (5) to the cleaning and conservancy of Calcutta, and the maintenance and cleaning of drains and drainage works. These are the most important duties which the Commissioners have to perform. They have immediate reference to the health of the town, and in respect of which the Government should have a power of control. As regards clauses (1) and (2), they are so important and so essentially a part and parcel of the working of the Municipal Act that I have not thought it necessary to include them in section 38, because the payment of interest and the establishment of a sinking fund are the first duties of the Corporation. If the Commissioners can be trusted with the administration of the municipal affairs of the town, they should be trusted to make suitable provision for these purposes. I cannot conceive it possible that under any circumstances these duties would not be performed, but if it is thought desirable that they should be included, though the section will then need slight modification, I shall have no objection to offer. I have excluded them simply because they are primary duties, and it is not possible to conceive that under any circumstances these duties would be neglected.

Then as regards other matters, I submit that they are matters of detail which may be left to the Commissioners, subject to the control of public criticism and to the influence which the Press can bring to bear on the Commissioners. I put it to the Council and to Your Honor, whether or not it would be utterly absurd to supersede the Commissioner, because two or three streets had not been named. That, however, is how the section stands. While it is desirable that the Local Government should have this power in matters of vast importance, I think it is desirable that such power should be safeguarded, and the safeguard should be an enquiry by a Commission. The members of the Select Committee, in dealing with this subject, say in the first page of their report, chapter II:—

"Section 37 enumerates the duties of the Corporation. This section has been enlarged to include all that should be included as the duties of the Commissioners, and section 38 confers ample powers on the Local Government to compel the Corporation to discharge any of these duties should it neglect to do so. We could not recommend the re-enactment of the cumbrous and unworkable sections of the former law. On the other hand, the discretion and forbearance of the Government constitute the best guarantee which can be given to the Corporation against a hasty and injudicious use of this power. We have introduced an appeal as of right to the Government of India."

Though I look upon this right of appeal as a concession to my objections, yet I am not satisfied with the section as it has been framed by the Select Committee; and I think it is necessary that there should be material alterations made in it to show the public that since the passing of the Act in 1876 nothing has happened which would justify an alteration of the law on the subject. Within ten or eleven years it was only once that the Local Government thought fit to have recourse to this section. I do not wish, for obvious reasons, to enter into that discussion further than to show that all the recommendations of the Commission were altogether accepted by the Commissioners, and they gave effect to them so far as the Government requested them to do so, not putting their request under the provisions of the law, but appealing to the good sense of the Commissioners. I believe the hon. member in charge of the Bill will bear me out in saying that every one of those recommendations has been attended to. Suppose the law then stood as it is now proposed to make it, what would have been the consequence? I think the consequence would have been the supersession of the Commissioners, and then a grievous mistake would have been committed. As regards matters of vast importance, of course the Local Government should have a power of control; but while conceding this control there should be the safeguard of an independent enquiry. In 1876, and also upon the present occasion, it has been said that this power exists in England and in Bombay. As regards England, the cases are totally different. There the Government does

not appoint a single Town Councillor, but all of them are elected by the rate-payers, and the Chairman is elected by themselves; so that in every sense local bodies there are wholly independent of Government control, and moreover all large municipalities, as far as I have been able to ascertain, are represented in Parliament, and that of itself is a safeguard against the capricious action of Government. I appeal to the Council and to Your Honour to say whether it is likely the town will suffer in the least by adopting the section I propose. If the town will not suffer, I think it will be an act of grace towards the Commissioners and the rate-payers not to alter the law so materially as is proposed. On this subject both the British Indian Association and the Indian Association have made representations. The British Indian Association in their letter says—

"The controlling power of the Government is proposed to be made more summary than at present. The exercise of such summary power would not only be inexpedient in the face of the very reasonable provision at present existing, but unjust to the Commissioners, who ought to be heard in their defence. The Local Government may, after considering such explanations as the Commissioners may offer, appoint a Commission, as in section 28 of the present Act. Such a Commission, if properly constituted, would form a proper bench to judge of the issues between the persons complaining of default by the Commissioners on the one hand, and the Commissioners on the other. After our experience of the last Commission, it is necessary that the Government should specify in detail the work or works neglected, and the exact amount of work to be done. The danger of a special officer, spending money without limit on any particular work, may so cripple the municipality as to lead to the neglect of more pressing work in other directions. The resources are not unlimited, and the expenditure should be regulated according to income."

And the representation of the Indian Association have also made similar observation. After comparing the provisions of the existing law with the section in the Bill, they say—

"It will be seen at once that the powers of control claimed under the new Bill are far more summary in their operation than what is provided for in the existing law. Under the present law, the Government cannot take any action except as the result of a public enquiry. Under the Bill no public enquiry need be made. If the Government is satisfied that default has been made—it does not matter by what process—the Municipality may at once be coerced to carry out the orders of Government. But the fact remains that the powers of control reserved to the Government by the existing law have been found by actual experience to be amply sufficient for all purposes."

With these observations I leave the matter in the hands of the Council. I think this is a matter which demands our earnest attention, and I hope that the Council will accept the amendment proposed by me.

The HON. DR. GOOROO DAS BANERJEE said:—I beg to move that in section 38, line 5, after the word "duties" the words "relating to public health" be inserted. I also move that in line 7 of the same section, after the word "enquiry" the words "by a Commission consisting of three persons, two of whom shall be appointed by the Local Government, and one by the Commissioners in meeting" be inserted. The object of these amendments is of a nature similar to that which my hon. colleague who has just sat down has in view in proposing his amendments. The only difference between his amendment and mine consists in this, that whereas he would revert to the old law with very slight modifications, my amendments take a middle course between the old law and the provision contained in the Bill. I fully admit the necessity of the Government having control, but I submit that this control, in the case of an important public body like the Calcutta Municipal Corporation, should be limited to extreme cases—to the cases of serious neglect of duty by the Corporation in relation to matters of public health. It is then only that the grave importance of the subject would justify the action of the Government. In other matters of minor importance, the Municipal Corporation could be safely trusted. But if the provisions of the law remain as they are in the Bill, the result will be that the Commissioners would be liable to be superseded on account of default in the discharge of every minor duty, such as the naming or the watering of streets. This would no doubt very prejudicially affect the independence of the Corporation, a result which is scarcely desirable. Then it should be borne in mind that the new Corporation, with their limited funds, and with the comprehensive and detailed scheme of duties laid down in section 37 of the Bill, would be constantly exposed to the risk of being proceeded against under this section unless its operation is limited

in the way I suggest; and this danger will be all the greater when it is further borne in mind that the amalgamation of the large suburban area with the town will increase their responsibilities a great deal without providing them with adequate funds to discharge those responsibilities. Therefore, I submit, that the first of the two amendments I propose ought to be accepted by the Council.

Then as regards the second amendment, it is quite true, as the Select Committee observe in their report, that the discretion and forbearance of the Government constitute the best guarantee that can be afforded against any unnecessary or arbitrary exercise of the power; but, I submit that it is equally true, in the case of an important public body like the Calcutta Corporation, that their own good sense and the control of public opinion will be sufficient in all ordinary cases to induce them to perform their duties. And if it is thought necessary to guard against neglect of duty by the Corporation in important cases by legislative enactment, I submit it is at least desirable, if not necessary, to make some provision in the same law against any hasty or injudicious exercise of the power of control in any case. And this necessity will appear most clearly when it is remembered that the Corporation, with their limited funds and almost unlimited responsibility, will always have to choose between two evils. They will always be obliged to neglect, for a time at least, duties of a less urgent nature in order to discharge others of a more pressing character. With regard to a public body so circumstanced the duty of judging of their acts and omissions must necessarily be of a most difficult and delicate nature, and therefore I submit it is due as well to the Corporation as to the controlling authority itself to lay down rules and to make careful provision against any unfair or injudicious interference being made in any possible case. There are many cases in which the question involved will after all be a mere matter of difference of opinion; the Commissioners after exercising their judgment most carefully and anxiously may think one class of duties more important than another, whilst the Local Government may be inclined to take a different view. And the possibility of the Commissioners being able to discharge both duties together will depend on the state of their funds. An enquiry into these points can hardly be fairly conducted unless the Commissioners are represented by some one in the tribunal which is to judge. I therefore submit that the very least which ought to be done in this direction will be to have an enquiry by a Commission constituted as my amendment indicates. I earnestly hope that if the Council has any difficulty in accepting the larger proposition contained in the amendment of my hon. friend Babu Kali Nath Mitter, it, at any rate, will find no difficulty in accepting the smaller measure proposed in my amendment.

The Hon. Sir Henry Harrison said—Although I am quite prepared to admit that the question is not without difficulties, I can hardly recommend the Council to accept the amendments moved by the Hon. Member on my left (Babu Kali Nath Mitter). As regards the fact that section 37 in its earlier form did not contain the clauses to which the Hon. Member has referred, I may mention that in the first instance the Government of India drew attention to the non-inclusion in the section of such provisions. In a letter, received from the Government of India last year, commenting on the draft Bill, they asked us to look into the corresponding sections in the Acts relating to Municipalities in other parts of India, and it is not possible to deny that the maintaining of a system of registration of births and deaths for instance, or the naming of streets and the numbering of houses are duties of the Municipality. Then, if it is the duty of the Municipality to do these things, ought they to be omitted from the section of the Bill, over the operation of which a power of control is given to the Government? I admit that for all practical purposes it will perhaps be sufficient if the power of control is confined to matters affecting the public health, because it is essentially in such matters that there will be a probability of difference of opinion. But as a question of principle, why should the other clauses of the section be excluded? The probability is that there will be no likelihood of default in such matters. But suppose the Commissioners were to commit default in respect of such matters. Suppose the Commissioners discontinued the maintenance of a system of registration of births and deaths. There

are statistics of births and deaths extending over a series of years of extreme value to which constant reference is needed. Would it not then be necessary that the Government should have power to say to the Commissioners, you shall not discontinue those registers ? Take another case. Take the naming of streets and the numbering of houses. Conceive the total confusion which would result from total neglect of this duty. Consider the total prostration of the Postal Department and of all inter-communication in Calcutta. Is there one single duty of the Commissioners regarding the performance of which it would be more incumbent on the Government to interfere than that supposing it neglected? As a question of principle I cannot see why we should take away the control of the Government over duties of this kind which, supposing they are not performed, will lead to disastrous results, simply because we think there will be no necessity for such control. The chances are a hundred to one that the Commissioners would not commit default in such matters; if so, no harm would be done, and the section would remain a dead letter. But suppose the Commissioners did commit general default, then there is no single matter amongst the duties of the Corporation control over which would more meet with the approval of the entire population, than some of the matters which I have instanced. I think the essence of the objection is that instead of the decision in such matters being vested in the Government it should be vested in a tribunal consisting of three persons, two of whom should be appointed by the Local Government and one by the Commissioners in meeting. That is a legacy from the Act of 1876, and the Hon. Babu Kali Nath Mitter correctly described what happened then. The section was adopted as a compromise by way of concession to representations made by various public bodies, because they considered that the general power of control proposed to be given would prove fatal to the independence of the Commissioners. But I would ask the Council to consider whether that is not a fundamentally erroneous principle. It appears to me to be an erroneous principle incautiously and easily yielded by Sir Richard Temple to satisfy the objections raised by several public bodies. And now that the law is being amended, I am bound to say that in my opinion the Council will do wrong, unless it lays down most distinctly that the authority in all such matters rests with the Government. There is a great deal of difference between the Government interfering in matters concerning the duties of a Municipality and in matters affecting private rights, in which case the decision of a perfectly independent tribunal is necessary. There is a wide difference between such rights and rights and duties which are really part of the work of Government. The Municipality is a body vested with some of the authority of the Government of the country, and it should be properly regarded as a body which is subordinate to the Government of the country, and so it is regarded in every country in the world. In Paris, in Berlin, in London, the Government of the country is vested with the supreme authority and the supreme responsibility of disposing of public duties, but as it cannot attend to everything itself, it has its subordinate officers, and, where it is possible, local bodies are constituted for local purposes. But who in the long run is responsible to the individuals of each community against gross abuse of authority, but the Government of the country. Therefore, I submit, that as a matter of Government we must have a hierarchy of institutions, and subordinate authorities must be placed under superior authority. The Government ought to make up its mind with the utmost care, prudence, discretion, and forbearance; but when the Government has made up its mind that something is wrong, it is erroneous in principle to say that it should not have power then and there to act, but that authority should be given to some other tribunal to judge between it and the subordinate authority. That is the principle on which this section is based. Therefore on the whole I submit that the proper principle is that the responsible authority must be given the power after it has given full consideration to the matter, and has made up its mind. And that being so, may we not fairly appeal to the experience of all other parts of the world ? Can the Hon. Member point to any provision such as exists in the Act of 1876? In France, there can be no question that Municipalities are absolutely and entirely under the control of the Government: the President of the Republic has

complete power over municipalities. In Paris, it is entirely under the Prefect of the Seine and the Prefect of Police. And a similar rule prevails everywhere. In Bombay, a precisely parallel case, where a portion of the members of the Corporation are appointed by the Government, we have the same principle; and in Madras it is the same. In India, that appears to me to be the legitimate and proper position which the Government must exercise. On the other hand, it seems desirable that that principle once safeguarded, the Government should make every concession it can, consistently with the working of the principle, to the position of the Corporation. On that ground we are much indebted to Your Honor that the Corporation should, under such circumstances, have been given a right of appeal. That right can no doubt be granted without any serious incumbrance to the exercise of the authority. It is in itself a very moderate safeguard. The Hon. Member asked why it should not be incumbent on the Government in the first instance to call for an explanation from the Commissioners. But by a concession of the kind offered by Your Honor, you practically concede what is asked. I know that there is a strong feeling in many quarters that in doing that the Government has made an unnecessary concession, and it is perfectly possible that if that view had been pressed on the Council, a majority might have been found to agree with it; and that makes us all the more indebted to you for making the concession, and it is the utmost concession which Your Honor can make consistently with principle, Your Honor being the responsible authority.

One more argument before I sit down. It is but fair to point out that a very great change has taken place, or, I should rather say, the experience of past years has made a great change in the aspect which this question now presents. If I read to the Council from a speech delivered by the late Hon. Kristo Das Pal when he objected to a similar provision which was first proposed, it will be apparent that what he made the primary objection to the principle no longer exists. He said—

"This was the last straw which broke the camel's back. If this section passed, he would rather set his face against an elected system than vote for it in this form. The section gave power to the Local Government to modify or cancel rates which might be fixed by the Municipal Commissioners after full and mature deliberation. So long as this section should remain a part of the statute book, he did not know whether any independent gentlemen, with any feeling of self-respect, would care or would be willing to work for an object which would be likely to be set at nought at the pleasure of the Government. The other day the Justices, after days of labour and discussion came to the decision, that a 7½ per cent. house-rate would be sufficient for the year. The Chairman was not of course satisfied with that decision, and, as under the present law, the Government had no power to alter the rates, the Chairman was bound to accept the decision of the Justices so long as they saw no reason to alter it. But if the Government had power under the existing law in the way proposed in this section, then the Chairman might have at once gone up to Government, and the rate passed might have been cancelled. It might be urged that Government would not unnecessarily exercise that power. But at the same time Babu Kristo Das Pal submitted, with due deference to the Government that it would be chiefly inspired or guided by the Chairman in a matter like this. Government could not be expected to be master of those details which the Chairman, it was thought, ought to be; and in such a matter the Government would necessarily be guided by the Chairman. With every deference to his hon. friend who now so ably filled the office of Chairman to the Justices, he submitted that the tendency of the executive had always been to expend money, and that tendency it had been the business of the working Justices to control.

"That, he submitted, was a healthy policy. He thought such a state of things was good for the town. Good, because the Chairman, as the executive officer, might be anxious to undertake works of improvement which might be desirable to carry out, and good, because there was an independent body of working Justices to temper the excessive zeal of the Chairman, and their conduct in this way helped to preserve the much-needed equilibrium. But once that power was destroyed or lost, it would come to this, that the Chairman, however reasonably he might be overruled by the Commissioners, would have only to appeal to the Government, and, as the representative of the Government, he would in nine cases out of ten be likely to be supported by it. Such being the tendency of this section, he was sorry he could not support it, and he was compelled to say that, if it were carried, it would defeat the very object for which His Honor so laudably sought."

The whole gist of his objection was that the Chairman would be constantly rushing up to the Government to appeal against the Commissioners. Has not experience shown that that is quite contrary to the spirit in which the Act has worked? Does not the Chairman recognize that his interest and the interest of the Corporation are the same; that his success is their success and that

their success is his success? And so long as that is the spirit which guides the Corporation, I do not think there is any reasonable fear of the Chairman going up to Government; of any constant appeal to Government from within the Corporation. That was the only way in which the late Hon. Kristo Das Pal thought the principle of the section originally proposed was unwise; but, as far as the outside public was concerned, he admitted that if, say, 500 rate-payers petitioned the Government, the section should be brought into operation.

For all these reasons, I think it will be fittest for the Council not to accept the amendment, and to be satisfied that the Corporation will always have a right of appeal to the Government of India.

The Hon. Babu Kali Nath Mitter in reply said:—I have listened very attentively to what has fallen from the hon. member in charge of the Bill, but I fail to see how he has attempted to meet the objections I have raised to the section. He has made general statements which an advocate will always make when he has a bad case to deal with, but he has not attempted to meet the objections which I raised. All throughout he has made general statements. As to the quotation from the speech of the late Hon. Kristo Das Pal, I submit that everything he then said applies in every possible way to the present time. Suppose this section is not altered, but is passed as it has been framed, will the relations between the Chairman and the Corporation be of the same character as they have been in the past? I think if the law was different, the Chairman would on many occasions have gone up to the Government; the Act has worked well, because the law insisted upon an enquiry. We have no experience of what would have happened if the law had been different; our past experience, therefore, does not help us. The late Hon. Kristo Das Pal put it on that ground alone. I did not put it on that ground. I never referred to the possibility of the Chairman being the person who would be the complainant: that is a matter wholly immaterial to my argument. We are asked why the Government should not interfere if the Commissioners omitted to register births and deaths or to name streets and number premises. If that happened, the interference of Government should be very different. It should not be supersession by the appointment of a person to register births and deaths or to name streets or number premises, but the interference would take the form of establishing a totally different system of Municipal Government. If it is possible to conceive that the Commissioners should fail to provide for the performance of these obvious duties, then the course would be not to supersede the Commissioners in the manner indicated in the Bill, but to supersede them completely, and to have another system for the administration of the affairs of the town. To my mind the two things are as totally distinct as it is possible to conceive, but I do not think it is possible any such thing can happen. I am told that if it is not possible to happen, what objection is there? I object to this provision on principle; that it is a provision which should not be left without reasonable safeguards. Then I am referred to the words "general default." The expression "general default" has not been defined in the Bill, and I do not know what it means; whether the omission to name two or three streets or a hundred streets would be considered "general default." It would be very difficult to say how a court of law would interpret this "expression," or how the Local Government would interpret it. Then my hon. friend has thought fit to say that on the last occasion when this question was considered it was decided on an erroneous principle. I have listened very attentively to find where the principle lies, but I have failed to find any principle involved in it. My hon. friend says that if such default is committed, who is the person who should take action but the Local Government? My answer is that it will be impossible for the Local Government, constituted as it is, to have any opinion on the subject, unless it causes a proper enquiry to be made by an independent person or tribunal. When a memorial signed by 500 or 1,000 persons is submitted to the Government, it is *primâ facie* evidence th..t the complaint is a just one, and no reasonable man can object to the exercise of this power in such a case; but if the complaint is to be enquired into in the mode indicated in the law, and if, as the result of that enquiry, the Local Government is to exercise the power, then I do not see where the principle suffers. It is not to be an enquiry made by a Secretary to Government or some

other Government official; but by independent persons, assisted by a nominee of the Commissioners, so that the nominee of the Commissioners will be able to place before his colleagues the fullest information on which it would be possible for the Commissioners to come to a finding. Therefore I humbly submit that there is no question of principle involved in the section. My hon. friend has asked me to show whether there is in England or elsewhere, or in this country, any such provision of law as that contained in Act IV of 1876 or in my amendment. I say there is not, and it is because Calcutta is differently circumstanced from other towns that it was thought fit to make this provision. May I not retort and ask whether the hon. member can point to any case where an appeal to the Government of India from the decision of the Local Government has been allowed? If he cannot, then does not that show conclusively that the circumstances of the case are different, and that therefore a different procedure is applicable. I would also urge that as this appeal is to be allowed, the order must be made after the Commissioners have been heard. Where is the objection to provide for such hearing? If that is the intention of the section, why not plainly say so? Where is the objection to state plainly what the law intends, and to say so plainly if that is the intention? We know as a fact that on the occasion to which I have referred, the Commissioners were not heard before they were condemned; and therefore I am extremely anxious that it should be stated plainly, so that there should not be the slightest doubt on the subject. Under these circumstances, I hope that notwithstanding the opposition of my hon. friend, Your Honor, as President of the Council, will see your way to support these amendments. One thing more I have to say. If my hon. friend, the member in charge of the Bill, is so much struck with the erroneous principle of this section of the existing Bill, why was not the amending section proposed by him when he introduced the Bill? It was not proposed by him, but it was brought forward by the hon. Mr. Macaulay at the very last moment. It is a matter of surprise that the hon. member in charge of the Bill, who is so much struck with the erroneous principle of the existing law, never brought forward any amendment of it.

The Hon. Dr. Gooroo Dass Banerjee said in reply—The Hon. Member in charge of the Bill has been pleased to point out the necessity for retaining the section in the general terms in which it stands, on the ground that although general default in the performance of their duties by the Corporation may not be a very probable thing, yet it is possible, and that when such a possibility happens, there will be good reason for the interference of Government. I have not had the honour of being a member of the Corporation, and it is therefore not for me to say what default by the Corporation is possible and what is not possible; but we have the word of the Hon. Member himself that it is not very probable that such default will be made. If that is so, where is the necessity to provide for a mere possible contingency which may after all never happen? I should have thought that the work of providing for probable contingencies is work enough for us. Then as to the question of enquiry, it has been said that it involves an erroneous principle, and the hon. member in charge of the Bill entered into a discussion on the general question as to whether the functions of the Municipality are functions delegated by the Government or are independent functions. I do not think it necessary to enter into a discussion as to whether the Municipality is an independent body and entitled to have any question in dispute between it and the Government decided by an independent tribunal. I concede to the fullest extent the correctness of the principle laid down by the hon. member in charge of the Bill, but I must say the hon. member has been labouring under a misapprehension. When I addressed the Council, I did not say that any of the powers of the Local Government to judge are to be curtailed in any way. I think I said, with some degree of distinctness, that I wanted the Corporation to be represented by some one on their behalf as an assessor, in order that the controlling authority, the Local Government, may be in full possession of the facts and details into which it would be necessary to enter to enable the Government to come to a right decision. I do not think that would infringe any principle of law or justice. My amendment concedes that the Local Government shall have

the right to judge; all I say is that it will be assisted very materially if it has before it the report of a Commission consisting, amongst others, of one member at least who has been nominated by the Commissioners.

The HON. BABU KALI NATH MITTER's motion that (c), (d), (e), (f), (g), (h), (i), (j) and (k) of clause (5) and clause (6) of section 37, be omitted, was put to the vote and negatived.

The HON. DR. GOOROO DASS BANERJEE's motion that in line 5 of section 38, after the word "duties" the words "relating to public health" be inserted, being put, the Council divided:—

Ayes 4.	*Noes* 7.
The Hon. H. Pratt.	The Hon. C. H. Moore.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. Moulvie Abdul Jubbar.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. Sir Alfred Croft.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.

So the Motion was negatived.

The HON. DR. GOOROO DASS BANERJEE's motion that in line 7 of section 38, after the word "enquiry" the words "by a Commission consisting of three persons, two of whom shall be appointed by the Local Government, and one by the Commissioners in meeting," be inserted, being put, the Council divided:—

Ayes 3.	*Noes* 9.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft.
	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The HON. BABU KALI NATH MITTER's motion that, for section 38, the following be substituted, being put, the Council divided:—

"Upon complaint made to the Local Government that the Commissioners have made general default in the performance of any of the duties enumerated in clauses (3) and (4), and in (a) and (b) of clause (5), the Local Government, may, by notification in the *Calcutta Gazette*, appoint a Commission, consisting of three persons, of whom one shall be the Sanitary Commissioner for Bengal or any Medical Officer officiating for him, the second shall be appointed by the Commissioners in meeting within a fortnight from the date of the said notification, or in their default by the Local Government, and the third by the Local Government. And the Local Government shall order the members of the said Commission to report within a certain time to be fixed by the Local Government whether they are of opinion that any such general default has been made, and in that case to specify in their report what further provision should be made towards the performance of any of the duties in respect of which such default has been made, and to submit an estimate of the cost of the said further provision."

Ayes 4.	*Noes* 8.
The Hon. H. Pratt.	The Hon. C. H. Moore.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. Moulvie Abdul Jubbar.
The Hon. Dr. Mahendra Lal Sircar.	The Hon Sir Alfred Croft.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The HON. BABU KALI NATH MITTER, by leave, withdrew the motion that after section 38, the following new section be inserted:—

"38A. On receipt of the said report, the Local Government shall forward the same for the consideration of the Commissioners; and if the Commissioners shall decline to carry out the provisions recommended therein, the Local Government may order that such

provisions, or any of them, or any portion of them, respectively, be carried out; and thereupon it shall be the duty of the Commissioners to comply with such orders, and to provide the funds mentioned in the said estimate or such portion thereof as the Local Government may fix; and the Chairman shall forthwith carry out such order and shall defray the cost of carrying out the same from the Municipal Fund, notwithstanding any power conferred on the Commissioners by section sixty-one or anything to the contrary contained in any other provision of this Act:

Provided that if there is a difference of opinion among the members of the said Commission, the opinion and report of the majority of the said members shall be held to be the opinion and report of the Commission."

The Hon. Babu Kali Nath Mitter moved that, for the first paragraph of section 39, the following be substituted:—

"The Commissioners at a special meeting to be held for that purpose may, from time to time, nominate a proper and fit person residing within the limits of Calcutta to be appointed by the Local Government as the Chairman of the Commissioners"

He said:—Under the present Municipal Law of Bengal many municipalities have been entrusted with the duty of appointing their own Chairman, and of late this concession has been extended even to some of the minor municipalities. I fail to see why the Calcutta Municipality should not have some voice in the appointment of their Chairman. The policy of the law, as laid down in this Bill and in the existing Act, seems to be as if it was intended that the Commissioners should have some voice in the matter; for we find that in the appointment of officers on a salary not exceeding Rs. 200 per mensem, the Chairman of the Corporation has uncontrolled power. Then, as regards appointments between Rs. 200 and Rs. 500, he is to make nominations to the Commissioners, and the Commissioners are to appoint one of the persons so nominated by the Chairman; and in regard to appointments of Rs 500 a month and upwards, the Commissioners have the absolute power of appointment subject to the approval of the Local Government. But there is one appointment as to which the Commissioners do not seem to have any power whatsoever. I fail to understand why that should be so. If they are competent to appoint all the superior officers of the Municipality, subject to the sanction of the Local Government, surely they ought to be allowed to have the privilege of nominating a person to be their Chairman. It seems to me that the Commissioners are in an excellent position to make such a nomination. So far as the appointments hitherto made by the Government of Chairmen of the Corporation are concerned, I believe they have given satisfaction generally. There was only one case in which satisfaction was not given, but with that exception the appointments made by the Government generally gave satisfaction. But I claim on principle that the Commissioners should have some voice in the appointment of their Chairman. If it be considered that the amendment proposed by me goes too far, I shall be quite content to make a modified proposal. In the same way as the Chairman is required to submit three names to the Commissioners in respect of appointments between Rs. 200 and Rs. 500 a month, the Commissioners might be authorised to send up to Government three names, out of which the selection should be made for the appointment of Chairman of the Corporation. If that proposal is approved, I shall have no objection to modify my amendment. My object is simply that the views of the Commissioners should be considered, and that the Government should make the appointment after the Commissioners have made their nominations.

The Hon. Mr. Macaulay said:—I regret that my hon. friend in charge of the Bill leaves it to me to oppose the amendment. I do so on two grounds. First, I think that my hon. friend has proceeded on a wrong line in suggesting that the appointment of the Chairman is in any way of the same character as other officers of the Corporation. He has, I think, overlooked the provisions of section 61 of the Bill, under which the Chairman may exercise all the powers of the Commissioners. That removes the appointment from the same category as the subordinate officers of the Corporation. Beyond that we have to regard Calcutta in a different light from other municipalities in Bengal. No one would be more ready than myself to see the principle of Local Self-Government extended as far as possible, and I fully admit that the nomination to the office of Chairman is a proper development of that principle, and that this power should be given to the Commissioners of Municipalities where it can be given safely

But I draw a serious distinction between Calcutta and Municipalities in the interior. It must be remembered that in Mofussil Municipalities the Commissioners are concerned in managing their own affairs. In Calcutta the Commissioners are, to a great extent, managing the affairs of people in all parts of the world who are concerned in the welfare of the town as it affects commerce, though they have never been and may never be in Calcutta. We must look upon Calcutta as the capital of a great Empire, and, as such, we should secure as far as we possibly can its good Municipal Government.

The Hon. Sir Henry Harrison said:—I was in no way unwilling to oppose this amendment myself; but as I was convinced that my hon. friend, Mr. Macaulay, would do so much more forcibly and eloquently than I could, I asked him to reply to the observations of the hon. mover of the amendment. Nevertheless I will add a few words, and in doing so I would draw attention to the difference between Calcutta and the homogeneous municipalities in the mofussil. In Calcutta the main difficulty lies in this—that there are people of different classes, different races, different nationalities and different religions, all of whose affairs have to be managed impartially and equitably by the Municipality. Looking at it in that light, is it desirable that the Chairman should be nominated by the Commissioners? The problem is an extremely complex one, and might well lead one to suppose that nothing short of administration by an officer of Government would satisfy all parties. It is of the utmost importance that any tendency to special national and race sympathies should be kept out of the Municipality. For this reason it seems most unwise that the appointment of Chairman should be thrown into the cauldron of Municipal contests as a prize to be carried off by the strongest party. The Chairman of the Municipality should be of no party, so that he may deal with all parties on an equality. If you make him the nominee of one particular party, would you not bring about the very thing you wish as much as possible to prevent? He would simply be the nominee of the majority, and the more completely he would be in harmony with the views and feelings of the majority, the more effectually would he work in the very way he should not work: any Chairman who would be competely in harmony with one party would be as completely antagonistic to the others. On the other hand, the Local Government, which is extremely interested in the welfare of all parties, and which has the best means of judging between them, should be the authority to select a fit person for the appointment. The Hon. Member has himself borne testimony to the success of the present mode of appointing the Chairman during the last ten years. Could they do better then let well alone?

The Hon. Babu Kali Nath Mitter said in reply:—My own experience is that the Chairman has always belonged to one of the parties in the Corporation, and the members of the opposition to the other; so that there have been two parties, the Chairman and his followers, and the members of the opposition. It is a mistake to say that the Chairman is wholly independent of parties, because it cannot be so. He has to work by majorities. I think the very reasons he has assigned strongly support my contention. Many municipalities have been entrusted with this privilege, and surely the metropolis of the Empire can be trusted with it. We have not got any experience of nominations by the Commissioners; but in one or two instances in which the Government accepted the views of the Commissioners, the appointment gave complete satisfaction. In every instance, as the hon. member in charge of the Bill said, there would be competition, and the Chairman would side with the party which elected him; but it is very difficult to say whether in practice it would so happen. I can, however, conceive it to be quite possible for the nomination to be made without canvassing. If my hon. friend desires to restrict the appointment to the members of the Civil Service, he is right in what he said; but if the appointment is to be thrown open to other persons, then the nomination should be left to the Commissioners. It may be that the Commissioners would nominate a gentleman who is not a member of the Civil Service, and such person may turn out a success; but without allowing the thing to work, it is difficult to say what would be the result. The ultimate power would rest with the Local Government to accept the nomination of the Commissioners; and, with this

safeguard, I do not see why this privilege should not be granted to the Corporation. I think the Commissioners have shown that they are persons who ought to be trusted.

The motion was put to the vote and negatived.

The Hon. Sir Henry Harrison moved that in line 7 of section 41 for the words "Collector of Taxes" the word "Collector" be substituted.

He said:—The term "Collector of Taxes" was a misnomer. The Act distinguishes between rates and taxes. Taxes are imposed on trades and professions, and rates are levied from the community at large. As a matter of fact, the Collector is the Collector of Rates, and not the Collector of Taxes; the latter being collected by the officers of the License Department.

The motion was put to the vote and carried.

The further consideration of the clauses of the Bill was postponed to the next sitting of the Council.

BENGAL MUNICIPAL ACT, 1884, AMENDMENT BILL.

The Hon. Mr. Macaulay moved for leave to introduce a Bill to amend the Bengal Municipal Act, III of 1884. In doing so, he said:—This is a measure to which Your Honour made reference in your opening Address. But I may inform the Council that since that address was delivered, some correspondence had taken place between the Government of India and the Local Government, with the result that the scope of the Bill will be much more limited than was originally proposed. It was originally suggested that the Government of Bengal should have the same power as other Local Governments in India under their respective Municipal Acts, without referring to the Commissioners of a Municipality, to exclude from its limits any lands or buildings in the occupation of the State for State purposes. The Lieutenant-Governor, however, represented that as the law stood any change of limits would require the sanction of the Commissioners of the Municipality, we have practically to guard against two dangers; undue assessment and undue interference. As regards undue assessment it was considered that the interests of the State were sufficiently protected by the Imperial Municipal Taxation Act, XI of 1881; and as regards protecting State property from undue interference, it was believed that it might be effected by restricting the power of the Government with regard to altering the limits of Municipalities to lands and buildings belonging to the State of a particular character. In this view the Government of India concurred. The Council are aware that the necessity for legislation arose out of the proceedings of the North Barrackpore Municipality. The Commissioners of that Municipality claimed the right to enter upon and to inspect the premises of the Gunpowder Manufactory, and the Superintendent of that Manufactory represented—and it was a reasonable representation—that that was a power which could not ordinarily be exercised without risk to the very delicate and dangerous operations under his control. The Commissioners, however, had the power, and so long as the Act remained in force, and the manufactory was within their Municipality, they were entitled to exercise that power. The only way out of the difficulty was to alter the limits of the Municipality so as to exclude this magazine from the municipal limits. The Commissioners declined to give their assent to this proposal, and we now ask the Council to amend the Act so as to give the Government power to do so without the consent of the Commissioners of the Municipality. It has been considered that cases of this kind will be sufficiently met if section 9 of the Act be amended so as to give the Government power to exclude from municipal limits any land or buildings in the occupation of the State for military or for naval purposes. With that object, I ask leave to introduce a Bill.

The motion was put to the vote and carried.

The Council was adjourned to Saturday, the 7th April, 1888.

C. H. REILY,

Assistant Secretary to the Govt. of Bengal,
Legislative Department.

Calcutta;
The 17th April, 1888.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 14th April 1888.

Division	No.	District and date of return		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.		*Western Districts.*			
BURDWAN DIVN.	1	Burdwan	Apl 14, '88	Nil	Weather—extremely hot. Prospects of crops favourable. Rain is now wanted. Price of common rice has fallen to a little over 22 seers per rupee.
	2	Bankoora	„ 14, '88	Nil	Weather—seasonable, strong westerly wind in the day. Prospects of indigo, cotton, *boro*, and *til* good. Planting of sugarcane proceeds. Prices stationary.
	3	Beerbhoom	„ 14, '88	Nil	Weather—hot. State and prospects of crops good.
	4	Midnapur	„ 14, '88	Nil	Weather—hot; cool wind in evening. *Boro* crop is commencing to be reaped, and promises well. Rain is required.
	5	Hooghly	„ 14, '88	Nil	Weather—abnormally hot. Prospects of crops not so good as in last week, owing to excessive heat and want of rain.
		Howrah	„ 16, '88	Nil	South winds. *Boro dhan* doing well.
		Central Districts.			
PRESIDENCY DIVN.	6	24-Perghs.	Apl 17, '88	Nil	Weather—very hot with high winds and cool nights. No crops on the ground except sugarcane, which is doing well. Lands are still being tilled for rice crops.
	7	Nuddea	„ 14, '88	Nil	Weather.—Days exceedingly hot with sultry evenings and pleasant cool mornings. Tillage for early rice in good progress. Indigo doing well. Rain much wanted.
	8	Khoolna	„ 14, '88	Nil	Weather—sultry. *Boro* rice promises well. Rain urgently needed for ploughing. The spread of cholera, fever, and cattle-disease is so serious as likely to effect agricultural operations.
	9	Jessore	„ 14, '88	Nil	Weather—very hot with a good deal of west wind. Rain is wanted for all crops.
	10	Moorshedabad	„ 14, '88	Nil	Weather—getting warmer. Sowing of *aus* paddy going on. Harvesting of *rubbi* crops over.
RAJSHAHYE DIVN.	11	Dinagepur	Apl. 14, '88	Nil	Weather—hot with strong west winds at midday. Jute and *bhadoi* are being sown.
	12	Rajshahye	„ 14, '88	Nil	Weather—very hot. Rain urgently required for jute, *aus*, and *aman*, also for further sowings.
	13	Rungpur	„ 14, '88	Nil	Weather—hot with strong west winds. Crops doing fairly, but require rain.
	14	Bogra	„ 14, '88	Nil	Weather—very hot in the beginning of the week; cloudy and cooler at the end. State and prospects of crops good.
	15	Pubna	„ 14, '88	Nil	Weather—hot. Rain wanted. Prospects of crops good.
	16	Darjeeling	„ 14, '88	Nil	Weather—cloudy, no rain. Rain much wanted in the hills. Lands are still being prepared in the Terai. Some jute already sown. Prices steady.
	17	Julpigoree	„ 14, '88	Nil	Weather—hot with strong east wind. Early rice has germinated in parts. Rain much wanted. Prices stationary.
		Eastern Districts.			
DACCA DIVISION.	18	Dacca	Apl. 14, '88	0·42	Weather—hot and windy. A terrific tornado visited Dacca city and Hashail, a village in Munshigunge, on the 7th. Paddy and jute are being sown. *Boro* paddy thriving. Harvesting of *rubbi* crops nearly completed. Prospects continue favourable.
		Manickgunge	...	0·37	
		Munshigunge	...	0·20	
	19	Furreedpur	„ 14, '88	Nil	Weather—hot. Prospects of crops fair, but rain is wanted for jute and early paddy sowings.
	20	Backergunge	„ 13, '88	Nil	Weather—rather warm. Rain wanted. Prospects of crops good.
	21	Mymensingh	„ 13, '88	Nil	Weather—very hot. Prospects of crops good. Rain wanted for cultivation.
CHITTAGONG DIVN.	22	Chittagong	Apl. 17, '88	Nil	Weather—variable. Rain much wanted. Prospects of crops fair. Prices stationary
	23	Noakholly	„ 13, '88	Nil	Weather—seasonable. Strong southerly wind. Harvesting of *rubbi* crops continues. Sowing of *aus* progressing.
	24	Tipperah	„ 12, '88	Nil	Weather—seasonable; some rain would be very beneficial. Whatever standing crops there are, are being reaped with good outturn. Lands are being prepared for rice and jute
	25	Chittagong Hill Tracts.	„ 11, '88	0·79	Weather—foggy in the morning, hot till midnight, and cool in the latter part of the night. A shower of rain on the 9th. Joom burning continues. Tobacco, chillie, and other winter crops are being gathered. Planting of sugarcane commenced.
		Hill Tipperah	„ 12, '88	Nil	Weather—hot. Early rice is being sown in some parts. Prospects of *boro* paddy fair.

Division	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR.					
Patna Divn.	26	Patna	Apl. 14, '88	Nil	Weather—dry and sultry. Threshing of *rubbi* going on. Opium weighment in progress. Prices of food-grains stationary.
	27	Gya	" 14, '88	Nil	Weather—very hot. *Rubbi* being threshed. Sugarcane being irrigated.
	28	Shahabad	" 14, '88	Nil	Weather—dry and hot with high west wind generally at midday. *Rubbi* threshing still in progress. Sugarcane is being irrigated. Opium weighment nearly finished; outturn not quite so good as expected.
	29	Durbhunga	" 14, '88	Nil	Weather—hot. West wind prevailing. Threshing of *rubbi* continues. Prospects of early rice, *moong*, and indigo promising. Opium weighment in progress. Prices remain stationary
	30	Mozufferpur	" 14, '88	Nil	Weather.—Days hot, mornings cool and pleasant. Threshing of *rubbi* crops progressing. Paddy, *moong*, and *cheena* thriving. These crops are still being sown in places. Rain required.
	31	Sarun	" 14, '88	Nil	Weather—hot and dry. Threshing of *rubbi* crops is in full progress. Sugarcane is being irrigated. *Prospects of all crops on the ground good.* Weighment of opium in full swing; outturn excellent.
	32	Chumparun	" 14, '88	Nil	Weather dry with west wind Threshing of *rubbi* crops in progress. Preparation of fields for *bhadoi* and *aghani* sowings going on. Indigo doing well. Weighment of opium progressing satisfactorily.
Bhagulpore Divn.	33	Monghyr	Apl. 14, '88	Nil	Weather—hot and dry with strong west wind at mid-day. *Rubbi* harvest completed; threshing in progress with fair outturn
	34	Bhagulpur	" 14, '88	Nil	Weather—hot with strong west winds. Sugarcane doing well. Rain wanted. *Rubbi* outturn eight to ten annas.
	35	Purneah	" 14, '88	Nil	Weather.—Genial west winds have abated. Land is being prepared for ensuing rice.
	36	Maldah	" 14, '88	Nil	Weather—very dry. Days hot, with changeable winds, generally westerly. Nights still moderately cool. *Boro* paddy still doing fairly. Some *bhadoi* seedlings are up, and some being sown, but rain is very much wanted, and the unusually prolonged drought is doing harm both to standing crops and to preparation of land for future crops. Common rice selling at an average of 23¼ seers per rupee.
	37	Sonthal Perghs.	" 14, '88	Nil	Weather—hot with strong west winds *Rubbi* nearly all cut; outturn about 12 annas (16 being average). Indigo prospects bad. Some sugarcane planted. Rain wanted for sugarcane and mango. *Mohua* outturn not good.
ORISSA					
Orissa Divn.	38	Cuttack	Apl. 13, '88	Nil	Weather—very hot. *Dalua* rice is being cut with fair outturn. Rice is sold at 21 seers per rupee in town.
	39	Pooree	" 12, '88	Nil	Weather—seasonable. Ploughing going on. *Dalua* crop being harvested. *Rubbi* being gathered. Sugarcane, cotton, *dalua*, and mango are in want of rain in the Khurda sub-division. Common rice 20 seers 2 chittacks per rupee in the Sudder sub-division and 21 seers 5 chittacks in the Khurda sub-division.
	40	Balasore	" 13, '88	Nil	Weather.—Days hot but nights fairly cool. *Dalua* rice is being harvested in south. Cultivation of lands in progress everywhere. Rain wanted.
CHOTA NAGPORE.					
South-West Frontier Agency.					
Chota Nagpore Divn.	41	Hazaribagh,	Apl. 13, '88	Nil	Weather—hot, strong west winds. Sugarcane promising. Prospects of mango fair. *Mohua* yielding well except in parts of the district. Opium weighment in progress. Condition of agricultural stock generally fair.
	42	Lohardugga	" 14, '88	Nil	Weather—very warm. Harvesting of *rubbi* continues. *Mohua* gathering is going on. Prices steady.
	43	Singbhoom	" 13, '88	Nil	Weather—most extraordinary; hot, moist, and muggy. Wheat is still being harvested. Sugarcane and cotton doing well *Mohua* and mangoes suffered much; not more than half crops expected.
	44	Manbhoom	" 14, '88	Nil	Weather—very hot with strong west winds. Sugarcane is being planted *Mohua* dropping; probable outturn from 12 to 16 annas. Cotton doing well. Great scarcity of water throughout the district.

Published for general information.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten
The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number
are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12
station in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

* Mean of 6 days.

for the week ending Friday, the 13th of April 1888.

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the* 17*th April* 1888.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 13TH APRIL 1888.

At the close of the previous week, ordinary hot weather conditions prevailed over Bengal. As is usual at this season, hot dry westerly winds were blowing in Behar, in West and Central Bengal, and had even penetrated over a large part of North Bengal. In South-West Bengal south-westerly winds were blowing, bringing up moderate amounts of moisture into the Province; while in East and South-East Bengal very moist southerly and south-easterly winds were blowing. Down the Assam Valley a steady north-easterly current was reported, which apparently penetrated along the foot of the hills as far as Julpigoree. The meteorological conditions in neighbouring districts of the Province on the 6th were very diverse. Thus at Rampore Beauleah on this day a dry south-westerly wind was reported, the saturation with moisture being only 23 per cent., at Bogra the air saturation was only 21 per cent., and at Berhampore only 18 per cent., while in the neighbouring part of South-East Bengal winds were very moist, and thus at Dacca the air saturation was 70 per cent. and at Furreedpore 65 per cent. On the 7th a sudden increase in the strength of the moist winds appears to have taken place, and humidity rose rapidly at many stations, only, however, to decrease quite as suddenly on the following day, when apparently a rapid increase took place in the strength of the dry westerly wind which was blowing over the north and centre of the Province. These remarkable changes in humidity, which point to equally remarkable and sudden shifts of wind with probably more or less corresponding changes of temperature during the period April 6th to the 9th, are best shown in the form of a small table.

Table showing the saturation of air with moisture. Complete saturation = 100.

Dates.	Central and North Bengal.							East and South-East Bengal.				
	Raniganj.	Berhampore.	Rampore Beauleah.	Bogra.	Maldah.	Dinagepore.	Rungpore.	Chittagong.	Burrisal.	Noakholly.	Furreedpore.	Dacca.
April, 6th ...	9	18	23	21	31	11	16	68	73	70	65	70
" 7th ...	31	68	61	58	49	13	45	65	73	68	63	72
" 8th ...	8	17	27	27	26	10	45	76	78	78	61	75
" 9th ...	7	15	18	14	27	7	21	79	58	67	38	50

From these figures it will be clearly seen that the moisture laden current, which on the 6th was confined to the south of the Province, had advanced between the 6th and the 7th in a northerly direction, and had on the morning of the 7th penetrated as far as Central Bengal, as represented by Berhampore, and into the southern part of North Bengal, as represented by Rampore Beauleah, Bogra, Maldah and Rungpore; but that it had failed to reach as far as Dinagepore. The moisture laden current was, however, driven back during the period 10 A.M. of the 7th to the 8th, and by 10 A.M. of the 8th the dry westerly wind had almost completely re-established its former position. These fluctuations in the area occupied by these more or less opposite winds are unusually large and well-marked, and such cannot happen unless the atmosphere is in a somewhat disturbed condition. The result of such a conflict of more or less opposing winds, varying so largely as to humidity, &c., is usually to produce the local storms known as nor'westers; and as a matter of fact, during the first few days of the week, local storms were reported from several stations in the Dacca, Chittagong, Noakholly, Mymensingh and Tipperah districts of East Bengal.

In addition, however, to the usual local storms or nor'westers which thus occurred, the disturbed conditions in the Dacca district were accompanied by the formation of a small but very violent tornado or whirlwind, which passed through the town of Dacca and the neighbouring district on the evening of the 7th, and which caused much destruction of life and property throughout its course. It is very rarely that Bengal is visited by storms of this type, and on account of the suddenness of their appearance, their short duration, the small path over which they act with destructive violence, and the difficulty in obtaining reliable and accurate accounts of the phenomena preceding and attending them, no attempt has hitherto been made to work out scientifically the subject of Indian tornadoes. Two or three only have in fact been described. On the other hand, tornadoes of the most violent character are rather frequent in parts of the United States, and the scientific work which has there been done on their history shows that the atmospheric conditions which appear invariably to precede the formation of a tornado are violent contrasts of temperature and humidity immediately to the north and south of the path to be traversed by the storm. From the above description of the weather in parts of East and North Bengal at the beginning of the week, it will be seen that the conditions were precisely those which are invariably found to precede tornadoes in the United States. In addition, however, to these antecedent conditions, there must be some particular cause or set of causes which must determine the formation of a tornado, but of which nothing is at present known, for

similar, though perhaps not such violent, contrasts of temperature and humidity in different air currents in Bengal frequently happen at this season of the year; yet in most cases they are only followed by the formation of dust-storms and nor'westers, but which are sometimes very fierce, and it is only from the presence of some unknown exceptional conditions that perhaps once in five or ten years excessively fierce whirl winds, tornadoes or even water-spouts are formed, instead of the usual class of Indian hot-weather storms. Much doubt exists as to where the enormous energy displayed in tornadoes is derived from; but it is possible, as in the case of cyclones, the energy is derived from the condensation of aqueous vapour into rain, for in most tornadoes torrential rain follows after the passage of the storm.

Detailed and accurate accounts of the Dacca tornado have not yet been received; but the meteorological observer at that station estimates its width to have been only 200 yards; it pursued apparently a zigzag course for a considerable distance both over Dacca and parts of the surrounding country, but its commencement and ending have not been accurately ascertained. The general track of the storm was probably from S.W. to N.E., and it passed through the compound of the meteorological observatory. The observatory and its instruments were not damaged, as at this period the violence of the storm did not reach down to the ground, but the tops only of five large trees in the compound were cut off at about 30 feet from the ground. The time of commencement of the storm at the observatory is given by the observer to be 7-30 P.M. (? Madras or local time), and its duration to have been three minutes only. The force of the wind was excessive. Further details will be given when the full history of the storm is subsequently discussed.

The remaining details of the meteorology of the week are of comparatively little interest In connection apparently with the disturbed conditions which gave rise to the tornado, a large low pressure area was developed over North Bengal on the 8th, which still existed on the 9th, but which disappeared on the 10th. There is, however, nothing at present to show that any barometric depression was generated previous to the formation of the storm on the 7th. For the remainder of the week there have been the usual slight oscillations of pressure and temperature; but in the case of humidity at the stations considerably removed from the sea coast, the percentage of saturation has been exceptionally low almost throughout the week, except when the abnormal oscillations of humidity above referred to occurred in the central and eastern parts of the province.

Pressure.—Generally for the first two days of the week fell decidedly; from the 9th to the 11th a slight but distinct rise occurred; while on the 12th and 13th pressure again commenced to fall by small amounts. As already stated, a low pressure area existed over North Bengal for a part of the week, and at such stations as Rungpore and Julpigoree the average pressure for the week has been more than a tenth of an inch below the normal. Taking into consideration only the stations from which averages have been received for a series of years, and which therefore yield reliable averages, the mean pressure of the Province for the week has been 0·067 inch below the normal.

Temperature—Has throughout the week been very high, and the mean temperature of the whole province has been two degrees in excess of the normal; while in such districts as Chutia Nagpur and North Bengal the excess has been nearly three degrees. Some very high maximum temperatures have again been recorded, the hottest day of the week being usually the 13th. The following are some of the highest temperatures recorded :—

At Bankoora	on the 13th	... ...	108·6°
,, Ranigunge	,, 13th	... ...	108·5°
,, Chyebassa	,, 13th	... ...	108·3°
,, Midnapore	,, 13th	... ...	107·9°
,, Burdwan	,, 13th	... ...	106·8°
,, Gya	,, 13th	... ...	106·5°
,, Dehree	,, 13th	... ...	106·4°
,, Nya Doomka	,, 8th	... ...	106·1°

At Calcutta (Alipore) the highest temperature during the week was 100·4° on the 9th.

The following table shows the temperature variations during the week at eight typical stations in the province :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 13th April 1888.

	Normal mean maximum temperature for the week ending 13th April.	Actual mean maximum temperature for the week ending 13th April 1888.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 13th April.	Actual mean minimum temperature for the week ending 13th April 1888.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 13th April.	Actual mean daily temperature for the week ending 13th April 1888.	Variation of actual mean from the normal.
Calcutta	94·7	96·6	+1·9	75·1	75·8	+0·7	84·9	86·2	+1·3
Dacca	92·9	94·3	+1·4	73·4	76·3	+2·9	83·2	85·3	+2·1

Purneah	96·8	99·0	+2·2	68·6	67·5	−1·1	82·7	83·3	+0·6
Hazaribagh	96·6	97·8	+1·2	70·6	71·8	+1·2	83·6	84·8	+1·2
Darjeeling	60·2	62·1	+1·9	45·3	48·1	+2·8	52·8	55·1	+2·3

Humidity.—The following exceptionally low humidities have been recorded during the week. The numbers given represent the amount of saturation of the air with moisture, 100 equalling complete saturation :—

At Ranigunge	on the 8th	humidity was	...	...	8 per cent.
,, Ditto	,, 9th	,,	...	...	7 ,,
,, Dinagepore	,, 9th	,,	...	...	7 ,,
,, Motihari	,, 8th and 9th	,,	...	...	6 ,,
,, Dehree	,, 8th	,,	...	...	5 ,,
,, Ditto	,, 9th and 10th	,,	...	...	7 ,,
,, Ditto	,, 11th	,,	...	...	0 ,,
,, Buxar	,, 8th	,,	...	...	8 ,,
,, Bankipore	,, 8th	,,	...	...	8 ,,
,, Bhagulpore	,, 8th	,,	...	...	6 ,,
,, Nya Doomka	,, 8th and 9th	,,	...	...	8 ,,
,, Hazaribagh	,, 7th	,,	...	...	8 ,,
,, Ditto	,, 8th	,,	...	...	4 ,,
,, Ditto	,, 9th	,,	...	...	5 ,,

Winds.—In addition to the facts with reference to the distribution of the winds given in the general summary, the strength of the southerly winds blowing during the week at the head of the Bay has to be noticed, and thus at Saugor Island from the 7th to the 8th 648 miles were recorded on the anenometer, and from the 12th to the 13th 600 miles. The average daily velocity at Saugor Island during the week has been no less than 535 miles, or 22 miles an hour.

Rainfall.—The only rainfall which has occurred during the week has been in East Bengal which has been brought by the local storms as previously described. The average rainfall, in East Bengal, has, however only been 0·16 inch. With this exception the whole Province has been rainless. At Dacca the rainfall on the 7th was only 0·42 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 13th of April 1888 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of Month.		Since 15th May 1887.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, △ dew, ≡ fog.

ALEX. PEDLER,
For Offg. Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 16th April 1888.

The mean temperature of the seven days	86·4°
The extreme variation of temperature	29·7
The maximum temperature	102·0
The mean relative humidity	61 %
The total fall of rain from 8th to 14th April 1888	Nil. Inches.

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA; *The 16th April 1888.*

ALEX. PEDLER, *For Offg. Meteorological Reporter to the Govt. of India.*

MEMORANDUM.

THE following is a summary of the main facts connected with the vital statistics of the principal Municipalities in Bengal for the week ending 31st March 1888, as d duced from the annexed table—

1. That, during the week in question, births and deaths were registered in the proportions, respectively, of 20·1 and 27·8 per 1,000 of population, as opposed to 22·5 and 29·3 per 1,000, respectively, during the preceding week ending 24th March, indicating a retrogression in their registration.

2. That the following Municipalities returned the highest proportions of births and deaths:—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Kishnaghur	45·4	Serampore	84 4
Durbhanga	37·8	Comillah	65·5
Monghyr	29·8	Suburbs of Calcutta	57·7
		Bali	35·1
		Beauleah	34·2
		Gya	29·4
		Puri	29·4
		Narainganj	29·0
		Bhagulpore	29 0

3. That the casualty-rates from the principal diseases specified below exhibit no noticeable variations in comparison with the death-rates from the same diseases in the preceding week:—

	Ratio per *mille* during the weeks ending—	
	31st March 1888.	24th March 1888.
Cholera	9·2	9·8
Small-pox	·2	·2
Fever	9·0	9·8
Bowel-complaints	2·7	2·6
Injury	·2	·4
Other causes	6·4	7·0

4. That eliminating fever and bowel-complaints which proved notably fatal, the former only in the Beauleah town, viz. at the rate of 21·0 per 1,000 of population, and the latter in the Puri Municipality, viz. at 10·5 per 1,000, and small-pox and injury which did not exhibit any local exacerbation in fatality, cholera and the maladies returned under the head of "other causes" manifested exceptional mortality in the following Municipalities:—

Cholera.	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Serampore	60·8	Midnapore	17·0
Comillah	50·1	Suburbs of Calcutta	11·6
Suburbs of Calcutta	29·4	Gya	10·2
Howrah	14·3		
Hughli	5·4		

It will be seen from the above figures that cholera appears to have prevailed very severely in Serampore, Comillah, the Suburbs of Calcutta and Howrah.

5. That the death-rates under the heads of *Sex*, *Class* and *Age* stood as shown below:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	31·1	Christians	13·0	Under 1 year	186·9
Females	24·0	Hindus	28·0	1 and under 5 years	46·0
Ratio of male deaths to every 100 female deaths	147	Mahomedans	28·1	5 " 10 "	14·7
				10 " 15 "	12·7
				15 " 20 "	23·0
				20 " 30 "	21·7
				30 " 40 "	19·4
				40 " 50 "	20·4
				50 " 60 "	26·8
				60 years and upwards	53·0

K. P. GUPTA, M.B., F.R.C.S., *Surgeon-Major,*
Offg. Sanitary Commissioner for Bengal.

The 16th April 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

General remarks on the fluctuation of principal staples carried over the East Indian Railway during month ended 25th February 1888.

INCREASES.

Coal and coke.—There was an increase in both the upward and downward traffic; that in the former is due to improved demand from the North Western and Bombay Baroda and Central India Railways, and the increase in the downward traffic is due to despatches for the Eastern Bengal State Railway over the Jubilee Bridge.

Fruits other kinds.—The increase was principally in betelnuts from Howrah, Sealdah and Digha Ghât.

Gram and pulses.—

Other rain and spring crops.—This was in continuation of the increase reported in previous months, and was due to scarcity of food-grains in the North-Western Provinces.

Rice (husked and unhusked).—There was a decrease in weight carried attended with an increase in the earnings, and this was due to the rice being carried long distances upwards this year, instead of, as in 1887, short distances downwards.

Minerals.—Due chiefly in lime from Raneegunge for the Kidderpore Dock works.

Iron.—This was chiefly in despatches from Howrah for the Government Telegraph Department, and in pig-iron from Barakur.

Oil.—The increase under this head was chiefly in kerosine oil from Howrah.

Salt.—The increases were in the despatches from Howrah and *viâ* Agra; from Howrah the increase is attributable to a heavy speculation in Calcutta on account of the increased duty imposed on salt.

Seeds.—The increases were chiefly in linseed, mustard and rape and indigo seed; the former was due to an active demand in Calcutta for export; that in mustard and rape-seed to increased despatches from the Bengal and North Western Railway. The increase in indigo seed was chiefly in the despatches from Delhi.

Spices.—Chiefly in chillies from Mokameh and the Tirhoot State Railway to Howrah.

DECREASES.

Cotton.—Due to the same cause as given last month, viz. want of supplies.

Piece-goods, European.—The decrease was both from Howrah and *viâ* Jubbulpore, principally in the despatches to Cawnpore.

Turmeric.—Principally in despatches from Howrah.

Wheat.—There was very little export business, and the wheat carried during the month was principally for local consumption.

Government stores.—This was almost entirely in the despatches from Howrah.

Brass and copper.—Due to advanced prices during the month, which prevented business being done.

Opium.—Due to despatch of Government opium being postponed.

Railway material, Foreign.—The decrease was chiefly in despatches from *viâ* Jubbulpore; there was an increase in weight in the short lead traffic from Howrah, attended with a decrease in earnings.

Sugar and jaggree.—There was an increase in weight carried, with a decrease in earnings due to short lead traffic from the Oudh and Rohilkhund Railway.

N. ST. L. CARTER, *Traffic Manager.*

TRAFFIC MANAGER'S OFFICE, JAMALPUR, *the* 13*th April* 1888.

The HON. H. PRATT.

BENGAL MUNICIPAL ACT III OF 1884, AMENDMENT BILL.

The HON. MR. MACAULAY, in introducing the Bill to amend the Bengal Municipal Act III of 1884, and moving that the Bill be read in Council, said:—The Bill is one of extremely attenuated dimensions, and I do not think I need trouble the Council with any further observations upon it.

The Bill was read accordingly. The motion was put to the vote and carried.

The Hon. Mr. Macaulay also moved that the Bill be referred to a Select Committee, consisting of the Hon. Mr. Allen, the Hon. Dr. Gooroo Dass Banerjee, and the Mover, with instructions to report thereon.

The motion was put to the vote and carried.

CALCUTTA AND SUBURBAN MUNICIPALITIES AMALGAMATION BILL.

The Hon. Sir Henry Harrison moved that the clauses of the Bill to consolidate and amend the law relating to the municipal affairs of the Town and Suburbs of Calcutta, as further amended, be further considered for settlement in the form recommended by the Select Committee.

The motion was put to the vote and carried.

The Hon. Dr. Gooroo Dass Banerjee moved that, for the definition of "Calcutta" in section 3, the following be substituted :—

"'Calcutta,' subject to the inclusion or exclusion of any local area by the Local Government under section four hundred and fifty-eight, includes the area bounded as follows :—

By a line drawn along the southern and western bank of the Circular Canal from the River Hooghly to the south of Balliaghatta, till it meets the Pagladanga Road. Thence along the eastern edge of the Pagladanga Road to a point where it meets the Chingrahatta Road. Thence along the southern edge of the Chingrahatta Road to a point where it meets the South Tangor Road. Thence along the eastern edge of the South Tangor Road to a point where it meets the South Topsea Road. Thence along the eastern edge of the Topsea Road to its junction with the Tiljullah Road. Thence westward along the southern edge of the Tiljullah Road to its junction with the Ballygunge Circular Road. Thence along the southern and western edge of the last mentioned road to its junction with the Puddopookur Road. Thence westward along the southern edge of the Puddopookur Road, and its continuations, the Pakoortollah Road, and the Chaoollputty Road to Tolly's Nullah. Thence southward along the eastern bank of Tolly's Nullah to the southern edge of the Tollygunge Bridge. Thence westward along the southern edge of the road leading therefrom, and its continuations, the Sharpore Road, the Goragachee Road, and the Taratollah Road to Nimuck Mehal Ghât, where it joins the Hooghly. And thence along the left bank of the Hooghly to its junction with the Circular Canal. But from this area there shall be excluded—

(1) —Fort William.
(2).—The Esplanade.
(3).—That part of Hastings, north of the south edge of Clyde Row, which has hitherto been excluded from the Municipality of the Town of Calcutta."

He said :—I beg to point out how these boundaries will stand. If the Council adopt this amendment, the line of roads commencing with the Tiljullah Road, going along the Ballygunge Circular Road, and coming to a point where the Chaoollputty Road meets Tolly's Nullah, will give the northern boundary of the suburban area excluded on the south ; and a line southward along Tolly's Nullah will be the western boundary. That is how my amendment stands. I now ask permission to move a further amendment in the alternative, if my first amendment is not accepted, that the definition of "Calcutta" be so altered that this other line of roads which I have marked in two of the maps now before the Council in red pencil be adopted as part of the boundary. That line consists of the Tiljullah Road and the Ballygunge Circular Road up to the point where the latter meets the Majra Road.

Then the boundary goes south along the eastern edge of the Majra Road up to the Beltala Road. The boundary then continues along the south edge of the Beltala Road ; and then the boundary proceeds along the eastern edge of the Russapugla Road till it meets the Tollygunge Road. The verbal alterations which this will render necessary in the definition of 'Calcutta' I have in writing, and I ask permission to move the same in the alternative if my first amendment is not accepted. My reasons are almost the same as those I had the honour to submit in support of a former motion of mine for a more restricted boundary when considering the question of the number of wards in the town. I need not therefore repeat those reasons in detail now. I will only observe that, shortly stated, those reasons amount to this. That considering the limited funds of the present Calcutta Corporation, and remembering that the inclusion of the additional suburban area will lead to an increase of liabilities without bringing in anything like a proportional increase of funds, the larger the suburban area we can conveniently leave out, the better it

will be for the improvement of the suburban area we propose to take in. The only question then is one of convenience. Can we conveniently leave what my amendment proposes to leave out? As regards the former of these two alternative amendments, I may observe that the major portion of the area proposed to be left out is scarcely of an urban character, though I am bound to admit that the area between Tolly's Nullah and Russapugla Road is of an urban character. But no such objection can apply to the second of my two alternative amendments, because the area that the boundary there proposed excludes is almost wholly of a rural character. I may also observe that neither of these two amendments is open to the objection on account of which my former motion for a restricted boundary was rejected. The objection was that it excluded the Kidderpore Docks, Kidderpore, and Alipore. All those portions will now come in under either of these two amendments, and therefore there need be no objection on that score. I have one other observation to make, namely, that by leaving out rural areas in the vicinity of the proposed new town, we leave some breathing ground, so to speak, for the poor, who are unable to pay the increased rates which will be levied within the amalgamated suburban area, and may go outside the town and take up their abode in the area left out And if in the end those areas grow populous, then the Lieutenant-Governor, under the power reserved to him, might include them within the town thereafter. The change might be effected gradually without any hardship to the people.

His Honour the President said:—As I understand the proposal of the hon. and learned member, the difference in regard to the area in dispute is this: the line drawn by the Select Committee has for its eastern boundary the line of railway going from the South-Eastern Railway station to the Kidderpore Docks. The first proposal made by the hon member was to take as the eastern boundary of the new municipality a line a good deal to the west of that; a line which, for practical purposes I may say, follows Tolly's Nullah as far as the Tollygunge bridge. There is no question that a great portion of the country included between these two boundaries is rural rather than urban; but, as he admits, that portion between the Russapugla Road and Tolly's Nullah, including all the lanes around Kalighat, are distinctly urban and very thickly populated. I walked there quite lately and satisfied myself that that bit of land is so distinctly urban in character that it ought to be included in the municipality. Personally, therefore, I am quite prepared to accept the second alternative of the hon. member's two proposals, and I think there is a good deal to be said for the argument which he uses—that as far as it is in the power of the new municipality to exclude from its operation thinly-populated non-urban tracts for the present, it is as well they should do so. The time will very likely come when these tracts will be as thickly populated as the portion we propose to include, but that time has not yet come, and sufficient unto the day is the evil thereof. On these grounds, speaking for myself only, I shall be prepared to accept the second alternative of the hon. member's two proposals. At the same time I shall be glad to hear what other hon. members, who have studied the question in Select Committee, have to say on the subject.

The Hon. Mr. Allen said:—That the portion of country which it is proposed to exclude under the second amendment is perfectly rural is entirely true: it is covered with paddy-fields, kitchen gardens and cultivation generally, and when this Bill was first introduced I was opposed to its being included within Calcutta. But in Select Committee I was persuaded, and I adhere to the conclusion I then came to, that on the whole it was more desirable to include it in order that the line of railway might be the boundary of Calcutta. There is great inconvenience in taking roads for boundary lines For instance, the hon. member took the Ballygunge Circular Road as one of the boundaries. The consequence would be that a man who possessed land on this side of the road came within Calcutta, while houses on the other side of the road would be neither in Calcutta nor in any other place. The Suburban and the South Suburban Municipalities are, I believe, divided by the sandy road which runs from the Jodhpore thannah to the Tollygunge bridge, and the line of railway follows that line within a few hundred yards, so that in taking the line of railway for our boundary we are accepting a boundary which divides and marks

off one municipality from another—the South Suburban from the ordinary Suburban Municipality—we avoid the inconvenience of taking in houses on one side of a road and leaving out other houses on the other side, while the inconvenience of including within the town an area which is not of an urban character is very trifling. The assessment on such a tract of land would be almost nothing, and it is not likely that the sanitary and other provisions of the Act will come into operation in that portion of Calcutta for a very long time to come. By taking the line of railway as the boundary, the inconvenience to which I have referred would be avoided; and even should houses be erected up to the verge of the railway, still the land which forms the property of the Railway Company is a strip of land of considerable width, so that there would be a marked distinction between what would be Calcutta and what would not be Calcutta. It is not, however, at all likely that houses will be built up to the railway fence. It therefore appears to me that the inconvenience and the risk of confusion would be infinitely less by taking the line of railway as the boundary than by taking any road or series of roads. There is a mistake in the amendment in speaking of the Tiljullah Road; the road is the Bandel Road which leads from the rifle butts to the end of the Ballygunge Circular Road. I therefore accept the boundary which was settled by the Select Committee after much consideration, and I think it much better to take the railway line as a boundary than to follow the line of these roads which might lead to confusion.

The Hon. Sir Henry Harrison said:—My own view of the subject is something like that of the classical donkey with two bundles of hay at equal distances on either side. The arguments on both sides are so nearly balanced that all I can say is that although I think I shall give my own vote for taking the line of railway for the boundary, having weighed both the advantages and disadvantages, I cannot press those who think otherwise to adopt my view. I do not agree in the argument that the poor would be driven out of Calcutta by increased taxation. Under the present system no doubt the poor feel the taxation very heavily, but one of the objects of the Bill is to bring about relief to those upon whom taxation now presses most hardly, and I am inclined to think that if this Bill becomes law, the position of the poor in Calcutta will be very much better than it is now.

Both the original and alternative amendments were put to the vote and respectively negatived.

The Hon. Sir Henry Harrison moved that in clause (*b*) of section 42, the words "The Chairman may also hold the appointment of Commissioner of Police, and" be inserted before the words "The Chairman."

He said:—The object of this amendment is not to put any obstacle in the way of the change which has always been recognized by the Select Committee, that if this Bill becomes law, and if the police-rate is not levied, there should be separation of these two appointments. But the object of it is for a purpose of equal importance, but at the same time differing very much from it, namely, that in adopting this change there may be left a *locus penitentiæ*, or an opportunity of reviewing the measure at any time should it turn out not to work well. I know well that the body of opinion on the subject of the separation of the two offices is so overwhelming that I appear almost to stand alone. At the same time it does require very strong arguments to induce the Council to tie the hands of the Government and to prevent it from going back to the present policy. It is difficult to say how strong the argument ought to be to justify us in burning our ships. The matter strikes me very forcibly, because this is not the first time the question of separating the two offices has been raised. The very same question was raised in 1876. The late Hon. Kristo Das Pal then moved the separation of the two offices, and he was replied to by the then Lieutenant-Governor himself in words so forcible that I ask the permission of the Council to read them. Sir Richard Temple said:—

"I listened with great interest and attention to all the arguments which have been advanced by him, but I deem it my duty to say that I cannot concur in any one of them. So far from the present arrangement causing divided responsibility, as the hon. member seems to think, it appears to me that it has the clearest possible advantage in uniting responsibility. It may be that the Deputy Commissioner of Police exercises a great

deal of power over the police, and that the Chairman of the Justices does not interfere very much with them. Nevertheless, he does interfere with them in some respects, and in so far as he does interfere, he interferes beneficially. But if his interference was really so rare and exceptional as the hon. member supposes, then what possible objection can there be to uniting the functions of Commissioner of Police and Chairman of the Justices? Either the Chairman does interfere with the management of the police, or he does not; if he does not, then there is no practical harm in having the power; but if he does I maintain that he does so with advantage.

"The duties of the Chairman may be varied and onerous, as the hon. member seems to consider, but I believe they will not be rendered less onerous by his being shorn of his power as Commissioner of Police, and I believe that the possession of this power renders the execution of his duty as Chairman of the Justices much more smooth than it would otherwise be; and so far from his being able to do much more for the town if he were not also Commissioner of Police (as the hon. member supposes), my belief is that he would be able to do much less; and that, were the functions of the two offices to be divided, the state of the town would not be so good as we now see it. And as to the combined power being used to the detriment of the poor and the liberty of the people of the town (as stated by the hon. member), I cannot at all believe that to be the case. I do not suppose that the police are always blameless; they may be sometimes in the wrong. But, on the whole, I believe that the police powers of the town, as administered by the officer who combines the functions of Chairman of the Justices and Commissioner of Police, are exercised judiciously and considerately towards the people. There may be instances to the contrary, but whenever they occur a prompt remedy is applied. But my impression is that the Police Administration of the town has been on the whole just and considerate towards the people, and that it is more likely to be so when the two offices are combined in an officer who has so direct an interest in the welfare of the town as the Chairman of the Justices must necessarily have. I desire to put that in the clearest manner as regards the interests of the people, viz., that the Commissioner of Police is more likely to be merciful and considerate when he holds the office of Chairman of the Justices than if he held the office of Commissioner of Police only. I believe it is the combination of the two offices that greatly improves the practical adaptability of the police administration to the needs and feelings of the people.

"As regards the experience of Bombay, I need not remind the Council at this moment that I have a great respect for the example of that Presidency town, having so recently quoted its experience from this Chair. But there are cases in which this Council may be permitted to judge for itself, and I contend that in this matter we have a better system than that which exists at Bombay. We have what is of the greatest benefit, viz., a strong, united, and efficient executive, and I believe the condition of the city and its administration will compare favourably with that of any city in 'British India;' and I do hope there may be no disturbance of this system, which long experience has shown to work so well."

I think the experience of twelve years since that time has not done anything to alter the circumstances which led Sir Richard Temple to speak so strongly in favour of keeping the two offices united, and no one would say that the police had become inefficient; and those who say that the municipal arrangements are not efficient will not say that it is because of the union of the office of Commissioner of Police with that of Chairman of the Corporation. I think that the inefficiency of the municipality would have been greater and not less had it not been for the assistance which the head of the municipality has derived from being also the head of the police. Sir Richard Temple argued in favour of continuing the union of the two offices, mainly on the ground of the advantage to the police itself. But although I believe these arguments are correct, it is in the interests of the Corporation and the future Chairman of the Corporation that the proposed separation should not be made. The police and municipal establishments are necessarily brought into contact at all points of the city. These two bodies represent two fundamentally different animating principles. The animating principle of the police may be said to be the efficiency of the public service, whereas the animating principle of the Corporation is the convenience of the community and the individual. Nothing strikes me more forcibly than that in the police the first consideration is always efficiency, whereas in the municipality the convenience of the public is everything, and everything must yield to it. I may appeal to many of the amendments on the paper to-day to show how that spirit animates the Corporation. I am not blaming the municipality: it is good to a certain extent, but if pushed too far it is not good. We have here two bodies, whose animating principles may be said to be two opposite poles, and the result must be a rapid discharge of electricity unless you apply the connecting link which will take off the current. The Chairman of the Corporation is that connecting link. Hardly a week passes when he does not have complaints from one side or the other, commenting on the action of the one or drawing attention to

something which is deficient in the other, and I derive the greatest advantage from such complaints. I get the benefit of the information, but before acting on it, where there is a sting in it, I take it out. The reports received by me are utilised, but they do not lead to friction between the two bodies. Of course there are cases in which subordinates of the two bodies have come into more marked collision, but they are comparatively rare. What happens every day is something in the form of a criticism or report which now comes under one authority; but if the two bodies were separate, would terminate in correspondence and friction. Nor can it be said that experience everywhere else is against it. In England, in all boroughs of 30,000 inhabitants, and in many of less extent, the police are the servants of the Corporation; they are appointed and paid by them, and Government interference extends no further than the obtaining of a report periodically from an Inspector appointed for the purpose, and the Government do not sanction a contribution—for there the Government give a contribution—unless that officer reports well of the efficiency of the police. In all other respects it is a municipal force. In France the Mayor is the head of the Police, except in Paris. Paris is placed under a special disability in consequence of past proceedings there, and the police is under the Prefect of the Seine and the Corporation is shorn of all police authority. Neither is the experience of Madras and Bombay to the point. The question is, is it desirable that the Chairman of the Corporation should sink into a very inferior position? If it is, then possibly the experience of Madras may be to the point. In Madras there is a separation of the two offices. The present Chairman of the Corporation there occupies a position a little below the Inspector-General of Registration and a little above the Superintendent of Stamps and Stationery. If that is a desirable position for the Chairman of the Calcutta Corporation, then of course the separation of the two offices is desirable. I am aware that there are some members of the Corporation and of this Council who think that in some respects that is a desirable position, because the more the position and the prestige of the Chairman declines, the more the probability of the nomination falling into the hands of the Commissioners. I do not mean to say anything against that. We perfectly understand that the natural desire of many of the Commissioners is that that might be brought about; and it is but natural that seeing that this arrangement will tend in that direction, they will be influenced to do what they can to effect the separation of the two offices. But it is not wise for them to do so. The position of the Corporation and of their Chairman is so closely united that their prestige and influence must fall together. I have always fully felt that the interests of the Corporation and my own are identical, and that whatever redounds to its credit redounds to mine. But the opposite is also true, and it will infallibly be found that if the position of the Chairman is lowered, the position of the municipality will decline with it. When the Chairman of the Corporation loses his influence with the Government, and becomes a personage of less importance in the town and occupies a more subordinate position, the prestige of the Corporation will be weakened, and the desire to serve on it will decline also. One of the greatest objections to this separation of offices is the inevitable decline in the importance of the Corporation which will be the result. Then, as regards the system in Bombay, the only way it has worked has been by the head of the municipality being another Commissioner of Police. He is called the "Municipal Commissioner," but is in reality a second Commissioner of Police. In Bombay the executive is not in the hands of the Corporation as it is here. The Corporation has the financial control, but in all ordinary matters, when the funds have been granted, the Municipal Commissioner does as he likes. The Town Council is a separate body independent of the Corporation, but the Municipal Commissioner has all the powers of the executive, and as a consequence it is most interesting to observe the totally different turn the discussions on the Bill have taken in Bombay as compared to what is happening here. The Bills in themselves are in many respects similar. Here the objections are almost entirely to powers being conferred upon the Corporation. You have the singular position of the municipality itself and those whom they regard as their special representatives not asking you to increase the powers of the Corporation, but not to increase them. On the other hand, you see no traces of friction between the executive and the municipality itself. The Commissioners are represented by the Com-

missioners in meeting. The executive are represented by the phrase "Commissioners," which means that in all cases where there is no special rule, vote or resolution of the Commissioners to the contrary, the Chairman exercises the power. Not a single case throughout the whole of this Bill has there been in which we have fought as to whether we should have the phrase "Commissioners in meeting" or "Commissioners"—so complete is the agreement. In Bombay, on the contrary, the whole struggle regarding the Bill has been a struggle between the "Municipal Commissioner" and the Corporation. The Bill was framed so as to give the whole power to the "Commissioner," and the amendments proposed were nearly all to substitute one for the other. It has been simply a struggle for authority. They raise no objection at all to the whole class of sections which have been objected to here. All the sanitary powers conferred by the Bill are much more stringent than they have been proposed to be made here, but they have been passed without objection. The simple question is, who shall exercise the power? So it cannot be said that you have not the same problem. You have an officer of the executive in the place of the "Municipal Commissioner." It may be well, at a time when it is easy to find an efficient Commissioner of Police for Calcutta, to try the change, especially when the municipality will not pay for the police. But what harm can there be in leaving the door open to the Government to go back if they find the change does not work? It seems as if those who advocate the change admit that they are afraid it will turn out wrong. If it turns out well, and if my expectations prove wrong, what harm can there be in having the provision in the Bill? But should the change turn out wrong, and should injury be done to the town or to the police, or should it turn out not easy to find an efficient Commissioner of Police apart from the Chairman of the Corporation, and should Your Honor or your successor be of the same opinion as the Lieutenant-Governor of 1876, why should you not be allowed to retrace your steps and say, as Sir Richard Temple said, that long experience has shown the union of the two offices to work well?

The Hon. Mr. Macaulay said :—It is with great reluctance that I find myself compelled to oppose the amendment, and I can assure my hon. friend that my reluctance is very much enhanced by the consideration that I am opposing the wishes of an officer who has for so many years, and with so much distinction, held the amalgamated office of Chairman of the Corporation and Commissioner of Police. But in spite of all that my hon. friend has said, and in spite, to my mind, of a certain confusion of argument which he has introduced in reference to the discussions in Bombay, and to what Sir Richard Temple said in 1876, it appears to me that the issues before the Council, and the conclusions to be drawn from them, are perfectly clear. The hon. member has adduced certain arguments in favour of the principle of his amendment, and adds what I may call an apology for its form. As regards the principle, the first question is, can it in any way be said that the conjunction of the functions of the Commissionership of Police with the Chairmanship of the Municipality will be of assistance to the Corporation in the discharge of municipal work? The Council may put aside the question of the efficiency of the police. That has not been called into question, and I have no intention of calling it in question. But as regards the first point, what is our experience? In 1864 Sir John Strachey, who was Sanitary Commissioner at the time, drew attention to the fact that portions of Calcutta were in an extremely bad condition in point of sanitation, and he was of opinion that this was due to some want of executive vigour, and that the hands of the Chairman of the Corporation would be strengthened if he were made also head of the police. This suggestion was adopted, although the arrangement was altered after a time. But with reference to what Sir Richard Temple said in 1876, I am bound to tell the Council, from my own personal experience, that at that time the police did not give any assistance to the Corporation, and that the Chairman of the Corporation did not interfere with the regulation of the police. I myself was Deputy Commissioner of Police in 1875 under Sir Stuart Hogg; and if ever there was a strong and active executive officer at the head of the Corporation, it was Sir Stuart Hogg. Yet he hardly interfered at all in police administration. Some years afterwards my hon. friend himself was obliged

to admit that he himself did no part of the police work, as he was unable to find time for it. Now, if in 1875, a keen, able, I may even say masterful, man like Sir Stuart Hogg found it necessary to put aside what I may call the most attractive part of his duties, when the municipality was, if not in its infancy, at any rate in its youth, is it likely that the Chairman of the Corporation, which would now control the great amalgamated municipality to be created, when sanitation has made so much progress and so many works are in contemplation, would be able to devote time to the control of the police or derive any benefit from their assistance? As to the second and, it seems to me, only other argument which my hon. friend has used, that to dissociate the two offices would have the effect of injuring the prestige of the Chairman of the Corporation, I think that that is very much a matter of opinion; but I should certainly say that the head of the amalgamated municipality of Calcutta and the Suburbs will hold a position which will require no additional prestige from the conjunction of another office. But apart from these considerations, the great point is this. The police will now be paid by the Government, and no part of the cost will be borne by the Corporation. I wish to know what claims the Corporation have, either on the ground of assistance from the police, or on the ground of prestige to the head of the Corporation, to ask the Government to put the regulation of the police under an officer whom it does not pay? [The Hon. Sir H. Harrison—It appoints him.] But it does not pay him. My hon. friend has brought forward the case of the police in English boroughs, where the police are paid as well as controlled by the municipal authorities. Now this might be used as an argument why the people of Calcutta should pay for their police, but I think that such an illustration is inopportune at the very time when the police of Calcutta are no longer to be paid by the municipality. If the police rate were to be retained, there might be some sort of reason for retaining the present state of things; but precisely when the maintenance of the police is to be taken away from the Corporation, and the Government is to provide for its payment, it seems strange for my hon. friend to refer to the case of towns in England where the Government does not pay for the police.

So much for such arguments as my hon. friend has brought in support of his proposal. Looking at it from the other point of view, let us see what are the objections to it? The first objection to my mind is that it is a sham. My hon. friend does not pretend that he takes any real part in the police work, and it is clear, except for a time when Mr. Souttar made an energetic effort to do so, that it is impossible for any Chairman of the Corporation to take any substantial part in the work of the police of Calcutta. In the second place it involves an injustice. I maintain that it is unjust to the officer who is in charge of a great body like the Metropolitan Police, and who is practically responsible for its working, that he should not have the name and title of the office. In the third place, it might be, though it has not yet been, a source of very serious inconvenience. Calcutta is a great metropolis, where, as the Council are aware, a great many elements of disorder are brought together from all sides—elements which are always ready to menace the public peace and even to cause political danger. It is important that the Government should be more closely in touch with the police of the metropolis than with the police of any other part of the province. It is due entirely to the personal qualities of my hon. friend, to his tact and moderation, that no friction has arisen in his case. But that does not alter the fact that the arrangement involves a danger of very serious public inconvenience. Now as regards what I may call the apology of my hon. friend for the permissive form of his amendment, and his desire that the Council should not tie the hands of the Government or burn its ships, but on the contrary should provide for it a *locus penitentiæ*, I can only say that the policy of the Government in this respect has already been distinctly and officially affirmed. The plurality of appointments, though, I admit, not of emoluments, which has been held of late years by the Commissioner of Police, has undoubtedly resulted in inconvenience. The Commissioner of Police was till lately also President of the Steam-boiler Commission, and, as in the case of the police, he found it impossible to devote much time to the supervision of that institution. The result was that the attention of the Government of India and of the Secretary of State was drawn to this plurality of

appointments, and that the question was asked whether it was possible for any one man to do all this work. My hon. friend may, under the Act, be a member of the Port Commission and of the Bengal Council, and he is also President of I do not know how many charitable institutions besides. But in the case of the Boiler Commission it was found necessary to make new arrangements; and the Government then officially declared that the office of the Commissioner of Police should be severed from that of the Chairman of the Corporation. That being the case, what possible good can there be in giving the Government a power to do something against which it has formally and officially declared? On all these grounds I cannot advise the Council to accept the principle of the amendment, and its permissive form does not save it from condemnation. I therefore ask the Council to reject it.

The HON. SIR HENRY HARRISON said:—I will not take up time in reply. My experience, if not much longer, is a little longer than that of my hon. friend who has opposed the amendment, and my experience is that what is officially condemned in one decade is most usually officially thought right in another. There is no country in which the official pendulum swings more certainly, and in which Government opinion and public opinion changes more rapidly, than in India. That is certainly my experience. My hon. friend said that the office of Commissioner of Police is an impossible burden for the Chairman of the Corporation to bear. [The HON. MR. MACAULAY—On the contrary, I said that as Commissioner of Police he did not do anything at all.] But the Commissioner of Police signed every letter to Government, and the Government would not receive a letter not signed by him; and he took considerable part in the correspondence. The Lieutenant-Governor, for instance, has no personal knowledge of the wants of the Medical Department or of the Public Works Department, and yet he exercises a control over both departments. In the same way the Chairman of the Corporation has very great advantage if he has a control over the police, even if he has not the advantage of exercising control over its details. I think that not many years will pass when not the rights of the municipality but the public interests will necessitate a return to the present system. Before any long time elapses, I think it will be found desirable in the public interest that the two offices should be united.

HIS HONOUR THE PRESIDENT said:—I wish to say a few words before the debate closes. The hon. member has alluded to the previous history of the question to a certain extent, but I may add to that, that quite recently the Government of India selected a special officer and deputed him to Madras and Bombay to examine the working of the police in those Presidency towns, and he made suggestions, primarily financial, but also administrative, in regard to the working of the police in Calcutta. One of the leading and most important suggestions made by that officer was that the separation between the posts of Chairman of the Corporation and Commissioner of Police, which has been already recommended by my predecessor, should be carried out without any further delay. This recommendation with others was submitted by the Government of India for my opinion, and I have recently had the duty of sending in that opinion, which concurs with the opinion of Sir Rivers Thompson and with that of the officer who was deputed to make enquiries: that upon grounds of public responsibility, of the necessity of the man who does the work being the responsible officer to the public, and on the principle that there should not be any shadow or cloud between the Government which is the representative of the public, and the working officer at the head of the police, the separation is necessary and desirable, quite apart from any personal or other considerations whatever. But on looking a little beyond that, my views were strengthened by the historical aspect of the case of which some details have been given by the Hon. Mr. Macaulay. It was also strengthened by the acknowledgment which I had previously seen put on record by the Commissioner of Police himself, that it is impossible for an officer in the position of the Chairman to the Corporation to devote his time to any of the details of those minor points connected with police administration. My opinion was also strengthened by the considerations which the Hon. Mr. Macaulay has placed before the Council that in times of difficulty, and in case of a crisis when some action has to be taken within half an hour, or an hour, it will be exceedingly inconvenient that the

man who has the power to give an order is not the person whom by official routine the Government was bound to address. They were bound to address the Chairman of the Corporation who does not give the order, and he has to address the man who will give the order. Then, when we come to the present aspect of the case in connexion with the Bill, there is the particular fact that so long as the Municipality paid for the police, it was quite right that their Chairman should have some control over it, and that his prestige and position should be increased by the extent of that control. But as my hon. friend has admitted, as soon as the duty of paying for the police is removed from the shoulders of the Municipality, that argument no longer applies, and there is no necessity for further discussing it. For my own part I am greatly obliged to the hon. member for the stool of repentance which he has provided for me, but I see no necessity for taking advantage of it. The principle involved is so important that if the Government should in future wish to revert to the present arrangement, it is not unreasonable that they should again bring it before the Legislature. I shall vote against the motion.

The Motion being put, the Council divided:—

Ayes 3.	*Noes* 9.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. H Pratt.
The Hon. Sir Henry Harrison.	The Hon. Dr. Gooroo Dass Banerjee.
The Hon. H. J. Reynolds.	The Hon. C. H. Moore.
	The Hon. Babu Kali Nath Mitter.
	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	His Honour the President.

So the Motion was negatived.

The Hon. Babu Kali Nath Mitter moved that, in clause (*a*) of section 43, the words "or less than two thousand five hundred rupees a month" be omitted.

He said:—Under the present law no minimum is fixed at all; the maximum salary is fixed, but the minimum is left to the discretion of the Commissioners. It seems to me that nothing has happened to necessitate the Council making any modification in the law at the present moment. Since the introduction of the elective principle, no less than five persons have been appointed Chairman of the Corporation, and in each of those cases the Commissioners in meeting have had to make provision for their salary, and I do not think any instance can be shown where the discretion left to the Commissioners has not been properly exercised by them. In every instance Rs. 2,500 a month has been fixed as the salary of the Chairman, but house-rent was reserved until such time as the Commissioners were satisfied with the work of the Chairman, and then house-rent was allowed. That being so, I do not see any necessity for making this change in the law. The change implies a slur upon the Commissioners, as if they had not exercised their discretion properly, and therefore it was necessary to modify the law. The officer who is to be the Chairman of the future Corporation will be appointed by the Government, and the only safeguard which the Commissioners have against an inexperienced officer being appointed to the post of Chairman of the Corporation is the fixing of his salary. No such thing has happened during the last twelve years, and I do not for a moment think it will happen, and that being so, I cannot understand why this slur should be cast on the Commissioners by making a modification in the existing law.

His Honour the President said:—As I am to a certain degree responsible for asking that this provision should be retained in the Bill, I will explain my reasons. The Council having now affirmed the principle that the Chairman of the Corporation should be appointed by the Government, it seems to me there must be some point at which the question between the two people who ride on the horse—as to who is to ride in front and who is to ride behind—must come to an issue. The hon. gentleman says he is not aware what has occurred during the last twelve years to necessitate this modification being made now. I quite admit that nothing has happened, but must we always wait till the steed is stolen before we shut the door? It is perfectly certain that if an

officer is appointed who is distasteful to the Commissioners, and if no minimum salary is fixed, it will be in the competence of the Corporation to adopt a course which will render the power of appointment nominal and to prevent its being exercised. The Government may appoint A to be the Chairman; the Commissioners may fix Rs. 100 a month as the salary: then B may be appointed, and the Commissioners may again fix Rs. 100, and so on until the power of appointment is whittled away to absolutely nothing. I do not anticipate that this friction will occur, for the common sense of both parties will easily bring about a *modus vivendi*. But when you come to make legal provision as to the authority in whom the power of appointment shall rest, it is perfectly apparent that to leave a counteracting power with another body will be to make the power of appointment a nullity. As long as you give the power to the Government you must fix some adequate salary as a minimum to prevent the power of nomination being made absolutely null. I can assure the hon. gentleman that nothing like a slur is intended, and I cannot understand how any reasonable person can suppose that any slur is intended. It is like any ordinary condition which is drawn up when an agreement between two persons has to be made in which a clause safeguarding the agreement implies no slur on either party. And I would also point out that the power of reducing the salary is not the only safeguard which the Commissioners have to prevent the nomination of an inexperienced officer. The law provides that a majority of two-thirds of the Commissioners may insist on the removal of the Chairman, and that the Government must then remove him. I hope the Council will accept these reasons for the proposal to fix a minimum, and will not think that any slur is in any way meant.

The Hon. Babu Kali Nath Mitter said in reply:—I wish to make one observation in reference to what has fallen from His Honour the President. My experience is that it will be utterly impossible to obtain a majority of two-thirds for the removal of any Chairman: with every deference to the opinion expressed by His Honour, I think that provision affords no safeguard at all.

The motion was put to the vote and negatived.

The Hon. Sir Henry Harrison moved that in line 30 of section 45, for the word "section" the word "clause" be substituted.

He said:—As it is intended to accept the amendment to be moved by the Hon. Babu Kali Nath Mitter, that when the Chairman nominates for the approval of the Commissioners, he shall, if the Commissioners wish it, nominate three persons, of whom the Commissioners might choose one; this verbal amendment becomes necessary to make the meaning clear.

The motion was put to the vote and carried.

The Hon. Sir Henry Harrison moved that in lines 6 and 7 of section 46, for the words "subject to confirmation by the authority empowered to confirm such removal" the words "subject to the approval or sanction of the authority (if any) empowered by this Act to approve or sanction such removal" be substituted.

He said:—It is desirable to indicate that the same authority who may dismiss an officer may suspend or fine him. The word "confirmation" is not the word used: it is "approval" in the case of the Government, or "sanction" in the case of the Commissioners. The object of this amendment is to improve the wording of the section.

The Hon. Babu Kali Nath Mitter said:—I do not see that this alteration is merely a formal one. When the words "if any" are added, it must mean that there is no such authority in the Commissioners. As the section stands, it means that the Commissioners will have power to sanction the removal, and will also have power to sanction the imposition of the fine contemplated under this section. If the words "if any" are added, a doubt will be thrown as to the real meaning of the section; and therefore it does not seem to me that the alteration is a mere verbal one, and I oppose it.

The Hon. Sir Henry Harrison said in reply:—I cannot accept the validity of the argument used by my hon. friend. There are three ways in which the section will apply—First, to the case of an officer appointed by the Commissioners and the appointment approved by the Government; secondly, to the case of an officer appointed by the Chairman, whose appointment must be sanctioned

by the Commissioners; and lastly, to the case of an appointment under Rs. 200 a month, in which case no sanction is required. The section as it stands may be read as implying that in every case there is *some* authority mentioned by the Act. There can be no mistake as to the cases in which there is authority. The words 'if any' will apply to cases in which there is no power of approval. It seems to me that the ambiguity lies in the old section under which it appears as if there is always some authority to approve or sanction. The section as proposed to be amended will make the meaning clear.

The Motion being put, the Council divided:—

Ayes 8.	*Noes* 4.
The Hon. H. Pratt.	The Hon. Dr. Mahendra Lal Sircar.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. Babu Kali Nath Mitter.
The Hon. C. H. Moore.	The Hon. T. T. Allen.
The Hon. Moulvie Abdul Jubbar.	The Hon. H. J. Reynolds.
The Hon. Sir Alfred Croft.	
The Hon. Sir Henry Harrison.	
The Hon. C. P. L. Macaulay.	
His Honour the President.	

So the Motion was carried.

[On a suggestion made by His Honour the President, the following three amendments were considered together.]

The Hon. Babu Kali Nath Mitter moved that, in line 2 of the second paragraph of section 63, for the words "eighteen" and "twelve" the words "thirty" and "twenty-two," respectively, be substituted; also that in line 13 of the same paragraph, for the word "three" the word "five" be substituted.

He said:—Section 63 provides for the appointment of a General Committee consisting of 18 members, of whom 12 shall be elected by the fifty elected Commissioners, one shall be nominated by the Bengal Chamber of Commerce, one by the Calcutta Trades' Association, one by the Port Commissioners, and three by the 15 nominated Commissioners. At present the Town-Council consists of 30 members, the average attendance being 14 or 15. This question was fully discussed by the Amalgamation Committee, who recommended a reduction of the number of members of the Town Council, but at the same time they recommended that special fees be paid to ensure attendance. When this Bill was first referred to the Select Committee, it was almost unanimously resolved that provision for the payment of fees should be eliminated. As that has been done, I do not see why the other part of the recommendation of that Committee should be retained. It would be extremely inconvenient to pay 30 members every week, and very properly it became necessary to reduce the number. But when there is no longer a question of payment, I do not see why the number should stand in the way at all. There will be 25 wards. It is a matter of great advantage, and I believe my hon. friend in charge of the Bill will admit it, to have all the wards represented in the Town Council. Week after week local grievances are placed before the Town Council for consideration by one of the members in whose ward the grievance has occurred, and the matter is taken up and decided one way or another. If, however, the number of elected Commissioners is reduced to 12, having 25 wards, it will necessitate the making of at least two wards into one for the purpose of appointing elected Commissioners to the Town Council. The result will be that many Commissioners who take great interest in the affairs of the town will be excluded by reason of the limit of number, and their services, which are valuable, will no longer be at the disposal of the Town Council. And one of the obvious difficulties which will arise will be that there will be debates at the general meetings of the Commissioners much more frequently than at present, because Ward Commissioners who are not members of the Town Council will take up matters which they would have discussed in the Town Council if they had been members of that body. Moreover, the Town Council itself would be more willing to consider complaints made by a Ward Commissioner than if the grievance was brought before them in respect of a ward by a Commissioner who was not returned by that ward. Therefore there will not be a reciprocal feeling between the rate-payers and the members of the General Committee, which is essentially

necessary for the proper administration of the affairs of the town. For myself, I have been a member of the Town Council since it has been formed. No doubt on some occasions, when matters of great importance come to be discussed, there was a full attendance of members, and it might be that on such occasions some inconvenience was felt by the Chairman owing to the presence of the large number; but considering that many of the persons who attended on such occasions are those who were in the habit of taking great deal of interest in municipal matters, it was better they were heard in Committee than that there should have been long discussions at the general meetings of the Commissioners. It is under these circumstances that I bring forward this motion, but if it is thought desirable that all the 25 wards should be represented in the General Committee, as will presently be proposed by my hon. friend, Dr. Gooroo Dass Banerjee, I shall not oppose that motion.

The Motion being put, the Council divided :—

Ayes 4.	*Noes* 8.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The Hon. Dr. Gooroo Dass Banerjee moved that, for the second paragraph of section 63, the following be substituted :—

"A General Committee shall be elected by ballot by the Commissioners in meeting, and shall consist of thirty-five Commissioners—one being chosen from the elected Commissioners of each of the twenty-five wards, and the remaining ten being chosen from the Commissioners appointed by Government and those elected by the Bengal Chamber of Commerce, the Calcutta Trades' Association, and the Commissioners for making Improvements in the Port of Calcutta."

He said :—I move this amendment because I consider it necessary that each of the wards or electoral units should be represented by one of its elected Commissioners in the General Committee, which is to be the Executive Committee of the Commissioners, and which will occupy the same position as the present Town Council does. My reasons are two—First, it is clear that every elected Commissioner will naturally feel inclined to serve that ward best which returned him. But if he has to represent more wards than one on the General Committee, then in almost every case, and particularly in cases involving conflict of interests, wards, other than those the members of which are elected to the Committee, will be most imperfectly represented. That is not a desirable state of things. The second reason is that by having each of the wards represented on the General Committee, we afford greater facilities to the rate-payers to get their local grievances redressed than we can by having a General Committee constituted in the manner proposed in the Bill. That is a reason which has already been alluded to by the hon. member who moved the last amendment. So that we ought to have 25 members on the General Committee out of 50 elected Commissioners. To keep up the proportion as nearly as possible, 10 more members should be selected from amongst the 25 remaining Commissioners. The number would thus rise to 35. I know it may be said that when a Committee consists of a large number of members work is done less quickly than in a small Committee. That may be true to a certain extent, but we should bear in mind that this loss in time will be more than compensated for by gain in efficiency and in public confidence in the decisions arrived at by the General Committee, and therefore we should not object to any little loss of time on this score. I may be permitted to add that it is as true in machinery municipal as in machinery mechanical that gain in time is always joined with loss in power and efficiency, and conversely. There is another point worth noticing. My amendment, subject to certain conditions, gives a voice to every member of the Corporation in the selection of the Executive Committee, whilst the provision in the Bill leaves to

different sections of the Corporation the right to elect their respective representatives in the Executive Committee; and what is worse, in one instance, in the instance of small electoral units, such as the Chamber of Commerce, the Trades' Association, and the Port Commissioners, it gives the power of electing representatives of representatives not to these last-mentioned representatives, but to the original electors themselves. That, I consider, is wrong in principle. It is allowing the original electors an interference with the working of the electoral body after that body has been constituted. I may also point out that my amendment has this additional advantage. It cannot be denied that though it is necessary in the first instance to have every sectional interest, geographical or otherwise, represented in the general body of the Corporation, on the Executive Committee of that Corporation those members will work best who are most void of party spirit, who are not the least animated by party interest; and that can only be secured by giving the right of election to the General Committee to the Corporation at large, instead of dividing the Corporation into groups, and asking each group of Commissioners to elect their representatives. On all these grounds I ask that my amendment be accepted. It is in certain respects an improvement on the last proposed amendment. It carries out to the full the suggestions as to the necessity of each ward being represented, where my hon. friend's amendment stops short at a certain point. As regards the number of the Committee, my amendment is open to objection, but this is but a trifling one when it is remembered that instead of having a town consisting of six square miles as we have now, we shall have a new town of, I believe, 18 square miles.*

The Motion being put, the Council divided:—

Ayes 4.	*Noes* 8.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The HON. SIR HENRY HARRISON moved that, for the second paragraph of section 63, the following be substituted:—

"The General Committee shall consist of eighteen Commissioners, of whom twelve shall be elected in such manner as the Commissioners in meeting may direct by the Commissioners elected under clause (1) of section 8.

And six shall be elected in accordance with such rules as the Local Government may prescribe by the Commissioners nominated under section 7, and elected under the last clause of section 8."

He said—I shall take advantage in moving this amendment to comment also on the amendments of the two preceding speakers. It is true that there is some advantage in having one member from each ward, but the views of the Commissioners are so pronounced in favour of keeping the present wards, that we have now 25 wards, and I look upon a Town Council of 37 members to be quite out of the question. I look upon a Town Council of 30 members as half-and-half; nor does it give adequate representation to the other Commissioners not elected under clause (1). Though there is a certain advantage in having one member from each ward, I do not attach anything like so much weight to it as the two hon. members who preceded me have done. We can always invite one or both members of a ward when any thing local has to be discussed. By far the greater number of questions do not affect any particular ward, and there is really too much isolated ward interests as opposed to the general interests of the Corporation. As regards the principles of legislation, I am decidedly opposed to what the Hon. Dr. Gooroo Dass Banerjee has advanced. I think it shirks a fundamental principle. If you allow the whole body of Commissioners to elect to the General Committee, you will not get a proper representation of the minor bodies. Suppose a native gentleman was sent in by the Chamber of Commerce, would it be right and proper that that very one should be selected without any malice *prepense* by

the whole body of Commissioners to represent the Chamber? On the last occasion of election to the Town Council, two gentlemen, one of whom would have been a most proper representative, and another who would not, were nominated. Of the nominated Commissioners, the one who was not so good a representative had more friends among the elected Commissioners, and he got one or two more votes; the majority did not wish to exclude the Eurasian gentleman, but they wished to have their friend; and that is sure to happen if you allow election in that way. Therefore you should allow the elected members to select their representatives, and the other classes theirs. The representatives of the Chamber of Commerce, the Trades' Association and the Port Commissioners are in the same class as the Government nominees, and it would be better if representatives from all these classes were elected by the general body of nominees. On the other hand, it will not always be convenient to do otherwise. Take the case of the two members of the Port Commissioners. It is quite possible that neither of them may be able to afford the time, when perhaps a second member of the Chamber or of the Trades would serve the town better. I can assure the Council that they will get better representatives of all the bodies if you allow them to be elected by the 25 Commissioners. For the rest, I consider that we might possibly go up to 20 or even 24, but a Town Council of 30 members has often been found to work very inconveniently. We have no set discussions, and we often have separate discussions in each corner of the room going on at the same time, because everybody cannot find an opportunity of getting in his word. The work is, however, best done with twelve or fourteen members present, but not with a much larger number. I think therefore that, all things considered, we must abandon the principle of one member for each ward, now that we shall have such a large number of wards; but on the other hand it will conduce to convenience if we agree to accept the grouping of the 25 nominated members, and the selection by them as a body of those who should represent them on the General Committee.

The HON. BABU KALI NATH MITTER said—I have carefully listened to the speech of the last speaker. He is slightly in error in stating that it will be necessary for the Chamber of Commerce to elect one of their own representatives to act on the General Committee. The Bill says: "One shall be nominated by the Chamber of Commerce, one by the Trades' Association, and one by the Port Commissioners," so that the nomination is not limited to any particular person. Any of those bodies is at liberty to name any one they please. That being so, I do not see much force in the observation of my hon. friend as to any modification in the way proposed by him. He has thrown out a hint that possibly there would be no objection to 24 members on the General Committee; that is the largest number he would agree to. Twenty-four to my mind is certainly a better number than eighteen, because I certainly think it will be an advantage to make as many Commissioners as possible conversant with the working of the affairs of the Corporation. If there are only twelve elected Commissioners they will virtually be the governing body of the Corporation. If eight of them agreed together they would practically be able to carry everything before them; but if the number is larger it will be impossible to form small parties, and there will be the advantage of some of them giving independent views. That is a decided advantage which ought to be secured if possible. The Chairman of the Corporation no doubt would be better pleased to have the number reduced as much as possible, because he would have a small body to deal with, and he would be able to persuade a small body better than a larger one. That I can well understand, but we should not forget that the exclusion of those members from the General Committee who take an active interest in the affairs of the Corporation will necessitate warm discussions at the General Meetings of the Commissioners, which should be avoided as much as possible, and the effect of having a large number on the General Committee will be to avoid such discussions. If my amendment raising the number to 30 is lost, I claim permission to propose a further amendment that the number be raised to 24.

[HIS HONOUR THE PRESIDENT intimated that he could not give that permission.]

The Motion being put, the Council divided :—

Ayes 9.	*Noes* 3.
The Hon. H. Pratt.	The Hon. Babu Kali Nath Mitter.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. Moulvie Abdul Jubbar.
The Hon. C. H. Moore.	The Hon. T. T. Allen.
The Hon. Dr. Mahendra Lal Sircar.	
The Hon. Sir Alfred Croft.	
The Hon. Sir Henry Harrison.	
The Hon. C. P. L. Macaulay.	
The Hon. H. J. Reynolds.	
His Honour the President.	

So the Motion was carried.

The Hon. Babu Kali Nath Mitter moved the following amendments:—
That, for the first paragraph of section 64, the following be substituted :—

"The General Committee shall ordinarily meet once a week for the transaction of business. It shall transact such business as may be expressly referred to it by the Corporation, or as may not be referred to any other standing or special Committee."

Also that in line 3 of section 65, after the word "Commissioners" the words "a Budget Committee for preparing an annual budget, and" be inserted.

Also that in line 1 of the third paragraph of section 70, after the word "to" the words "a Special Committee to be called the Budget Committee" be inserted; also that in line 1 of the fourth paragraph of the same section, for the word "general" the word "special" be substituted.

He said :—Past experience has shown that it is desirable to have a separate Budget Committee, because there are some Commissioners who may not be members of the General Committee, but who may be best qualified for the Budget Committee. The object of the amendment is to exclude the annual budgets from the consideration of the Town Council, and to leave the Commissioners at liberty to appoint a separate Budget Committee.

The Hon. Sir Henry Harrison said :—This is not a very important matter, and I cannot say I strongly deprecate it. But the principle seems to me to be wrong. We have a General Committee which will have to deal week by week with financial questions, and no doubt, being a Finance Committee, it will pay special attention to the consideration of the budget, which is a very important matter, being not merely estimates, but sanctions on different heads as well. A separate Budget Committee is now appointed by the Commissioners in meeting, and is subject to all the difficulties to which the appointment of such Committees is subject. The list of members must be prepared by some body or be drawn by ballot; sometimes the Commissioners get out of the difficulty by asking the Chairman to select the members of the Budget Committee. I cannot say that the present system is altogether bad. But when you have a General Committee which understands what the wants of the town are, and which in some sense will be a representative Committee, it will really make a better Budget Committee than a Committee chosen by four or five leading Commissioners. I think the proposed amendment not an amendment in the right direction, though it is not a matter of great importance. The General Committee I consider ought to be the Budget Committee.

The Hon. Babu Kali Nath Mitter said in reply :—I certainly think that some members of the General Committee ought to be members of the Budget Committee, and also some members of the Bustee Committee; some members from each of the standing Committees should be on the Budget Committee. There is always some difficulty in selecting the members of Committees; and if it is considered desirable that the Budget Committee should be appointed by ballot, I shall have no objection. My experience is that there are some members who, though not on the Town Council, would make excellent members of the Budget Committee, and whom it would be desirable to have on that Committee, and now that the members of the elected and nominated Commissioners on the General Committee have been reduced to 12 and 6 respectively, it will be still more desirable that some of the outside members should be appointed as

members of the Budget Committee. I do not ask this as a matter of favour. I consider it a matter of vital importance.

The motion was put to the vote and negatived.

The Hon. Sir Henry Harrison said:—I come to the amendments now, notice of which was given only this morning; but as far as I can judge, they are in the nature of details involving no important principle: they are chiefly matters regarding the working of the Office, as to which I have received help from the Vice-Chairman and some of the Commissioners, as well from some of the officers of the Corporation. Several of them introduce amendments which will be conducive to the good working of the departments concerned; and if no hon. member objects, I shall ask the Council to consider them. I have put the first of these amendments at the head of the chapter, but it has been pointed out that some objection might be taken to its application to the carriage and horse tax. I move first that, at the end of section 77, the following definition be inserted:—

"'Person' in this Chapter shall include a Company, Firm, Association, or Hindu Joint-Family."

The Hon. Mr. Allen said:—I think the members of the Select Committee may complain of amendments of this kind being sprung upon the Council at the last moment without having been laid before the Committee. The significance of the amendment may be very much greater than the hon. member anticipates. The definition of "person" is given in the General Clauses Act of the Government of India. It applies to Acts passed only by the Government of India, and therefore it may be said to have no force in regard to Acts passed by this Council: yet as a principle of interpretation it would apply. Now as to the particular cases to which the proposed definition is intended to apply. This is a chapter dealing with the carriage and horse tax, and the trades and professions tax, and it is difficult to see in what way the definition would apply. The word "person" occurs in only a few sections in the chapter. The obligation to take out a license for a carriage or animal is imposed on the owner or person in charge. Primarily the obligation is upon the owner; secondarily on the person in charge. Under the amendment the "person in charge" in section 78 would include a joint-Hindu family; so that the joint-Hindu family would be required to forward a statement in writing containing a description of the carriages and animals in their charge which are liable to the tax. And in the section in which the penalty is imposed (section 80), the word "person" does not occur. When you come to the next part of the chapter, which relates to the tax on trades, professions and callings, great confusion will be caused by the introduction of this amendment. A joint-Hindu family having taken out one license, every member of it will be at liberty for the payment made on account of it to carry on a trade, profession or calling. I think it will be very unwise to accept a definition like this at the last moment, because it may considerably embarrass the working of the Act. It is an unprecedented occurrence for a member who has for a year and half been drafting the language of an Act, and after it has been discussed and re-discussed in Select Committee, to propose an amendment of this kind without affording proper opportunity for its consideration.

The Hon. Sir Henry Harrison said in reply:—The hon. member did not say what the definition of "person" in the General Clauses Act is. I do not see anything unreasonable in a joint-Hindu family taking out a license. This amendment has been before the Council for many days: it is not sprung on the Council at the last moment. It has been adopted by me in consequence of representations made by the department concerned, that many Honorary Magistrates refuse to interpret the word "person" as including a company or joint-Hindu family. I am, however, willing to withdraw the amendment at this stage of the proceedings and bring it on afterwards if it is thought necessary.

The motion was then, by leave, withdrawn.

The Hon. Sir Henry Harrison moved that, for section 78, the following be substituted:—

"The owner or person in charge of a carriage or animal kept in Calcutta shall, before the first day of May and the first day of November in each year, forward to the office of the Commissioners a statement in writing signed by him, containing a description of the carriages

and animals owned by him or in his charge; and if he claims exemption under any of the clauses of section seventy-seven, noting the grounds of such claim.

If exemption be not claimed, such person shall, if he is the owner of the carriages or animals, or if the owner is not resident in Calcutta, at the same time pay to the Commissioners such sum as shall be payable by him for the half-year commencing on the first day of April or on the first day of October (as the case may be) for the carriages and animals specified in such statement according to the rates given in the Fourth Schedule.

If the person forwarding the statement be not the owner, and the owner is resident in Calcutta, such person may, at his discretion, instead of paying the tax due, state the name and address of the owner.

Any person who becomes the owner, or who takes charge of any carriage or animal kept in Calcutta after the first day of May, or the first day of November in any half-year, shall, within a week of his becoming owner or taking charge thereof, send in a statement as in the first clause of this section, and if liable to pay the tax for such carriage or animal under this section, shall pay the whole of the tax for the then current half-year according to the rates specified in the Fourth Schedule.

The Commissioners may, if they are satisfied that any such carriage has not been used within the half-year, or that any such carriage or animal has been kept for only a portion of the then current half-year,

refund, or remit the whole, or such portion thereof as they may think fit, of the amount so payable.

For the purposes of this section, a livery stable-keeper shall be deemed to be the owner of every animal in his stables."

He said:—At present great difficulty arises from persons who are prosecuted for not having taken out licenses claiming exemption under one or other of the exemption clauses. It would be much fairer if such persons claimed exemption at an earlier stage. It is not at all the rule that statements are sent in by persons owning carriages and horses; but statements are left to be filled up, and thus opportunity is given for claiming exemption. As to the second clause of the section, the person in possession is bound to pay, whether the owner is or is not in Calcutta.

The Hon. Mr. Allen said:—The objection I have already taken to amendments of this kind being brought at the last moment applies equally to the present amendment. It is certainly extraordinary that after two years' meditation, and after the Bill has been altered by the Committee to suit his views, the hon. member in charge of the Bill should suddenly have new light drawn on him. It is only about four weeks since he himself signed the report of the Committee advising the Council to pass the Bill then sent up. Independently of the merits of the amendment, I say that the Council ought not to accept it at this stage. The Select Committee has most carefully discussed every section of the Bill, and has sent in their report and the revised draft Bill, and the Council is asked on the opinion of a single member to adopt this amendment. Without going into the merits of the question, I say that the Council should not do so. But as to the merits, the amendment simply says in more words what is already said in the sections of the Bill as they stand. I can see no necessity for, nor advantage in, making this change.

The Hon. Sir Henry Harrison said in reply:—The hon. member has himself proved my case; nobody is liable to pay for carriages and animals which, though used in Calcutta, are not kept in Calcutta. As to the rest, the alteration is a very substantial one, and is made both in the interests of the persons concerned and the License Department of the Municipality. Hitherto persons not liable to pay the tax were not liable to send in a statement. Not having sent in a statement, the person is prosecuted on the supposition that he is liable to the tax; he then claims exemption under one of the clauses of section 77. The object is to compel every one who owns or has in charge a carriage or animal to send in a statement, in which he should set forth the ground upon which he is exempted from liability to payment.

The Hon. Mr. Reynolds said:—I do not quite understand whether the hon. member means that a person who is prosecuted is not to be allowed to set up the defence that he is exempted from the tax, unless he previously sends in a statement.

The Hon. Sir Henry Harrison said:—There is no intention to do so; but persons cannot then complain, as they do now, of having been molested.

The Motion being put, the Council divided:—

Ayes 5.	*Noes* 7.
The Hon. Moulvie Abdul Jubbar.	The Hon. H. Pratt.
The Hon. Sir Alfred Croft.	The Hon. Dr. Gooroo Dass Banerjee.
The Hon. Sir Henry Harrison.	The Hon. C. H. Moore.
The Hon. C. P. L. Macaulay.	The Hon. Dr. Mahendra Lal Sircar.
His Honour the President.	The Hon. Babu Kali Nath Mitter.
	The Hon. T. T. Allen.
	The Hon. H. J. Reynolds.

So the Motion was negatived.

The Hon. Sir Henry Harrison moved that, for section 79, the following be substituted:—

"Whenever any person shall pay to the Commissioners the amount of the tax which shall be payable by him for the current half-year in respect of all carriages and animals kept in Calcutta, the Commissioners shall grant to such person a license to keep such carriages and animals during that half-year.

A license may at any time be granted for any previous half-year for which no license has been taken out on payment of the amount due for that half-year.

But the production of such license shall not afford a valid defence, if the licensee is prosecuted for failing to take out a license within the time required by this Act."

He said:—This is only a verbal amendment by the addition of the last clause; for the rest, the section has been shortened in the wording. So far from these sections having been discussed and re-discussed in Select Committee, my difficulty has been that I have never been able to get as much assistance in the settlement of this chapter of the Bill as in the others. The part relating to the trades and professions license, which is full of pitfalls, was passed by the Committee almost without a word. I cannot, however, complain that the Select Committee had sufficient confidence in me to adopt it on my responsibility, but the result has been that it has not been considered, and I think it better, even at the last moment, to bring forward these amendments.

The Hon. Babu Kali Nath Mitter said:—If I understand this amendment rightly, one point is this, that if a person takes out a license in November, and he is prosecuted in December, still because there has been default for a certain number of days, he will be liable to prosecution. I will refer to a case which happened a short time ago. A member of the Bar was prosecuted for not having taken out a license, but it appeared that he had taken out a license. [His Honour the President—After the prosecution was instituted.] I cannot say personally whether it was so or not in that case, but I believe that many cases of that sort have happened. When parties were prosecuted they produced their respective licenses in Court, and the Magistrate dismissed the cases, remarking that the license officer had failed in his duty. I think that if a person, before prosecution, takes out a license, he should not be prosecuted. If the section is allowed to remain in its proposed form, it will be quite possible, notwithstanding the statement of the Chairman to the contrary, that such a person will still be liable to prosecution, and I think that is not desirable. I still hold the opinion that when a prosecution has been set on foot, the Commissioners should not treat the prosecution as a farce, take the money, and then allow the prosecution to be struck out: the case should be prosecuted to a conclusion. That is in respect of persons who take out licenses after prosecution. But where a person has taken out a license before a prosecution is instituted, it will be a very harsh proceeding that he should be prosecuted for the lapse of a few days; and that can be done under the wording of this amendment.

The Hon. Dr. Gooroo Dass Banerjee said:—I think the last clause of the proposed section is objectionable on another ground. It is wholly unnecessary, because section 80 provides that, whoever owns, or is in charge of, any carriage or animal without the required license shall be liable to a fine. The mere fact of owning a carriage or animal without a license makes the person liable to a fine.

The Hon. Sir Henry Harrison said in reply:—The objection which has been taken on the question of principle is not a new one. The Bill already provides that a license may be granted for a previous year. The prosecution will not be brought until the person who is liable to the tax has neglected for the whole of the period to take out a license. After that, if the Commissioners think it right to prosecute, then the prosecution ought not to be dropped, because the

person has subsequently taken out a license. But take the case of a person being prosecuted; he promptly runs to the office and takes out a license. That I say should not be allowed. I do not think I know a case more in point than that of Mr. Roy. After the prosecution was instituted he takes out a license in the name of Roy, he being prosecuted in the name of Raye. The license officer thinking the name of Raye to be an English name, when questioned, said the license was not taken out; and notwithstanding these facts the view of the Court was that it was a most scandalous prosecution, and the license officer was fined Rs. 25. I cannot conceive a more erroneous feeling than that which animated the Courts with regard to the License Inspector as a wrong-doer. Soon after that case we had a precisely similar one, and the charge was dismissed. In a precisely similar case in England, the defaulter admitted that the license was omitted to be taken out, but for not nearly so long a period. A prosecution was instituted simply on the ground that the time for taking out a license had lapsed. In that case the prosecution was instituted after the license had been taken out and was produced, and that showed the widely different view taken of the matter in England. I maintain that the principle of this amendment is a very important one.

The Motion being put, the Council divided:—

Ayes 5.	*Noes 7.*
The Hon. Sir Alfred Croft.	The Hon. H. Pratt.
The Hon. Sir Henry Harrison.	The Hon. Dr. Gooroo Dass Banerjee.
The Hon. C. P. L. Macaulay.	The Hon. C. H. Moore.
The Hon. H. J. Reynolds.	The Hon. Dr. Mahendra Lal Sircar.
His Honour the President.	The Hon. Babu Kali Nath Mitter.
	The Hon. Moulvie Abdul Jubbar.
	The Hon. T. T. Allen.

So the Motion was negatived.

The Hon. Dr. Gooroo Dass Banerjee moved that, for section 80, the following be substituted:—

"Whoever owns, or is in charge of, any carriage or animal without the required license shall be liable to fine not exceeding three times the amount payable by him in respect of such license, and not being less than such amount. And such fine shall, when levied, be taken in full satisfaction of the demand on account of such license."

He said:—I move this because I think it unnecessary and undesirable to provide by law a minimum amount of fine in so far as such fine is a penalty and not merely in liquidation of the demand of the Municipality. The section in the Bill provides that the minimum amount of fine shall be one-and-a-half times such amount, so that, whenever there is a prosecution, in addition to a fine being imposed to the amount of the license fee, a further fine of half the amount at least will have to be imposed. That I think is unnecessary and undesirable. It ought to be left to the discretion of the Court to say whether the penalty part of the fine is to be substantial or nominal, or no amount at all. We need not tie the hands of the Court.

The Hon. Babu Kali Nath Mitter said:—The next amendment which stands in my name is on the same lines. I am quite willing that the amendment should be in the terms of the amendment just moved, and I shall withdraw the amendment on section 80 of which I gave notice.

The Hon. Sir Henry Harrison said:—We find by experience that the Magistrates almost invariably impose no fine at all, and this reduces the matter to a farce. If the section contained in the latter part of the Bill, authorizing the Government to appoint a Magistrate to try municipal cases is agreed to, then the amendment now before the Council will be of minor importance; but as things stand, whenever the Municipality depends upon prosecutions for the recovery of its revenue, it is simply paralysed. From all departments of the Municipality the same cry arises. The leniency of the Court is so great that it is absolutely no sanction at all, and the Act becomes a dead-letter. The same difficulty occurred in reference to non-registered coolies in the municipal market, the Magistrates having inflicted fines of only one or two annas. The minimum fine is introduced to prevent the systematic omission to take out licenses.

The Motion being put, the Council divided :—

Ayes 4.	*Noes* 8.
The Hon. H. Pratt.	The Hon. C. H. Moore.
The Hon Dr. Gooroo Dass Banerjee.	The Hon. Dr. Mahendra Lal Sircar.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The Hon. Babu Kali Nath Mitter moved that the second clause of section 84 be omitted. He said:—The second clause of this section provides that if the Commissioners at any time find any carriage or animal in respect of which no license has been obtained, the Commissioners may, if the person entitled to the possession of such carriage or animal is unknown, by a written order authorize any of their subordinate officers to take possession of such carriage or animal. This is a new provision: it does not exist in the present Act. A power of this kind is objectionable, because in the first place it may be resorted to when there may be no necessity to have recourse to it. It is the duty of the Inspectors who are appointed by the Commissioners to find out the owner of the carriage, and they will have very little difficulty in doing so if they go to work properly. Whenever there might be the least difficulty, there would be a written order authorizing such officer to take possession; the carriage and horse will be placed elsewhere, and expense will be thrown upon the owner. The Commissioners enjoy plenary powers in this matter; they can prosecute and have offenders fined; all they have to do is to prove their case. In order to justify a change of the law on this subject, it will be necessary for the Commissioners to make out a very strong case, and to show that they suffer loss of a considerable amount of revenue from want of a power of this kind. I am not aware that any considerable amount of revenue is lost on this ground; it may be that a very small sum has been lost, but that will not justify the grant of this extraordinary power to seize property for non-payment of license fees. I think the provision is erroneous in principle. It will be practically attachment of property without the decree of a competent Court. When a fine is levied by the Magistrate, the Court has power to seize the carriage or animal, and have it sold in realisation of the fine, and further the Commissioners have power to sue and obtain a decree and attach the property. But to be allowed to seize property without having recourse to any of these methods, simply because the Inspector has not been able to find the owner, is asking a great deal too much. If proper exertions are made, the officer ought to be able to find the owner or the person in charge of the carriage or animal. A carriage or a horse must be in charge of some one, and there should be little difficulty in finding out in whose possession the carriage or horse is. That being so, a prosecution can be instituted and a fine levied, but to have recourse to such exceptional legislation is unnecessary and undesirable, and I am afraid that if this provision is passed into law the power thereby conferred will be very largely used without proper enquiry being made to find out the owner. I have also to point out that as such provision does not exist in the present law, I am therefore strongly opposed to it.

The Hon. Sir Henry Harrison said:—This is a very good illustration of the enormous difference with which the law is regarded, according as it affects the rich and the poor. Let me refer the Council to section 98. That section authorises the Commissioners to seize and detain any unregistered cart, and to sell the same if not claimed within ten days. Here there is no necessity for a written order, and the police, moreover, are required to assist in the seizure. The owner of the cart may be there, and may be willing to pay the license fee. Now observe the extremely small power which we ask for with regard to carriages and animals. The reason for this provision has not been stated by my hon. friend. It is to meet a difficulty which is very great in finding out, in a chummery, for instance, or any place where many persons reside, who is the owner of a carriage or animal found there. The license officer prosecutes, but has no evidence; and if he does produce evidence, he is probably misinformed.

It is one of those powers which if granted is its own remedy. If the Inspector cannot find to whom a carriage or horse belongs, he can apply to the Chairman or Vice-Chairman and explain the circumstances; and if the explanation is satisfactory, an order will be issued. Where is the hardship of attaching the property: the owner or person in charge has nothing to do but to pay the amount of the license fee? This is a curious illustration of the remark I have made before, that the Commissioners themselves are not anxious to be vested with powers: it is one of the curious illustrations of the working of the municipality in Calcutta. I submit that the power is a very reasonable one and should be granted.

The HON. BABU KALI NATH MITTER said in reply:—In the very section to which my hon. friend has referred, the order of the Magistrate has to be obtained before the cart can be sold: whereas in the section under consideration there is no such provision. Besides, there is a great distinction between a carriage or horse and a cart. As regards the one, there may be difficulty in ascertaining the owner or the person in charge; in regard to the other, there should be no difficulty whatever. If the Inspectors did their duty, there should not be the slightest difficulty to find out who the owner or the person in charge of a carriage or animal is.

The Motion being put, the Council divided:—

Ayes 4.	*Noes* 8.
The Hon. H. Pratt.	The Hon. C. H. Moore.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. Dr. Mahendra Lal Sircar.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived:—

The HON. SIR HENRY HARRISON moved that, in line 9 of section 85, for the words "establishes his claim" the words "satisfies the Commissioners that he is entitled" be substituted.

He said:—This is only a verbal amendment.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON also moved that, in the second paragraph of section 88, for the words "next after the day of the granting thereof, and no longer" the words "of that year" be substituted.

He said:—This is also a verbal amendment.

The motion was put to the vote and carried.

The HON. DR. GOOROO DASS BANERJEE moved that, for section 90, the following be substituted:—

"Whoever exercises any trade, profession or calling without the license required by section eighty-seven, on or after the first day of July in any year, shall be liable to a fine not exceeding three times the amount payable by him in respect of such license, and not being less than such amount. And such fine shall, when levied, be taken in full satisfaction of the demand on account of such license."

He said:—My reasons for this amendment are similar to those which I urged in support of the amendment I moved in section 80. Among the hon. members here present there are some who exercise professions and callings, and have to take out licenses, and I put it to them to say how far they have been strictly punctual in taking out their licenses. I do not mean to encourage want of punctuality or to suggest that in any case they have failed to take out their licenses on due date in wilful disregard of the law, still there have probably been instances where, from forgetfulness or other cause, there may have been delays, and I say that the Courts, and not we here, are the best judges as to what penalty, if any, should be inflicted in each case. We have been told by the hon. member in charge of the Bill that the Magistrates who decide these cases generally act too leniently. If the Courts are badly constituted, the remedy lies not in making the law too severe, but in the remodelling of the Courts.

The HON. MOULVIE ABDUL JUBBAR, in supporting the motion, said :—I know many cases in which persons who are prosecuted have failed to pay their license fees simply on account of poverty, and in such cases I do not think it is proper that the hands of the Magistrate should be tied by hard-and-fast rules : he should be left to exercise his own discretion in each case.

The HON. BABU KALI NATH MITTER said :—I also think that the imposition of a penalty and the amount of it should be left to the discretion of the Court ; and as the Bill provides for the appointment of a special officer for the trial of municipal cases, I hope there will be no more further cause for complaint.

The HON. SIR HENRY HARRISON said :—It will be obviously a one-horse arrangement if we accept this amendment for this part of this chapter when we have rejected a similar amendment for an earlier part of the same chapter.

The Motion being put, the Council divided :—

Ayes 5.	*Noes* 7.
The Hon. H. Pratt.	The Hon. C. H. Moore.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. Sir Alfred Croft.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. Sir Henry Harrison.
The Hon. Babu Kali Nath Mitter.	The Hon. T. T. Allen.
The Hon. Moulvie Abdul Jubbar.	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The HON. SIR HENRY HARRISON moved that, in section 91, for the words "the names of all persons residing in such house" the words "the names of all male persons residing, or carrying on any trade, profession or calling in such house" be substituted.

He said :—I move this amendment, because I am told that there the native community have an objection to give the names of the female members of their families.

The motion was put to the vote and carried.

The HON SIR HENRY HARRISON moved that, for the last paragraph of section 96, the following be substituted :—

"The total net proceeds of the fees half-yearly received by the Commissioners for the registration of carts, after reduction of the charges incurred on account of such registration, shall be divided between the municipalities of Calcutta and Howrah, and such other municipalities adjacent to Calcutta and Howrah as the Local Government shall declare to be entitled to a share in such receipts, in such proportion as the Local Government may from time to time determine."

He said :—The present rule is to deduct the charges incurred for registration before dividing the proceeds ; but that condition has been omitted from the section. The object of the amendment is to supply the omission.

The motion was put to the vote and carried.

The consideration of the further clauses of the Bill was postponed till the next sitting of the Council.

The Council was adjourned to Thursday, the 12th April 1888.

CALCUTTA ;
The 24th April 1888.

C. H. REILY,
Asst. Secy. to the Govt. of Bengal,
Legislative Dept.

RESOLUTION REGARDING THE TOURS OF DISTRICT AND SUB-DIVISIONAL OFFICERS.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 21st April 1888.

RESOLUTION.

READ—

Correspondence regarding the tours of District and Sub-divisional Officers.

In the Resolution on the General Administration Report of the Presidency Division for the year 1877-78, the Government of Bengal directed that the tours of Sub-divisional Officers should extend to at least four months' duration, instead of three months, the period formerly fixed. The change has never been accepted as altogether beneficial; and in reviewing the results of the year 1886-87, Mr. Wilson, the late Officiating Commissioner of Burdwan, and Mr. Oldham, the Magistrate of that district, represented that the period, which Collectors were, under the orders in force, bound to spend in the interior of their districts, was ninety days; that, if properly spent, it is sufficient for the necessary work of inspection; and that a more prolonged absence from head-quarters often interferes very seriously with the trial of criminal and other cases by sub-divisional Officers. Upon receiving this report, the Lieutenant-Governor invited an expression of the opinion of the other Commissioners of Divisions, at the same time directing that full compliance with the orders under consideration need not be insisted on during the cold-weather season which has recently expired.

2. The replies to this circular show that the Commissioners are unanimous in considering that the tours of Sub-divisional Officers may be curtailed with advantage. The Lieutenant-Governor is accordingly pleased to direct, in supersession of all former orders, that in future these tours shall not, without special sanction, be of shorter duration than ninety days. If any Commissioner considers that in the case of a very small sub-division, such as Barrackpore, Dum-Dum, or Uluberia, the tour of the Sub-divisional Officer need not be so extensive, he should report upon the matter for separate orders. Collectors frequently extend their tours beyond the period required by rule, and it is expected that Sub-divisional Officers will do so also, when the public interests require it, and particularly when they first take charge of a sub-division. Commissioners may also prescribe longer tours when, for any special reason, it seems necessary to adopt such a course.

3. Complaints are frequently made that Sub-divisional Officers so arrange their work as to render it necessary for large parties of mukhtars and clerks to follow their camps. It may not always be possible to avoid this inconvenience, but it should be distinctly recognised that the attendance of a number of persons from head-quarters, having no concern in the work of inspection, is injurious to the objects with which these tours are undertaken. Sub-divisional Officers should endeavour to do as much of their regular case work as possible at head-quarters, employing themselves while on tour in making local enquiries. The utility of a Sub-divisional Officer's tour for inspection purposes, and the extent to which it can be carried without interruption to business, or inconvenience to the public, must depend greatly on the skill with which it is planned: the object in view can be obtained only by very careful arrangements, distributing the time to be spent in the interior between the different seasons of the year, and avoiding any very protracted absence from head-quarters.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt of Bengal.

DISTRIBUTION OF THE SURPLUS INCOME AND ACCUMULATED BALANCE OF THE MOHSIN FUND.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 23rd April 1888.

RESOLUTION.

READ the following papers on the subject of the application of the unappropriated surplus and balance of the Mohsin Endowment Fund:—

Letter to the Director of Public Instruction, No. 706, dated the 15th September, 1887.
Letter from the Director of Public Instruction, No. 418, dated the 23rd January, 1888.
Letter from the Director of Public Instruction, No. 911, dated the 15th February, 1888.
Letter from the Director of Public Instruction, No. 1015, dated the 18th February, 1888.

The Lieutenant-Governor has ascertained with pleasure that the Muhammadan endowment founded by Haji Muhammad Mohsin in 1806, and which, so far as the funds devoted to secular purposes are concerned, has been under the management of Government since 1817, possesses an annual income of at least five thousand rupees in excess of the expenditure at present sanctioned, and a surplus balance of Rs. 51,674. The proceeds of the endowment, after the requirements of a religious establishment at Hooghly have been met, are devoted to the maintenance of Madrassas, the support of teachers of Persian and Arabic at English schools, the award of scholarships to promising Muhammadan students, and the payment of two-thirds of the fees of Muhammadan pupils in all Calcutta Colleges, public or private, and in a certain number of Government zillah schools. The following statement shows the amount sanctioned for each of these purposes during the year 1886-87:—

	Rs.
Maintenance of Madrassas	27,986
Salaries of Moulvies in high schools	6,044
Scholarships	10,260
Short-fee payments	11,672
Total ...	55,962

2. From the surplus income, the Lieutenant-Governor, after consultation with the Director of Public Instruction, sanctions an additional grant of Rs. 1,200 a year to the Madrassa at Chittagong, the most numerously attended institution of its class in Bengal, and one of the most successful; also Rs. 626 a year on account of the classes of the Rajshahye College, in which Persian and Arabic are taught, and Rs. 50 a year to the Hooghly Madrassa. The grant for paying two-thirds of the fees of pupils at specified Government schools will be increased by Rs. 2,450, the following institutions receiving grants, or increased grants, for the purpose:—

NAME OF INSTITUTION.	From Government. Per annum. Rs.	Grant now sanctioned. Per annum. Rs.
Patna College and School	700	1,200
Patna City School	500	500
Cuttack College and School	700	850
Calcutta Colleges	3,160	3,160
Baraset Zillah School	600	600
Hooghly College and Collegiate Schools	2,210	2,210
Midnapore College and School	500	500
Rajshahye College and School	700	700
Dacca ditto ditto	800	800
Chittagong ditto ditto	700	700
Krishnaghur ditto ditto	420	420
Berhampore ditto ditto	250	250
Bogra Zillah School	680	680
Rungpore ditto	200	200
Pubna ditto	320	320
Maldah ditto	120	120
Purneah ditto	40	40
Furreedpore ditto	200	200
Burrisal ditto	390	390
Mymensingh ditto	500	500
Commillah ditto	440	440
Noakholly ditto	360	360
Jessore ditto	160	360
Barrackpore ditto	......	300
Beerbhoom ditto	......	300
Dinagepore ditto	......	250
Balasore ditto	......	250
Bankoora ditto	......	200
Hazaribagh ditto	......	150
Khulna ditto	......	150
Total ...	14,650	17,100

3. The Education Commission recommended that assistance from this fund should not be limited to Government schools, but extended to private institutions also, as has been done with regard to Colleges. In order that a beginning may be made in this direction, a sum of Rs. 700 a year will be placed at the disposal of the Director of Public Instruction for the purpose of making such grants. Sir Steuart Bayley attaches the greatest importance to the extension of the system under which two-thirds of the fees of Muhammadan students are paid at certain schools, considering that in no other way can the limited means available be used with so much effect for the purpose of assisting Muhammadans in the efforts they are now making to raise their educational position, and thereby to render their children fit to take a more adequate share in the administration of the country and in the practice of the learned professions. Future proposals for using any further surplus income which may accrue to the endowment should be made with reference to this consideration. It must, however, be remembered by school managers that the sum now made over to the Director of Public Instruction is sufficient to enable him to assist a few institutions only, the selection of these being left to his discretion. The total assignment from the annual income is as follows :—

	Per annum. Rs.
Increase in the grant to the Chittagong Madrassa ...	1,200
Increase in the grant to the Persian and Arabic classes in the Rajshahye College	626
Increase in the grant for the payment of two-thirds fees of Muhammadan students in Government Schools and Colleges	2,450
Increase in the grant to the Hooghly Madrassa	50
Total ...	4,326

4. Of the accumulated balance, Rs. 25,000 will be invested in Government securities, and the rest will be assigned as follows :—

	Rs.
Construction of a new building for the use of the Superintendent of the Chittagong Madrassa	12,000
Substitution of corrugated iron roofing for the thatched roofs of the cook-rooms and out-offices of the Chittagong Madrassa	1,400
Repairs to verandahs, drains, roads and fences of the Chittagong Madrassa	1,500
Erection of a new building, partly as an addition to the hostel of the Arabic and Persian classes of the Rajshahye College, and partly to serve as a class room	8,000
Acquisition of land for the erection of the new building for the Arabic and Persian classes of the Rajshahye College, and in order to get rid of an unsightly and insanitary bustee ...	3,200
Total ...	26,100

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

	Western Districts.		
	BURDWAN DIVN.		
1	Burdwan Apl. 21, '88	Nil	Weather—hot with violent east winds. Rain is much wanted for the sesamum crop. No other crops on the ground. Price of common rice has further fallen to nearly 23 seers per rupee on an average.
2	Bankoora „ 21, '88	0·20	Weather—sultry. Indigo, cotton and *til* thriving. Planting of sugarcane continues. No change in the rice market.
3	Beerbhoom „ 21, '88	0·12	Weather—intensely hot till 20th, when a storm cooled the air. No crops on the ground. Rain wanted for the mangoes.
4	Midnapur „ 21, '88	0·03	A small nor'-wester on the evening of 20th; moderately hot. *Boro* is being reaped. Rain is much wanted in the north and west of the district.
5	Hooghly „ 21, '88	0·14	Weather—very hot, stormy since 20th. Rain much wanted for crops and for ploughing.
	Howrah „ 23, '88	0·01	Weather—warm days, cool nights. State and prospects of crops good.
	Central Districts.		
	PRESIDENCY DIVN.		
6	24-Perghs. Apl 24, '88		Weather—unsettled with high winds. No crops on the ground except sugarcane, which is doing well. Lands are being prepared for cultivation of rice and jute crops.
7	Nuddea „ 21, '88	0·86	Weather—very sultry; wind high and stormy. Rain has fallen in Kooshtea and the Sudder sub-division and has done much good. It is urgently wanted elsewhere. Tillage for *bhadoi* progressing. Indigo and sugarcane good.
	Kooshtea ...	0·60	
8	Khoolna „ 21, '88	0·79	Weather—warm with bright sun and south breeze; sky overclouded with light rain during the last three evenings. *Boro* rice promises well. Rain wanted for cultivation.
9	Jessore „ 21, '88	1·14	Weather—hot, except in the latter end of the week, when rain fell. Rain will be beneficial to sowings.
	Magoorah ...	1·11	
	Narail ...	0·25	
10	Moorshedabad „ 21, '88	1·25	Weather—cloudy and cooler. A heavy shower with high wind on 20th in the Sudder sub-division. Sowing of early rice going on. Rain has come in time to assist cultivation of early rice and indigo.
	RAJSHAHYE DIVN.		
11	Dinagepur Apl. 21, '88	Nil	Blowing up for rain. *Bhadoi* and jute sowings have germinated. Cultivation of sugarcane in progress. Showers of rain wanted.
	Thakurgaon ...	0·26	
12	Rajshahye „ 21, '88	Nil	Weather—very hot till 20th, now cloudy and cooler. Rain still holds off, and *boro* paddy, jute, *aus* and *amun* are all suffering.
13	Rungpur „ 21, '88	0·09	Weather—cool and cloudy. Rain has fallen over a considerable portion of the district and has improved prospects.
	Nilphamari ...	1·40	
	Gaibauda ...	0·30	
14	Bogra „ 21, '88	Nil	High hot winds, except during last two days when winds changed to east. Winds still high. Thermometer dropped 10°. State and prospects of crops good, but rain wanted.
15	Pubna „ 21, '88	0·25	Weather—hot in daytime, but cool at night; stormy. State and prospects of crops good.
16	Darjeeling „ 21, '88	0·69	Weather—warm. Rain fell locally, but is believed to have been general. No reports from the interior. Prospects of the crops good. Prices the same as last week.
17	Julpigoree „ 21, '88	Nil	Easterly wind blew continually throughout the week. *Bhadoi* paddy and jute are being sown. Rice sells at 21 seers per rupee at head-quarters.
	Eastern Districts.		
	DACCA DIVISION		
18	Dacca Apl. 21, '88	2·44	Weather—mostly cloudy with high wind. *Aus* and *amun* paddy and jute are being sown. Harvesting of *boro* paddy commenced. Recent rain and storm have done some damage to *boro* paddy. On the whole prospects of crops good.
	Munshigunge ...	0·10	
	Naraingunge ...	1·15	
19	Furreedpur „ 21, '88	1·88	Weather—seasonable. Rain has fallen, but more is wanted. Lands are being ploughed for jute and paddy.
	Goalundo ...	0·26	
	Madaripur ...	0·44	
20	Backergunge „ 20, '88	Nil	Weather—very hot. Prospects of crops good. Rain wanted.
21	Mymensingh „ 20, '88	Nil	Weather—cloudy; very hot. State and prospects of crops good. Rain wanted for cultivation.
	Jamalpur ...	0·2	
	Kishoregunge ...	1·15	
	Netrokona ...	0·17	
	CHITTAGONG DIVN.		
22	Chittagong Apl. 24, '88	2·88	Weather—unsettled. A severe storm on 17th. Lands are being prepared for *aus* crop. Prices steady.
23	Noakholly „ 20, '88	0·66	Weather—cloudy and stormy. Sowing of *aus* continues. Harvesting of *rubbi* crops nearly completed.
	Fenny ...	0·72	
24	Tipperah „ 12, '88	0·61	Weather—cloudy, with some rain at head-quarters; comparatively cool. The few standing crops there are give promise of good outturn. Rain, wherever it has fallen, has promoted agricultural operations.
25	Chittagong Hill Tracts. „ 18, '88	0·59	Strong, steady, south-westerly gale throughout the week, interrupted on the 17th by a north-westerly rotatory storm which has cooled the air. *Jum* burning still going on. Gathering of winter crops almost finished. Planting of sugarcane continues.
	Hill Tipperah „ 18, '88	0·82	Weather—cloudy and unsettled. Early rice is being sown. Lands are being prepared for sugarcane.

	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR.					
PATNA DIVN.	26	Patna	Apl. 21, '88	Nil	Weather—dry and sultry. *Rubbi* threshing and opium weighment going on. *Boro* rice in some places on dearah lands promises well. Prices of food-grains almost stationary.
	27	Gya	„ 00, '88		Report not received.
	28	Shahabad	„ 21, '88	Nil	Weather—hot; west wind has abated; easterly wind prevailing for the last three days. *Rubbi* threshing almost completed; outturn fair. Sugarcane is being irrigated. Opium weighments are over; outturn not so good as expected.
	29	Durbhunga	„ 21, '88	Nil	East wind prevailing. Rain much wanted for *moong* and paddy sowings, which however, still look promising. Indigo is doing well. Price of common rice averages 21 seers per rupee.
	30	Mozufferpur	„ 21, '88	Nil	Weather—hot with high east wind. Paddy, *moong* and *cheena* thriving. Threshing of *rubbi* crops in progress.
	31	Sarun	„ 21, '88	Nil	Weather—seasonable. Indigo doing well. Preparation of fields for *bhadoi* and *aghani* will shortly be taken up. Sugarcane is being irrigated. *Cheena* coming up well. Opium weighments progressing satisfactorily.
	32	Chumparun	„ 21, '88	Nil	Weather—hot with varying winds. Threshing of *rubbi* crops coming to a close. Sowing of *aghani* on low lands commenced in the Bettiah sub-division. Weighments of opium in full progress. Prospects of all standing crops good.
BHAGULPORE DIVN.	33	Monghyr	Apl. 21, '88	Nil	Weather—hot and sultry; east wind prevailing since last four days. Threshing of *rubbi* crops still going on. Preparation of lands for *bhadoi* crops has commenced in places.
	34	Bhagulpur	„ 21, '88	Nil	Weather—at first hot with west wind, now cooler with wind from the east and cloudy. *Rubbi* crops being threshed. Rain wanted for rice, *moong*, and sugarcane.
	3	Purneah	„ 21, '8[illegible]	Nil	Weather—seasonable; east winds prevailing, indication of rain. Rain would do good to early rice and jute seedlings
	8	Maldah	„ 21, '88	Nil	Weather—hot and oppressive with clouds and east winds. *Boro* paddy still doing well. *Bhadoi* sowings going on. Rain much wanted for these and other standing crops, such as jute, *moong*, &c., the sowing of which has been finished in low lands in north of the district. Common rice selling at an average of 23¼ seers per rupee.
	37	Sonthal Perghs	„ 24, '88	0 43	Winds westerly, changing to south and east with clouds; very little rain. Sugarcane in Godda and *boro dhan* in Rajmehal doing well. Rain wanted for sugarcane in Deoghur. *Mohua* has been a bad crop.
ORISSA.					
ORISSA DIVN.	38	Cuttack	Apl. 20, '88	Nil	Mornings cool; evenings cool with high winds; mid-days extremely hot. Ploughing for *beali* and *sarud* rice stopped for want of rain. Rice is sold at 21 seers per rupee in town.
	39	Pooree	„ 19, '88	Nil	Weather—seasonable. Land is being ploughed. *Dalua* crop is being harvested. Mango is beginning to ripen. Common rice selling at 24 seers 1 chittack per rupee in the Sudder sub-division, and 23 seers 11 chittacks in the Khoorda sub-division.
	40	Balasore	„ 20, '88	Nil	Weather—very hot. *Kalai* and cotton being harvested. Cultivation of land retarded by want of rain.
CHOTA NAGPORE.					
South-West Frontier Agency.					
CHOTA NAGPORE DIVN.	41	Hazaribagh,	Apl. 20, '88	Nil	Weather—very hot with stormy west winds. Sugarcane doing well. Mango promising. *Mohua* has yielded fairly except in some places. No other crops.
	42	Lohardugga	„ 21, '88	Nil	Weather—very warm with strong west wind. *Mohua* gathering almost over. No crops on the ground to report on. Price of rice has a tendency to rise.
	43	Singbhoom	„ 20, '88	Nil	Weather—very hot; thermometer 110° in the shade. Cloudy to-day (20th). Only sugarcane and cotton on ground, both reported to be doing well. Mango expected to be an 8-anna crop only.
	44	Manbhoom	„ 2 , '88	Nil	Weather—very hot. Wind has shifted to the east. Sugarcane is being planted. Cotton pods bursting; probable outturn 12 annas.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten
The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number
are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12
station in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday. the 20th of April 1888.

Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. RAINFALL. Of week. Mean for district.	Of week. Normal mean.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1887. Mean for district.	Since 15th May 1887. Normal mean.	Since 15th May 1887. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	DISTRICT.	METEOROLOGICAL DIVISION.

Explanation.—...... Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 24th April* 1888.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 20TH OF APRIL 1888.

At the close of the previous week, ordinary hot-weather conditions prevailed over the whole of Bengal. Dry westerly winds, which had a more or less northerly element in them at the northern stations, while they were south-westerly at the southern stations, prevailed over the greater part of the province. Temperature was unusually high, while pressure was low, and there were very few local storms or nor'-westers reported, so that rain was practically absent from the province. These conditions remained unaltered, except for the usual oscillations of pressure and temperature, and slight changes in the wind directions, up till Tuesday, the 17th, and on the morning of Wednesday, the 18th, the meteorological observations taken at the eastern stations showed that a decided change was taking place, for at all the stations on the Arakan and Burma coasts, and at the stations in North and partly in East Bengal, an easterly wind current set in, attended at some of these stations also with an unusually rapid rise of pressure. This easterly wind current then gradually forced its way across Bengal, and at the close of the week more or less easterly winds were reported over the greater part of the province. The interaction between the two opposing wind systems at once caused the weather conditions to become disturbed over the province, and thus nor'-westers with rain occurred, and with the extension of the interaction, the area affected by the disturbed conditions gradually enlarged. Thus in East Bengal, from the 17th and 18th, local storms occurred frequently, in North Bengal the disturbance commenced on the 19th, and South-West Bengal received showers on the 20th. Up till the end of the week, however, Behar, Orissa and Chutia Nagpur had not come under the influence of this action, and practically no rain has fallen in these districts.

Pressure.—Except in the north and east of the province, the barometric changes during the week have generally been small, but, as stated above, a rapid increase took place in those districts on the 18th, amounting in several cases to nearly two-tenths of an inch. Over the remainder of the province pressure usually fell for the first three or four days of the week, then rose for two days and commenced to fall again slightly at the end of the week. Taking into consideration only those stations from which observations have been received for a series of years, and which thus give reliable averages, the mean pressure for the week of the whole province has been nearly 0·06 inch in defect of the normal. The largest defects have been reported at Gya (0·088 inch) and at Calcutta (0·075 inch).

Temperature—Was again unusually high during the greater part of the week, but with the setting in of the disturbed conditions, and with the occurrence of rain, temperature fell decidedly. Up to about the 18th exceptionally high maximum temperatures were reported in almost all districts, and the following figures will show this fact clearly :—

At Midnapore	on the 18th	maximum temperature was	...	112·4°
,, Chyebassa	,, 19th	ditto	...	111·6°
,, Ranigunge	,, 18th	ditto	...	110·5°
,, Cuttack	,, 19th	ditto	...	110·4°
,, Bankoora	,, 15th	ditto	...	110·3°
,, Gya	,, 18th	ditto	...	109·2°
,, Burdwan	,, 18th	ditto	...	108·9°
,, Nya Doomka	,, 18th	ditto	...	108·7°
,, Berhampore	,, 18th	ditto	...	108·2°

For the whole week the mean temperature of the province has again been rather largely above the normal, the excess being 2·2°. The excess temperature has, however, to a great extent been confined to the west of the province; in Chutia Nagpur it amounts to no less than 4·7° and in South-West Bengal to 3·5°.

The following table which contains the actual temperatures during the week, and their variations from the normal at nine typical stations in the province, will show the general temperature distribution clearly :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 20th April 1888.

	Normal mean maximum temperature for the week ending 20th April.	Actual mean maximum temperature for the week ending 20th April 1888.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 20th April.	Actual mean minimum temperature for the week ending 20th April 1888.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 20th April.	Actual mean daily temperature for the week ending 20th April 1888.	Variation of actual mean from the normal.
Cuttack	102·3	106·3	+4·0	77·6	80·3	+2·7	90·0	93·3	+3·3
Calcutta	93·3	95·5	+2·2	75·3	78·6	+3·3	85·8	88·6	+2·8
Dacca	93·4	95·5	+2·1	74·4	77·5	+3·1	83·9	86·5	+2·8
Bardwan	100·7	106·4	+5·7	75·5	78·9	+3·4	88·1	92·7	+4·6
Patna	101·3	104·2	+2·9	73·0	76·5	+3·5	87·2	90·4	+3·2

Purneah	99·1	101·0	+1·9	69·2	71·0	+1·8	84·2	86·0	+1·8
Hazaribagh	97·0	101·9	+4·9	71·6	76·3	+4·7	84·3	89·1	+4·3
Darjeeling	63·2	64·7	+1·5	48·4	50·7	+2·3	55·8	57·7	+1·9

Rainfall—Has been general in East Bengal, fairly general in South-West Bengal and local in North Bengal, while elsewhere the amounts have been so small as to be unimportant. East Bengal has received an average fall of 0·95 inch, South-West Bengal one of 0·38 inch and North Bengal one of 0·16 inch. In East Bengal the districts which have received the heaviest falls are Noakholly, Commilla, Dacca and Mymensingh. In South-West Bengal the districts of Moorshedabad, Nuddea, Jessore and Khoolna have received good rain the remaining districts receiving only small quantities, while in North Bengal the rain has been mainly confined to the districts of Darjeeling, Rungpore and Pubna.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 20th of April 1888 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of Month.		Since 15th May 1887.

The average fall of the corresponding period for 24 years, S. G.'s Office ...	3·74

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h. 10h. 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, d drizzling rain, ♂ dust storm, < lightning.

ALEX. PEDLER,

For Offg. Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

Calcutta, the 23rd April 1888.

MEMORANDUM.

The birth and death returns of the principal Municipalities in Bengal yield the following results for the week ending 7th April 1888 :—

1. The ratios per mille of births and deaths for the period above referred to stand at, for births 19·9 and for deaths 27·5, the records of the preceding week ending 31st March presenting very nearly the same proportions, viz., 20·1 and 27·8 respectively.

2. That the following Municipalities registered the highest proportions of births and deaths :—

Births.

	Ratio per *mille.*
Beauleah	44·8
Comillah	42·4
Bhagulpore	38·9
Bali	35·1
Monghyr	32·5

Deaths.

	Ratio per *mille.*
Serampore	78·5
Utterpara	56·7
Suburbs of Calcutta	50·9
Chittagong	47·0
Narainganj	45·6
Bhagulpore	41·6
Jessore	36·7
Beauleah	34·1
Comillah	30·8
Gya	29·4

3. That, as compared with the results of the preceding week, there was a sensible abatement of mortality from cholera, and only fractional increases in the casualty-rates from injury and the maladies grouped under the head of "Other causes," small-pox, fever and bowel-complaints presenting no variations :—

	Ratio per *mille* during the weeks ending—	
	7th April 1888.	31st March 1888.
Cholera	8·1	9·2
Small-pox	·2	·2
Fever	9·0	9·0
Bowel-complaints	2·7	2·7
Injury	·4	·2
Other causes	7·0	6·4

4. That the highest fatal results from cholera, fever and the diseases classed under the head of "Other causes" were returned from the following Municipalities, the rest of the maladies not proving noticeably fatal anywhere :—

Cholera.

	Ratio per *mille.*
Utterpara	56·7
Serampore	51·0
Jessore	36·7
Suburbs of Calcutta	23·2
Narainganj	16·6
Howrah	15·5
Comillah	15·4
Hughli	5·3
Dacca	4·5

Fever.

	Ratio per *mille.*
Beauleah	28·9
Chittagong	28·2

Other causes.

	Ratio per *mille.*
Bhagulpore	15·4
Puri	14·7
Gya	13·7
Suburbs of Calcutta	11·8

It will be noticed that the mortality from cholera in the Serampore, the Suburbs of Calcutta and Comillah towns, although yet high, was considerably below that of the preceding week, and that the same disease prevailed in the Utterpara and Jessore towns with greater severity.

5. That in relation to *Sex*, *Class* and *Age* the mortality stood as follows :—

According to Sex.

	Ratio per *mille.*
Males	30·9
Females	23·7
Ratio of male deaths to every 100 female deaths	148

According to Class.

	Ratio per *mille.*
Christians	8·7
Hindus	27·2
Mahomedans	29·2

According to Age.

	Ratio per *mille.*
Under 1 year	238·4
1 and under 5 years	40·3
5 " 10 "	15·1
10 " 15 "	8·6
15 " 20 "	15·7
20 " 30 "	20·9
30 " 40 "	22·1
40 " 50 "	20·4
50 " 60 "	30·2
60 years and upwards	68·6

K. P. GUPTA, M.B., F.R.C.S., *Surgeon-Major*,
Offg. Sanitary Commissioner for Bengal.

The 23rd April 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

* The Executive Engineer, Bhagulpore Division, has lately reported that the readings from 1st December 1857 to 9th April 1858, which were taken on temporary gauges put in without levelling, are unreliable, showing the river at Sahebgunge abnormally low.

A. D. McARTHUR, *Major*, R.E.,

Under-Secretary to the Government of Bengal.

The 24th April 1888.

CONTENTS.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

The Council met at the Council Chamber on Thursday, the 12th April, 1888.

Present:

The Hon. SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding*.

The Hon. G. C. PAUL, C.I.E., Advocate General.

The Hon. H. J. REYNOLDS, C.S.I.

The Hon. C. P. L. MACAULAY, C.I.E.

The Hon. T. T. ALLEN.

The Hon. SIR HENRY HARRISON, KT.

The Hon. SIR ALFRED CROFT, K.C.I.E.

The Hon. MOULVIE ABDUL JUBBAR.

The Hon. BABU KALI NATH MITTER.

The Hon. DR. MAHENDRA LAL SIRCAR, C.I.E.

The Hon. C. H. MOORE.

The Hon. DR. GOOROO DASS BANERJEE.

The Hon. H. PRATT.

BENGAL MUNICIPAL ACT, III OF 1884, AMENDMENT BILL.

The HON. MR. MACAULAY postponed the presentation of the Report of the Select Committee on the Bill to amend the Bengal Municipal Act, III of 1884.

CALCUTTA AND SUBURBAN MUNICIPALITIES AMALGAMATION BILL.

The Hon. Sir Henry Harrison moved that the clauses of the Bill to consolidate and amend the law relating to the municipal affairs of the Town and Suburbs of Calcutta, as further amended, be further considered for settlement in the form recommended by the Select Committee.

The motion was put to the vote and carried.

The Hon. Mr. Macaulay moved the omission of sections 99 and 100 from the Bill (sections relating to the imposition of a duty on petroleum). He said:—In order to clear the way for the discussion, I may as well inform the Council that a decision of the Government of India has been communicated to the Local Government since the Select Committee decided to adopt these sections. In reference to the question of the contribution from Imperial revenues towards the cost of the police charges, the Government of India have stated that the contribution now assigned to Provincial funds has been fixed on the understanding that petroleum stored in Calcutta shall not be subjected to municipal taxation so long as it is subjected to an Imperial Customs duty. In other words these sections, if adopted by the Council, will remain, for at any rate a considerable period of time, a dead letter. The question then naturally arises, why not leave them out? My hon. friend, Sir Henry Harrison, following the line of reasoning he adopted on another question at our last meeting, will probably rejoin, why not leave them in? My answer is that the principle of an octroi in Bengal is involved. I apprehend that more than one of my colleagues on the Select Committee voted for the inclusion of these sections because they were reluctant to deprive the new municipality of one means of increasing its income which we should all be glad to see augmented. But now that the hope of an increase from this source is removed, they may perhaps change their views. We can put aside the supposed interests of the municipality and look solely to the principle involved. The question comes up on the simple issue whether an octroi can be properly levied, I will not say in Calcutta alone, but in the municipalities of Bengal; and I am glad that the question has been brought to this plain issue. I will not trouble the Council with a disquisition on the arguments for or against an octroi tax. Hon. Members are doubtless well aware of them. On the one hand, if it can be secured that only the fixed rate, and no more and no less, will be levied on articles consumed by the people of a municipality, then octroi will be not only not an objectionable, but a most admirable tax. On the other hand, we know from the many Resolutions of the Government of India that it not only has a tendency to become, but does generally in practice become, a transit duty and a burden on trade. An instance was given by Sir John Strachey in 1879 where a municipality from which cotton was exported charged octroi on the iron brought in for hooping the bales, but refused a refund when it went out on the bales. Many other instances were brought to the notice of Government by the Bombay Chamber of Commerce, which strongly protested against the abuses which the octroi system had given rise to in Bombay municipalities. I shall not dwell further on this point, nor shall I dwell upon the very peculiar provision of the section as it stands, under which the storage of petroleum in transit is to be altogether prohibited in Calcutta. This will no doubt prevent the octroi from becoming a transit duty. But it seems to me to guard against the risk of one evil by ensuring the existence of another. It prevents a difficulty being placed on trade by a transit duty by placing another difficulty on trade, by preventing merchants dealing with a department of commerce which is increasing in volume every day, from transacting their business at a reasonable distance from their offices. They will have to conduct their operations from a distant depôt, miles out of the town, when, in the area to be included under the Bill, there are places well suited for the purpose. These, however, are not the points which I wish now to urge upon the Council. My objections to the duty are based on broader principles. I maintain that in Bengal, owing to the circumstances of the country and towns, an octroi cannot be levied without the certainty of oppression and corruption and of harassment of the people. Towns in Bengal are not walled or even compact; they are open and straggling, and the most experienced officers of the Government have expressed

strong opinions against the imposition of this form of taxation in towns. In 1868 the Commissioners of Divisions in Bengal reported against it. I will read to the Council the opinion of Sir Ashley Eden, on the Bill introduced by Sir John Strachey in 1879 to regulate the levy of octroi. Mr. Mackenzie's letter of 18th December, 1879, said:—

"The only suggestion which the Lieutenant-Governor has to make is that the Bill should be specifically declared not to extend to the Province of Bengal. It has repeatedly been shown that an octroi duty is not adapted to the circumstances of Bengal towns and villages, and the Lieutenant-Governor can imagine no form of impost which would be more objectionable here. Both Sir Cecil Beadon and Sir William Grey condemned proposals to introduce these duties into Bengal. The general voice of district and divisional officers was against them when Sir George Campbell sought to embody them in his (vetoed) Municipalities Bill of 1872, and Sir Ashley Eden would be very sorry to see any attempt made to re-open the subject so far as this province is concerned."

As I have said, our towns in Bengal are really a series of straggling houses. They are approached by roads and paths, creeks and khalls, and if you are to have an octroi in them, you must have an army of underpaid subordinates to collect the tax at their own sweet wills from the people. To collect an octroi a large staff must be maintained, and, as was pointed out by the Government of India in 1884, the cost of this staff will be unduly high. "In a large open city, moreover," wrote the Government of India, "the cost of collecting establishment must be excessively high, and quite out of due proportion to the receipts." I maintain that such a tax collected by such an agency will, under the appearance of indirect taxation, have all the worst evils of direct taxation. If it is urged that the question before us concerns the levy of octroi in Calcutta only, I would answer that in the first place Calcutta is such a town as I have described. I would remind the Council of the speech of my hon. friend opposite (Mr. Allen) at the last meeting. He pointed out that on this Bill becoming law the boundary of Calcutta on the Ballygunge side will be, not even a village, but a series of paddy fields. Again, if we affirm the principle of octroi in Calcutta, I cannot see how we can refuse it in Howrah, Patna, Dacca, and other towns. Here I will borrow a metaphor of which my hon. friend Sir Henry Harrison is so fond. My friend does not like the closing of doors. Here, however, is a case, not of closing a door which might afterwards be opened, but of opening a door, taking it off its hinges, and carrying it away. Such will be the result of introducing any form of octroi in Bengal. If you admit it in Calcutta you will have it throughout the country. Apart, therefore, from the general question of the economic effects of octroi, I would urge that the tax is unsuited to the towns of this Province, and I ask the Council to affirm this principle by omitting these sections.

The Hon. Sir Henry Harrison said:—I much hope that the Council will not accept this amendment, which will very seriously cripple the new municipality. My hon. friend has supported his amendment on two legs widely different in character. One is the *vis major* of the Government of India. We are told that it will be a condition with regard to this Bill that no duty shall be levied on petroleum so long as a duty is levied on that article by the Supreme Government. When we were in Select Committee it was thought probable that it would involve the rejection of the Bill altogether. I am pleased to find from what has been now said that the form of opposition has toned down, and that the exercise of the power reserved by the Government of refusing permission to raise this tax will be the means of preventing it. But is it just to suppose that the Government of India is so opposed to the proposal that they will not be open to conviction, or that there will be no changes in the *personnel* of that Government? Has the case that can be made out for putting a levy on petroleum in Calcutta ever been put before the Government of India? Has the Corporation had the chance of impressing upon the Government of India their view of the equity of allowing this tax on petroleum? I believe that a case so strong and so forcible can be placed before the Government for allowing this tax that, knowing how open they will be to reasonable conviction, if this provision remains in the law not many years will pass before the view of the Government of India on the subject will be changed. If the Council will agree to retain this provision in the Bill, we are confident that we shall be able to make out so strong a case that in a very few years the Government of India

worth while to keep the section in the Bill; and although I regret exceedingly to find myself not in accord with such powerful bodies as the Chamber of Commerce and the Trades' Association, still I feel inclined to come to the assistance of the Municipality on this subject, and to explain the reasons why I prefer to keep the section as it stands in the Bill. You have been told what the history of these sections is. How it was a resource unanimously agreed upon by a tolerably strong and representative Committee and accepted by the Government. I do not think, although of course I cannot be sure, that any objection to this section would have been heard of if it had not been that the Government of India had been beforehand with us. They took the wind out of our sails and imposed an Imperial tax on petroleum, and they say that is enough, you must not tax petroleum any more. And no doubt people interested in the trade of petroleum look with some trepidation to an additional tax being thrust upon it, although for local and not for imperial purposes. It has just the same effect upon the trade for whatever purpose the tax may be levied. But whether that be so or not,—whether it be the case, as I suppose, that nobody would ever have heard of any serious objection being taken if it had not been for the imperial tax levied by the Government of India—I want to point out that the Government of India's objection merely applies to the superimposition of this tax over and above their own. If their own tax be taken off—and although I do not say it is likely, I have been reminded that the Government of India has been known to take off taxes—then they will not object to our tax being levied. I think that stands clearly in the letter which I have just read to the Council, and that shows, it seems to me, that there is equally good reason for keeping in these sections in their permissive shape in order that, should that good time ever come, it may be taken advantage of without fresh recourse to legislation. Of course it may be objected, as the hon. mover of the amendment probably will object, that the theory being wrong in principle, the question whether the Government of India thinks fit to levy an imperial tax on petroleum or not makes no difference, and that even if they take off their tax, the municipality ought not to levy a municipal tax upon petroleum. On that point I have listened with great interest to what the hon. member said on the subject of octroi generally, but it seems to me that his argument that it is objectionable in Bengal generally really amounts to this, that octroi duties are objectionable only so far as your towns are not conveniently situated to watch the ingress and egress to such towns, but in towns where you can watch the ingress and egress of goods without having recourse to any very large protective staff, the objection, so far, will be removed. Therefore the objection is not a universal objection of principle, but an objection as far as the cost of levying octroi duties is concerned. And, as the hon. member in charge of the Bill has pointed out, that objection, as applied to the levy of a duty on petroleum introduced into Calcutta for consumption, falls to the ground. For it is quite certain to all who pursued the subject that, so long as the restrictions to which the importation of petroleum is subjected by law, for the purpose of safety to the public, are in force, so long as the existing establishments and regulations are kept up, you do not want that army of peons which otherwise would be necessary for the imposition of a tax on petroleum brought into Calcutta. I think that on that point the argument of the hon. member in charge of the Bill is unanswerable. For my own part, although I think it may not do much good at present to retain these sections in the Bill, and although I do not think that Sir Henry Harrison, notwithstanding his sanguine temperament and the force of his eloquence, will be able to persuade the Government of India that they are wrong and he is right, still I think there is no objection to give him the opportunity he desires.

The Hon. Mr. Macaulay said in reply:—With the President's permission, I will say a few words in closing the debate. My hon. friend, Sir Henry Harrison, has said that one of my arguments, or rather one leg of my argument, is an appeal to *vis major*. In fact, however, I used no argument at all in regard to the Government of India's decision. I merely stated the fact, and I think that, from the terms of that decision, there appears little hope of its being reversed. My hon. friend desires to use another *vis*, and to have the means of applying a lever to the Government of India. The question is whether the Council will place such an implement in his hands

There is another point in this part of the hon. gentleman's speech to which I must take serious exception. Sir Henry Harrison has said that the Select Committee had been told that if the octroi sections were accepted, the Government of India would veto the Bill. Now, in the first place, it appears to me to be an unusual and inconvenient course that any words used informally in Select Committee by one member to another should be officially stated to the Council. In the second place, I said nothing of the kind in Select Committee. I distinctly said that I did not speak on any official authority, but only mentioned that one member of the Government of India had said that he thought it likely that that Government would take exception to those sections. I believe that my hon. colleagues on the Select Committee will confirm what I have said. My hon. friend (Babu Kali Nath Mitter) assents. I need therefore say no more on this point.

Now as regards the main question, I regret that I shall have to imitate my hon. friend in his argument. I must, I fear, answer him with a *tu quoque*. My hon. friend said that I avoided the question of petroleum to deal with another question. But my hon. friend has also avoided the real drift of my argument. He has not observed that, though my argument was purposely directed against the general principle of octroi in Bengal, I said that this led from the proposal regarding petroleum. I fully recognize that an octroi may be levied on petroleum without the general objections to the impost. I quite recognize that the minute regulations regarding import and storage and transport offers facilities for it. It would raise the price no doubt, but beyond this I think it is as nearly as possible an ideal octroi. But, I would ask, if on petroleum, why not on salt? Salt is also subject to minute regulations, and certainly, apart from the objections to the levy of municipal taxation concurrently with imperial taxation, it would be as easy to levy an octroi on it as on petroleum. Then, why not on coal? Coal, it is true, is not subject to minute regulations. But it enters the city in bulk by rail, or sometimes by boat, and an octroi could easily be levied on it. What I contend is that if an octroi is admitted on petroleum, it will be extended to other articles. Throw in the stone of octroi, and there will be the ever widening circles of petroleum, then salt, then coal, and so forth.

As regards my hon. friend's argument that because increased revenue is necessary, those who oppose an octroi on petroleum are bound to propose a substitute, this seems to be an argument that should be addressed rather to the Government of India than to the Council. But as a matter of fact, as I shall have occasion to show later on, the amount of which Government is relieving the new Corporation of police charges will actually amount to precisely the figure which has been suggested as the increased income required. This is Rs. 2,80,000 for police and Rs. 75,000 for petroleum. It will be found that the Government relief would amount to at least Rs. 3,55,000. I have only referred to the circumstances of Bengal municipalities, because I thought that that argument was enough to convince the Council apart from the general objections to octroi in India. But even if the circumstances were the same, I think they would be wise to avoid the difficulties which the Bombay Chamber of Commerce has found in Bombay, and Sir John Strachey found in the North-West. It is true that the Government of India has taken exception to the proposal only on the ground that municipal taxation cannot be allowed to be concurrent with Imperial taxation. But as the Government of India has admitted octroi generally in other provinces,—though, as I have shown, with constant attempts to subject it to regulations,—it could not well forbid it in Bengal. This, it appears to me, is a matter for the Bengal Council.

The motion being put, the Council divided:—

Ayes 5.	*Noes* 8.
The Hon. H. Pratt.	The Hon. Dr. Gooroo Dass Banerjee.
The Hon. C. H. Moore.	The Hon. Dr. Mahendra Lal Sircar.
The Hon. Moulvie Abdul Jubbar.	The Hon. Babu Kali Nath Mitter.
The Hon. C. P. L. Macaulay.	The Hon. Sir Alfred Croft.
The Hon. the Advocate-General.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The Hon. Babu Kali Nath Mitter moved that the following new sections be inserted after section 100:—

"100A. It shall not be lawful for the Commissioners to apply the rates, taxes, fees, and other income belonging to the Town of Calcutta to the area added to the said town for any of the purposes contemplated by this Act, save and except the sum of Rs. 2,80,000, being the amount which the Local Government has relieved the said town from contributing to the expenses of the police maintained by the said Government.

"100B. The Commissioners shall yearly spend for the area to be added to the Town of Calcutta the whole of the revenue to be derived from the said area, including the sum of Rs. 2,80,000 referred to in the preceding section, the sums which may be raised under the provisions of section ninety-nine of this Act, and any sum which the Local Government may, with the sanction of the Supreme Government, contribute to the Municipal Fund."

He said:—The object of the insertion of the first of these two sections is to prevent any confusion ensuing as to the division of the funds of the present town of Calcutta, for any purpose contemplated by the Act, to the added area. The Amalgamation Committee in their report distinctly pointed out that one of the conditions on which the amalgamation should take place was that there should be no diversion of the funds of the town for the benefit of the amalgamated area. In the concluding portion of paragraph (15) of their report, they say—"It should, in our opinion, be accepted as a definite principle that the scheme of amalgamation is not to involve the town in any heavier charges than the town is now legally liable to bear." And in the Statement of Objects and Reasons appended to the Bill it is said that the Government of India having approved in general terms of the principle that no portion of the revenues and funds belonging to Calcutta should be diverted for any purpose to the added area, it is necessary that a section of this sort should be introduced into the Bill because it is anticipated that the funds which are likely to be placed at the disposal of the new municipality will not be such as to enable it to administer to the wants of the added area in a satisfactory manner. The Amalgamation Committee thought that the revenue, which it would be possible to obtain from such added area, would be Rs. 6,00,000: that was the figure they put down in their report. I think that that was a sanguine estimate. I have since been in consultation with one of the Commissioners who takes an active interest in the affairs of the Suburbs, and from the figures with which he supplied me, the conclusion I have come to is that it will not be possible to obtain more than Rs. 5,00,000 from the added area. But even supposing that my figures are wrong, and that the expectation of the Amalgamation Committee is realized, we have Rs. 6,00,000, from revenues; to that has to be added Rs. 2,80,000, which is the amount of relief the town of Calcutta will obtain from not being required to contribute to the Police Fund, besides Rs. 25,000, the amount of rating to the added area on the same account; and if we add also Rs. 75,000 to be realised from a tax on petroleum, the prospect of realising which is as distant as ever from what has fallen from Your Honour, the whole amount available for expenditure on the added area will come to about Rs 9,50,000. The question is whether that sum would be sufficient to administer the municipal affairs of the added area? I am deliberately of opinion that it will not be sufficient. The first thing to be done will be to construct reservoirs for filtered water, to lay down distribution pipes, and to pay for four million gallons of water which the Suburbs will take from Calcutta. That contribution will amount pretty nearly to Rs. 2,00,000. An estimate has, I understand, been prepared, which shows that the cost of laying down pipes will be somewhere about Rs. 7,00,000; then there will be charges for the distribution of the water, which will be a serious item of expenditure at the very outset. It will of course be necessary, as far as the works for the water-supply and other improvements are concerned, to raise a loan for the purpose; and therefore out of this estimate of Rs. 9,50,000, at least Rs. 1,00,000 will have to be set apart for the payment of interest and for a sinking fund for the loans to be raised for the water-supply, for the construction of latrines (I am not aware that there is any large number of latrines in the added area), for the drainage of the area, and for opening out new roads. If you really wish to improve the added area, the first thing to be done will be to open out new streets: you will not be able to effect any improvement unless you open out new streets. For all these purposes, it will be necessary to set apart at least Rs. 1,00,000 for interest and sinking fund on loans. This is a very moderate

estimate, and there is every prospect of its being exceeded. Then we have Rs. 8,50,000 left. I have prepared a statement showing the different items of expenditure, and it is a very moderate estimate. The annual cost of distributing water, according to Mr. Buckley's estimate, will be Rs. 47,380, and of providing a large main will be Rs. 21,000. At present the scheme is to supply only two million gallons of water, but the Corporation of Calcutta has contracted to give a supply of four million gallons; and if we really want to improve the sanitation of the added area, it will be necessary to give at least four million gallons of water; so that the figures will be doubled, and the amount for this purpose will be Rs. 1,37,684. Then the establishment charges will be Rs. 40,538, maintenance of roads Rs. 3,50,000, conservancy Rs. 34,000, house-service Rs. 2,00,000, charges of collection Rs. 12,000, additional lights Rs. 75,000, watering streets and so on Rs. 50,000: the present contribution to hospitals is Rs. 4,560, cost of vaccination Rs. 3,431, education Rs. 4,000. These items make up a total of Rs. 9,14,832. But this does not take into account expenses incurred for the erection of latrines and for the opening out of drains. If these are done out of capital, perhaps Rs. 1,00,000 will, for a few years, suffice. We have therefore Rs. 9,14,000 against an asset of Rs. 8,50,000. This is a moderate estimate on the basis of the expenditure in the Suburbs at present, increasing it of course to the extent necessary. For my own part, I think that this estimate of Rs. 9,14,000 is not a sufficient estimate, and I would not put down the expenditure at less than Rs. 12,00,000 per annum. I think that is the conclusion also to which the Local Government arrived when this matter was placed before it. After reviewing the report of the Amalgamation Committee, the Local Government pointed out that although the Committee did not in so many words state the amount of expenditure which the municipality would have to incur, it came to the conclusion that the sum which should be provided for was Rs. 6,00,000. Although by the Statement of Objects and Reasons of this Bill, no portion of the funds of the town is to be applied for any of the purposes of the added area, yet in making provision for the additional sum of Rs. 6,00,000, Rs. 2,50,000 of the house-rate was taken into consideration. That is entirely opposed to the scheme of the Amalgamation Committee. The funds of the town are to be applied for the benefit of the town, excepting the amount of relief which the Government is about to give, and yet in the estimate for this additional Rs. 6,00,000, which the Local Government considered would be needed for the improvement of this area, 2½ per cent. house-rate is taken into calculation. That, I submit, is entirely a mistake. Therefore it seems to me absolutely necessary that a section of the sort I propose should be introduced in the Bill to protect the rate-payers of the town of Calcutta. If, with the maximum rates from the added area, it be found impossible to do all that is needed, the responsibility will not rest with the Commissioners of Calcutta, but with the Government, and I wish that to be stated in the Bill as clearly and definitely as possible. Now it is proverbial that the added area is in an extremely insanitary condition, and this has been brought about not by the neglect of a few years, but of ages. This area is now to be placed under the administration of the town which has done a great deal to improve its sanitation, but has not yet done all that is necessary. Therefore it cannot be said that the area to be made over to the town is precisely in the same condition as the town, and on these grounds I submit that care should be taken to make it as clear as possible that no portion of the funds of the town will be diverted for any of the purposes of the added area. Under these circumstances, I move that section 100A be added to the Bill, but I have no objection to any improvement in the drafting of the section which may appear necessary to the learned Secretary of the Legislative Department.

If section 100A is accepted by the Council, it will be necessary to insert also section 100B, and I put it on precisely the same footing. If these sections are adopted, I do not propose to raise a discussion by moving my next amendment, viz., that the following section be inserted:—

"The Local Government shall contribute to the Municipal Fund the sum of two lakhs of rupees per annum, to be devoted to the improvement of the area added to the town of Calcutta."

My object is simply to put on record that if the funds available are insufficient for the proper municipal administration of the added area, the responsibility will not rest with the Commissioners.

His Honour THE PRESIDENT said:—I think it will help somewhat to the decision of this section if I put the Council in possession of the gist of the correspondence with the Government of India on the subject of this contribution. This Bill has been before the Council about two years. When it was introduced by my predecessor Sir Rivers Thompson, it was introduced on the assumption, as you will see from the Statement of Objects and Reasons, that the Government of India are prepared to take over the entire charge of the contribution for the police, a charge which was stated at the time to be Rs. 3,00,000. That runs all through the correspondence, and when I took up the subject it had already very far advanced, so far in fact that when the Select Committee submitted its report, it did so on the assumption that this contribution of three lakhs had been settled. It was only during my absence in Chota Nagpore that I learned that the Government of India were of opinion that this assumption was without any sufficient foundation. On going into the official papers on record, I am bound to say that the Government of India had always carefully guarded themselves from consenting in so many words to undertake this entire charge, although they had always accepted the principle of bearing a portion of the charge. As soon as I returned and found this situation of affairs, I took immediate measures to get the matter definitely considered and settled. The result of the further consideration on the part of the Government of India was that the Imperial revenues will contribute Rs. 2,00,000 towards the police charges of the municipality. No more. It then became a question for me to consider what was to be done—whether to ask you to go on with the Bill and hand over the added area to the municipality with diminished means to meet the charge, or whether to abandon it altogether, or to await the result of our deliberations as to whether the Provincial revenues are going to bear the burden. Last year I do not think the Provincial revenues could have done it; but fortunately by dint of hardheartedness on the part of the hon. the financial member on the left (Mr. Macaulay) we have accumulated sufficient to give an extra contribution from the Provincial funds. As to this extra contribution which will be given from the Provincial funds, my hon. friend will explain further what the total burden of our contribution will be. But it includes the police charges which we have already relieved the Suburbs of, and part of which have accumulated from year to year with a view to furnish a water-supply to the Suburbs, a statement which the hon. member omitted to mention. With reference to the amendment now before the Council, I presume the hon. member in charge of the Bill will say how far he thinks it is possible to work it. It seems to me it will involve an almost impossible practical difficulty in working. I only wish to put the Council in possession of such information as I can as to how Rs. 3,00,000 are to be given, and to assure the Council that, although the Provincial revenues will gladly give the additional Rs. 1,00,000, it is quite impossible to give more. I may mention that I do not think I can allow the additional provision proposed by the hon. mover of the amendment, as it is contrary to the section in the Indian Councils' Act, which allows no measure affecting the public revenues or any charge which would be imposed on such revenues, to be put without the previous leave of the Government.

There is one other point it is well I should mention now, as the proposed section 100B gives me a better opportunity of doing so than at any other time. The Government of India, in agreeing to give Rs. 2,00,000, saddled it with two conditions, one of which you have already heard, namely, that we shall not put a tax on petroleum while the Government of India taxes it, and then that we shall give some guarantee that the sum so contributed in lieu of the cost of the Calcutta Police will be devoted to expenditure on works of sanitation, and will not eventually be diverted from such purpose and be applied to a reduction of such taxation. It is just such a guarantee which section 100B, moved by my hon. friend, proposes to give. I have been in consultation with my hon. friend, the member in charge of the Bill, on the subject, and he thinks as I do, that this guarantee ought to be given, and he will propose to put it in the Bill as clause No. (7) at the end of section 37 in a slightly different form, viz., "devote to the improvement of the area newly added to Calcutta by this Act not less than Rs. 3,00,000 annually from the receipts of the revenue funds described in sections 102, 103, and 105 of this Act; provided that the instalments of interest and reserve fund payable on any capital sum expended under clauses (3), (4)

and (5) of this section, for the improvement of that area, shall be taken as part of the Rs. 3,00,000." It will probably be desirable that the Council should see this section and have an opportunity of considering it. Therefore my hon. friend will not ask you to vote upon it now. But in case you do not accept section 100B, or in case it is withdrawn, the provision to which I have referred will be brought forward after the Council have had an opportunity of considering it.

The HON. MR. MACAULAY said:—The precise figure in regard to the Calcutta Police charges of which the municipality will be relieved has been stated to be Rs. 2,80,000. I think that figure is taken from the figures of a year before additions were made on account of the mounted police. As a matter of fact in the current year the contribution payable by the Government is Rs. 1,02,720, and consequently the amount payable by the municipality is Rs. 3,08,158. In addition to that there is now the charge on account of the Suburbs, viz., Rs. 38,000. And I may mention that previously in 1883, Sir Rivers Thompson relieved the municipality of an equal sum of Rs. 38,000 on condition of its being devoted to the water-supply and other works of sanitation. The total sum is Rs 3,84,000 for the whole of Calcutta and the Suburbs. But as the portion of the Suburbs, which will not be included in the Calcutta Municipality, is, if I recollect rightly, in the proportion of 12 to 26, the amount of which the Government will relieve the area to be included in the Calcutta Municipality will be about Rs. 3,55,000 a year. In addition to that I may mention that this Bill will involve a relief to the Howrah Municipality of Rs. 11,000, which will be made available for expenditure on works of water-supply and sanitation.

The HON. SIR HENRY HARRISON said:—I would ask whether, after the statement which Your Honour has made, it will not be better to reserve the discussion till the section which you read out is proposed. It nearly covers the same ground, and the objections are not objections in principle, but the section prescribes a course which in practice it will be difficult to follow. It will be better if the hon. member sees the section proposed to be introduced, and then moves any amendment he thinks necessary to effect the further purposes which his section is intended to embrace. He wishes to make it compulsory by law for the Commissioners to spend on the added area no larger sum from the revenues of the town than the sum of which they are to be relieved from payment on account of the police charges. I think the practical difficulty of making that a legal obligation is so great that I could not undertake to support such a provision. The hon. member himself perceived the objection when he said that it was the principle he wished the Council to adopt, and that he was open to an alteration in the wording of the section. It seems to me that the objects it is intended to accomplish are beyond the possibility of being expressed in the imperative manner in which he desires to do so. I wish to know if the hon. member will accept the suggestion I have made.

The HON. BABU KALI NATH MITTER said:—If there is any chance to coming to an agreement on this point, I am quite willing to postpone the discussion on this matter. But the section which Your Honour has read out makes the Commissioners responsible for devoting a particular sum of money for the improvement of the added area. There it stops. It does not go further. It takes the restriction from my section, puts it in the Bill, and excludes all the privileges. I do not consider that a right course to adopt. If I am to be met on fair terms, if we can come to a compromise on this point, surely the English language will enable us to enunciate a principle which is just, and I do not think there will be any difficulty. Therefore, on that footing, I am ready to meet my hon. friend for the purpose of seeing whether we can come to a compromise.

HIS HONOUR THE PRESIDENT said:—I think the objects of the two sections are really incompatible. The object of the Hon. Babu Kali Nath Mitter is, that you should spend nothing on the new area which should come out of the pockets of the rate-payers residing in the old area. He says, if you will undertake to do that, we will undertake to give a guarantee that the police contribution shall be spent in that way and in no other. Speaking for myself, I think that to put in the Bill a section making it illegal for the Municipality to spend on the objects of the new area any portion of the funds

raised in the old area will make the whole thing unworkable. The Commissioners will have to keep separate accounts, and when you come to distribute the establishments, it will be almost impossible to make the distinction. And I may add that I think the Municipality is strong enough to distribute the funds in such a way as not to give the new area any advantage over the old. I think it will be advisable, as the hon. member has said, that we should leave the section as it stands.

The Hon. Babu Kali Nath Mitter said:—What Your Honour has recorded will be quite sufficient for my purpose. I am quite willing that the matter should stand over now. I understand from Your Honour now, that you affirm the principle that no portion of the funds of the town shall be applied to the improvement of the added area.

His Honour the President said:—What I distinctly refused to affirm is any legal restriction enforcing that principle.

The Hon. Dr. Gooroo Dass Banerjee said:—I wish to make one observation in the interests of the newly-added suburban area. It will be most unfair to it to tie up the hands of the new Municipality in this way. The amalgamation scheme has been accepted for the sole purpose of enabling the municipal improvement of the Suburbs to be undertaken, which could not be done if the Suburban Municipality had been left unaided by itself. If the proposed section is allowed to stand, there would really be no amalgamation at all; at best there would be federation of the two Municipalities. When the strong and the weak go in partnership, the strong must assist the weak; and if the hon. mover of the amendment is not agreeable to that, he should oppose the amalgamation altogether. With regard to the remark of my hon. friend, that the present insanitary condition of the Suburbs is the result of the neglect for years past, it should be remembered that it is really due not to any neglect of the Municipality, but to the want of funds. His own argument went to show that the insanitary condition of the Suburbs was due to want of funds and not to the want of proper supervision.

The Hon. Sir Henry Harrison said:—I need not say more than that, as Your Honour remarked, the proposal of the hon. member appears to me to be unworkable. Every salary paid to the Municipal officers and every payment made to the Municipality will have to be divided. My idea is that the town will not want any safeguard, as with a little care nothing will be more easy than for them to protect themselves. The body which will really want protection will be the Suburbs; and as they will be brought in from outside and engrafted on to a system in full working, it will be necessary that their representatives should look closely to see that they are getting their share.

The Hon. Babu Kali Nath Mitter said:—I do not possess the experience which the hon. member in charge of the Bill does, but to my mind it seems that there cannot be any difficulty in carrying out the sections I have proposed. Moneys are now being collected and duties totally distinct are being performed yet under the same authority. The water-rate, the lighting-rate, and the general rate are separate funds; yet there is no difficulty in working, and why should there be any further difficulty in working on the lines I have suggested. That portion of the objection I think is more imaginary than real. As to the remark that the Town Commissioners will be a stronger body, I do not see how that has anything to do with it. To me it seems possible that the Town Commissioners may wish to devote a portion of the funds of the Town for the benefit of the Suburbs. In the Statement of Objects and Reasons accompanying the Bill, the hon. member said that "care has been taken to protect the rate-payers of the Town against loss owing to the diversion of these rates and taxes to the benefit of the new area to be added to Calcutta." That being stated in the Statement of Objects and Reasons of the Bill, I cannot understand why there should be any opposition to inserting a section in the Bill affirming that principle.

The motions were then severally put and negatived.

The Hon. Babu Kali Nath Mitter withdrew the amendment of which he had given notice, that the following section be inserted after section 100:—

"100A. The Local Government shall contribute to the Municipal Fund the sum of two lakhs of rupees per annum to be devoted to the improvement of the area added to the town of Calcutta."

The Hon. Babu Kali Nath Mitter said in reply:—As the hon. member in charge of the Bill has referred to my opinion on this point on a previous occasion, I will meet him on his own ground and point out that what he now considers the most fundamental part of the Bill on which everything depends, was not contained in the Bill as submitted by him to the Council after having been agreed to by the Select Committee. There was no Halalkhor rate at all in that Bill, although the consolidated rate was to be found in it. The consolidation of the rates was adopted at my suggestion, but at that time there was no idea of introducing a Halalkhor rate. That idea dawned on the mind of my hon. friend after the Bill had been remitted to the Select Committee for various consideration of details. It was only when the Bill was being reconsidered on points of detail that this idea dawned on his mind. If it is such a fundamental principle, why did not my hon. friend propose it on the first reference of the Bill to a Select Committee? It passed the Select Committee and was laid before the Council without any such provision. There is one circumstance connected with my change of opinion to which my hon. friend refers, and it is this, that although there were 13 members on the Committee, and I was one of those who were in favour of a rate instead of levying fees, yet three of the most experienced Commissioners were against their imposition. I had then recently joined the Municipality, and opinions formed then were subject to change by the light of experience. I came across a very curious case where the owner of a very large tank called the Kurballah tank was called upon to pay a bill for night-soil service in respect of the tank, but when the matter came before the Commissioners, it was unanimously agreed that no fee could be charged unless the service was performed. The lighting-rate was justifiable because the value of houses enhanced owing to the lighting of streets. In the same way water-rate was paid because the supply of filtered water increased the value of property in the town. It is very remarkable that the very law under which the water-rate is levied makes a distinction in the rate levied in different localities. When the water-rate is levied at a maximum, houses situated in streets where pipes are not laid have to pay one per cent. less than houses on streets having water: in the one case the rate would be five per cent. and in the other six. Night-soil fees cannot come under the definition of a rate; it is only by a forced construction that you can impose a rate for house service. The rates at present payable by owners and occupiers are 7¾ and 9¼ per cent. respectively. If the past literature on the subject is studied, it will be obvious under what circumstances the owners of house property were made to contribute one-fourth of the water-rate. The question was decided by the casting vote of the President. Perhaps it is right that they should pay something, but one-fourth was an arbitrary proportion fixed by the Legislature. Under these circumstances, I submit it is only fair to a large number of persons in whose houses no service is performed that they should be relieved from paying this charge for house service. My hon. friend said that all persons must have their places of convenience. He forgets that persons who have shops have also houses to live in for which they pay fees for house service. Therefore I do not see how that argument advances my hon. friend's argument. I again submit that an inequitable rate should not be levied merely for the sake of the convenience of collection.

The motion was put to the vote and negatived.

The Hon. Sir Henry Harrison moved that in clause (*d*) of section 103 for the words "above purposes" the words "specified in clause (*c*)" be substituted.

He said:—This is a mere verbal amendment. The purposes of clauses (*a*) and (*b*) do not involve any expenditure, and I think the alteration in wording will be an improvement. It was suggested to me by the Secretary.

The motion was put to the vote and carried.

The Hon. Babu Kali Nath Mitter moved that section 117 be omitted.

He said:—Persons should not be made to pay for what they are not liable. Hut-owners are properly liable to pay this rate; but by this Bill the owners of the land on which the huts stand will be made to pay. This again is a question of convenience. Suppose the landholder is not able to realise the rate? Suppose the tenant absconds? The rates have to be paid in advance, while rents are paid to the landholder in arrear, and he cannot realise it in

advance. I think this provision is most arbitrary, and I cannot perceive any principle of justice in it. Precisely the same thing was attempted to be done on the last occasion. The late Hon. Kristo Das Pal took exception to it. The matter came up for discussion, and the hon. and learned Advocate-General then said:—"It appeared to him that the objections of the hon. mover of the amendment were really unanswerable. He had put it on the ground of principle, that the person to whom the hut belonged should be the person chargeable with the tax. The hon. member in charge of the Bill said that such a procedure would produce confusion. The Advocate-General did not think the Council should legislate simply for facilitating the collection of taxes, but they were also to see that the party from whom the tax came was the party from whom it should come." With that I will leave the matter in the hands of the Council; it is not possible to adduce stronger arguments. The result was that the amendment of the late Hon. Kristo Das Pal was carried.

The Hon. Sir Henry Harrison said:—I cannot accept this amendment, although I am aware that it had on a previous occasion the support of the learned Advocate-General. It is no new principle. It was in the Act of 1863 and in our present Act, but in an optional form, and it has not been acted upon, and therefore for some years we have collected from the smallest huts in the town. But that is not the principle elsewhere. Under the English law all the rates are paid by occupiers, so that you have much greater force of precedent. Nevertheless, in the case of small tenements, that rule is broken through. In the first instance it was done in the form of an appeal to the owners to compound for their tenants; but since the Act of 1869 was passed, the local authorities have the power of forcing the owners to compound, and an abatement of 15 per cent. is allowed from the amount of the rent for the cost of collection. It has been found necessary to make the owner compound. At present the tax gatherers have to go to all the smallest and poorest hut-owners to collect the rate, and afterwards the agency of the Warrant Department recovers the amount in addition to warrant fees. If any objection is taken, it ought to be to the amount allowed for collection, which is one-eighth of the total demand; and as a portion is payable by the landholder, it comes to about one-sixth of what he has to pay for others. It is a fair allowance, and it does not throw upon him any additional expense, because he will collect the rate by the same agency by which he collects his rent. The whole of the subordinate agency of the Municipality will be kept away from the doors of the poorest inhabitants, and the amount of saving in time and establishment, but above all the saving in vexation, harassment, and even worse than that, which must necessarily result from poor ignorant people being brought face to face with the tax-collectors, will be considerable. I consider this provision to be fair, it is fully covered by English precedent, and is expedient in an eminent degree in the interests both of the poor and of the Municipality itself.

The Hon. the Advocate-General said:—I wish to explain that the precedent which the hon. member in charge of the Bill relies upon does not apply in this case. In England all house property belongs to the landlord: in this country huts belong to the tenants. Everything put upon land in England belongs to the landlord: here huts belong to the tenant. And therefore, I submit, it is unfair to make the landholder pay for property of which he is not the owner.

The Hon. Babu Kali Nath Mitter said in reply:—In this country the tenant is allowed to remove his hut: in England the landlord gets the benefit of permanent fixtures. My hon. friend, the member in charge of the Bill, has given a glowing picture of the harassment to which poor hut-owners are subjected by the Municipal agency; but does not he foresee the harassment to which they will be subjected by the sircars and durwans of the landholders? The landlords will have to pay the rate even when the hut-owner absconds. My hon. friend has not attempted to meet my argument that if the tenant absconds, how is the landholder to recover the money which he has paid? Moreover, the harassment and annoyance to which the hut-owner is subject will be nothing less because the agency is changed.

The Hon. Babu Kali Nath Mitter moved that clause (*d*) of section 101 be omitted.

He said:—This refers to what is called the Halalkhor rate, and is the same as the fees levied under the present Act for removing night-soil. My objection to this being put under the head of rates is one of principle. Fees for service performed cannot be made the object of a rate. The basis of a rate is rent; unless there is rent there cannot be a rate. If that objection fails, there is the further objection that this rate will have to be paid by three classes of persons—persons who have got their water-closets unconnected, persons who have them connected, and persons who have no water-closets at all. It may seem a strange statement to make that there are persons in the town who have no water-closets at all, but in point of fact it is so. This is principally to be found in places of business where different rooms of a house are assessed separately for the purposes of the assessment of the Trades and Professions Tax, and if this clause of section 101 is passed, they will have to pay a rate of two per cent. At present such persons do not pay any night-soil fees; no service is performed, and justly they ought not to be called upon to pay. Then again connected houses do not pay, but it has been very properly pointed out that the drainage works have been constructed at considerable expense to carry away the sewage of the town, and it is only fair that connected houses should make some contribution towards the maintenance of the sewers. But that unconnected houses should pay at the same rate as connected houses is, I think, far from right. The owners of connected houses have undergone very large expenditure to have their houses connected, and therefore they get the benefit of the sewers, and though it will be just to make them pay something for the maintenance of the sewers, to make them pay in the same way as unconnected houses seems unreasonable. I cannot understand on what principle persons who have never hitherto paid night-soil fees, and for whom no service is performed, should have to pay simply for the convenience of the Corporation. The argument for the imposition of a rate is simply this, that there will be a saving of trouble and expense in preparing bills for house service, and for collecting the fees due. No doubt there is considerable force in that argument, but I do not for a moment admit that that inconvenience justifies the adoption of a proposal which will make persons liable for payment who have not now to pay anything. This liability will not be restricted to a few persons, but will fall on large numbers who are not now liable to pay anything. If this amendment is carried, I shall propose two sections to enable the Commissioners to levy fees from connected as well as unconnected houses, and so far as the revenue is concerned, the Corporation will not lose anything. It will only have the effect of applying a differential rate. To impose the same rate upon connected and unconnected houses will be totally unfair to the owners and occupiers of unconnected houses. It is also an objection that a large number of persons who have not to pay now will have to pay though no service is performed for their benefit.

The Hon. Sir Henry Harrison said:—If this amendment is accepted by the Council the results will be very embarrasing. This section is one of corner stones on which the whole scheme of taxation rests. I do not know what the views of other hon. members are; whether they are to any large extent in favour of the amendment. Therefore I shall have to set forth fully all the reasons why this section should be retained as it stands. This is essentially a part of the scheme for the consolidation of the rates, and if it is not accepted the difficulty will be great. The principle of it is that you may collect all the rates by one and the same bill and by one and the same establishment, and then fairly divide them between owners and occupiers. But the amendment will destroy both these arrangements; it will prevent one collection and a fair and equal division between owners and occupiers. At present, as pointed out by the Select Committee in their report, by the Trades' Association and by the Chamber of Commerce, the incidence of taxation is $9\frac{1}{4}$ per cent. upon owners and $7\frac{3}{4}$ upon occupiers, if you leave this occupiers' cess out of consideration. Fees for house service are entirely paid by occupiers; leaving them out, the proportion is as I have stated. But if you turn the house service fees into a rate, you have a maximum of $10\frac{1}{2}$ per cent. upon occupiers and the same upon

owners, and then the fairness of an equal division comes in. Besides this, very great importance must be attached to a diminution of the expense and vexation caused by the separate collection of fees of this kind. In all Municipal establishments, especially in England, the first idea which naturally finds favour is to adjust the payment of the burden of taxation to each particular case. In this way, as one measure after another was introduced for local taxation, it was adjusted in a different manner, and the result has been that with the legitimate object of adjusting taxation fairly, local taxation in England has reached a state of perfect chaos, and although we have not yet reached a similar state, the difficulty is very great indeed, and it arises from our endeavour to recover payment for house service only from houses in which house service is performed. Where you have 30 houses and 10 privies, it is very difficult to find out who ought to pay and who ought not. There is now not a Municipal discussion on a quarterly report in which the failure to work the cess successfully does not form the first and chief topic of comment. At least 10 per cent. of the bills are returned unrealised, on the ground that the persons who are required to pay are not liable. Local enquiries are made and lead to reports which are not accepted, and the whole subject gives more vexation and more trouble than any other matter connected with the administration of the Municipality. On the other hand, the trouble of making out the bills is extreme. The scale varies with every form of rent. In the suburbs there are 23 scales; in Calcutta there are 20, according to the rating of the house. Then even in the matter of exemptions it is extremely invidious. The exemptions in the Suburbs are tanks, waste land, gardens, and shops without privies. Why should shops having no privies be exempted? The persons who occupy the shops are subject to the ordinary laws of nature; and as a matter of fact the only principle is this, that the town is for human beings and the Municipality has to undertake the task of removing the sewage for all, whether by means of drainage for connected houses, house service for unconnected houses, or public latrines where there are no privies at all. The one thing above all others to which attention is necessary is to make the municipal system work smoothly. In Mr. Goschen's Committee in 1871, this was the one point upon which they were most unanimous, and they recommended one consolidated rate. I have by me a handbook on local taxation by Wright and Hobhouse, and they write:—"There are some alterations in the system of local taxation in which all parties are agreed; one of which is the consolidation of the rates." That is now an accepted principle. Again, it is not possible in Municipal administration to apply generally the principle of taxing according to benefits. See how you break through that principle in the matter of the equal payment of water-rates. Do large business houses, the Port Commissioners, the Mint, the High Court, get anything like the amount of water they pay for? You ought not on that principle to make temporary residents in the town pay anything on account that part of the municipal income which is levied for the repayment of debt. Permanent residents of course benefit by the construction of permanent works; temporary residents derive much less benefit from them. If you once allow yourself to be drawn into that argument and insist on separate collections and collections according to some ideal of the extent to which persons are benefited, you will land yourself in unmistakable difficulties and inconsistencies. When the present system was introduced the Commissioners appointed a Committee to consider the question of the house service fees, and my hon. friend, the mover of this amendment, was a member of that Committee. I am not going to twit him with changing his mind, but I may appeal to his former judgment on the subject. Out of 13 members of the Committee all but three reported that it would be better to have a rate in preference to a system of fees, and my hon. friend himself was one of the majority. I say that this is a section which cannot be struck out without upsetting the whole arrangement of the Bill. It will remove from the poor a burden which they now in some cases pay to the possible point of 400 per cent. Therefore you see how very hardly the present system presses on the holders of small tenements, and it will be a very great relief to them if the Council accept the provision in the Bill which will have the effect of converting the house-service fees into a rate.

The motion being put the Council divided :—

Ayes 5.	*Noes* 8.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
The Hon. the Advocate-General.	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The Hon. Sir Henry Harrison moved that, for the first paragraph of section 117, the following be substituted :—

"The entire consolidated rate imposed upon bustee land and the huts built thereon shall, after deducting therefrom a sum equal to one-eighth of such rates, be paid by the owner of such land. The sum deducted shall be retained by the owner of the land as a set-off against the expenses which may be incurred in collecting the portion of the rate recoverable from the occupiers of the land, or the owners or occupiers of huts built thereon, under the provisions of the next succeeding section, and as a commutation of all refunds in respect of huts which are vacant, or which may be removed or destroyed during the continuance of the period for which the rate is imposed."

He said :—It is not intended to make any alteration in substance in this section, but it was considered by the learned Secretary to be an improvement in the wording.

The motion was put to the vote and carried.

The Hon. Sir Henry Harrison moved that, in line 1 of section 118, for the words "in such cases" the words "whenever a rate is imposed on bustee lands" be substituted.

The motion was put to the vote and carried.

The Hon. Sir Henry Harrison moved that, in line 7 of section 120, for the words "duly entered" the words "registered provisionally" be substituted.

He said :—This section is a reproduction of section 103A of the present amending Act, with alterations which are a little more than verbal. If the section had been acted upon, it might have led to a very serious abuse. If a person's name is registered as owner, it may assist him very much in borrowing money on that property. Now that we have a system of provisional registration, it is better to say that it shall be *provisionally registered* so as to be subject to all the safeguards of that form of registration.

The motion was put to the vote and carried.

The Hon. Dr. Gooroo Dass Banerjee moved that, for the first paragraph of section 122, the following be substituted :—

"For the purpose of assessment under this Act, the annual value of land and the annual value of any house shall be the gross annual rent at which such land or house might reasonably be expected to let from year to year, less, in the case of a house, an allowance of ten per cent. for the cost of repairs, and for all other expenses necessary to maintain the house in a state to command such gross rent."

He said :—The object of this amendment is to leave out that portion of the section in the Bill which provides a special mode of valuation for residential and other houses not intended for letting purposes, and to fix one general mode of valuation for all lands and houses. That is the law at present, and is the only method which can be supported on principle; and so far as I can discover from the report of the Select Committee, no case has been made out for the proposed alteration. The only grounds upon which the Select Committee propose to introduce the change are two, namely, difficulty of assessment under the present law, and its inequitableness. With regard to the first ground of objection, I think the difficulty is not peculiar to Calcutta. Similar difficulties arise in England in similar cases as Sir Richard Garth points out in the case of *Nundo Lal Bose* v. *The Corporation of Calcutta* (see I. L. R. 11 Calc. p. 281). I may further point out that the mode of assessment proposed to be substituted in this Bill also involves a difficulty, namely, that of ascertaining the amount of deduction for deterioration, which is certainly not less, and may often be greater, than the difficulty which is sought to be avoided. In the second place let us see how far the other objection is well grounded. It is said that if we are to assess houses built for purposes of residence on their expected letting value, the assessment may be far

below what it ought to be. But on what principle? The majority of the Select Committee say on this principle, that we should adopt 5 per cent. on the cost price as the letting value. Nobody denies that that will give a valuation considerably above the expected letting value. But to infer thence that the existing assessment is too low is to beg the whole question. If 5 per cent. on the cost price is the proper basis of assessment, then no doubt anything less than that would be unjustly low. But is there anything in reason which supports that basis? The report of the Select Committee refers to the great English political economist Mill, and points out that the cost price of a house may be fairly adopted as the basis of taxation, because it indicates the extent of the owner's means, and therefore it fairly indicates his capability of paying the tax. With reference to that argument, I would beg to point out that that is not the case in this country, and for a very simple reason. We all know that many a man builds a large house to live in because he has a large family consisting of his own children and those of his father and grandfather, and secondly, because there is a prevailing sentiment that one ought to have a house which he can call his own to live in; and therefore to tax a person on the basis of the capital he has invested in building the house will, in this country, be not taxing him according to his means, but taxing him on account of his feeling and sentiment. Another point I will draw attention to. In the report of the Select Committee an English decision is referred to:—

"In the case of such houses in England as are not built to let to tenants from year to year, the rule has been judicially declared to be that 'a hypothetical tenant must be assumed, and the terms of such tenancy are not difficult to be conceived; the occupying tenant must be assumed to pay *adequate remuneration to a contractor for land and fixed capital vested therein*, and the local rateable value would be such a sum as would pay the rent of the land and profit on the fixed capital therein.'"

I have not been able to find this case in the reports, but the hon. member in charge of the Bill has handed me the book from which he made the quotation, and I find that the case is not the case of a residential house but of a manufactory. In the case of a residential house, which is also referred to in that book, the basis of assessment is said to be a percentage not on the capital invested, but on the market value which the property will fetch. That one can understand, but that is very different from the provision in the Bill. A man may build a house which suits his convenience more than the convenience of another man, and he may invest more money in building it than another man. But if he sells the house, what he would get would not be the cost price, or the cost price less a deduction for deterioration, but it will be something which would be quite different from and much less than the sum of money invested in building the house. So that the standard on which the section is based is quite an arbitrary standard, and therefore I submit it ought not to be allowed to stand. If this amendment does not commend itself to the Council, I propose as an alternative the substitution of "4" for "5" in line 14 of section 122, the object of which is to bring the valuation nearer to the proper standard.

The Hon. Sir Henry Harrison said:—I am very much disposed to agree with the concluding remarks of the hon. member. I would consider it a considerable improvement if "market value" is substituted for "cost price." So far, if the hon. member will agree to that, I shall be very glad to make the alteration.

The Hon. Mr. Allen said:—The principle of this section has been attacked as if it was perfectly unknown, but already it is the law in all mofussil municipalities that where property or houses have been erected not for purposes of letting, a certain percentage should be struck on the cost price as correctly as can be ascertained. It was found necessary to introduce this principle, because while mills and structures of that character were over-assessed, houses in which Municipal Commissioners and their friends resided were as much under-assessed. From the report of the Chairman of the Corporation it would appear that something of the same kind is not unknown in Calcutta, and that on houses occupied in the northern part of the town, hitherto the average assessable value has been about 2 per cent. or less of the cost of construction; while in regard to all houses in the southern part of the town which are built for letting purposes, there is not a house which is let for less than 6 or 7 per cent. on the cost, and the full rent is taken as assessable value of all such. I have

heard of houses being built with money borrowed at 7 per cent., and the Hon. Mr. Irving took the trouble to ascertain from a partner of Messrs. Mackintosh, Burn and Company, who reported that it is a thing unknown in Calcutta to expect less than 6 per cent. as a return for the money invested in house property. This being the case, while the southern part of Calcutta is assessed at the full rent, that is 6 or 7 per cent. on the outlay, a totally different principle of assessment is in force for the northern part of the town. If the amendment now proposed is carried, the only way to adjust the incidence of taxation between the north and south of the town will be by deducting one-third of the rent paid in the southern portion and taking two-thirds as the assessable value. It will to that extent be equitable. But possibly the total receipts of taxation would fall so far short that a higher rate would have to be struck. The market value of a house is supposed to be a proper indication of the value rather than the cost of construction. What is the market value of that for which there is no market? The first difficulty is that the houses in the northern portion of the town are not built for sale, and they are not in the market. Market value implies that somebody should be willing to sell, and that more than one person should be willing to buy. The hon. mover of amendment talks about a man building a house to suit his own taste which differs so much from the taste of everybody else that he sinks a greater sum of money in the construction than any other person would be willing to give. If he is a poor man, the probability is that he will not sink money in that way. It is a novelty to hear that natives of this country are willing to accept 4 per cent. on money in house property. In other matters even 6 per cent. will not suit them. If a man does so sink money, the money sunk represents his stake or interest within the municipality, and it is precisely on the stake each member so has that municipal tax is properly levied. The average rate they expect for their money is far beyond what Europeans expect; far above 6 per cent. The only way to effect an equitable assessment is either to deduct 33 per cent. of the rent of houses in the southern part of the town, or to take a percentage on the cost price where houses are built for the purpose of residence and not for the purpose of letting.

The HON. BABU KALI NATH MITTER moved that, for section 122, the following be substituted:—

"The annual value of any house or land for the purposes of assessment shall—

(a) in cases where the gross annual rent at which such house or land might reasonably be expected to let from year to year can be ascertained, be such gross annual rent, except that, in case of a house, an allowance of ten per cent. shall be made for the cost of repairs and for all other expenses necessary to maintain such house in a state to command such gross rent;

(b) in cases where such gross annual rent cannot be ascertained, be four per cent. on the sum obtained by adding the estimated cost of building, less a reasonable amount to be deducted on account of depreciation (if any) to the estimated value of the land valued with the house as part of the same premises:

Provided that in making the assessment under clause (b) the estimated value of ornamental works in any house or building shall be excluded; and provided further that no assessment under the said clause shall be valid unless sanctioned by the Commissioners in meeting."

He said:—There are a few houses in Calcutta in regard to which perhaps it may be difficult to obtain the letting value. To meet these few exceptional cases I propose to frame the section in this manner. In cases where the lettable value can be ascertained, the assessment should be the rent less a certain deduction for repairs; in cases where the lettable value cannot be ascertained, it would be a percentage on the cost price. The Select Committee in their report refer to the report made by the Committee of which Mr. Goschen was the Chairman. There it is pointed out that—

"When it appears to the assessing authority that for special reasons a building cannot be fairly valued according to the annual rent which a tenant might reasonably be expected to pay for it, it shall be valued in the following manner:—

"The gross value of any such building shall be a sum equal to 4 *per cent.* on the capital sum which a purchaser might justly be expected to give for such a building in its actual state and existing mode of occupation."

Therefore, as far as this report is concerned, it clearly points out the distinction. In cases where the lettable value cannot for any special reason be ascertained, then we must take a percentage on the market value. I wish to adopt that principle, and have therefore framed the section in this manner. In the first place objection is taken to the amendment of

my hon. friend on the ground that in the mofussil a percentage on the value is allowed by law. But my hon. friend forgets that the value of land in the mofussil is very different from Calcutta. Here you have to pay large sums of money to purchase land. A cottah of land has been known to sell for Rs. 5,000. In the mofussil in the best of position it will perhaps be Rs. 50. Therefore the mode of valuation allowed in the mofussil does not justify it being introduced into Calcutta. It was said by the hon. member opposite (Mr. Allen) that a person who has money to spend after his house should not grumble to pay Municipal taxation. Take the case of a person who has embellished his house with guilded corners and ornamental works, would it be just because he has spent money in that way to take the annual value as a percentage on the cost price? To my mind such a proposal should not be entertained for a moment. Rent is the basis of rating; before you can tax property, that property must be capable of producing rent. It has been pointed out that there are some cases in which it is not possible to fix the rent of a house: in those cases perhaps an exception is needed. The Select Committee referred to certain observations of Mr. Mill, but those observations are inapplicable to Calcutta, because the rate he speaks of is paid by the occupier and not by the owner. It shows that the rent which a man is able to pay for a house to live in, is a fair guide to go upon; but it is different when the rate is to be paid by the landlord. A landholder sinks his money with the view of getting a fair return, and surely the rent is to be taken into consideration. The hon. member in charge of the Bill will correct me in what I now say I am mistaken. When this question was considered for the first time in Select Committee, he referred to those exceptional cases showing that justice was not done because of this hard-and-fast rule of ascertaining the lettable value, and on that the section was framed as it stood in the last Bill. But when the question came before the Select Committee on the second occasion I understood the hon. member to say that in the majority of cases, in the case of almost all residential houses, the assessment should be based on a percentage of the cost. While I agree that there are some exceptional cases which ought as far as possible to be dealt with on that principle, I think the proposal to assess all residential houses at 5 per cent. on the cost price would press unduly upon owners. In the first place who is to decide the market value of the property? The assessor fixes one value; the owner puts it at a different figure. From the amendment to be moved by the hon. member in charge he seems to wish that there should be no appeal from the decision of the Commissioners. I myself am not in favour of allowing an appeal to the Presidency Small Cause Court. The Judges of that Court not having to decide matters relating to land have no experience as to the value of real property, and therefore they will find extreme difficulty in determining the market value. There will besides be the further disadvantage and inconvenience of the parties having to dance attendance for perhaps six months before a case is decided. I believe I am perfectly correct in saying that although recourse is now allowed to the Small Cause Court by way of appeal from the assessment of the assessor, there has hardly been a single appeal to that tribunal. People avail themselves largely of the right of appeal to the Commissioners, but they do not resort to the Small Cause Court. What is the reason for that preference of one tribunal to another? It is this, because in the one case the Judges are themselves mostly land-owners and are fair judges of what the assessment should be, and in the other there is no such experience, and moreover there is the harassment and annoyance of a case hanging on for months. I admit that the amendment of the hon. member in charge is an improvement on the section in the Bill, but not to the extent desirable. This is a question on which the rate-payers of the town are very much interested, and I hope therefore that on this and all other matters of importance due consideration will be given. The British Indian Association is composed of men of property in Calcutta, and they have pointed out that it is only in exceptional cases that the assessment should be based on the value, but that in such cases it should not exceed four per cent. My hon. friend the last speaker believed that the natives of Calcutta would not invest money at 4 per cent. I think he is labouring under some misapprehension on that point. A very large proportion of the Government securities is held by the natives of Calcutta, and that is a strong argument that they are satisfied with that investment. From my own experience I know that house-owners now lend out money on mortgage of house property at from 6 to 8 per cent., whereas the rate of interest formerly was 12 per cent. Hitherto no

difficulty was found in the assessment of property in Calcutta till we came to the memorable case of Nundolall Bose I know of no other case which was appealed to the High Court. There was one other case appealed to the Small Cause Court from an over-assessment of the Justices. Besides these two cases I am not aware of any other where, as far as the Commissioners are concerned, any difference has arisen between them and the rate-payers. The case of Nundolall Bose, which gave rise to the proposed alteration in the mode of assessment, shows that in that case no attempt was made to ascertain the lettable value of the property, but the assessor professedly took a certain percentage on the market value. Nundolall Bose appealed to the Commissioners. A Bench of five Commissioners sat. There was no denial that the assessment was made irrespective of the lettable value and solely on a percentage of the value of the property. The Commissioners made a slight reduction, which did not satisfy the appellant, and he applied to the High Court for a rule of *certiorari*. The matter first came before Mr. Justice Pigot, who was of opinion that the Commissioners were not justified in making the assessment in the way they did; but that they had acted within their jurisdiction, and the High Court could not interfere That decision was appealed against, and the appeal was heard by the then Chief Justice, Sir Richard Garth, and Mr. Justice Wilson. There was nothing before those Judges to show that there was any attempt to fix the assessment on the lettable value of the property, and the statement made, that the assessment had been reduced out of regard to the Pleader who acted for Babu Nundo Lall Bose, was not challenged in any way. The Appeal Court held that this was not a question of jurisdiction but of a mistake made by the Commissioners in fixing the assessment on a principle not warranted by the law, and the rule was made absolute. I do not think there is anything in that case to justify a change in the principle of assessment hitherto followed, and to make the value of property the basis of assessment. It is contrary to all the principles of rating in England so far as I am aware. The case referred to in the report of the Select Committee is in respect of a manufactory. It is a case in which Mr. Justice Whiteman said there should be a hypothetical tenant. Probably in the case of Nundolall Bose, if it could have been shown that the lettable value could not be ascertained, and that it was necessary to presume a hypothetical tenant, the result might have been different; but the assessor simply stated that he took the percentage which he considered fair and reasonable ($2\frac{2}{3}$ per cent.) on the value of the property. I submit it is quite evident from the ruling in this case that the law as it at present stands does not warrant the value of the property being taken as the basis of assessment. What has happened to justify the proposed change in the law? Simply this case of Nundolall Bose. If my amendment is adopted, the ordinary method of assessment will be the lettable value. Where that cannot be ascertained, a percentage on the value would be taken; but then there would be this safeguard, that it would need to be sanctioned by the Commissioners. The cases in which this mode of assessment would be resorted to would be exceptional cases where the lettable value cannot be ascertained, but the ordinary mode of assessment would be the lettable value.

The Hon Sir Henry Harrison said:—I would suggest that the Council should adjourn at this stage. This is, I think, the most difficult section in the Bill. It is beset with difficulties, and it is one to which I have given more attention than to any other part of the Bill. Several principles of extreme difficulty are involved in it; and before I proceed to propose the amendment of which I have given notice, I would ask the President to adjourn the Council.

His Honour the President said:—I am rather unwilling to cut short this discussion in the middle of it; but if the hon. member in charge of the Bill thinks it expedient to take time to consider the suggestions which have been made before making his reply, I think it would be wrong in me to refuse an adjournment.

The further consideration of items Nos. (15), (16), and (17), and of the other clauses of the Bill, was postponed till the next sitting of the Council.

The Council was adjourned to Saturday, the 14th April, 1888.

H. A. D. PHILLIPS,

For Asstt. Secy. to the Govt. of Bengal,
Legislative Department.

CALCUTTA;
The 1st May 1888.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

The Council met at the Council Chamber on Saturday, the 14th April 1888, at 11 A.M.

Present:

The HON. SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding*.
The HON. G. C. PAUL, C.I.E., *Advocate-General.*
The HON. H. J. REYNOLDS, C.S.I.
The HON. C. P. L. MACAULAY, C.I.E.
The HON. T. T. ALLEN.
The HON. SIR HENRY HARRISON, KT.
The HON. SIR ALFRED CROFT, K.C.I.E.
The HON. MOULVIE ABDUL JUBBAR.
The HON. BABU KALI NATH MITTER.
The HON. DR. MAHENDRA LAL SIRCAR, C.I.E.
The HON. C. H. MOORE.
The HON. DR. GOOROO DASS BANERJEE.
The HON. H. PRATT.

CALCUTTA AND SUBURBAN MUNICIPALITIES AMALGAMATION BILL.

The HON. SIR HENRY HARRISON moved that the clauses of the Bill to consolidate and amend the Law relating to the municipal affairs of the Town and Suburbs of Calcutta, as further amended, be further considered for settlement in the form recommended by the Select Committee.

The motion was put to the vote and carried.

[The adjourned debate on section 122 was resumed.]

The HON. SIR HENRY HARRISON said:—The amendment which stands in my name has been wrongly shown in the notice paper. I gave notice of two amendments in respect to this section, each distinct from the other, the first to substitute for the words 'the estimated cost of the building' 'the estimated present cost of building the house.'

The other to add the words—

"When a house is occupied by the owner under such exceptional circumstances as renders a valuation of 5 per cent of the cost of building, less depreciation, excessive, a lower percentage may be taken."

It seems to me that this provision stands on quite a different footing, and therefore I put it separately, although it may be discussed with the other amendment. If both are put as one amendment, they would stand or fall together; but if put separately this branch of the amendment might be adopted, although the first portion might be rejected. Having Your Honour's permission to put my amendments in this way, I shall now proceed to discuss them. As I stated to the Council at the last meeting, my reason for asking for the adjournment of this discussion was that the question is the most difficult and most important which we have to face. Most important because it will be easy to show, and in fact it has been shown by my hon. friend Mr. Allen, that there is an abuse prevalent in the existing system which renders the whole incidence of taxation in the town unequal—an abuse which goes to the root of the whole equity of our municipal taxation. If that is an opinion which I can conclusively establish, then a case is made out for correcting it, and it is not difficult to point out to a certain extent the direction in which amendment should take place. But as to the exact wording which will best meet the case, there is considerable difficulty, and it is a matter on which I may fairly appeal to the assistance of the whole Council to help me in solving the difficulty in the best manner possible. A few words I ought to say in the first instance as regards the serious abuse which it seems to me indispensable to correct in the new Bill. It is this. Obviously fair and equal valuation lies at the root of all municipal rating. If one house is estimated at half its proper value and another at its full

value, it is perfectly evident that the same injustice is done as if you put a rate of 5 per cent. upon one and of 10 per cent. upon the other. If it is a fact that a large portion of Calcutta is being valued at more rather than less than double of the other, it means that more rather than less than double taxation has been levied from one class of rate-payers as compared with the other, and it is difficult to conceive any abuse which more urgently requires remedy than this. It is not so much a case as between the south and the north of the town, as between different classes of the community. The class which has benefited, I think unjustly, is the class living in their own houses. The class which has suffered has been first and chiefly the business community; that portion of the community which does the work of Calcutta, and which most contributes to its wealth and greatness, and in this class must be included public offices and buildings. In the second category are all those classes of the community who live in tenanted houses. These are the two classes who suffer; while the class who are living in their own houses have had an unfair advantage. If that is the case, the first point to notice is that it is exactly the opposite of the distinction which should be made, if any. Business premises, according to political economists, ought not to be taxed at all, and on the principle of this tax, as pointed out by Mill, whatever portion of a house is occupied for business purposes ought to be exempted altogether. That obviously would not be practicable in Calcutta. Still this much is reasonable, that certainly the business parts of the town ought not to be selected for exceptional taxation. I will not contend that any immunity ought to be given; but if any immunity ought to be given, then the only sound principle of justice in municipal taxation is that that portion of a property which is devoted to reproductive purposes—business purposes—ought rather to be exempted. Then there is another principle why business premises should not be too heavily taxed. For water-supply and some other purposes, they pay much more than the benefits they receive. There is no difficulty in showing, in fact I have already shown, that a large portion of the business part of the town undoubtedly pays more for water than the advantage they get in return. I am merely pointing out that if there is to be any distinction, if all classes are not to be put on the same footing, the portion of the community engaged in business is the one which ought rather to be treated with consideration.

Next as regards tenanted houses, their occupiers also may put in a claim for indulgence. Certainly, as regards the water-supply, they get their share; but a large portion of the revenue of the town goes to making improvements or paying interest for improvements. Suppose a great improvement is made If the money is laid out wisely, property rises in value. So long as there is a lease the tenant enjoys the benefit, but when the lease expires, the result is that the rent is raised. It is therefore a well recognised principle that, in so far as taxation is devoted to improvements, and not to ordinary current expenditure, the taxing of occupiers who are tenants, and occupiers who are owners, on the same basis, is not equitable. I do not like to take up the time of the Council by reading long extracts; but I may say that this is very clearly pointed out in the last pages of Fawcett's Political Economy. Therefore I say that the two classes now worst off are those which, if there should be any immunity at all, ought rather to be favoured. But so far from being favoured they have not merely been over-assessed, but another class has been under-assessed. I say they have been over-assessed, because in making a valuation you should on principle allow such deductions as will enable the property to be kept in such a condition as to continue to command the full letting value. Suppose Rs. 3,000 is the annual letting value, but, to keep the property in a state to obtain that value, Rs. 500 have to be spent annually for repairs: you ought to deduct this Rs. 500 for repairs before fixing the fair letting value. That is never done in Calcutta, and the objection has been dismissed with the remark that taking the assessment all round it comes to the same thing in the long run. But in this instance it is not an all round deduction. Houses occupied by owners have been assessed on a totally different principle. They have not been assessed much below their value: therefore the classes I speak of—persons occupying business premises and tenanted houses—have been assessed on the gross rent realised, and they have consequently been over-assessed to the extent of 10 or 20 per cent., while

others occupying their own houses have been assessed at less than the true value. My hon. friend Babu Kali Nath Mitter has said that I am unnecessarily stirring up dirty water, that hitherto things have worked well, and he does not see why I need have raised the question. But I maintain that I should have been absolutely wanting in my duty, when my attention was drawn to the unfairness, if I had not laid before the Select Committee proposals for remedying it.

Assuming that this inequality of assessment does exist, and that the injustice should be redressed, the question is how should it be done? The first question is, to what is it due? I have taken a great deal of trouble to discuss the matter with several Commissioners and the officers of the Corporation, and, so far as the state of facts is concerned, I have found no real dispute but I have found many persons ready and eager to justify the system. I have therefore pressed them to disclose the reasons for favouring one class of the community. I give the best reasons I have heard. One very intelligent advocate argued that when the owner lets his house he gets an income, and therefore he feels that he ought to pay a rate on that income as a deduction from his profits; he receives Rs. 1,000 and pays Rs. 100. But when he gets no profit, and is living in his own house, he feels it particularly hard that he should have to pay anything. It is not difficult to understand the sentiment; but how about those who have to pay Rs. 1,000 to occupy a house? If the person who makes no income from his house feels the payment of rates a grievance, what must the person feel who has to pay rent and rates besides? If the owner who gets no return feels it a grievance that he has to pay an equal rate of taxation, ought not the person who pays rent to feel that he ought to have a portion of the rent returned to him? Arguments of this kind cannot help the matter. There is, I am aware, a strong sentiment that my proposal is extremely unjust. It is looked upon as a grievous act of oppression, reflecting the greatest possible discredit on me and on some hon. members of the Council who adopt my proposal; but surely an accusation such as this must rest on something better than the sentiments of those whose pockets it touches, it must be shewn to have some reasonable foundation.

Another argument advanced is this, that a gentleman, when he builds a house to dwell in, looks upon it as his jewels or his ornaments, and he feels it as great a hardship to be taxed for that house as if he is taxed on his diamonds and his pearls. Lastly, we have the objection which is embodied in the amendment before the Council, proposed by my hon friend Babu Kali Nath Mitter, which says: "Provided that in making the assessment under clause (*b*) the estimated value of ornamental works in any house or building should be excluded." That in fact he ought not to pay anything more than before—for the brick and mortar. Is that reasonable? If a person spends a certain sum to ornament his house, plainly he ought to pay on that sum just as much as he ought to pay on any outlay for additional buildings.

The next point is what are the causes of this anomaly? One cause is the system of procedure in force for the last 12 years; the other is, to the wording of the substantive law. As regards the system of procedure, the assessor fixes the valuation. On his doing so, if the owner is dissatisfied, he has the option of appealing either to the Small Cause Court or to a bench of three Commissioners from which the executive officers of the Corporation are excluded. As a matter of fact, the second of these modes of appeal is invariably adopted. Within my experience I have known, I suppose, of 200 or 300 appeals against assessments, and I have known of only one appeal to the Small Cause Court. The appeal to a bench of three Commissioners is almost invariably followed. In the law of 1863, and in the revised law of 1866, the rule was that the appeal should be heard by three Justices, the Vice-Chairman being usually one. But on the motion of the late Hon. Kristo Das Pal in 1876, objection was taken to any executive officer of the Corporation sitting on Assessment Benches; and that objection was allowed, and the result is that appeals are now heard by three Commissioners. We have had various systems in the selection of the three Commissioners to hear such appeals. Under the latest system the selection has been by lot amongst those who offer to sit on appeal benches, volunteers being invited for the purpose. To this appeal, which is made once a year generally rather more than half the Commissioners respond. The European

Commissioners, as a rule abstain. It is true it is their own fault, but they consider they have not the time to spare. The Assessment Committee thus consists of about 36 Native Commissioners and about 4 European Commissioners; and I only know of 3 Europeans who have ever sat on appeal benches during the last six or seven years. Nearly all these Commissioners are owners residing in their own houses. I do not say that this has been designed; it comes about by natural drift; they are most interested, therefore they put their names down, and they naturally have sympathy with their own class and look kindly on any interpretation of the law which tells in their own favour. They have adopted one standard for houses occupied by owners and a totally different one for houses occupied by tenants or for business purposes, or for large Government buildings. The Government officers have accepted the assessments, and Government buildings have on the whole been assessed at a fair valuation.

Now, as regards this lenient interpretation of the law, I ask the Council to bear with me while I explain what the law is. The present law of assessment in England dates from the time of William the Fourth. Before that time it was in great confusion. At that time an Act was passed which has maintained its ground ever since. It prescribes that the valuation is to be the rent at which the tenement might reasonably be expected to let from year to year, free of all usual tenant's rates and taxes, and deducting therefrom the average annual cost of repairs, insurance, and other expenses, if any, necessary to keep the estate in a state to command such rent. The words adopted by the Indian Legislature are "the rent at which it may be reasonably expected to let from year to year." That is in the existing Act and in the present Bill, and the principle has been everywhere accepted as the best. Although in England an amendment of the law is now considered necessary by all authorities, nevertheless the law has worked fairly well there owing to the liberal interpretation which has been put by the Courts on the words of the Act. The difficulty which has to be faced, is how to apply it to houses which are not ordinarily let, such as large manufactories, light-houses, hospitals, and, above all, large family mansions. The case of large family mansions soon came up in England, and the very same abuse resulted there for some time. Instead of being assessed at anything like their proper value, such mansions were assessed at a mere song, on the ground that no one would be likely to take houses like those on rent from year to year. On this subject Mr. Mill says:—

"The public were justly scandalised on learning that residences like Chatsworth or Belvoir were only rated at the imaginary rate of perhaps 200 a year, under the pretext that owing to the great expense of keeping them up they could not be let for more, probably even they could not be let for that, and if the argument were a fair one they ought not to have been taxed at all. But a house tax is not intended as a tax on incomes derived from houses, but on expenditure incurred for them. The thing which it is wished to ascertain is what a house costs to the person who lives in it, not what it would bring in if let to some one else. When the occupier is not the owner and does not hold on a repairing lease, the rent he pays is the measure of what the house costs him; but when he is the owner some other measure must be sought. A valuation should be made of the house, not what it would sell for, but what it would cost for rebuilding it, and the valuation might be corrected by an allowance for what it had lost in value by time, or gained by repairs and improvements."

Does not every word of this argument thoroughly bear out and justify the changes proposed in this section?

But how has the law been interpreted in England? I have here a manual on assessments by Lumley published in, and I will read to you the summary of decisions given by the Superior Courts in the cases of manufactories, light-houses, family residences, and hospitals (Here the Hon. Member read from the manual).

What can be more reasonable than the spirit of these decisions? The determination which the Courts manifest not to allow the letting test to be used as a handle for under-assessment, on the plea of no tenants coming forward to offer more. They invariably insist that either the cost of building with ground rent, or the market value, must be taken to determine the rent which a hypothetical tenant should pay.

How, on the other hand, has the law been applied in Calcutta? I am not referring to the decision of the High Court in the case of Nundolall Bose, partly because it has very little to do with the matter, because the decision in

that case is not constructive, but merely reverses the decision of the Appellate Bench. What is the principle on which our assessor has proceeded under the guidance of these Appellate Benches? I have questioned him very closely on the point, and he thinks that in general the Assessment Benches do not proceed on any principle at all. Just consider what is likely to be the principle of action of three gentlemen, taken haphazard, who have never sat before together, and who have forty appeals to decide in the course of an afternoon. But still they are clearly in agreement on one point, that if any one desires to let his family residence, he is not likely to get any one to rent it at its full value. There is no demand for such houses, and he will perhaps have to wait a long time before he can get a tenant at all; when he gets one, a small sum will be offered. Hence on that principle they value such houses just as was done in the case of Chatsworth and Belvoir at very small amounts. Now I put it to the Council that this is not a proper interpretation of the law. I believe it to be erroneous and contrary to the spirit of the interpretation in England. When a house is built for occupation by the owner, and the owner is the tenant himself, that house has found its tenant, and you have not got to go into the highways and byeways to find another tenant; but to ask what is the tenancy worth to him, and not to any imaginary successor. He builds it to suit his own taste and family, and has no intention of letting it. Now so much do the owners of such houses value the tenancy that far from this principle leading to too low an assessment, it would, if correctly applied, lead to over valuation. It would take two or three times the fair value of the house to tempt them to give it up. Of course that is partly due to the sentiment of attachment to ancestral property, and, above all, to the desire to live in their own houses. It is said that it is not fair to make a man pay for his sentiment. This may be admitted : but it remains that if the true test, the value of the tenancy to the actual tenants, were looked to, they would have to pay much more rather than less than others; and if the present law were applied by an unsympathetic instead of a sympathetic tribunal, they would soon come to their senses and see the justice of applying some other test.

I consider therefore that I have fully shewn, looking to the very different way in which the present words of the law may be interpreted, the necessity for changing that wording. The same difficulty was found by Mr. Goschen's Parliamentary Committee; and in the Bill, which he brought before Parliament, he thought it necessary to add some sections about taking the capital sum paid for the house. Opinion oscillates between two different tests. The first is to take "the capital sum which would be paid for the house," which is the same virtually as the market value, or should be so. The second,—the cost of building, which in several decisions is said to be the best and the proper test, or, as Mill has it, the present cost of the building, allowing for depreciation. When my hon. friend Dr. Gooroo Dass Banerjee proposed at the last meeting the words "market value," I was disposed to accept the suggestion, because it is, on the whole, a question of equity, as people would not be willing to under-value their own property. On the other hand, there is an objection to use the words "cost of building," because it is not quite clear whether it should be the original or the present cost of the building. The original cost is not a fair test. The cost of building might have been much less 30 or 40 years ago; the true test is the cost of building now, not then. On the other hand, as regards "market value," I have been dissuaded from accepting this test by my hon. friends the learned Advocate-General and the Legal Remembrancer; they consider the expression "market value" to be fraught with far more embarrassment, and prefer taking the present cost of building the house, making due allowance for deterioration. After full consideration I have come to the conclusion that it is best to be advised by experts in a matter of this kind, and I therefore submit that the wording should be "estimated present cost of building the house, less an allowance for depreciation on account of deterioration."

Then as regards percentage, the Committee at first thought 6 per cent., or nearly 16 years' purchase, to be a fair assessment, and that is usually taken by the Courts in the valuation of property; but the remonstrances to that were so strong, that by a narrow majority we thought it better to reduce it to 5 per cent. Less than 5 per cent. I cannot say is fair. I cannot think that

in ordinary circumstances 5 per cent. on the cost would be too high an assessment, looking at the rate of interest. At the same time I have, after giving very careful consideration to the question, thought it necessary in a subsequent amendment, to which I shall refer now, to add these words: "When a house is occupied by the owner under such exceptional circumstances as renders a valuation of 5 per cent. of the cost of building, less depreciation, excessive, a lower percentage may be taken." I would not propose this if the appeal is to be left as heretofore to the haphazard tribunal of three men to-day and a different set of three men to-morrow, because I am afraid the exceptions, as in the Latin grammar, will be the rule. But I hope in future to have a fair-minded and impartial officer to decide objections to assessments under an appeal to a judicial tribunal, so that it may be shorn of the objections which I would otherwise admit. I shall now explain the necessity for this clause. A person builds a house for his own use and to suit his tastes and his means, and when he occupies it you may fairly rate him at the full value of the house to him; but circumstances may change very materially. Subsequently, whether in one, two or three generations, the family may fall into less prosperous circumstances, as happens in this country very frequently. They have this house on their hands; their circumstances are such that they would not have built so expensive and well-kept a house; they would with their means have built a much less pretentious house. They have only three alternatives at hand; they have either to sell or to let the house, or to continue to live in it themselves. It is hard, looking to the great attachment to ancestral property in this country, to drive owners to these alternatives; but if he retain the house you cannot in justice say that it is worth the same to him as it was to his ancestor who built it. To him it is really not worth more than he could get for it if he sold it or let it. You cannot make out that the house is worth more than it will command in the market, and I should therefore be very reluctant to make a hard-and-fast rule in the case of poor house-owners of this kind. I think that in such extreme cases an assessment of 4, 3 and even 2 per cent. might be taken equitably as the fair value in the case of once wealthy families whose property and circumstances have become depreciated. I propose to move this as a separate amendment, because I do not think I ought to include the amendment on the general principle with this amendment, which is intended to deal only with exceptional cases. I hope the Council will fully realise that such a clause is essential, if we are to keep a 5 per cent. valuation as the general principle on which residential houses ought to be assessed, where they now pay 4 per cent. or even less: on the other hand even 4 per cent. would in some cases be very hard. We should levy taxation fairly over the town, but at the same time should not be unjust to those families in impoverished circumstances who have inherited houses of a better kind. For these reasons I ask the Council to consider these two amendments.

The HON. MR. ALLEN said—This is one of the hon. member's last thoughts. During the two years the Bill has been before the Council, I do not believe that this proposal has ever been brought forward. The early part of his speech distinctly showed the evils to be guarded against; and having guarded against those evils by a section which is substantially the same as the Select Committee has provided, he proceeds to undo the whole and to introduce a clause which is vague above all vagueness. Having erected a dyke to keep out the sea, he is not content till he burrows a hole through it which lets in the sea again. He provides that "when a house is occupied by the owner under such exceptional circumstances as renders a valuation of 5 per cent. of the cost of building, less depreciation, excessive, a lower percentage may be taken." And he mentions one single circumstance to which the exception would apply, viz. where a man lives in a bigger house than his circumstances warrant. But the words of his clause reach far beyond anything of that kind, and they are words which should not find a place in any law. They are, as I said, vague beyond any permissible degree of vagueness, and they afford not the slightest indication as to what limits the reduction may extend. And further with reference to the words "valuation of 5 per cent. of the cost of building being excessive." With reference to what is it excessive? Not with reference to the valuation of the property. The whole

system of municipal taxation proceeds on the idea that the property owned by a person within a municipality is an indication of the amount of tax to be paid by him; he is to pay in proportion to the extent of his property. Whether he is a poor man or a rich man, whether he occupies it himself or lets it, is immaterial for purposes of municipal taxation. His poverty would be a good ground to reduce his income-tax, or any tax which takes the circumstances of the individual into consideration. But when the law discards all consideration of the circumstances of individuals, and takes into account only the value of property in the municipality, if the circumstances of a man are to render the valuation of his property excessive, we have altogether a new principle introduced; it is utterly impossible to say how far it will extend, or to what extent the resources of the municipality will be affected by it. The hon. member is unwilling to allow appeals to the assessment benches of Municipal Commissioners, and suggests that the decision on appeals should be left to the Small Cause Court. But suppose enquiries into these exceptional circumstances are to be held by the Small Cause Court. It is the bounden duty of this Council to lay down some indication of the character of the exceptional circumstances which should be admitted as a sufficient justification for a reduction of the assessment valuation. I can imagine nothing more exceptional than the position of Government House, which is occupied only for three months in the year; the Government may ask for a heavy reduction of the assessment. Then there is the Indian Museum, which is a building occupied by the Government not for any benefit of its own, but for the public good. Can anything be more exceptional? Suppose the residential house of a Hindu gentleman proves unhealthy, and that its inmates are unable to work more than three days in the week on account of illness. Who can say that that is not an exceptional circumstance, and the parties may ask the Court to take into consideration the unhealthiness of the house. Hotels are not very numerous in this town, and therefore occupation as a hotel is an exceptional circumstance. Messrs. Dykes & Co. have premises behind the Great Eastern Hotel a mile in circumference; that is exceptional. All these may be held to be exceptional circumstances. But while the hon. member means to limit the reduction of the assessment to the case of probably one or two respectable gentlemen in reduced circumstances, all these classes of cases may be brought successfully before the Small Cause Court. [The Hon. Sir Henry Harrison—The contention is that the property in these cases is of less value than before.] Property has a certain value according to the amount of money sunk in it, and when there is a demand for such property, as at the time of the Exhibition, it will certainly command its full value: when it is otherwise, it is simply that there is no demand and that purchasers are not forthcoming. Were a wealthy family to migrate from the mofussil into Calcutta, they would have to pay for the house its full value according to the expense of construction, and the situation of the fact is that there is no change in the value of the property, but an impoverished man is perhaps not justified in living in such a house. In natural history we learn that the oyster dying by starvation expends its last efforts of strength in constructing for itself a smaller shell to match its reduced size. If it is a fact that the people of this country are unwilling to follow the example which nature has set them, I can therein see no sufficient reason to violate the principle of this Act. I think that under any circumstances this clause in its present state ought not to be accepted for its vagueness and uncertainty.

The Hon. the Advocate-General said:—I wish to say just one word as to what has fallen from my hon. friend Mr. Allen. The clause goes on the supposition that there are circumstances which depreciate the value of the building. The whole of my hon. friend's argument proceeds on the assumption that there are no circumstances under which a valuation of 5 per cent. would be excessive. That is a very different thing. Suppose a person of eccentric habits builds a large house in a grotesque fashion; it suits his fancy, but after he dies it will not be valued at the price the building cost? It is an exceptional case which would fall under this clause. I quite agree with my hon. friend that no human wisdom, ingenuity or ability could define the range of exceptional circumstances, and frame a section which would clearly be applicable to all cases. Cases of this sort cannot be defined: this must be left to the discretion of the court for determination. It must not be supposed that

in the northern part of the town property yields a return of 5 or 6 per cent. when they are let; sometimes they fetch only 3½ or 4 per cent. It will be impossible for the Legislature to summarise all the exceptional circumstances; they can only enunciate some general principle such as a reasonable person could interpret. I do not see that that makes a hole in the rule laid down. The rule applies to ordinary circumstances, leaving the court to deal with exceptional cases as they arise. I think it does honour to the hon. member in charge of the Bill that he has thought proper to introduce some sort of a safety-valve which may be applied in the case of those who have been excessively assessed.

Then with regard to the substantive section. The hon. member in charge of the Bill dwelt on the value of the house to the owner. I might put it in this way. Suppose a man wants a house to suit his fancy and another man is to build it for him; the cost of the house would be a fair test of its value to the occupant. The only thing I am a little in doubt about is whether the words "a lower percentage may be taken" ought to be allowed to remain, and whether or not a minimum limit of assessment ought not to be given. I throw this out as a suggestion for the consideration of the hon. member in charge of the Bill.

The Hon. Dr. Mahendra Lal Sircar said:—The amendment proposed to be introduced by the hon. member in charge of the Bill, and the arguments which have been adduced both in favour and against it, clearly show that it is inconvenient to have two different standards of valuation of houses in town. This introduction of two different standards of valuation will lead to most unfair and inequitable conclusions unless we can make these two standards correspond. Now we have just heard from the hon. and learned Advocate-General that, in the northern part of the town, houses built for dwelling purposes would scarcely fetch even so much as 3 per cent. of the cost of building. [The Advocate-General—I said sometimes.] It is a notorious fact that houses built at the same cost in different parts of the town fetch different rents, the difference being sometimes enormous—two, three, four, and even tenfold. Take the case of two similar houses, one in the south and one in the north of the town, both built at a cost of Rs. 50,000. The house in the south of the town may fetch Rs. 200 a month or even Rs. 300; whereas a similar house built in the northern portion of the town at the same cost would scarcely fetch Rs. 100 a month. Suppose both the houses were let, one fetching Rs. 200 and the other only Rs. 100. Under the first standard, that is, taking the rent as the net annual value, the two houses would be assessed at different rates. But suppose the owner of the house built in the north of the town, after having let it for one year, chooses to keep it to himself, he would have to pay now at quite a different rate from what he was doing when he got Rs. 100 a month. Would that be fair? You will now assess his house by the standard of cost, whereas a year ago you assessed him to the extent of the net annual income or rent of the house. Then, again, what is to be the basis of the estimated present cost? Are you prepared to accept the cost as given by the owner of the house? Is it not a fact that similar houses may be built at very different costs? Two similar houses built, one under the supervision of the owner, the other by a contractor, would cost different sums of money: the one could be built for much less than the other. That being so, how are you to proceed in making the estimate? You must accept the cost given by the owner. In the one case it may be Rs. 50,000; in the other as much as Rs. 80,000. A difference of Rs. 30,000 would make a great difference in the assessment. It is also notorious that large houses like those of Baboo Nundo Lall Bose, Maharajah Sir Jotendro Mohun Tagore, and others built by different contractors, are built at enormously different costs, each contractor having his own estimates and prices differing considerably from those of others. How would you assess such houses? Taking all these things into consideration, I am of opinion that the use of two different standards of valuation of houses would not work fairly and justly. You must revert to the old standard of the annual rental of the house; otherwise you will be doing serious injustice to occupiers and owners of houses.

The Hon. Dr. Gooroo Dass Banerjee said:—I do not wish to protract this debate much longer. I will only ask permission to say a few words in answer to the remarks against my amendment, and to point out the objections to which some of these remarks are open. My hon. friend on my left (Mr. Allen), who spoke against my amendment at the last meeting of the Council, was pleased to remark that the portion of section 122 to which I objected was rendered necessary by the under-assessment of houses in the northern division of the town resulting from the Committees of the Commissioners being led away by personal feelings of favour towards their friends and neighbours. [The Hon. Mr. Allen—I did not say so. I referred to what had occurred in mofussil municipalities.] My hon. friend reminds me that he referred to the Commissioners of mofussil municipalities, with whom we have nothing to do just now. It is fortunate that I was not a mofussil Commissioner before the passing of Act III of 1884, in which the new assessment provision was incorporated for the first time. Then my hon. friend pointed out what to his mind was a shocking absurdity and inequity of assessment; the inequity, namely, of a house in the south of the town being assessed as 6 per cent. on the cost-price, whereas houses in the northern division are assessed at only 2½ per cent. But how is that an inequity? The whole argument assumes that we are bound, in making valuation for the purpose of rating, to have a certain uniform percentage on the money actually spent in building the house; that is the only basis on which all these arguments about inequality and inequity rest. Now my hon. friend was good enough to point out that we must base municipal taxation on the standard of the extent of interest that the rate-payer has in the municipality as determined by the capital sunk by him within its limits. Granting, for argument's sake, that the extent of permanent interest which a rate-payer has in immoveable property owned by him in the municipality ought to be the basis of taxation, I deny that the capital sunk in building a house is any indication of it. The capital may be misspent and may be partially irrecoverable when the property is put up for sale, and would it be right in such cases to tax a man for his folly because he has sunk capital which cannot be recovered? There is no reason or justice in that. It is not the capital sunk, but so much of it as can be recovered in the shape of market value which ought to be the standard of valuation for assessment. Adopt that standard, and you at once get rid of all those difficulties and anomalies which have been pointed out in the course of the discussion on the amendment moved to-day by the hon. member in charge of the Bill. And if you adopt the market value, you will after all be returning to the present law; for how is the market value ascertained? Every intending purchaser calculates what income the property will bring in if it were to be let out; and therefore ultimately we come to the expected letting value. The annual letting value and a proper percentage on the market value are convertible terms. Well, then, it is said it is a difficult thing to ascertain the market value. Perhaps it may be difficult: but is it not equally difficult to ascertain that which has been made the basis of the proposed law, as well as of the provision in the last amendment proposed by the hon. member in charge of the Bill? Here we have to make a deduction on account of depreciation. How is that to be ascertained? Is it not at least as difficult as the other? Perhaps it is more so. The only fair way of ascertaining the amount of deduction on account of depreciation will be by finding the difference between the cost price and the present market value. That is the only way which will indicate what the deduction ought to be. If, then, we are beset with the same difficulty, in accepting the proposed provision, that we have in the existing law, where is there any good in the change? It is said by the hon. member in charge of the Bill that the cost-price or the estimated present cost-price indicates the value of the property, if not to a third party, at least to the owner; and that in the case of an owner building a house to live in he has found a tenant, and we have only to ask him how much rent he has to pay. It is clearly the interest from 4 to 6 per cent. on the capital he has spent. That may be true, but the argument has one fallacy in it. In the case of an ordinary tenant living in another man's house, he has the option of giving it up whenever it suits his convenience. In the other case he becomes a permanent tenant because he has invested his money in building a house for his own residence. It will not do, if afterwards

his means are reduced, for him to let the property, because it has been admitted by several hon. members that it will not yield anything like the interest on the capital sum; nor will it do to sell it, because it will not fetch anything like the sum spent in building it. If that be true, by adopting the other standard of valuation you ignore change in circumstances. These anomalies and sources of difficulty can be avoided only by taking the annual value as the basis of assessment, or, if that form appears objectionable, by putting in its stead a certain percentage of the market value. But really it comes to the same thing. I fail to see that anything has been pointed out to show why the section in the present law should not be re-introduced in this Bill.

The English law has been freely referred to on the point, and it has been remarked that under the English law rating proceeds on a different principle from that which has been the basis under the existing law. Instead of presuming to say what the English law is, I think I may put before the Council the remarks of the late Chief Justice and Mr. Justice Wilson, in the case of Nondo Lall Bose *versus* The Corporation of Calcutta. Sir Richard Garth in that case said—

"The principle of rating on which the Commissioners are directed to proceed is the same which is adopted in England; and similar difficulties arise there in the case of gentlemen's parks and mansions which are laid out for residential purposes and not for sale or letting. But such properties are nevertheless constantly rated upon the basis of their annual letting value."

And Mr. Justice Wilson in the same case said—

"But the whole system of taxation and assessment under the Act in question is obviously borrowed in its general outlines from English Rating Acts."

I have already pointed out that the case referred to in the report of the Select Committee is not at all a case in point. It is a case with reference to the valuation of a manufactory, and I do not think we have anything to do with such a case, because we have exempted machinery from valuation. With regard to dwelling-houses, the basis of assessment is not the estimated cost, but the market value. The report of Mr. Goschen also adopts the same basis. There is no sound reason for adopting the cost-price, either actual at the time the house was built, or estimated at the present time, as the basis of valuation.

The HON. BABU KALI NATH MITTER said—The hon. member in charge of the Bill has confidently stated that he has made out a strong case for making an alteration in the law. He makes that statement on two suppositions. First, that his statement of facts is perfectly correct; and secondly, that the present state of the law is unjustifiable. I have no hesitation in joining issue with him as to the point of fact. I think it is an error to suppose that as a general rule the owner of a residential house has hitherto been under-assessed. I admit that in certain exceptional cases it has been so, but barring those exceptions, I submit that the statement of the hon. member is wholly erroneous, and, if necessary, I think it would be well, before the Council finally decides this matter, to have a thorough enquiry on the point. My hon. friend has not given his authority, but has said that his friends amongst the Commissioners and other persons have made certain statements to him. I am quite willing that this matter should be referred to the Commissioners, and I have little doubt as to the manner in which their view will be expressed. I venture to think that before any change is made in the law on the supposition that a certain statement of facts is true, it is necessary to make a thorough examination of the facts and to find out whether such statement has proceeded from erroneous impressions or is justified by the actual state of things. Now when the Local Government was pleased to intimate its willingness to assist the Commissioners in raising further funds, and with that view appointed the Octroi Committee, I never heard that there was such a simple method by which the income of the municipality might be greatly increased. If the reports of the Calcutta Municipality from 1877 to the present time are overhauled and examined, I am almost certain that not a single word will be found anywhere which will justify the statements which have been made by the hon. member in charge of the Bill. Will it be just, will it be right, without making due enquiry into this matter, so far as the question of fact is concerned, to

come to the conclusion that the owners of residential houses have not been fairly assessed up to the present time? I submit that it will not. As regards the law, the English law is applicable to this country. It is the law which in most cases is administered by the Courts here. If the law on the subject is that which has been propounded by my hon. friend the member in charge, why cannot he persuade the Judges to agree with him? I think it is going too far to say that it is impossible to have the law properly interpreted here. I think we have Judges here who are capable of enunciating the law in matters of this kind without any difficulty whatever. That being so, and as the provision of the law to which my hon. friend referred is based on the probable letting value of the property, why should not the matter be left there, and in exceptional cases, resort to the ruling of the different Judges in England, and fix the assessment in such cases on the basis my hon. friend has suggested? But he is not satisfied with that. He wants a change in the law. He has referred to what I said on the last occasion, and he said he felt it is his duty to point out the inequalities which exist. Of course he is responsible for his own acts, and what he considers his duty no doubt he will perform to the best of his ability. But it is also my duty to show the Council that we shall be doing a grave injustice if, without making due enquiries, we adopt the hon. member's proposal in this matter. He has entered into an elaborate discussion in order to show how it is that this inequality has come into existence. He has been pleased to refer to several appeals before assessment benches of the Commissioners; but it would have been better if he had pointed out the percentage of appeals allowed, of modifications made in the valuations of the assessor, and of appeals disallowed altogether. If these percentages are given, I am positive that the conclusion to which the Council will come will be different from that which my hon. friend asks the Council to adopt. I think that if those cases are carefully examined you will find that substantial justice has been done; that in most of the cases the appeals were rejected; that in about 30 or 35 per cent. of the appeals there were modifications made; and that in only a very small percentage appeals were wholly allowed. My hon. friend shakes his head. I am now speaking from recollection; but my hon. friend has the papers before him, and he could have given the information on this head without the slightest difficutly, and he could have shown that in most cases the appeals were allowed.

In the course of his argument he has been pleased to say that he would only support his modified proposal in the event of a proper system of appeal being fixed, and that proper system he has foreshadowed by his notice of amendment, that appeals are to be taken out of the hands of Commissioners and preferred to the Small Cause Court. I submit that it will be a great mistake to drive persons to the Small Cause Court, putting them to the expense of appointing vakeels and to the harassment and annoyance of frequent attendance for the purpose of having the appeals heard. There is another difficulty which has suggested itself to my mind, and which I shall refer to at the proper time in a much fuller manner than I shall do at present, viz., that by the constitution of the Court of Small Causes, there is no provision in the law which compels the Judges of that Court to take up this duty. Suppose the Judges refuse to entertain these appeals on the ground that the law which constitutes the Court does not provide for the hearing of such cases. What then would be the state of things? One executive officer would make the assessments, another would hear objections, and then, if the person was dissatisfied, he will be compelled to go to the Small Cause Court. In addition to the harassment and annoyance of frequent postponements, and to the absolute necessity of incurring expense for engaging vakils, the person preferring the appeal will run the risk, when such appeals become frequent, of the absolute refusal of the Small Cause Court Judge to hear him, on the ground that there is no provision under which that Court can be compelled to hear such appeals. I submit that this is a matter of very great importance, and that, before the facts stated by my hon. friend are accepted, it will be far better that an enquiry should be made; and if in the course of that enquiry it transpires that his position is unassailable, I shall then have nothing to say against his proposal; but I do think it will be altogether a mistake, especially when the rates are being consolidated, when the owners are to pay one-half and the occupiers the other half, to

have two modes of assessment. A great deal has been urged by my hon. friend to show that one class of rate-payers is now benefited at the expense of the other two classes. I am not prepared to admit that the two classes mentioned by my hon. friend are sacrificed for the benefit of the other class; it has not been ascertained that they consider they have been sacrificed. Therefore, it seems to me that before we give way to any of the arguments adduced by my hon. friend in respect of this matter, we should really realize what we are doing. It seems strange that no complaint of any kind has been heard up to the present time from one class or the other of the unequal incidence of taxation. It seems strange that there should be such unequal incidence of assessment. It can only be possible if the assessment has been made on some erroneous basis; for if the Council would refer to the assessment of appeals, they would find that the percentage of appeals is very small. On the contrary, the rate-payers are generally satisfied by the assessments made by the officer of the Corporation. And if the percentage of appeals has not been large, what does it show? Either that the officer entrusted with the duty of assessing has entirely mistaken his vocation, or that he has made correct assessments. I think the Council would be perfectly justified, in the absence of any complaint, to come to the conclusion that the assessments have been justly made. Under these circumstances, I submit that we should pause and consider before we accept a mode of assessment which prescribes two different methods of valuation for two different classes of property. I am aware that I have myself proposed two methods; and, as far as that is concerned, it is open to my hon. friend to say that my remarks are somewhat out of place. But my alternative proposal is restricted to cases where, owing to exceptional circumstances, it is not possible to ascertain the letting value. It puts the matter on this sound footing, that it will only be in certain exceptional cases that the assessment will be affected. And then there will be the safeguard that the assessment will not be valid unless it is sanctioned by the Commissioners in meeting, showing that it will only be in exceptional cases that assessments under the second clause will be permitted. With these observations I leave the matter in the hands of the Council.

The Hon. Sir Henry Harrison said in reply:—As regards the facts, I must leave every member of the Council to judge. We have just heard the statement made by a very competent member of the Council that if two similar houses be built in the two divisions of the town, each at a cost of Rs. 50,000, the house in the southern division would be assumed to carry a letting value of Rs. 200 a month or more, while the house in the northern division will be valued at only Rs. 100. Is any single circumstance more than that necessary to establish the case which I have laid before the Council? There is no question that land is more valuable in one part of the town than in another; but the moment you have bought the land, you have cleared the ground for the operations of Calcutta, which in the long run will look for the same return in one neighbourhood as in another, otherwise it will not be invested. Is not what has been stated above sufficient to establish my contention that the opinions of a large class of the community have completely lost their bearings in a matter of this kind? Is not that conclusive of the position I have taken that, where the lettable value cannot be ascertained, the valuation should be fixed at 5 per cent. on the estimated present cost of building the house? Can any one doubt that in the part of the town where this Council Chamber is situated, on the river bank, or in Chowringhee houses are assessed at fully 5 per cent. on their cost; probably more, either 6 or 7 per cent. If there is any doubt that in the native part of the town houses are assessed less highly, then why this outcry against 5 per cent.? So far from there being an outcry, we ought to be thanked for reducing it to 5 per cent. Is anything more necessary to show that my fundamental contention is right?

As regards the assessment benches, that will be more properly discussed in another stage of the proceedings. I shall only say further that the hon. and learned Advocate-General has correctly explained what is the meaning of the exceptional clause I have proposed. It does not mean an appeal *ad*

misericordiam to the poverty of the owner; it means that for some exceptional reason the valuation of 5 per cent. will be at times excessive, and when that can be shown, the operation of this clause will come in. One exceptional case is that in which property passes from the person who built it for his own purposes to his successor, to whom it is not worth what it was to the original owner. I should feel no difficulty in applying the principle to the other cases selected by the Hon. Mr. Allen. To Government House, the Museum, and the Great Eastern it would not apply; whereas the other case put by my hon. friend, where a person builds a house at great expense in a position which he thinks will be healthy, and the house turns out to be very unhealthy, is precisely one of these exceptional cases. The clause is proposed to meet such exceptional cases, and in each case the exceptional circumstances must be proved.

The HON. DR. GOOROO DASS BANERJEE'S motion that, for the first paragraph of section 122, the following be substituted:—

"For the purpose of assessment under this Act, the annual value of land and the annual value of any house shall be the gross annual rent at which such land or house might reasonably be expected to let from year to year, less, in the case of a house, an allowance of ten per cent. for the cost of repairs, and for all other expenses necessary to maintain the house in a state to command such gross rent."

being put, the Council divided:—

Ayes 4.	*Noes* 9.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	The Hon. the Advocate-General.
	His Honour the President.

So the Motion was negatived.

The HON. BABU KALI NATH MITTER'S motion that, for section 122, the following be substituted:—

"The annual value of any house or land for the purposes of assessment shall—

(*a*) in cases where the gross annual rent at which such house or land might reasonably be expected to let from year to year can be ascertained, be such gross annual rent, except that, in case of a house, an allowance of ten per cent. shall be made for the cost of repairs and for all other expenses necessary to maintain such house in a state to command such gross rent:

(*b*) in cases where such gross annual rent cannot be ascertained, be four per cent. on the sum obtained by adding the estimated cost of building, less a reasonable amount to be deducted on account of depreciation, if any, to the estimated value of the land valued with the house as part of the same premises:

Provided that in making the assessment under clause (*b*) the estimated value of ornamental works in any house or building should be excluded; and provided further that no assessment under the said clause shall be valid unless sanctioned by the Commissioners in meeting."

being put, the Council divided:—

Ayes 3.	*Noes* 10.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft.
	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	The Hon. the Advocate-General.
	His Honour the President.

So the Motion was negatived.

The HON. SIR HENRY HARRISON'S motion that, for the words "the estimated cost of building" the words "the estimated present cost of building the house" be substituted, being put, the Council divided:—

Ayes 5.	*Noes* 8.
The Hon. Moulvie Abdul Jubbar.	The Hon. H. Pratt.
The Hon. Sir Henry Harrison.	The Hon. Dr. Gooroo Dass Banerjee.
The Hon. H. J. Reynolds.	The Hon. C. H. Moore.
The Hon. The Advocate-General.	The Hon. Dr. Mahendra Lal Sircar.
His Honour the President.	The Hon. Babu Kali Nath Mitter.
	The Hon. Sir Alfred Croft.
	The Hon T. T. Allen.
	The Hon. C. P. L. Macaulay.

So the Motion was negatived.

The HON. SIR HENRY HARRISON'S motion that the following clause be added to section 122:—

"When a house is occupied by the owner under such exceptional circumstances as renders a valuation of 5 per cent. of the cost of building, less depreciation, excessive, a lower percentage may be taken."

being put, the Council divided:—

Ayes 7.	*Noes* 6.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. T. T. Allen.
The Hon. Sir Henry Harrison.	The Hon. C. P. L. Macaulay.
The Hon. the Advocate-General.	The Hon. H. J. Reynolds.
His Honour the President.	

So the Motion was carried.

The HON. DR. GOOROO DASS BANERJEE moved that, in line 14 of section 122, for the figure "5" the figure "4" be substituted.

He said:—I have already explained to the Council the reason of this amendment. The reason is that 5 per cent. is not anything like the profit which is likely to be made where the house is not built for letting purposes, but is the dwelling of the owner. The profit is much nearer 4 per cent. than 5. And if that is the case, there is no reason why the Council should adopt an arbitrary percentage instead of the real one, viz., the value of the property to the owner. In the course of the discussion on the last amendment, it has been abundantly shown that in the Northern Division of the town, house property does not bring anything like 5 per cent. on the cost price. Why, therefore, should we take 5 per cent. as the basis of valuation? It is only by adopting the figure "4" that we can do anything like justice. The adoption of the figure "5" does not rest on any principle of justice unless we hold that justice requires that a man must be taxed uniformly on capital whether it is sunk profitably or unprofitably. We may as well say that the same percentage of valuation must be taken on property drowned in a river within the municipality.

The Motion being put, the Council divided:—

Ayes 4.	*Noes.* 9.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	The Hon. the Advocate-General.
	His Honour the President.

So the Motion was negatived.

The HON. SIR HENRY HARRISON moved that, at the end of section 123, the following proviso be inserted:—

"Provided that, for the purpose of dividing the town into districts under section one hundred and twenty-nine, the Commissioners may retain the valuation of the houses in any

part of Calcutta for a further period not exceeding six years, or may, with the same object, make a re-valuation for a less period than six years."

He said:—The town is divided into districts for the purposes of assesssment, and each division is assessed in turn after six years. But it is not equally divided, and when the new area is added, it may be that by an accidental flush of assessments a great deal more will have to be taken in hand in one year than in another. Therefore I wish to give a power of re-arranging those assessment districts as may be convenient, and to allow an assessment which has terminated to go on for another period, or if the period happens to be a long one to re-assess a district for a shorter period. Suppose the assessment of a certain portion of the new area terminates inconveniently, and that it is desirable that it should be re-assessed, say, in 1892, it will be for the Commissioners to say, we will continue the existing assessment till 1892, or we will make a new valuation up to 1892. This is a new power which it is proposed to give to enable the assessments to be properly carried out.

The motion was put to the vote and carried.

The Hon. Sir Henry Harrison said:—I propose to discuss together the following four amendments to be moved by myself for the omission of section 135 of the Bill, the substitution of a new section for section 136, the insertion of a new section after section 136, and the substitution of a new section for section 137, as well as the amendment to be moved by the Hon. Babu Kali Nath Mitter for the omission from clause (*a*) of section 135 of the words "the Chairman or Vice-Chairman and." My amendments run thus—

(1). That section 135 be omitted.

(2). That, for section 136, the following be substituted:—

"Any person who is dissatisfied with a valuation made under this Chapter shall, in the case of houses, within fifteen days after the publication of the notice referred to in section one hundred and thirty-two, or after receipt of the notice referred to in section one hundred and thirty-three when such notice is received after the publication of the notice referred to in section one hundred and thirty-two, and in the case of bustee or other land within fifteen days after the receipt of the special notice referred to in section one hundred and thirty-four, deliver at the office of the Commissioners a notice in writing stating the grounds of his objection."

(3). That, after section 136, the following be substituted:—

"136A. All such objections shall be entered in a register to be maintained for the purpose, and on receipt of any objection, notice shall be given to the objector of a day and place when his objection will be investigated.

"On the day and place notified, the Chairman or Vice-Chairman (if the case is referred to him by the Chairman) shall hear the objection in the presence of the objector if he shall appear, or the Chairman or Vice-Chairman may, for reasonable cause, adjourn the investigation. When the objection has been determined, the order passed shall be recorded in the register of objections, together with the date of such order."

(4). That, for section 137, the following be substituted:—

"Any person dissatisfied with the orders passed on his objection may appeal to the Court of Small Causes having jurisdiction in the place where the house, land, or bustee land is situated. Such appeal shall be presented to the Court of Small Causes within thirty days of the decision of the objection under section one hundred and thirty-six A, and shall be accompanied with an extract from the register of objections containing the order objected to. No appeal shall be admitted unless an objection has first been taken under section one hundred and thirty-six."

He said:—First with regard to section 135. I have for a long time past thought that the present system of assessment benches is utterly unsound. In Select Committee it was known that my hon. friend would move that from clause (*a*) the words "Chairman or Vice-Chairman and" be omitted, and as we were desirous of getting on with the Bill, I suggested that he should bring forward his motion in Council, and I reserved my amendment also. It is an amendment in principle to be considered on its own merits. The present system is that a person aggrieved has a right of appeal to a bench of three Commissioners or to the Small Cause Court, and the former is always exercised. The effect of this is that the assessor knows perfectly well who is the controlling authority. The closing remark of my hon. friend in the last debate was that if the assessor did his duty no inequalities of assessment would happen. Is this remark either just or true? The assessor cannot rise above the body which controls him. If he knows the assessment will be revised on one principle,

naturally he cannot be expected to make his assessments on any other basis. The proportion of appeals is small, as he generally persuades people to accept his assessments. He knows perfectly well what system of assessment will ultimately prevail, and he adapts himself to it, and it is understood that houses occupied by their owners will be assessed on the rent which another tenant can be found to pay for it, and therefore the assessor assesses these houses on that principle. So far from the assessment bench not usually modifying what the assessor does, the fact is precisely the opposite. I have added up two pages of assessment appeals taken haphazard. In one of them there are 29 cases, and I find that the assessment was modified in 18 cases, and the objection fully allowed in 7 and disallowed in 4 cases only. Where there is an old assessment, and it is retained or reduced, I call that a rejection of the assessment *in toto*; where there is a new assessment, it is hard to say whether it is rejected or modified. In the next page 5 assessments are upheld out of 25; 19 are modified, and the other one, the objection is maintained in full. Again in another page the results are remarkable. In the Chitpore Road six houses are assessed. The first is a new assessment, which the assessor fixes at Rs. 1,800; the Committee reduces it to Rs. 1,200. In the next case the assessor fixes Rs. 3,000; the Committee reduces it to Rs. 1,200. In the case of the next house, formerly assessed at Rs. 720, the assessment is raised by the assessor to Rs. 900; the bench lower it to Rs. 600. In the next the former assessment was Rs. 480. The assessor raises it to Rs. 900. The bench reduce it to Rs. 360. In the next the former assessment was Rs. 360; the assessor raises it to Rs. 480. The assessment is reduced to Rs. 240. The last case is that of a new house which the assessor values at Rs. 3,000; the bench reduce it to Rs. 1,200. I do not select these as average cases; they are no doubt extreme, but can any officer be expected to do his duty according to principle when the opinions he forms are upset in this manner, although he is a most experienced officer? I have often asked the assessor what he thinks is the best remedy, and it is instructive to hear what he says. One of his suggestions is, that the assessment benches should be obliged to give their reasons in all cases where they admit appeals or modify the assessments. The second suggestion is, that they should be required personally to satisfy themselves by seeing the house which has been assessed. For myself I do not think that the remedy lies in any of these courses. It is true that in England there have been Assessment Committees of two kinds. First, in parishes, introduced in 1837, and at first they were highly thought of. But actual experience showed that exactly the same objection applied there as here. It was found that their decisions were unequal and commanded no respect, and now they have been nearly discarded, and, as far as possible, not resorted to. Then there were Assessment Committees appointed by the Unions, and the object here was different: it was to check the partiality of officers in their own parishes. In 1869 an assessment law was passed for London under which the system of appeals was very elaborate. There was an Assessment Committee, whose functions were relegated to the hearing of objections, totally different from the supreme appellate benches here. After the assessments are made, the Assessment Committee revises them; then they are ready for appeals, and the rule is that anybody can appeal. Our idea is that only the owner of the house assessed may appeal. In England if a person's neighbour is under-assessed the aggrieved person may appeal. And the overseer of the parish may also object, and above all an officer appointed by the Commissioners of Inland Revenue, called the Surveyor of Taxes, and it is his duty to go round and see that the assessments are fair, and the decision of the Surveyor of taxes is made binding on the ultimate appellate bench of Justices from the decision of various Committees, unless it can be proved to be wrong. So the whole burden of proof is thrown on those who oppose the judgment of an experienced officer. The assessor here says I am thrown over for no reason. I have seen the house; it has so many large rooms. The appellant says they are small rooms, I cannot afford to pay. Instead of an assessment of Rs 180 which the assessor proposes, the Assessment Bench fixes Rs. 120, and it is settled. Is it possible for assessments to be carried on in this way on any fair and satisfactory manner? And some continuity of principle is needed. The system I propose, is, I am convinced, the only one if you want to have Calcutta fairly and

equally assessed. It is true that in Select Committee I accepted the Chairman or Vice-Chairman being a member of the Bench, and as a makeshift that would be something. He would be the principle of continuity, and that would do something. But I have only to appeal to the discussions of the last few days and ask you, looking to the extreme divergence of views, is it possible that a tribunal constituted by haphazard in this way can be an equal tribunal? Would it not depend on the lot whether an appeal would be decided on one way or the other? My hon. friend says he is confident that if an appeal is made to the Commissioners, they will endorse his views. He is right. But either that view is right or it is wrong. I say that it is wrong, and that from the very nature of the circumstances the Commissioners are disqualified from being a good tribunal. In a matter between class and class we choose a fair and impartial officer to decide. It is not a question of Municipal convenience or expediency. It is simply a question of justice between man and man, and is it fair to let the question depend upon the opinions of three Commissioners chosen by lot? That is not at all fair. The work of the Assessment Bench is judicial work, and must be made over to an officer who feels the responsibility, and who has constant experience. Therefore I am satisfied that if you wish to do what is right, you will accept the system of appeals which has always been in force in Bombay. There the Municipal Commissioner, an Executive officer, issues most elaborate instructions for the guidance of the assessing officer, and he is the person to whom the appeal comes, and if the appellant is dissatisfied, he goes to the Small Cause Court or to the Presidency Magistrate there. That is the system I wish to adopt in Calcutta. I am quite satisfied that it will be very fair, and that the assessments will be much more equal. If the Council is unwilling to adopt this system, I hope the section in the Bill will be allowed to remain by which the Chairman or the Vice-Chairman will be made members of the Assessment Bench The feelings of the different classes of the community are so widely different and so incompatible, that I may almost say that it is a farce to leave the decision of these cases to Commissioners chosen by chance, who would take an entirely different view of the equity of the case if they belong to one class, and an entirely different view if they belong to another class. My object is simply to do justice to all classes of the people.

The Hon. Babu Kali Nath Mitter moved that in clause (*a*) of section 135 the words "the Chairman or Vice-Chairman and" be omitted.

He said:—As regards the amendment of the hon. member in charge of the Bill, my first objection is this, that there is no provision in the Presidency Small Cause Court which confers jurisdiction in such cases on that Court. I appeal to the hon. and learned members, the Advocate-General and the Legal Remembrancer, to say whether it is so or not. [The Advocate-General— Opinions are divided: it is extremely doubtful] I think the question is very doubtful. [Sir Henry Harrison—Numbers of cases have been decided under the provisions of all the Municipal Acts.] I went through the Presidency Small Cause Court Act on a recent occasion, and I found that in the Chapter on Jurisdiction there is nothing in my judgment to show that the Court can be compelled to take up a case of this kind. The hon. the Advocate-General is pleased to say that opinions are divided; two eminent lawyers came to one opinion and two to another. Therefore I am right in saying it is a doubtful question. In the second place the constitution of that Court is such that it has nothing to do with questions relating to immoveable property. The Judges who preside in that Court have not the experience necessary to enable them to determine the value of real property, because questions of that kind never come before them. They have to deal with questions relating to moveable property, matters of contract, and so on; and it is not a Court which in my humble opinion is capable of doing justice in cases of this kind, and it will not be the best tribunal to select for the purpose. When the Bill was in Select Committee, I intimated my intention to move for the omission of the words "Chairman and Vice-Chairman" which were inserted on the motion of the hon. member in charge, without in any way intimating that he reserved his amendment for the consideration of the Council. Not a word was then said by him as to the hearing of these appeals being taken out of the hands of the

Commissioners. The section regarding the mode of assessment will operate very hardly on the owners of residential houses. I have said before and I repeat that the hardship of dancing attendance on the Small Cause Court will be intolerable. Contested cases will not be decided in that Court in less than four or five months; sometimes they take years, and in my own experience I know of one case which took more than two years to decide. The cases in the Court are so numerous that it is impossible for the judges to do more than they are doing; and that being so, when a case of assessment comes on, the first thing which will infallibly happen will be its postponement for two months. That is the first satisfaction the appellant will have, and I cannot say in the ordinary course how many postponements will be made, and on each of these occasions a pleader will have to be engaged. I ask the Council whether it is right or just to drive persons to a Court not so constituted as to be able to deal with these cases in a proper manner. The English precedents referred to by the hon. member show that these appeals are placed before Justices. I ask how any continuity of principle can be maintained under such a procedure, as the Justices hearing appeals will not always be the same persons. Here in 1863 the duty of administering the affairs of the town was entrusted to the Justices of the Peace, and the assessment appellate benches were formed from amongst them. In 1876, on the amendment of the law, Commissioners were substituted for Justices, the change being only one in name. It is a singular fact that complaints as to the decisions of assessment appeals are heard here for the first time; they are not made the subject of complaint in the administration reports published from year to year. The Chairman never pointed out to the Commissioners that appeals are not conducted as they should be. On the contrary, judging from the fact that the number of appeals is very small in proportion to the number of assessments, I am emboldened to say that the mischief the hon member speaks of does not exist. He has referred to a few cases to show that reductions have been made in the assessments, and he asked the Council to infer from that, that appeals are not conducted in a fair and proper manner. I submit that two or three cases or even five will not justify any tribunal to determine whether appeals are conducted fairly or not. If the public are under the impression that they have only to appeal to get their assessments reduced, how is it that the proportion of appeals is so limited? That one fact goes to the root of my hon. friend's argument. It shows that there is no such belief in the minds of the people. The belief is quite the other way, viz., that the appellate benches will not admit appeals unless there is real ground of complaint. The method proposed by my hon. friend is no doubt a very convenient one as far as the executive officers of the municipality are concerned; one officer assesses, another deals with objections, and then the appellant is driven to the Small Cause Court. The annoyance and trouble and expense of litigating in that Court are so great that in many cases the parties will be deterred from instituting appeals. I am sure the Council will not in a matter of this kind, after passing a very stringent clause as to the assessment of house property, place people in a position not to be able to obtain justice. It is all very well for my hon. friend to say that that will be the best course. He said there will be a continuity of policy. We have had instances when the Corporation has been either plaintiff or defendant in the Small Cause Court. In one case it was a question of taking out a license, and some very strong remarks were made by the presiding Judge, and there was another case where another Judge made similar remarks. Therefore the result will depend very much upon whether the case will always come before a particular Judge before you can say that there will be a continuity of principle. If the Commissioners are unfit to be trusted to hear these appeals, they are not fit to be trusted with the administration of the affairs of the town. My contention is that the executive officer having done his duty, the hearing of appeals should be left to the Commissioners. Ordinarily the number of Commissioners who sit to hear appeals is five, and not three. Five Commissioners are chosen by ballot, and that is done because it was said that if a person knows beforehand who are to hear his appeal, probably the Commissioners who are going to sit will be subjected to the annoyance of receiving personal solicitations from the appellant. That rule was therefore established and is in force now. It seems to me that of all persons the persons

who have to deal with these appeals are the very persons who, by virtue of their position, are far better able to judge of the value of property than any Judge of the Small Cause Court. If the theory is that they will not do justice, then I say that the elective system should not be retained in Calcutta. If there is this fear lurking in my hon. friend's mind, he should be the last person to advocate the elective system. Large sums of money are expended on the advice of the Commissioners for the benefit of the town, and yet these persons are considered by my hon. friend not fit to decide whether the value of a particular property is Rs. 5,000 or Rs. 50,000. My deliberate opinion, formed from an extensive and intimate knowledge of the value of house property in the town, is that the Commissioners are the best persons to decide assessment appeals. Under these circumstances, I say that the adoption of my hon. friend's amendment will be a gross injustice to the rate-payers of the town, and I hope the Council will, at any rate, not alter the existing law in this respect. If the report of Nundolall Bose's case is carefully read, it will be seen that it does not help my hon. friend's contention. The Judges there came to the conclusion that the valuation on which the assessment was made is wrong, and therefore they allowed the appeal. Therefore there is no decision of any Court which will justify the Council in taking this matter out of the hands of the Commissioners. They are responsible for the well-being of the town, and I cannot understand why they should not be entrusted with the assessment of house property. I can understand the principle of their supersession under the control section of the Bill, but I cannot understand their supersession in the matter of hearing assessment appeals.

The Hon. Sir Henry Harrison's motion that section 135 of the Bill be omitted, being put, the Council divided:—

Ayes 8.	*Noes* 5.
The Hon. H. Pratt.	The Hon. Dr. Gooroo Dass Banerjee.
The Hon. C. H. Moore.	The Hon. Mahendra Lal Sircar.
The Hon. Sir Alfred Croft.	The Hon. Babu Kali Nath Mitter.
The Hon. Sir Henry Harrison.	The Hon. Moulvie Abdul Jubbar.
The Hon. T. T. Allen.	His Honor the President.
The Hon. C. P. L. Macaulay.	
The Hon. H. J. Reynolds.	
The Hon. the Advocate-General.	

So the Motion was carried.

The Hon. Sir Henry Harrison's motion that, for section 136, the following be substituted :—

"Any person who is dissatisfied with a valuation made under this Chapter shall, in the case of houses, within fifteen days after the publication of the notice referred to in section one hundred and thirty-two, or after receipt of the notice referred to in section one hundred and thirty-three when such notice is received after the publication of the notice referred to in section one hundred and thirty-two, and in the case of bustee or other land within fifteen days after the receipt of the special notice referred to in section one hundred and thirty-four, deliver at the office of the Commissioners a notice in writing stating the grounds of his objection."

was put to the vote and carried.

The Hon. Sir Henry Harrison's motion that, after section 136, the following new section be inserted :—

"136A. All such objections shall be entered in a register to be maintained for the purpose, and on receipt of any objection, notice shall be given to the objector of a day and place when his objection will be investigated.

"On the day and place notified, the Chairman or Vice-Chairman (if the case is referred to him by the Chairman) shall hear the objection in the presence of the objector if he shall appear, or the Chairman or Vice-Chairman may, for reasonable cause, adjourn the investigation. When the objection has been determined, the order passed shall be recorded in the register of objections, together with the date of such order."

was put to the vote and carried.

The Hon. Sir Henry Harrison's motion that, for section 137, the following be substituted :—

"Any person dissatisfied with the orders passed on his objection may appeal to the Court of Small Causes having jurisdiction in the place where the house, land, or bustee land

is situated. Such appeal shall be presented to the Court of Small Causes within thirty days of the decision of the objection under section one hundred and thirty-six A, and shall be accompanied with an extract from the register of objections containing the order objected to. No appeal shall be admitted unless an objection has first been taken under section one hundred and thirty-six."

was put to the vote and carried.

The Hon. Sir Henry Harrison's motion that, in section 138, for the words "two last preceding sections" the words "last preceding section" be substituted, was put to the vote and carried.

The Hon. Babu Kali Nath Mitter moved that section 151 be omitted.

He said :—This provision is not in the existing law. The water-supply to the shipping is working satisfactorily and no friction has arisen, and I do not see why a section of this sort fixing a maximum charge of Rs. 5 per thousand gallons should be introduced when Rs. 8 per thousand gallons is now charged without complaint. At present the Port Commissioners get all the water they want, ships are supplied with water, and I am not aware that any difficulty has arisen.

The Hon. Sir Henry Harrison said :—This section was inserted in the interests of the Port Commissioners. At present we charge Rs. 8 per thousand gallons, but the price is no doubt excessive when the cost of the water is from 2 to 2½ annas per thousand gallons, although the cost of putting it on board is something considerable. I think on the whole Rs. 5 per thousand gallons is really a very liberal allowance.

The Hon. Babu Kali Nath Mitter said in reply:—My argument is that no necessity has been shown for the introduction of such a provision. It is a notorious fact that one-third of the town has not yet been piped, and it might seem invidious to make legal provision for the supply of water to the shipping when a large proportion of those who have contributed to the expense of the water-supply have not yet been supplied. Charity begins at home, and I think that matters of this kind ought to be left to the discretion of the Commissioners.

The motion was put to the vote and negatived.

The Council was adjourned to Wednesday, the 18th April, 1888.

H. A. D. PHILLIPS,

for Asst. Secy. to the Govt. of Bengal,
Legislative Department.

CALCUTTA;
The 1*st May*, 1888.

RULES FOR THE GRANT OF LICENSES TO PROSPECT FOR METALS ON GOVERNMENT WASTE LAND.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 26th April, 1888.

RESOLUTION.

READ—

Letter No. 187TP—G, dated the 25th October, 1886, from the Conservator of Forests, Bengal.

Endorsement No 199TP—G, dated 5th November, 1886, from the Conservator of Forests, Bengal, with enclosures.

This Government's endorsement to the Board of Revenue, L.P., No. 2241—839LR, dated 19th November, 1886.

Letter No. 263A, dated 6th April, 1887, from the Board of Revenue, L.P., with enclosure.

Letter No. 150A, dated 2nd March, 1887, from the Board of Revenue, L P, with enclosure.

This Government's letter to the Board of Revenue, L.P., No. 1060—421LR, dated 7th April, 1887.

This Government's letter to the Board of Revenue, L.P., No. 43T—R, dated 17th June, 1887.

Endorsement from the Board of Revenue, L.P., No. 492A, dated 19th July, 1887, with enclosure.

Letter from the Board of Revenue, L.P., No. 157A, dated 13th February, 1888, with enclosures.

Read also—

The rules of the Madras Government for the grant of licenses to prospect for gold or other metals on Government waste land, published in the *Fort St George Gazette* under order No. 126 of 1st February, 1882.

It has been brought to the notice of the Bengal Government that great delay occurs in the disposal of the applications occasionally made for leave to prospect for minerals on Government estates, as local officers think it necessary to refer every case of the kind for special instructions, no general rules having been prescribed for their guidance; and, in the absence of any recognised policy, even the superior revenue authorities find much difficulty in issuing orders with the promptness which in such cases is of the greatest consequence. After consultation with the Board of Revenue and the officers of the Chota Nagpore Division, the Lieutenant-Governor is pleased to prescribe the following rules to be in force for two years, at the end of which period the matter will be reconsidered :—

1. Persons desirous of obtaining the exclusive privilege to search for metals on Government waste land should apply to the Collector or Deputy Commissioner of the District, specifying distinctly the situation of the land within which it is proposed to search, and its boundaries as accurately as possible, together with its estimated area. Every application should be accompanied by a rough sketch of the tract applied for, which must be a compact block not ordinarily exceeding half a square mile. Applications will be dealt with in order of receipt by the Collector or Deputy Commissioner. On an application being accepted by the Collector or Deputy Commissioner, a license to search for metals will be granted on the following conditions :—

(1). That the license shall be in force for a term of six months, and shall be available for purposes of prospecting only, and shall not justify mining proper.

(2). That a rent of one rupee per acre, or such lower amount as the Collector or Deputy Commissioner shall find to be adequate, shall be payable by the licensee in advance on the date of the grant of the license.

(3). That if the licensee satisfies the Collector or Deputy Commissioner that he has effectually explored the tract, he shall have the preferential right to a mining lease on such terms as Government may consider suitable.

(4). If the licensee shall have caused any injury by digging pits or otherwise to any land in excess of the extent for which he can obtain a mining lease, he shall pay to Government as compensation such sum as shall be required to repair the damage done; provided, however, that the amount so payable shall not exceed twenty-five times the assessment on the portion of the area affected, if assessed, or of the assessment which the lands would bear if they were rated in the same way as similar assessed lands in the neighbourhood.

(5). That in all questions or differences of opinion in regard to the observance or non-observance of the conditions of this license, the Lieutenant-Governor of Bengal shall be the arbiter, and his decision shall be final.

2. Without the written permission of the Collector or Deputy Commissioner previously obtained, the land applied for must not be entered upon, nor operations commenced.

3. Immediately on receipt of an application for permission to search for metals in a specified tract of country, the Collector or Deputy Commissioner shall ascertain whether the land is at the disposal of Government, and whether there is any objection to the grant of the permission sought, by reason of the land being required for public purposes, or on any other ground.

4. If no such objection is known to exist, the Collector or Deputy Commissioner will accept the application, and will, without loss of time, place the land in the possession of the applicant and grant him a license in the form prscribed below.

5. A register of applications to search for metals shall be kept in the Collector's or Deputy Commissioner's office in English in the following form:—

Register of Applications for permission to search for Metals.

Number.	Date of application.	Name and residence of applicant.	Situation of the land, *i.e.*, district, sub-division, village, &c.	Boundaries of the land.	Estimated extent.	Date of license.	REMARKS.
1	2	3	4	5	6	7	8

NOTE.—In the Remark column it should be stated whether the application is for permission to search for gold or other metals, and whether a mining lease was eventually granted, reference being made in such cases to the number of such lease in the register.

Form of License to search for Metals.

Whereas A.B. of has applied to the Collector / Deputy Commissioner of acting for and on behalf of the Right Honorable the Secretary of State for India in Council, for the grant to him the said A. B. of the full and exclusive license and authority to search for metals in, under, and throughout the tract of Government land measuring about acres in extent and particularly described in the schedule hereunder written; and whereas the said A.B. has paid to the said Collector / Deputy Commissioner acting as aforesaid the sum of Rs. being rent at the rate of per acre of the said tract of land for such full and exclusive license and authority; now these presents witness that the said Secretary of State in Council in consideration of the said sum of Rs. so paid by the said A.B., as aforesaid, hereby gives and grants to the said A.B. full and exclusive license and authority to enter upon and to search for metals for the period of six calendar months in, under, and throughout the said tract of land upon the following terms, that is to say,

1. That the said A.B. forthwith commences and during the aforesaid term continues to explore the said lands and search for metals therein in a skilful and workmanlike manner.

2. That if the said A.B. shall have caused any injury by digging pits or otherwise to any land in excess of the extent for which he can obtain a mining lease, he shall pay to the Government of Bengal as compensation such sum as shall be required to repair the damage done; provided, however, that the amount so payable shall not exceed twenty-five times the assessment on the portion of the said lands so damaged, if assessed, or of the assessment which such lands would bear if they were rated in the same way as similar assessed lands in the neighbourhood.

3. That in all questions or differences of opinion on points connected with this license the Lieutenant-Governor of Bengal for the time being shall be the arbiter and his decision shall be final. This license shall be available for prospecting purposes only and shall not justify mining proper. Dated the day of 18 .

Schedule.

District.	Sub-division.	Village.	Boundaries.	Estimated extent.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that copies of it be forwarded to the Board of Revenue, Lower Provinces, and all Commissioners of Divisions and District Officers.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

REPORT ON THE TORNADO WHICH VISITED DACCA ON THE 7th APRIL 1888.

No. 877J, dated Dacca, the 27th April 1888.

From—W. R. LARMINIE, ESQ., Commissioner of the Dacca Division,
To—The Chief Secretary to the Government of Bengal.

I HAVE the honour to forward herewith a copy of the Magistrate of Dacca's report on the tornado which visited Dacca on the 7th April last.

2. Although at the time within a few hundred yards of the centre of the storm, I did not observe any special violence, but noticed the peculiar noise as of a number of trains. I was not aware, till next morning, that any great damage had been done.

3. As Dr. Crombie has prepared a scientific account of the tornado, it is unnecessary for me to enter into any details as far as that branch of the subject is concerned.

4. The damage done to life and property has been stated by the Magistrate, and I am satisfied that he has not over-estimated it. I have myself gone over the greater part of the area which suffered; and if I had not done so, would have found it difficult to credit the completeness of the damage done.

5. Great credit is due to Mr. Clark and his subordinates for their prompt and continued exertions; also to Mr. S. J. Sarkies, Secretary to the Municipality.

6. The liberality displayed by the Nawab in particular, and the other gentlemen named, in regard to the relief of the sufferers, deserves special notice. The list has since been increased by the name of Baboo Protab Chandra Banerjea, who has subscribed Rs. 500.

7. Every care is being taken that the money at our disposal is being judiciously distributed.

No. 835, dated Dacca, the 25th April 1888.

From—L. HARE, ESQ., Offg. Magistrate of Dacca,
To—The Commissioner of the Dacca Division.

I HAVE the honour to submit a formal report upon the recent tornado, and to furnish a statement showing the damage it caused.

2. On the night of Saturday, the 7th April, there was to all appearance only the signs of an ordinary storm. I hurried home from polo before the game was ended at about 6-20, and got home just as the storm began.

At about 7 o'clock P.M. the tornado struck the town, and so sudden was its arrival, and so partial the course it took, that those outside its path were hardly aware of anything unusual.

3. On the night of Saturday it was clear that very much damage had been done, but it was not until Sunday morning that anything like a full idea could be formed of the enormous extent of the damage. At first I was of opinion that there had only been in a part of the town a somewhat more severe storm of wind than I had experienced in my own house, and that it was only thatched houses and badly constructed kutcha-pucca houses which had suffered. But subsequent examination showed that even fairly well built pucca houses, such as the Nawab's house, had been wrecked by the tornado.

4. The tornado appears to have entered the town on the north-west extremity and to have followed the river bank for some distance, and turned in towards the lunatic asylum, a bit of the wall of which was thrown down. It then turned back to the river, which it crossed into Keranigunge, the suburb on the opposite bank of the river to Dacca. Here it did great damage to the boats moored to the banks. It then went inland for some two or three hundred yards. Then it stopped and turned at right angles to its former course, going straight for the Nawab's Ahsun Munzol. Here, and close behind this building, the greatest havoc was committed. After travelling through Saukari Bazar, the tornado disappeared apparently between the College and the Cutcheries.

5. Dr. Crombie, Civil Surgeon, has written a detailed account of the tornado, which has been submitted to Mr. Pedlar, who is preparing a scientific account of the tornado for the Lieutenant-Governor, and it is not necessary to give any further description of the storm.

6. All along its track houses were wrecked and unroofed, and in many places, as I have stated, pucca buildings were demolished. If I had not seen it, I would not have believed it possible that such a complete wreck could have been caused by the wind.

The damage seems to have been all done in some two or three minutes, and was not the result of a continually increasing pressure of wind, but apparently of a sudden, irresistible and overwhelming force of wind.

7. As to the damage done, as far as can be ascertained 118 persons were killed by the fall of houses and flying bricks and bamboos, or were drowned. It is probable that more were drowned than there were bodies recovered, and it is impossible to say how many were really drowned, as many of the boats destroyed had only recently arrived and were manned by foreigners.

Of wounded people, as many as 1,200 were counted, and of these 222 were seriously wounded and treated in hospital. Besides the attendance given at the hospital, 248 persons were treated in their own homes. The Civil Surgeon, Dr. Crombie, and the Assistant Surgeons (especially Mr. Kelly) were indefatigable in their exertions to help the wounded. Additional Hospital Assistants were also employed to visit people at their homes.

8. When on Sunday as the ruins began to be cleared and more and more bodies were found and the wounded began to pour into the hospital, something like a panic occurred for a short time, and there was some difficulty in keeping the hospital clear of the crowd.

9. The damage done to property has been estimated at Rs. 6,78,428; nine pucca houses were completely demolished and 148 partially so. Of cutcha houses 3,518 were completely and 61 partially destroyed, and 121 boats were wrecked. Amongst the latter was the District Superintendent of Police's Government steamer *Marion*, which was sunk.

10. The police behaved very well and worked hard throughout Saturday night and Sunday in maintaining order in the excitement which prevailed, and in guarding the large amount of property which was exposed.

No cases of theft in connection with this calamity have been reported. They also did much useful work in rescuing buried persons and forwarding wounded persons to the hospital. Mr. Clark, District Superintendent, worked most admirably. He specially mentions the assistance rendered by Inspector Abhoy Charu Ghose, who has also since given me much help.

11. The streets, many of which were wholly or partially blocked by debris, were speedily cleared by the exertions of Mr. S. J. Sarkies, Secretary to the Municipal Committee, who superintended and directed the municipal coolies.

12. For the relief of those who have suffered by the calamity, the Nawab has generously given you Rs. 10,000, and Rs. 5,000 was subscribed by Baboo Raghu Nath Das, Rs. 1,000 by Baboo Sonatun Das, and Rs. 500 by Baboo Sri Nath Roy. The generosity of the Nawab is the more marked, inasmuch as he is one of the principal sufferers by the storm.

13. Enquiries have been steadily conducted and are still being conducted to ascertain who of the many sufferers from the tornado should be relieved. Already Rs. 5,670 have been distributed, and further sums are being distributed daily.

14. Very shortly after the tornado visited Dacca, a part of the Munshiganj sub-division was visited by a tornado, either the same or another. The damage done by this was very severe, and it is at present reported that 66 deaths occurred, and that 128 persons were wounded. This tornado passed for a great part through open country, and did comparatively little harm to property, though, where it did strike houses, it carried them away more completely than in the crowded city of Dacca.

15. Medical assistance was at once sent to the villages which had suffered, and Rs. 1,000 has been put at the disposal of the Sub-divisional Officer from your relief fund for the assistance of those who require it.

Statement showing the nature of damage done by the Tornado of the 7th April 1888 in the City of Dacca and Keranigunge Station.

STATIONS.	Number of pucca house completely demolished.	Number of pucca houses partially demolished.	Number of cutcha barries completely demolished.	Number of cutcha barries partially demolished.	Number of boats destroyed.	Estimated value.	Number of persons killed.	Number of persons wounded seriously and treated in hospital.	Number of persons who died in hospital up to 16th instant.	Number of wounded persons attended in private houses by Government doctors.	Total number of persons wounded, including those in columns 9, 10 and 11.	REMARKS.

R. N. W. PRITCHARD,
For District Supdt. of Police.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 28th April 1888.

Division	No.	District and date of return	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.		*Western Districts.*		
BURDWAN DIVN.	1	Burdwan Apl. 28, '88	0·23	Weather—cloudy and stormy. Rain has done much good to standing crops Land is being ploughed. Rice selling at 22 seers per rupee.
		Culna ...	0·80	
		Cutwa ...	1·39	
		Raneegunge ...	1·86	
	2	Bankoora ,, 28, '88	1·23	Weather—cool and cloudy. Rain beneficial to cultivation of early rice. Lands are being prepared for *aus* and *telko* paddy. Indigo, *til* and cotton doing well. Planting of sugarcane proceeds. Prices stationary.
	3	Beerbhoom ,, 28, '88	1·16	Sky overcast. Occasional storms and frequent showers. Cool. Rain has enabled cultivators to commence ploughing and planting sugarcane, and has done good to mangoes and vegetation generally.
		Rampur_ Haut ...	0·82	
	4	Midnapur ,, 28, '88	2·58	More or less rain in the evenings during the week. Rain has cooled the air and has been very useful, as water-supply was failing. Fields are being ploughed. Outturn of *boro* fairly good.
	5	Hooghly ,, 28, '88	1·42	Weather—stormy. Good rain has now fallen and agricultural operations have been resumed.
		Serampur ...	0·46	
		Jehanabad ...	2·13	
		Howrah ,, 28, '88	2·84	Stormy evenings. State and prospects of crops good.
		Oolooberiah ...	1·04	
		Central Districts.		
PRESIDENCY DIVN.	6	24-Perghs. Apl 28, '88	3·35	Weather—rainy. Winds variable. No crops on the ground except sugarcane, which is doing well. Ploughing continues. Prospects favourable.
	7	Nuddea ,, 28, '88	1·18	General rain. Weather cooler; very unsettled and stormy. Continual rain during the week retarded cultivation. Prospects considerably improved. *Aus* sowings have germinated well.
		Kooshtea ...	3·77	
		Meherpur ...	2·61	
		Chooadanga ...	3·15	
		Ranaghat ...	1·[illegible]5	
	8	Khoolna ,, 28, '88	2·25	Weather—overcast; wind and thunder-showers since 22nd. Temperature fallen. The rain is desirable for cultivation.
	9	Jessore ,, 28, '88	3·32	Weather—rainy and cloudy. Rain has benefited cultivation of early rice and indigo
		Jhenidah ...	4·16	
		Magurah ...	3·31	
		Narail ...	2·17	
		Bongong ...	1·27	
	10	Moorshedabad ,, 28, '88	1·31	Weather—cool and cloudy. Timely rain has done much good to early rice and indigo. Ploughing for *aus* and *amun* rice commenced.
		Kandi ..	1·84	
		Lalbag ...	1·16	
		Jungipur ...	0·68	
	11	Dinagepur Apl. 28, '88	5·79	Weather—stormy during early part of week, now clear with sunshine. Rain has done much good to crops.
		Thakurgaon ...	3·85	
RAJSHAHYE DIVN.	12	Rajshahye ,, 28, '88	1·29	Weather- still cool. Quite cold up to 26th instant. Easterly wind. Condition of *til*, sugarcane, jute and *boro* paddy good. Rain has benefited sowing of *amun* and *aus*, but more wanted.
		Nattore ...	2·20	
		Nowgong ..	0·44	
	13	Rungpur ,, 28, '88	4·15	Prospects of *aus* paddy and jute appear to be very good, as plentiful rain has fallen, and the fine weather since is favourable to weeding.
		Kurigram ...	1·28	
		Gaibanda ...	4·18	
		Nilphamari ...	4·92	
	14	Bogra ,, 28, '88	2·00	Weather—cool with wind and rain. Prospects of crops good. Advantage taken of rain for ploughing and early sowings.
		Sherpur ...	2·96	
		Nowkhilla ...	2·90	
	15	Pubna ,, 28, '88	5·42	Weather—stormy and very cool. State and prospects of crops continue good.
		Serajgunge ...	4·99	
	16	Darjeeling ,, 28, '88	1·50	Heavy passing showers. State and prospects of crops good.
	17	Julpigoree ,, 28, '88	8·70	Weather—cool and pleasant. Heavy showers on the 22nd, 24th and 26th. Sowing of *bhadoi* continues. Rain has improved prospects. Prices stationary.
		Eastern Districts.		
DACCA DIVISION.	18	Dacca Apl. 28, '88	5·56	Weather—cloudy and stormy with rain. *Boro* paddy is being harvested. Cutting of *cheena* and *kaon* nearly completed. *Amun* and *aus* paddy are being sown, but excessive rain has to certain extent retarded ploughing and sowing.
		Manickgunge ...	4·43	
		Munshigunge ...	4·96	
		Naraingunge ...	7·69	
	19	Furreedpur ,, 28, '88	4·15	Weather—stormy. Good rain has fallen, and state and prospects of crops are good.
		Goalundo ...	0·75	
		Madaripur ...	2·74	
	20	Backergunge ,, 27, '88	2·08	High wind with occasional rain. *Rubbi* crops almost harvested; outturn fair. Ground is being prepared for *aus* paddy.
		Bhola ...	0·84	
		Patuakhali ...	1·24	
		Perozepur ...	2·07	
	21	Mymensingh ,, 27, '88	4·13	Weather—cool. Rain all over the district. Prospects of crops good. Rain has done much good.
		Jamalpur ...	0·52	
		Kishoregunge ...	2·35	
		Attia ...	1·07	
		Netrokona ...	2·05	

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
		Eastern Districts—concld.		
CHITTAGONG DIVN.	22	Chittagong ...	...	Report not received.
	23	Noakholly „ 27, '88	3·58	Weather—cloudy and stormy. Harvesting of *rubbi* crops almost completed. Sowing of *aus* continues.
		Fenny ...	3·79	
	24	Tipperah „ 26, '88	4·53	Weather—very cool for the time of the year. Rain has fallen, and cultivation is in full swing. Jute has been sown almost completely. Prospects good. A little break in the rain would be beneficial.
		Brahmanbariah ...	6·51	
		Chandpur ...	1·14	
	25	Chittagong Hill Tracts. „ 24, '88	1·67	Weather—rainy during first part of week with strong rotatory storms. Sowing in *jums* continues. Sugarcane is being planted.
		Hill Tipperah „ 25, '88	8·29	Weather—hot and stormy with copious showers of rain. Planting of sugarcane has commenced. *Jums* are being cultivated.
BEHAR.				
PATNA DIVN.	26	Patna Apl. 28, '88	Nil	Weather—nights somewhat cool during the latter part of the week. Threshing of *rubbi* crops still going on; a fair outturn expected. Fields are being prepared for sowing *cheena*. Mango crop has suffered some damage owing to strong west wind. Prices of food-grains almost stationary.
	27	Gya „ 28, '88	Nil	Weather—very hot. Threshing of *rubbi* nearly finished. Sugarcane being irrigated. Opium weighments finished.
	28	Shahabad „ 28, '88	Nil	Weather—seasonable; east wind prevails. Threshing of *rubbi* crops nearly over. Sugarcane and *cheena* promise well.
	29	Durbhunga „ 28, '88	0·80	Weather—cloudy with east wind. Rain has much benefited *moong* and *dhan*. Indigo doing well. Prices remain stationary.
	30	Mozufferpur „ 28, '88	0·56	Strong east winds. Rain has been beneficial to *moong* and *cheena*, though some damage was done to these crops in Sitamarhi by hail. Threshing of *rubbi* crops progressing.
		Sitamarhi ...	2·70	
		Hajeepur ...	Nil	
	31	Sarun „ 28, '88	Nil	Weather—seasonable. Indigo continues to do well. Fields are being prepared for *bhadoi* and paddy. *Cheena* and sugarcane fields are being irrigated.
	32	Chumparun „ 28, '88	0·95	Weather—moderately hot with east wind. Threshing of *rubbi* crops finished. *Bhadoi* and *aghani* sowings going on. Opium weighments progressing. Rainfall of the week has very much benefited *cheena* and indigo, and other standing crops.
BHAGULPORE DIVN.	33	Monghyr Apl. 28, '88	Nil	Weather—days hot and sultry with high east wind, nights cool. *Rubbi* threshing almost completed. Lands are being prepared for *bhadoi* crops.
		Jamui ...	0·32	
	34	Bhagulpur „ 28, '88	0·65	Weather—cool with strong east wind. Rain has benefited early sowings of rice and *moong*. It will bring on indigo and assist cultivation. Mango crop poor and damaged by hail. Sugarcane doing well.
		Madhupur ...	2·12	
		Soopool ...	1·22	
	35	Purneah „ 28, '88	2·43	Weather—cool with easterly winds. All crops have benefited by the rain which has been well distributed.
		Kishengunge ...	10·48	
		Arrareah ...	3·03	
	36	Maldah „ 28, '88	0·07	Weather—cool and cloudy. Harvesting of *boro* paddy begun. Rain has done some good to standing crops, but more wanted for sowings of *bhadoi* paddy and for preparing lands for winter rice. Common rice is selling at an average of 23¼ seers per rupee.
		Chanchal ..	0·51	
		Gazole ...	0·78	
		Suibgunge ...	0·1	
	37	Sonthal Perghs. „ 28, '88	0·81	East winds with rain. Weather cool. *Boro dhan* doing well. More rain wanted for ploughing and for sugarcane.
		Deoghur ...	0·22	
		Godda ...	0·24	
		Pakour ...	0·28	
		Rajmahal ...	0·14	
ORISSA.				
ORISSA DIVN.	38	Cuttack Apl. 27, '88	Nil	Weather—mornings cool; evenings cool with high winds; middays extremely hot. High winds prevailing from south-east. Ploughing for *beali* and *sarad* rice stopped for want of rain. Reaping of *dalua* rice going on. Mango ripening. Common rice is sold at 21 seers per rupee in town.
	39	Pooree „ 26, '88	Nil	Weather—seasonable with high winds. Land is being ploughed for *sarad* crop. *Dalua* crop is being harvested. Common rice 23 seers 7 chittacks per rupee in the Sudder sub-division, and 23 seers 6 chittacks in the Khoorda sub-division.
		Khoorda ...	Nil	
	40	Balasore „ 27, '88	1·11	Weather—stormy. Rain has been very beneficial in the north of the district. More rain wanted for cultivation in the Bhudruck sub-division.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
CHOTA NAGPORE DIVN.	41	Hazaribagh, Apl. 27, '88	Nil	Weather—rather unsettled and much cooler latterly. Sugarcane doing well. Mango promising. No other crops.
	42	Lohardugga „ 28, '88	Nil	Weather—cloudy, but no rain. No standing crops to report on. Prices steady.
	43	Singbhoom „ 27, '88	Nil	Weather—very hot and cloudy at times. Sugarcane doing well. No other crops to report on.
	44	Manbhoom „ 28, '88	0·52	Weather—cool and cloudy. Rain has done good. Fields are being ploughed up. Outturn of *mohua* and mango good.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, p passing temporary showers, t thunder, d drizzling rain, < lightning, K thunder-storm.

* Means for six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12 stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 27th of April 1888.

DISTRICT OBSERVATIONS.

Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	Rainfall: Of week: Mean for district.	Rainfall: Of week: Normal mean.	Rainfall: Since 1st of month: Mean for district.	Rainfall: Since 1st of month: Normal mean.	Rainfall: Since 1st of month: Variation.	Rainfall: Since 16th May 1887: Mean for district.	Rainfall: Since 16th May 1887: Normal mean.	Rainfall: Since 16th May 1887: Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

he variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater.
enoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal mean
ears. The means of the district are the numerical average of the rainfall return received in the district, *i.e.*, from total rainfall at the sub-divisions

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 27th of April 1888.

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the* 1*st May* 1888.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 27TH OF APRIL 1888.

In the report for the previous week it was noticed that towards its close the meteorological conditions obtaining over the province had undergone a considerable change, and that a moist easterly wind current had set in at the eastern and northern stations, and have gradually driven back the dry westerly current which had been previously blowing over almost the entire province. As usually happens in such cases, where there are two conflicting wind systems, which are opposed both in direction and character, weather conditions at once became disturbed, and local storms attended with rain occurred in the eastern, northern and southern districts. Similar conditions have obtained throughout the present week; a very moist easterly wind current has prevailed over the greater part of the province, and has even penetrated over the greater part of Behar, though westerly and south-westerly winds have been still blowing generally in Chutia Nagpur and Orissa and at the neighbouring stations of South-West Bengal. Consequently weather conditions have remained decidedly disturbed in Bengal throughout the week, and local storms with rain have been extremely frequent. The districts of Pooree and Cuttack in Orissa, and all the districts of South Behar and Chutia Nagpur, except Sonthal Pergunnahs and Maubhoom, have, however, been comparatively free from these storms, and rainfall in these districts has been scanty, but in the districts of East and North Bengal these storms have been very numerous, and the rainfall brought by them has been heavy. Some of these storms have again been exceptionally severe, and notice has been received that in the Hooghly district, on the evening of Friday, the 23rd, the small town of Bhudressur, which is close to Serampore, or only 16 or 17 miles north of Calcutta, was visited by a small but severe tornado, which lasted from about three to six minutes. Mr. Duke, the Sub-divisional Officer, Serampore, writes that the storm entered the south-eastern part of the town from the river about 8 o'clock in the evening. At first the direction of the track was north-west by north, and having travelled about 1½ miles, finally left north-east about the northern part of Bhudressur, disappearing in the river as it had come. The breadth of the course was about 200 to 300 yards on land from the shore, and the centre and point of greatest violence about the line of the riverbank near the gunge. The winds rotated from right to left, and the tornado was preceded by a booming sound. Much damage was done and large boats were lifted out of the water and thrown over the banks, and in one case a dinghi had been blow up on to a tree which had first been partially blown down. Seven persons are known to have been killed and three are missing, while a considerable number have been injured. Even up till the close of the week these disturbed conditions have continued over a large part of the province, nor did there at that time appear to be any immediate prospect of more settled weather setting in over the province.

Pressure.—As might be expected from the unsettled weather which has been experienced during the week, the pressure oscillations have been unusually large and varied. Thus on Friday, the 21st, there was an increase of pressure at many stations of nearly a tenth of an inch, which was followed by a further rise on the 22nd of about half that amount; on Monday, the 23rd, there was a fall which in some cases exceeded a tenth of an inch, which was followed by a further moderate fall on the 24th. A still larger fall took place on the 25th, but on the 26th this was succeeded by a rapid rise, while on the last day of the week the pressure changes were comparatively small. At neighbouring stations also the amounts of these changes have been rather variable, pointing clearly to a disturbed state of the atmosphere. A rather important result of the changes which have taken place during the week has been the establishment of a distinct low pressure area over Chutia Nagpur and the western parts of the province generally, and thus the mean pressure for the week is decidedly below the normal over this area, while almost the whole of the remainder of the province shows a pressure in excess of the normal. Taking, however, the whole province into consideration, the mean pressure for the week has been 0·012 inch above the normal. The largest variations from the normal have been a defect of 0·029 inch at Gya and one of 0·026 inch at Hazaribagh, and an excess of 0·048 inch at Durbhunga and one of 0·046 inch at Dacca.

Temperature—Has fallen rather rapidly during the week over the greater part of the province, and has remained rather low owing to the succession of small storms and rain. Thus, while the mean temperature of the province for the previous week was 2·2° in excess of the normal, in the present week the mean temperature has been 3·5° below the normal. The defect is particularly large in North Bengal, where it amounts to 6·9°, and in East Bengal and North Behar, where it is from 5° to 6°; while on the other hand temperature has been in slight excess in Chutia Nagpur, where there has been little or no rain. The defects at particular stations are even larger than those just quoted, and at Berhampur the mean temperature for the week has been 9° below the normal, and at Rampur Beauleah 10·2° below it.

The following table, which gives the actual average temperatures during the week and their variations from the normal values at nine typical stations in the province, will show the general temperature distribution clearly :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 27th April 1888.

	Normal mean maximum temperature for the week ending 27th April	Actual mean maximum temperature for the week ending 27th April 1888.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 27th April.	Actual mean minimum temperature for the week ending 27th April 1888.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 27th April.	Actual mean daily temperature for the week ending 27th April 1888.	Variation of actual mean from the normal.
Cuttack	101·8	103·8	+2·0	78·3	79·5	+1·2	90·1	91·7	+1·6

Hazaribagh	99·3	100·4	+1·1	72·6	73·4	+0·8	86·0	86·9	+0·9
Darjeeling	61·0	59·7	−1·3	47·3	47·5	+0·2	54·2	53·6	−0·6

Rainfall.—Decidedly heavy rain has fallen in East and North Bengal, which have received an average amount of about four inches during the week. South-West Bengal and North Behar have also received good rain, and an average fall of about one-and-three-quarters to one and-a-half inches is recorded. The fall in Orissa has been much smaller and has been mainly confined to the Balasore district ; in South Behar the fall has been principally in the Sonthal Pergunnahs district ; and in Chutia Nagpur the slight fall has been to a great extent in Manbhoom. In the last three large meteorological divisions, however, the average rainfall only varies from about three-tenths to one-tenth of an inch.

In East Bengal all the districts have received good rain, but the Dacca district has received very heavy falls averaging six inches for the week. In South-West Bengal, Jessore and Khoolna and the 24-Pergunnahs have received the largest amounts, and in North Bengal, Pubna, Rungpore and Julpigoree districts have received heavy falls, while Maldah has registered a comparatively light fall. In Orissa the Balasore district has received nearly an inch, Pooree and Cuttack being almost rainless. In North Behar, Mozufferpore and Purneah report good rain, while in South Behar all districts have been practically rainless, except the Sonthal Pergunnahs. In Chutia Nagpur a few isolated stations only report rain.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 27th of April 1888 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of Month.		Since 15th May 1887.

The mean temperature of the seven days	81·9
The extreme variation of temperature	30·9
The maximum temperature	97·0
	%
The mean relative humidity	81
	Inches.
The total fall of rain from 22nd to 28th April 1888	2·78

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;
The 30th April 1888.

ALEX. PEDLER,
For Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

THE principal Municipalities in Bengal registered, during the week ending 14th April 1888, births and deaths at the rates of 19·3 and 29·8 per 1,000 of population, respectively, as opposed to 19·9 and 27·5 per 1,000, respectively, in the preceding week ending 7th April, indicating a sensible improvement in the registration of deaths.

2. With regard to local distribution of the births and deaths of the week in question, the following Municipalities show the highest rates:—

Births.

	Ratio per *mille*.
Monghyr	44·3
Bhagulpore	35·3
Serampore	33·4
Beauleah	31·5
Durbhanga	30·7

Deaths.

	Ratio per *mille*.
Beauleah	110·4
Naraingunj	103·5
Jessore	97·9
Serampore	86·4
Suburbs of Calcutta	49·2
Chittagong	42·3
Durbhanga	37·8
Gya	32·8
Purneah	31·1
Comillah	30·8

3. In comparison with the results of the preceding week, there was a noticeable enhancement of mortality from cholera and fever, particularly from cholera, and only small differences in the casualty-rates from the rest of the death-causes, *vide* figures given below—

	Ratio per *mille* during the weeks ending—	
	14th April 1888	7th April 1888.
Cholera	9·8	8·1
Small-pox	·1	·2
Fever	9·9	9·0
Bowel-complaints	3·1	2·7
Injury	·5	·4
Other causes	6·4	7·0

4. The following Municipalities appear to have suffered the most from the diseases specified in the above table, excepting small-pox, bowel-complaints and injury, the casualties from which were nowhere above normal:—

Cholera.

	Ratio per *mille*.
Jessore	97·9
Beauleah	78·8
Naraingunj	74·5
Serampore	39·3
Chittagong	23·5
Suburbs of Calcutta	21·5
Comillah	19·2
Howrah	13·7
Hughli	10·7
Dacca	4·5

Fever.

	Ratio per *mille*.
Beauleah	28·9
Purneah	27·7
Durbhanga	22·8
Gya	21·8

Other causes.

	Ratio per *mille*.
Serampore	25·5
Naraingunj	16·5
Puri	10·5
Dacca	9·7
Suburbs of Calcutta	9·5

It will be seen that, in comparison with the results of the preceding week, the severity of cholera had abated considerably in Serampore, but that in Jessore, Beauleah, and Naraingunj the prevalence of the disease was very severe.

5. The mortality of the week, distributed under the heads of *Sex*, *Class* and *Age*, stood as indicated below—

According to Sex.

	Ratio per *mille*.
Males	34·0
Females	25·1
Ratio of male deaths to every 100 female deaths	153

According to Class.

	Ratio per *mille*.
Christians	21·7
Hindus	26·7
Mahomedans	37·4
Budhists	24·2

According to Age.

	Ratio per *mille*.
Under 1 year	190·4
1 and under 5 years	38·9
5 „ 10 „	20·6
10 „ 15 „	17·2
15 „ 20 „	21·4
20 „ 30 „	20·9
30 „ 40 „	23·9
40 „ 50 „	23·7
50 „ 60 „	33·3
60 years and upwards	55·6

K. P. GUPTA, M.B., F.R.C.S., *Surgeon-Major,*
Offg. Sanitary Commissioner for Bengal.

The 30th April 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "Age," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

Comparative Statement of the principal commodities carried over the Bengal Central Railway during the month of January 1888.

INCREASES.

	Tons.
Coal	1,336
For Railway and Flotilla purposes principally.	
Rice	609
Singia, Nawapara and Khulna contributed this increase.	
Betelnuts	161
Almost exclusively from Bengal Central Flotilla stations, Khulna showing a decrease of about 30 tons.	
Sugar	274
From Goberdanga and Ilukergacha principally.	

DECREASES.

The decreases under all heads are insignificant, aggregating only 278 tons.

CALCUTTA, *the 19th March* 1888.

F. P. QUINLAN, *Examiner of Accounts.*

Nalhati State Railway.

Statement showing Increases and Decreases in tonnage of Staples carried over the Nalhati State Railway during the month of March 1888, as compared with the same month of the previous year.

INCREASE. — Tons.

Cotton piece-goods—
(1) European ... 19
This increase is due to steamer not running between Jeaganj and Calcutta, the river being dry.

Grains—
(1) Wheat ... 7
(2) Rice ... 190
(4) Gram ... 23
(5) Others ... 20
The increase is due to steamer not running between Jeaganj and Calcutta, the river being dry; and to greater despatches from intermediate stations owing to good crops and favourable demands.

Salt ... 37
This increase is due to steamer not running between Jeaganj and Calcutta, the river being dry.

Oilseeds—
(1) Linseed ... 13
(2) Mustard and rape ... 47
(6) Others ... 41
This increase is due to river communication being stopped for want of water.

Stone and lime ... 11
This increase is due to more lime carried for building purposes.

Tobacco ... 18
This increase is due to river communication being stopped for want of water.

All other articles of merchandise ... 64
This increase is due to steamers not running between Jeaganj and Calcutta.

DECREASE.

Coal ... 204
This decrease is due to brick-burning coming to a close.

Jute—
(1) Raw ... 45
This decrease is due to no jute being carried for low market rate.

R. G. MOOKERJEE, *Manager, Nalhati State Railway.*

Printed and published by Edwin Morris Lewis, at the Printing Office of the Bengal Secretariat, Writers' Buildings, in the City of Calcutta, 2nd May 1888.

protesting against a number of the provisions of the Municipal Bill that is before you. Many of the points to which they have objected have already been decided by the Council; there are others which are still waiting for the Council to consider. A copy of the memorial and of my reply will be laid before you to-day, but I should tell you that in my reply I thought it necessary to say, in regard to those sections which have already been debated by the Council, and in respect of which decisions have been come, seeing that a Select Committee, consisting first of seven and subsequently of nine out of twelve members of the Council, have already through two Sessions made two separate careful investigations and examinations of the Bill—I say that, considering the constitution of the Council with relation to the Select Committee, I thought it would be scarcely consistent with proper respect towards the Council if I were to ask them without fresh arguments being put forward to reconsider their decisions. At the same time, if I should hear of any desire on the part of the Council to take up any of the points already decided, I shall not let any technical objection stand in the way. I think it right that this should be mentioned to you and the memorial placed before you in case the Council wishes to express any views or desires on the point.

The HON. SIR HENRY HARRISON moved that the clauses of the Bill to consolidate and amend the law relating to the Municipal affairs of the Town and Suburbs of Calcutta, as further amended, be further considered for settlement in the form recommended by the Select Committee.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON said:—I may be out of order, but perhaps your Honour will not object to my saying a few words on one point of the Building Regulations, with reference to section 233 and the recent accident in Kyd Street, so that if any members consider an amendment of the law ought to be made, they should have an opportunity of bringing it forward. A similar accident occurred some time ago, and the Coroner's jury having made some remarks as to the functions of the Municipality with respect to such buildings, we took legal advice, and the opinion clearly expressed by the Solicitors to the Corporation was that the present section does not impose any obligation of an inquisitorial character with regard to buildings which are not dangerous to a highway. The Government thought it expedient to take further opinion on the subject, and the opinion of the learned Advocate-General was to the same effect. Therefore in preparing this Bill it was fully considered whether it was desirable to impose any further obligations, and, as far as I am concerned, it was deliberately decided that it was not expedient to do so. I wish to draw attention to the distinction between watching over the safety of all buildings and of those which are absolutely dangerous to the public safety. But in case any hon. member thinks that the Corporation should have an obligation imposed on them with reference to all buildings, whether dangerous to the public safety or also to the inmates, I draw attention to the provisions of section 233, so that members may have an opportunity of proposing an amendment if desired.

In accordance with the instructions received from the Government of India, which your Honour explained to the Council two meetings ago, in the amendment which I now propose by way of addition to section 37 of the Bill I have endeavoured to embody the views and wishes of the Government of India. It makes no change in the intentions of the Government in framing the law, but it makes it obligatory upon the Corporation by law always to spend three lakhs of rupees annually—equivalent approximately to the town police rate—on the improvement of the added area. The following amendment does nothing more than reduce to words the obligations which it is always understood that the Corporation would undertake. Accordingly I move that the following clause be added to section 37:—

"(7). Devote to the improvement of the area newly added to Calcutta by this Act not less than three lakhs of rupees annually from the receipts of the revenue funds described in sections one hundred and two, one hundred and three, and one hundred and five of this Act.

Provided that the instalments of interest and reserve fund payable on any capital sum expended under clauses (3), (4) and (5) of this section for the improvement of that area shall be taken as part of the three lakhs of rupees."

The HON. BABU KALI NATH MITTER said :—As the amendment is worded, it is not open to any other objection than this. By an earlier clause (3) of the section an obligation is imposed on the Commissioners to spend two lakhs for drainage and bustees. So far as the drainage works of the town are concerned, they are almost completed now, and probably in another year or two there will be no appreciable expenditure on those works. And as regards the improvement of bustees, I believe in the course of another year the improvements contemplated three years ago at an estimate of Rs. 7,50,000 will also be completed. Therefore the greater part of these two lakhs will after a year or two be available for the improvement of the added area. That being so, is it desirable to make it obligatory to spend a further sum of Rs. 3,00,000, making Rs. 5,00,000 in all, for the improvement of the added area? As far as I understand the obligation, it has reference only to the contribution on account of Police. Such relief, without going to the benefit of the rate-payers, was originally intended to go to the benefit of the town; but since the question of the amalgamation has come up, it was decided to appropriate it for the improvement of the added area. That has been throughout the understanding, and I am quite willing that that understanding should be made clear by the law to save any misunderstanding hereafter. But if it is put in the form proposed, without having regard to clause (3), it might be that it will be obligatory to spend five lakhs on the Suburbs, which is far more than what was contemplated.

The HON. SIR HENRY HARRISON said in reply :—It appears to me that clause (3) must stand on its own merits and it was passed without objection, being mainly taken from the existing law. Instead of an obligation to spend Rs. 1,50,000, as in the existing law, on drainage, the Corporation is required to spend Rs. 2,00,000 on drainage and bustees. No doubt something should be done to drain the Suburbs. How much is a difficult question, whether Rs. 200,00,000 or 50, 40 or 30 lakhs, which is an inside estimate. The system of drainage remains to be decided on the best advice available. Still a considerable sum must be spent for a considerable time, and that is the reason why bustee improvement is thrown in with drainage. My hon. friend is correct in supposing that it would mainly be spent on the added area. The interest, &c., on the sums thus borrowed will be part of the three lakhs

The motion was put to the vote and carried.

The HON. BABU KALI NATH MITTER moved that in section 155 the words "five thousand gallons" be substituted for "three thousand gallons"; and that the words "through a ferrule, the size of which is to be determined by the Commissioners in meeting" be substituted for the words "through a ferrule of the size indicated in the ninth schedule."

He said :—The matter which I have to place before the Council is one of very great importance, and I have no doubt that it will receive from my hon. colleagues that consideration which it fully deserves. The question, as I understand it, is this. Whether the supply of water to the town within a given time should be reduced, for, broadly speaking, the reduction in the size of the ferrule will have that effect. Before a question of this sort can be fairly discussed and settled, it is absolutely necessary that independent opinion should be had from experts eminently qualified to advise in a matter of this kind. Undoubtedly the note submitted by the hon. member in charge of the Bill is a valuable document, and it should deserve consideration as coming from one who by virtue of his position is qualified to express an opinion; but no further. It should not be accepted as conclusive on the point and as justifying this Council in making a change in the law which must operate with very great disadvantage to the poorer classes. The literature of the water-supply of the town is rather extensive, and any one who has studied it will be struck with some of the features that have exhibited themselves from time to time, and generally it will afford this instruction, that the executive officers of the present Corporation and of the late Justices, who were entrusted with the duty of supervising the works, have not been able to give the satisfaction which was expected. That position I think even my hon. friend the member in charge of the Bill will admit. It is a notorious fact that when the 42-inch main was laid by the Justices, they did so under an agreement by which an eminent firm undertook to lay the main so as to bear a certain amount of pressure. When

the work was completed, pressure was applied to a portion of the main and the whole thing burst; and on advice being taken from experts, they unanimously advised the Justices not to test the main at all, but to take it over as a bad job. The result was that the main was taken over without having been laid in the way contracted, and it was not capable of bearing the pressure which it was intended to bear. Again when the extension of the water-supply was taken into consideration, various questions came up for discussion. Questions of great importance were submitted to experts; opinions were obtained, and ultimately the Committee of the Commissioners appointed to consider the subject submitted a report which was confirmed by the Commissioners, and the works were begun. But there was one striking feature above all others. When the extension works were first contemplated, the advice of the Engineer was that there should be a brick culvert of 60 inches diameter, and the Committee then appointed adopted it. It was placed before the Commissioners in meeting, who sent it back for further consideration, and some time after, when Mr Kimber, the present incumbent, obtained leave to go to England, Mr. Buckley was appointed to act for him. Mr. Buckley, on looking over the various papers in connection with the water-supply scheme, advised that it would be better to have an open cut instead of a brick culvert. The two questions were discussed in all their phases; they were submitted to experts, and their opinions were obtained But at the very last moment the Chairman suggested that a 48-inch iron main would serve the purpose best. I was one of the Commissioners who opposed this suggestion on the ground that the supply would not be sufficient for the town, that it would be necessary to have a still larger supply than what was contemplated, and that it would be a mistake to be satisfied with a 48-inch main. I was in the minority. But at my instance it was agreed that the main should be so laid as to be capable of bearing a pressure of 100 feet. Perhaps it would be well to explain what is meant by a pressure of 100 feet. The water was to be raised to a height of 100 feet at Pultah and then forced into the main, instead of being allowed merely to flow down by gravitation. Up to a very late period the Commissioners were under the impression that the main was being laid so as to be capable of bearing this pressure; but it was all a delusion. When the time came for testing the main, it was successfully pointed out, that it would be more economical to have a third main than to run the main under a pressure of 100 feet. The majority of the Commissioners adopted that view, and the main, after undergoing a certain test which by all was admitted to be insufficient if the main was to be worked under a pressure of 100 feet, but sufficient if it was not to be worked under that pressure, was put into use. There the question remained. Therefore I say that the question of the water-supply is not free from difficulties; it is not one in regard to which the public would be justified in putting implicit confidence in the statements of the executive officers. It is one which should be narrowly enquired into before any change in the law is adopted. The note of my hon. friend shows that, whereas under the present law the maximum supply to which a person is entitled is at the rate of 1,500 gallons for every rupee of taxation paid by him, the average present supply to the whole town is at the rate of 5,500 gallons to the rupee; but he proposes to allow only 3,000 gallons for the rupee. Is this equitable or just? I say that the people are not getting sufficient for the money they are paying. My hon. friend admitted at the last meeting that the average cost of filtered water was 2 annas or 2½ annas for every thousand gallons. In providing filtered water to the town the Corporation was not acting on commercial principles. They took the rate-payers' money for constructing the works and for providing a Sinking fund for the liquidation of the loan, and it could not therefore be said that they are selling water to the town. They are only giving the town what they are entitled to have, and if we give them 5,000 gallons for the rupee they will not get more than they have paid for. My hon. friend complains that the standard of 1,500 gallons has become a dead letter, and it is quite right that it should. Why should the people who have paid for the water-supply purchase the water at an enormous profit to the Corporation? There is no justice or sense in that. The original standard was fixed under a total misconception of facts: the facts were erroneously stated to the then Council.

But if by equity, good conscience and justice the rate-payers of the town are entitled to have 5,500 gallons for every rupee of tax they pay, I do not see why they should not have it. In fact it is only right they should have it.

An important question is raised in paragraph 7 of my hon. friend's note. He says—

"So far therefore as command over the water to the individual is involved, and loss of command to the Commissioners, this depends on the size of the ferrules; and it is the simple fact that the scale of ferrules sanctioned has been such that it has entailed entire loss of command over the water-supply, and if the Commissioners are to be responsible for the pressure of the future supply, they can only fulfil this duty if they recover their command by a wholesale reduction in the size of the ferrules."

If it is a fact that the Commissioners have lost command over the water-supply, is it not strange that there should be a general complaint all over the town as to the scanty supply of water. If that shows anything, it shows that the people have not got the command over the water which is stated in the note; they cannot get the water which they want, and therefore there is this outcry and howl of indignation on all sides. If an enquiry be made from 100 persons, probably only five persons will say that they get a fair supply; but 95 per cent. will complain that they do not get a proper supply. My hon. friend shakes his head, but I am quite willing to leave it to the rate-payers to say whether what I have stated is not perfectly correct. The effect of the proposed reduction in the size of the ferrules will be that within a given time the supply will be great deal less than it is at present. People require their supply within a given time, and care should be taken to give it to them within that time. It will be no satisfaction to tell the rate-payers that whilst you are now getting a given supply within one hour, by reducing the size of the ferrule, you will not get less than that quantity, but you will got it within three or four hours. This will be no satisfaction, because a supply within three or four hours will not serve their purpose. It is within a certain time that water is needed, and it must be supplied within that time. The whole of my hon. friend's memorandum is based on certain mathematical formulæ set out in paragraph 9, and it shows that in one minute 16½ gallons of water can be obtained if a tap of half inch diameter is left open. This statement has been tested by a friend of mine, a European gentleman living in the European quarter of the town. I have in my hand the letter in which he gives the result of his testing and which he has given me permission to use, and the fact is that he got only 1¼ quarter gallon of water by leaving the tap open uninterruptedly for a whole minute. He says he has two taps—one 18 feet above the ground level from which he got no water at all, and the other only six feet high from which he got the quantity specified. If that is so, what is the utility of my hon. friend's formulæ. Before the formulæ can be applied, there must be a certain state of things existing to satisfy the requirements on which the formulæ is based. If the main has not been satisfactorily laid, if the inclination of the main is different from what it should be, if the connection has several bends,—all these things will have a material effect on the supply; and until all these facts can be ascertained in respect of every case, the formulæ cannot be relied upon. As I have said, the complaint of the scanty supply of water is a just one, and on the 12th of November last a motion on the subject was brought before the Town Council, and a Committee was appointed for the purpose of making a thorough enquiry into the matter. On that Committee there were persons some of whom by virtue of their professional position were highly qualified to give an opinion in a matter of this kind. On the 19th of November this Committee met, and on that day, after a good deal of discussion, the following Resolution was passed at the instance of Mr. Spring:—

"That the engineer be requested to prepare a scheme for the Committee's approval for ascertaining in a reliable manner the actual quantity of water which passes clearly into certain isolated sections of the town which he may be able to select. The object of the scheme should be to furnish as far as possible the following information:—

(1). Period during which the supply is given.
(2). Pressure maintained during that period.
(3). Area of ferrule orifices in each isolated district.
(4). Population of each district.

It was hoped that the Engineer would be able to prepare this scheme on an early date. But that early date has not yet come. The Commissioners have been anxiously waiting for this scheme, but it has not yet been placed before them. If the information which has been asked for was available in a reliable form, there would be no difficulty in at once ascertaining what are the causes of the scanty supply of water, instead of giving credit to the vague general statements made, that persons are getting more water than they should have, or that a great deal of water is wasted. I submit that when the Commissioners are themselves enquiring into this matter, and when their executive officers have not placed the information before them up to the present moment, although it was called for so far back as the 19th November last, it will be a mistake to proceed now on the basis that people are getting more water than they are entitled to, or that there is a great deal of wastage. My motion is that instead of 3,000 gallons of water, 5,000 gallons should be supplied for every rupee of tax paid, the actual cost being less than at the rate of 5,500 gallons. That is the least quantity of water to which the rate payers are fairly entitled, and if they are fairly entitled to that quantity, why should the law reduce it? My hon friend speaks of his generosity in giving 3,000 gallons when the existing law only allows 1,500 gallons. Is there any generosity in giving 3,000 gallons when the rate-payers are entitled to 5,500 gallons? They are entitled to have more, and therefore they should have more. For the convenience of discussion I may state that my amendment should be divided into two parts.

My first amendment is to substitute in section 155, lines 3 and 4, "five thousand gallons" for the words "three thousand gallons." And my second amendment is that in lines 9 and 10 of the same section the words "through a ferrule, the size of which is to be determined by the Commissioners in meeting" be substituted for the words "through a ferrule of the size indicated in the ninth schedule." If in the course of the enquiry to which I have referred it transpires that the real cause of the scanty supply to several persons is what is put forward by the hon. member in charge of the Bill, he may be able to bring before the Commissioners a proposition for the reduction in the size of ferrules. If he can clearly show that that is the cause, there is no reason to suppose that he will not succeed in doing what he is attempting to do by the arm of the law. If the size of the ferrule is fixed by law, the result will be that in the absence of any enquiry this Council will take upon itself to say that some persons are getting more water than they are entitled to. That is my objection to fixing the size of the ferrules by legislative enactment. It does not go to the principle of the proposal, but it is whether the legislature should fix the size of the ferrule without being in possession of any reliable data. It is a question of pure justice.

The Hon. Sir Henry Harrison said:—I find the speech of my hon. friend very difficult to answer, because, instead of having brought out the essential points of the questions before the Council, he has directed his speech to an impeachment of the action of the Executive of the Corporation on the water-supply question. Naturally it is somewhat embarrassing for me to answer him in reply to this impeachment without saying anything, but I do not think I have the right to inflict upon the Council a disquisition upon the several matters which have arisen between the Commissioners and their Engineer. All I ask the Council to consider is the present issues which we have to decide to-day. It remains for me to point out what the issues are—a task which my hon. friend himself should have undertaken. I am very glad that he has divided his amendment into two parts, as it consists in fact substantially of two amendments—one that the Corporation shall be bound to supply to the rate-payers for every rupee of the tax paid by them 5,000 instead of 3,000 gallons of filtered water; the other that the supply should be given through a ferrule, the size of which is to be determined by the Commissioners in meeting instead of being laid down by law. Taking the first question, he has twitted me with claiming generosity. I never claimed any generosity whatever in this matter. I said you can easily give 3,000 gallons per rupee, instead of 1,500 as heretofore, and thus show that there is no intention to diminish the supply. But would it be equally safe to guarantee 5,000 gallons? The total supply may be said to be sufficient to give 5,500 gallons per rupee, and when the extension

works are completed, they will give 7,000 or even 8,000 gallons. But the effect of the amendment is to make it obligatory on the Commissioners to supply water to each person to that extent. How can we undertake to do so unless we can prevent others from taking more than they are entitled to have? There is no doubt that some persons are getting a supply equivalent to from 9,000 to 12,000 gallons per rupee, and as long as we cannot stop that, how can we guarantee to each person a supply of 5,000 gallons? The Select Committee thought I was too generous in proposing to fix the supply at 3,000 gallons: still we do think that under the proposed restrictions as to ferrules we can undertake to give 3,000 gallons. That seems on the whole a commendable concession, but we cannot undertake to do even that if we have not some surety that people are not taking more than their fair share. Therefore I cannot accept the first amendment.

Next as to the question of ferrules. This is a point in respect of which, by the unanimous agreement of all bodies who have been consulted, something must be done. We found ourselves bound not to overlook the unanimous appeal of all parties, and therefore we have carefully looked into the matter and examined the reasons why at present a good supply cannot be given to all persons. It has, I think, been shown to demonstration that the ferrules of the town are at present on too liberal a scale. I have consulted Mr. Kimber, the Engineer to the Corporation, and that point admits of no doubt. And yet how has it been accepted by my hon. friend? He seems to consider that, although the result is produced by a law of nature, yet I am in some way responsible for it. Is it right, when we try to combine forces and to cope with a serious difficulty, to hold back and decline to admit that the only solution which the laws of mathematics and hydraulics impose on you, is not the correct one? That attitude is taken up not only by my hon. friend, but by a large number of Commissioners. I am quite prepared to admit that it is a question of very great difficulty, because mathematically the formula can only apply under normal conditions. When you come to apply it to actual conditions, such as the pipes through the tortuous lanes and gullies in the town, the taps and bends throughout Calcutta, you must bring an enormous number of disturbing elements into the calculation. If there is a bend before or after the connection, if instead of going from one street to another there is a dead end, the pressure is not so good as it is elsewhere. Mr. Kimber is now engaged in completing experiments throughout the town with a view of testing the discharges; but there has not yet been time to tabulate the results and to examine them, but there can be no doubt that a ferrule of a certain size will operate very differently in different cases. By some mistake the section in the Bill does not stand in the way it was settled by the Select Committee; we directed that there should be a power of altering the schedule by the Commissioners in meeting with the sanction of the Local Government. We desired to introduce this power either in the section or in the schedule, but it has been left out of both. Seeing the uncertainty of the precise effect of a hard-and-fast scale of ferrules, I do think there must be a power of modifying the schedule in that way.

Then comes the further amendment of my hon. friend, that instead of inserting a scale of ferrules in the Act, it should be left to be determined by the Commissioners in meeting. I do not look on this proposal with any great disfavour. It will put a very hard task on the officers of the Corporation to persuade the Commissioners to adopt a reduced scale, for it is plain how very unwilling the Commissioners will be to face the question in the only way it should be faced, but it is a power which ought perhaps to rest with the Commissioners; and although it will be difficult to convince them of what is the right thing to do, I believe they will in the end be convinced. Therefore as Chairman of the Corporation I raise no opposition to the second portion of my hon. friend's amendment. It is a question for the Council to settle. It is not I, as representing the Corporation, who say that you must prescribe a schedule in the Act. Hard as the task may be, I am prepared to let the Commissioners settle it if the Council think fit, but it is a further question to consider how far we will be doing our duty to the public. This the Council must determine. If they are willing to leave the decision with the Commissioners, I do not object.

I must add one word as regards the allegation that 95 per cent. of the people complain of the scanty supply of water. This I deny *in toto*: 40 per cent. might be nearer the mark. There is not the slightest doubt of what the supply is; the capacity of the pumps is known. Every stroke that is pumped up is registered, and there is no doubt that the quantity of water shown by the indicator is actually delivered. But it is delivered to 13,000 or 14,000 houses in the town. Of these about 8,000 or 9,000 have a good supply, 2,000 or 3,000 have an indifferent supply, and 2,000 or 3,000 have a very bad supply; and these 2,000 or 3,000 persons have a very bad supply, because others take the water off before it reaches them. We had a very good practical test the other day. Out of 13 Commissioners who were present at a meeting of the Town Council only two of them, Mr. Simmons and Dr. Mahendra Lal Sircar, complained that they had a bad supply; and I believe every member of this Council, except the Doctor, would say that they have a fair supply. Mr. Simmons' house is situated in one of the worst quarters of the town. (St. James' Square) in relation to the water-supply, and for some reason the pipes there are so arranged and are of such a size as to act very badly indeed: and see how wide of the mark his comments are as read out by the Hon. Babu Kali Nath Mitter. Mr. Simmons is one of the most intelligent, hard-working and devoted members of the Corporation. The formula shows that he ought to get 16¼ gallons of water per minute, but it is a question of pressure, and he says (as has been stated by my hon. friend) he gets only 1¼ gallons per minute. All that that proves is that the pressure in his house is extremely bad. He has a tap 6 feet in height, therefore 6 feet of pressure goes in raising the water to the tap, and if the pressure there is only 7 feet, he can only get one foot of pressure. Applying the mathematical formula to this case, and assuming that the average quantity supplied is 16¼ gallons per minute on the 30 feet pressure, it follows that if there are no disturbing elements in the case, the supply to Mr. Simmons should be very small indeed. Making due allowance for the existence of some or all of the disturbing elements to which I have referred, the formula must be taken to be only approximately correct. My hon. friend knows that everybody wants the water quickly and at the same hour; is it not therefore perfectly plain that everybody cannot have what he wants, as the supply has been so arranged as to give the full supply not in one hour, but in three or four? It has often been suggested that we should give the supply at different parts of the town at different times, but that will give great cause of complaint, and will, moreover, involve a fundamental alteration of the scheme of the water-supply works. I have only to repeat that as regards the size of the ferrules I have no objection to leave it in the hands of the Corporation.

The Hon. Mr. Macaulay said:—As regards the first amendment of my hon. friend Babu Kali Nath Mitter, I think the arguments of the hon. member in charge of the Bill cannot be disputed, and that the Council should resist the amendment. As regards the willingness of Sir Henry Harrison to accept the second amendment, I would ask the Council to consider what the effect of that amendment will be. It is perfectly clear that the existing scale of ferrules has resulted in a considerable waste of water by certain people to the disadvantage of other people. Some people get a great deal more water than they pay for, because they are able to intercept it, while others are unable to get even as much as they pay for. This is the result of the adoption of the present scale of ferrules. Still I do not think it can be fairly said the Commissioners will be willing to exercise the very invidious task of reducing the dimensions of ferrules, and therefore I think the Council should wait until they are in a position to fix the schedule of ferrules in such a way as to give a standard to which the Commissioners can apply themselves. I understood in Select Committee that we had practically decided that. We found that the existing ferrules were on too liberal a scale, that the Engineer to the Corporation was engaged in practically testing the correctness of the mathematical formula, and that his enquiries have not yet been completed. There remain only the questions whether we should now fix a scale of ferrules in the schedule, or leave it to the Commissioners to do so, or wait until we are in possession of the results of Mr. Kimber's investigations. I ask the Council to allow the consideration of this question to stand over during the time we

are in Session, so that we may be in possession of fuller information before we come to prescribe any scale in the schedule.

The Hon. Mr. Allen said:—I would ask the hon. member in charge of the Bill to say whether it was not his suggestion that the question of the size of ferrules should be taken out of the hands of the Commissioners and embodied in the Bill by the Select Committee, and whether it was not in consequence of his having informed the Select Committee that he felt it perfectly hopeless to induce the Commissioners (who wanted a larger quantity of water than that to which they were entitled) to reduce the size of the ferrules, and that he wished a scale of ferrules to be inserted in the Act. At present the scale of ferrules is such that those who have been first in the field are able to take much more water than that to which they are entitled, to the disadvantage of those who apply for water connections later on. It has been a regular scramble; first come first served. To avoid that the hon. member induced the Select Committee (another view was adopted by a large majority) that the responsibility of fixing the size of the ferrules should be taken out of the hands of the Municipal Commissioners; that the Act itself should lay down the scale of ferrules according to the mathematical formulæ, so calculated that during the hours the pressure is kept up every man in Calcutta would be capable of receiving an amount of water which the rate he paid entitled him to receive. There was no intention to deprive a single person of a gallon of water which his rate entitled him: but it was determined that he should take his allowance so as not to deprive others. We were at the same time prepared to allow that in exceptional cases, where from houses being situated at a distance from the centre of the water-supply or from other exceptional circumstances, the proper supply could not be given from the standard ferrule, the Commissioners should have the power of altering and enlarging the ferrule to suit the peculiarities of the locality, and I understood that a clause to this effect would be appended to the schedule. I would strongly urge that this is the better course to adopt, and that the section now under consideration should stand as it is; but when we come to consider the schedule, it may, if necessary, be altered, and a clause may be inserted, entitling the Commissioners, with the approval of the Lieutenant-Governor, in exceptional cases and for special reasons, to enlarge the ferrule.

The Hon. Dr. Gooroo Dass Banerjee said:—After the admission made by the hon. member in charge of the Bill that the formula upon which the schedule of ferrules depends is not strictly correct, and that experiments are being made to test its accuracy, I think it will be very unsafe to pass this section of the Bill as it stands; for the result of the testing may show that the standard we have adopted as the basis of the schedule, viz., a supply of 16¼ gallons per minute through a ferrule half inch in diameter, is nothing near the truth, and that the real quantity is about the eighth part of that. In that case there will be no justification for saying that what we call the normal standard is the normal standard. Either the consideration of this question should stand over, or if the Council prefer to dispose of it now, we must accept the amendment of the Hon. Babu Kali Nath Mitter.

The Hon. Sir Henry Harrison said:—I do not see any substantial difference between the action which I now propose to take and what I did in Select Committee. If the Council, looking to the representations made by all classes of the community, wish to settle this question now, they must settle it by themselves prescribing a standard. What I have said to-day is that, so far as the Executive will have difficulty in getting the consent of the Commissioners to a proper scale of ferrules, I am willing to undertake the task of getting it passed. I think that in the long run when the matter is threshed out, the Commissioners will adopt a reasonable scale of ferrules; but it will be much more difficult to convince them than it has been to convince the Select Committee. As regards the proposal to postpone the consideration of this question, I have only to say that what I know now the Council will know a month hence. A formula which requires normal conditions cannot apply strictly to concrete cases. There is scarcely a single house in the town to which the formula will absolutely apply. In some cases the supply will be more abundant, and in other instances less than the standard quantity. I am afraid the Council will not find themselves in

a better position by postponing this question, but if they wish to do so I have no objection. I think there can be no objection to a standard schedule so long as it is perfectly clear that there is power to alter it; and so far as the alteration applies to individual cases that power must be left in the hands of the Commissioners. Provision is made for such cases in section 158, clause 2, which provides that if the house is so situated that the size of the ferrule prescribed is insufficient to pass the daily supply of water which the occupier of such house is entitled to receive, the Commissioners shall permit the use of a ferrule of such size as shall be sufficient to pass such supply. That is the section which applies to particular cases, but we also agreed to give a power to revise the schedule as a whole. That might be left to the Commissioners in meeting with the approval of the Local Government.

The HON. BABU KALI NATH MITTER said in reply:—I do not propose to take up much time in replying, after the hon. member in charge of the Bill has expressed his willingness to accept my second amendment: at any rate he has no objection to offer to it, and that being so, I hope the Council will adopt that amendment, which I think is right in principle. The question of the reduction of the ferrule has never been raised before the Commissioners in any shape whatever; but after the enquiry which is now being made it may be necessary to do so. As the whole matter of the water-supply of the town is in the hands of the Commissioners, it is only right that the question of the size of ferrules should also be left to them. If my amendment is not accepted, I shall be willing to adopt the suggestion of my hon. friend Mr. Macaulay, and allow the consideration of the question to stand over.

HIS HONOUR THE PRESIDENT said:—It seems to me that the proposals before the Council are getting a little mixed. As it stands we have a scale of ferrules in the schedule, and we have a proposal that a scale should be laid down with power to the Commissioners to modify the scale in individual cases. On the top of that the Hon. Babu Kali Nath Mitter proposes that the arrangement of the scale of ferrules should be left entirely to the Commissioners, and that the Legislature should take no part in it. Again, until the enquiry of which we have heard is completed, we have been told by the Hon. Mr. Macaulay that it will be better to hang up the question altogether. But the hon. member in charge of the Bill tells us that the enquiry will not be completed for another month, and that when it is completed we shall know little more about it than we do now; so a further proposal is made for us nominally to adopt the scale of ferrules now in the schedule, but at the same time we are to say that the Commissioners need not adopt it unless they like. It seems to me that if we are to leave to the Commissioners the power to alter the schedule at their pleasure, it is better to leave it to them at once. If you cannot trust your scale, and if the enquiry is not likely to throw any real light on the way in which the working of the formula differs from the practical discharge through the ferrules, it seems to me that as you cannot lay down a scale which you can trust to work easily, it will be better not to take the responsibility of laying down any scale at all. The first question is whether we shall adopt the section in the Bill as it stands, leaving, as the hon. member in charge of the Bill suggests, the schedule which contains the scale an open question; in which case it can be considered at another sitting of the Council, or any other scale can be inserted in the Bill; and we can at the same time discuss the provision which Sir Henry Harrison proposes that it should be in the power of the Commissioners in meeting, with the sanction of the Local Government, to alter or vary the schedule from time to time. These two motions will be proposed when we come to the schedule. If that is lost, then we come to the proposal of the Hon. Babu Kali Nath Mitter that the scale of ferrules be determined by the Commissioners in meeting.

The HON. BABU KALI NATH MITTER's motion that in section 155, the words "five thousand gallons" be substituted for the words "three thousand gallons" was put to the vote and negatived.

The consideration of the HON. BABU KALI NATH MITTER's second amendment, that the words "through a ferrule, the size of which is to be determined by the Commissioners in meeting" be substituted for the words "through a

ferrule of the size indicated in the ninth Schedule," was postponed till the Ninth Schedule of the Bill comes up for consideration.

The HON. DR. GOOROO DASS BANERJEE moved that in lines 6 and 7 of section 186 the words "every person present at the death, or in case of their default" be omitted.

He said:—The object of this section is to have correct and complete registers of deaths, and that object, I submit, will be fully secured by imposing an obligation to register deaths on the relatives and persons in attendance during the last illness of any persons dying in Calcutta, and also in case of their default, on the occupiers of the houses in which the death takes place. It is not only unnecessary, but unfair and unjust, to impose the duty on every person present at the time of the death. Many of the persons may be mere casual spectators; and the injustice of this provision will appear all the more clearly when it is borne in mind that a breach of this duty is made punishable under section 188.

The HON. SIR HENRY HARRISON said:—This is an obligation which has been imposed by law for some years past, but how far it has been of use I cannot say: people are not present at deaths unless they have some interest in the person dying.

[HIS HONOUR THE PRESIDENT pointed out that the wording of the existing Act is "some one of the persons present."]

The HON. DR. GOOROO DASS BANERJEE saw no objection to the wording of the existing Act.

The amendment was put to the vote and negatived.

The HON. SIR HENRY HARRISON moved that in section 187, for the words "seven days from the date of the death" the words "seven days of his becoming cognizant of the death" be substituted.

He said:—A medical gentleman represented to me that in many cases a doctor attends, but not having given satisfaction, he has not attended further. The object is not to make him liable under this section unless he knows of the death.

The motion was put to the vote and carried.

The HON. DR. GOOROO DASS BANERJEE moved that in line 3 of section 191, after the word "certificate" the words "or entry in a register" be inserted.

He said:—This is a verbal amendment. The object is to make the language of the section harmonise with section 190, which provides that in certain cases an entry in the register is substantially the same as a certificate.

The motion was put to the vote and carried.

The HON. DR. GOOROO DASS BANERJEE moved that, for section 204, the following be substituted:—

> "The Commissioners in meeting may acquire any land required for the purpose of opening, widening, extending or otherwise improving any public street, or of making any new public street, and the buildings, if any, standing upon such land."

He said:—The object of this amendment is to leave out of section 204 those clauses which authorize the Commissioners to acquire in addition to any land which may be actually required for the opening or widening of any street, additional land extending to 100 feet on both or either side of the street. That provision, I submit, is wholly objectionable. Private property ought to be held to be sacred, and the compulsory acquisition of it ought never to be allowed unless it is distinctly required for a public purpose. Acquiring land for the purpose of selling it at a profit may be advantageous to the Municipality, but I can hardly persuade myself to say that it is a public purpose which would warrant compulsory acquisition. If the doctrine were true that a public body like the Corporation can increase their funds by acquiring lands in that way, the doctrine will be most dangerous to private property, and I do not think the hon. member in charge of the Bill will rest his case on that ground. I know it may be said that there is further justification. Whenever a new street is opened or an existing street is improved or widened, it increases the value of the adjacent land on both sides up to a certain distance; and if the former owners are allowed to retain the land, they will, it is said, benefit at another's expense. But if we examine

the point a little more narrowly, it will appear that this argument is more specious than sound; for it is not correct to say that the owners of the adjacent lands derive advantage without paying for it. They do pay by contributing as rate-payers to the funds of the Municipality, and that is the purse out of which the acquisition is made. Nor can it be said that it will be wholly wrong for them to derive an incidental advantage. A street is to be opened or widened for a public purpose. It is a public purpose not merely because a street will be required for public traffic, but because the public will be benefited in other ways, such as by improved ventilation and the like. Therefore the advantage which the owners of adjacent lands derive by the value of their property being raised is one of the necessary incidental advantages to which the public or a portion of the public have a right. And I see no reason why the Municipality should be allowed to acquire these additional lands for the purpose of selling it at a profit.

Again it might be said that for the ornamentation of the town it is desirable that the buildings on either side of large streets should be of a certain form or size. This object would be secured if the Municipality in the first instance acquires land adjacent to a street and sells it under certain conditions. If that is the object, let us provide that the buildings by the side of public roads should, whenever they are taken down, be rebuilt in a certain way. That will be a far more satisfactory way of securing the object in view than this indirect mode.

The HON. BABU KALI NATH MITTER moved that clauses (*b*) and (*c*) of section 204 be omitted, and that the last paragraph of the same section be also omitted.

He said:—This motion is precisely the same in effect as the last. Clause (*b*) of the section applies to the acquisition of additional lands, and clause (*c*) gives authority to sell or otherwise dispose of any land or building acquired under clause (*b*) And then there is a further clause that any reconveyance of land or of a building under clause (*c*) may comprise such conditions as the Commissioners think fit as to the removal of the existing building, the description of new building to be erected, and such matters. I do not know whether, having regard to the Transfer of Property Act, such conditions can be imposed. That Act regulates the purchase of property in Calcutta, and I am not aware that such conditions can be imposed Besides that, my opposition to these clauses also rests on the ground that it is altogether inequitable. Section 190 of the existing law provides that the Commissioners, making due compensation to the owners and occupiers of any houses or land which may be acquired for any such purposes, may lay out and make new streets, and may widen, open, enlarge or improve any street; and for the purposes of this section the Commissioners in meeting may purchase any land necessary for houses and buildings to form any public street or for the improvement of any public street. So far as I have been able to understand the present Act, there are three modes by which the Commissioners may take over lands. First, they may do it themselves, under certain circumstances, the Court of Small Causes settling the amount of compensation to be paid; secondly, they may acquire it under the Land Acquisition Act; and thirdly, they may obtain it by purchase or by mutual agreement. I can see no objection to the Commissioners purchasing additional land whenever there is any necessity to do so; that means whenever the owner is willing to part with it. But the section in this Bill alters that, and makes it lawful for the Commissioners to acquire in addition land and buildings outside of the regular line of a street, provided that, without the special sanction of the Local Government, not more than 100 feet shall be acquired on either side of the regular line of the street. I wholly fail to understand this latter clause. Under the law in every instance the sanction of the Local Government is to be obtained, and without the sanction of the Government not a single inch of land can be acquired. The idea, though not stated in the section, is that by acquiring a great deal more land than is required when a locality is to be improved, the excess land when resold will fetch a considerably larger price than was paid by the Commissioners, and thus the cost of the improvement will be very much reduced, and in some cases it will probably be *nil*. That, I submit, is not the policy of the law. The policy of the law is that not only the present generation, but future generations should pay for works of a permanent character. If you drive away a large number of persons from

their houses in expectation of re-selling the land at a profit, you virtually make property belonging to a certain portion of the community pay for the whole of the improvement. That to my mind is inequitable. The argument which has been put forward with success—and I have no doubt will be put forward now with a great deal of force—is that by spending a large sum of money the Commissioners improve a certain locality, and why should they do that for the benefit of a limited number of persons; that if this limited number of persons get the largest benefit, they should pay for an adequate share of the improvement—an adequate share by the deprivation of their property. If a loan is raised for the improvement, these persons will have to bear their share of the interest and of the sinking fund for the repayment of the loan; and moreover when the locality is improved, the assessment on the property of those persons will be increased. In the first instance they contribute in the same way as the rest of the public for the payment of interest and for the sinking fund; and secondly, because they enjoy the benefit most their property is made to pay a larger assessment. It strikes me also in another manner. Whenever a particular property is improved, it is improved no doubt in the first instance for the benefit of all, and secondarily for the benefit of the persons who reside in the locality. The improvement of sanitation benefits the town, and these persons expect to share in the improvement. But the secondary object of the improvement is defeated if the property is taken away from those persons, and they are driven out of Calcutta. If the Legislature provides that additional lands may be acquired for improving a locality, and that the excess lands should be resold to the parties at the cost price, the objection would be minimised. Of course, no profit would not then be made. But I rest my objection on the higher ground that a violation of the rights of private property should not be tolerated unless it is for the public benefit, and that is the ground on which the Land Acquisition Act is based. The Government has to declare that a particular tract of land is required for a public purpose, and then the acquisition can be made. Traffic in land is in effect declared by this section to be a public purpose, which to my mind is not a public purpose contemplated under the provisions of the Land Acquisition Act. Under these circumstances I move that these clauses of the section be omitted.

The Hon. Moulvie Abdul Jubbar said:—I support the motion of the Hon. Dr. Gooroo Dass Banerjee. I do not see any good reason for authorising the Municipal Corporation to acquire more land than what is strictly required for municipal purposes. The only reason which is given for the authority claimed is that the adjacent lands on both sides of the street will command a higher value than they commanded before the street was opened or improved. But I do not think that is an equitable ground for depriving persons of their property. The property on either side of a line of railway is improved in value by its construction, but I do not think a Railway Company is authorised to acquire excess lands on both sides of a railway because their value will be increased by the opening out of the railway.

The Hon. Sir Henry Harrison said:—I do not propose to argue this question at any length. The section in this Bill is not believed to make any change in the law: legal opinion has declared that clearly; but as some doubts had been expressed, it was thought as well to introduce the wording of the Bombay Act which states the matter clearly. To my mind the first principles of equity show as clearly as possible that what is proposed is right. The section provides that when you are constructing a street, you may take up sufficient land to cover the buildings on either side of the street: to make it possible for proper houses to be built, you must give proper plots of lands. Otherwise you will find here a deep block, there strips of a few feet wide only enough to build godowns. If you wish to ensure success, you must acquire sufficient land on either side; and having got the land, is there anything unjust in selling it for a higher price entirely caused by your improvement? Owners are already paid 15 per cent. in addition to the market value as compensation for the enforced acquirement. Suppose the construction of a street to cost twenty lakhs, and the property on both sides to be enhanced five times in value; our friends contend that the public should get none of the enhanced value, and that the fortunate owners on both sides of the street should get the whole of the benefit? To my mind there is absolutely no equity in such a proceeding.

Those who have created the enhanced value of the side lands are the persons to whom the increased value ought to go. The law sufficiently guards the interests and rights of the owners themselves by giving them 15 per cent. as compensation in addition to the market value of their property. Therefore I hope the Council will reject these amendments.

The HON. DR. GOOROO DASS BANERJEE's motion being put, the Council divided:—

Ayes 4.	*Noes* 8.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mittar.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The HON. BABU KALI NATH MITTER's motion was put to the vote and negatived.

The HON. DR. MAHENDRA LAL SIRCAR moved that after clause (*c*) the following words be added:—"Provided that the profits accruing therefrom be devoted to the purpose for which the land is acquired."

He said:—The object of the amendment is to prevent the profits derived from the construction or improvement of a street being applied to any other purpose. The amendment is so clear and just that I do not see what possible objection can be taken to it.

The HON. SIR HENRY HARRISON said:—I do not see any reason for this amendment. The Municipality does not derive any profit in such cases. If, for instance, the construction of a road cost 20 lakhs, and 15 lakhs are recovered from the sale of surplus land, the 15 lakhs are set off against the 20 lakhs.

The HON. DR. MAHENDRA LAL SIRCAR said in reply:—The proviso will serve as a check upon the Corporation acquiring more land than is necessary for a specific purpose, and it will prevent any surplus being applied to any other municipal purpose.

The motion was put to the vote and negatived.

The HON. DR. GOOROO DASS BANERJEE moved that, in line 7 of section 205, after the words "compensation to" the words "and providing sufficient means of ingress and egress for" be inserted.

He said:—The section as it stands only provides for the grant of compensation, by which I understand pecuniary compensation for the inconvenience caused by the closing of the road. The section says nothing about provision being made for means of ingress and egress of which in all probability the person will be deprived by the closing of the road. It may be said that, strictly speaking, under the ordinary law he would be entitled to means of ingress and egress, which is technically termed a way of necessity; but seeing that the section makes mention of the word "compensation," there should be provision for a way of necessity. The amendment does not provide any additional obligation.

The HON. SIR HENRY HARRISON said:—The words "making compensation" are extensive. Compensation is to be given for every advantage which a person had, and the means of ingress and egress are usually matters which are included. It is perfectly certain that such provision will be made, otherwise the Corporation will have to pay enormous compensation, because the person's house would be hermetically sealed. If the amendment is adopted, what will be included within the words? Will it mean that in every case there must be a carriage way? It will be for the Court to decide in each case. Even by the common law a person cannot be shut up in his house.

The HON. BABU KALI NATH MITTER moved that, for section 205, the following be substituted:—

"When any public street is permanently closed under section two hundred and three, the Commissioners may, with the consent of the owner or owners of the property situated on either side of such street, dispose of the site of so much of the roadway and footpath as is no

longer required, making due compensation to such owner or owners. And if any dispute shall arise touching the amount or apportionment of such compensation, it shall be settled in the manner hereinafter provided for the settlement of disputes respecting damages and expenses:

Provided that in determining such compensation, the Court shall make allowance for any benefit conferred on the same premises or any adjacent premises belonging to the same owner by the construction or improvement of any other public street, at or about the same time that the public street, on account of which the compensation is paid, is closed."

He said:—It is possible to conceive of many cases where a money payment will not compensate an individual for the closing of a road. Suppose a part of a street is closed or diverted, and there are twenty houses on one side of it. The road may now be 20, 30, or 50 yards off, and the land between the new street and the house is bought by a stranger. The injury done to the owners of the property which was situated on the side of the old road will be so great that it will be impossible to compensate them by a mere money payment. Each owner should be allowed to take up the land in front of his house at a reasonable value and to advance his premises to the new street. There would then be no objection; but if strangers are allowed to come in, great injury will be done. The section should be so worded as to render it impossible for the Commissioners to commit such injury. By a resolution of the Commissioners in meeting, the individual is always offered the land in front of his house at a fair valuation. Before that resolution was passed, the land was always sold by public auction, and I know of an instance where such land of the value of Rs. 500 a cottah was with some ulterior object bought by a man's next-door neighbour for Rs. 2,400 a cottah. Since then the resolution to which I have referred was passed, and no difficulty has occurred. Practically the object of my motion is to retain the present state of things.

The HON. SIR HENRY HARRISON said:—I cannot admit that the Commissioners are not to be allowed to close a street except with the consent of the owners of property on either side of it. The words in the Bombay Bill are, "with the sanction of the Council the Commissioners may permanently close all or any part of a public street," and in Select Committee they added:—"Provided that the sanction of the Council shall not be given unless at least one month before the meeting notice has been given informing the residents of the said proposal in order that objections may be received." I have no objection to a provision of that kind. But under the amendment now proposed, the Commissioners will be unable to dispose of the site without the consent of the owners of the property situated on either side of the street. The section in the Bombay Bill provides that "the site may be disposed of and sold as land belonging to the Corporation." If you construct a new street, you must sometimes close another street or part of a street. The right of selling the site must be given, compensation being paid for the injury done to owners of property, to such amount as may be determined by any independent tribunal.

The HON. DR. GOOROO DASS BANERJEE said in reply:—The remarks of the hon. member in charge of the Bill go fully to show the necessity of inserting the words in my amendment. First he said that due compensation may be taken to include provision for ingress and egress. He may be of that opinion, but others may think differently. The word "compensation" means pecuniary compensation. At the same time he admitted that it is a common law right that a way of necessity must be given, and there can therefore be no objection to provide for it expressly by mentioning it in the law itself. The only word in my amendment which is considered objectionable is "sufficient," but whether that word be inserted or not, the amount of compensation must be determined by a court of law. That, however, is no reason why no provision should be made in the Bill.

The HON. BABU KALI NATH MITTER said in reply:—The hon. member in charge of the Bill is under some misapprehension as to the effect of my amendment, as he thinks it will interfere with the power of the Commissioners to close streets. Suppose the Commissioners close up a street, and the land between the houses in front of such street and the new street is sold to strangers; the owners of such houses will not have the means of ingress and egress. There is no provision in the existing law authorising the Commissioners to sell a street.

[Sir Henry Harrison—The Commissioners may, under section 137, sell any land vested in them which is not required for the purposes of the Act.] That will not apply in these cases. I submit that section 205 of this Bill is a new provision, and it has actually been marked in the Bill as a new section; and before such a power is conferred there must be a safeguard as to the disposal of the land, having reference to the rights of the persons interested.

The Hon. Dr. Mahendra Lal Sircar said:—I cannot understand under what circumstances a street can be closed without interfering with the sanitation of the town.

The Hon. Sir Henry Harrison replied:—The closing of a street is always undertaken in connection with some other improvement.

His Honour the President said:—While I can perfectly see the objection to the motion of the Hon. Babu Kali Nath Mitter, I cannot understand what the objection to the amendment of the Hon. Dr. Gooroo Dass Banerjee really is. I cannot see why this section, giving legal authority to dispose of the site of a closed-up street, should conflict with the resolution of the Commissioners under which the sale of land in front of private property is now conducted. The Commissioners now dispose of such land to the owners on either side of it, but if they cannot come to terms with them, they must give it to an outsider. But I do think a provision for ingress and egress very reasonable.

The Hon. Dr. Gooroo Dass Banerjee's motion being put, the Council divided:—

Ayes 5.	*Noes* 7.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Moulvie Abdul Jubbar.
The Hon. Sir Alfred Croft.	The Hon. Sir Henry Harrison.
His Honour the President.	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.

So the Motion was negatived.

The Hon. Babu Kali Nath Mitter's motion was put to the vote and negatived.

The Hon. Babu Kali Nath Mitter moved that in line 3 of the proviso of section 207, the word "direct" be omitted; and that the last clause of the same section be omitted.

He said:—Under the Land Acquisition Act damages are already allowed, and I cannot see why compensation should be limited by this Bill to "direct" damages. The Land Acquisition Act distinctly states what damages should be allowed. Indirect damages are as a matter of law never allowed.

The Hon. Sir Henry Harrison said:—The question raised by this amendment is not of very great importance, but I will explain why the provision now objected to was put in. The law as it stands provides that whenever a house which projects beyond the regular line of a public street has been taken down in order to be rebuilt, the Commissioners may require the same to be set back to or towards the line of the street, or the line of the adjoining houses, provided that the Commissioners shall make full compensation to the owner for any damage he may thereby sustain. Certainly that section reads as if it was intended to confer a power of some value on the Commissioners; for instance, they might take advantage of the opportunity to widen the street more advantageously than they could otherwise do; but if this amendment is adopted of what value is it? The question is, what is the compensation to be given? Is it compensation under the Land Acquisition Act? An instance in illustration of this occurred in Old Court House Lane in which a house was taken down for the purpose of being rebuilt, and it was pointed out that advantage might be taken of the opportunity to make the lane (an important thoroughfare) of uniform width. We gave notice to the owner of our intention to take up a small portion of the land at the orifice to the lane for the purpose stated, but he insisted on the Commissioners taking up the whole house, and demanded Rs. 80,000 as compensation. We took advice, and we were advised not to acquire the land unless we were prepared to face the probability

of having to pay for the whole of the plot; and thus an important improvement was abandoned. Suppose in such a case there are two cottahs of land, and the Commissioners wish to take up one cottah, it is fair and reasonable that the owner should be compensated for any injury done in diminishing the area of the land as building ground, but no indirect damages should be included.

The Hon. Dr. Gooroo Dass Banerjee said:—I support this amendment. The law will never give a decree for indirect damages, and therefore the common law being sufficient, we should not, for the benefit of the Corporation, insert a provision that is unnecessary. Just as in the other case the hon. member pointed out that for the protection of private owners it is unnecessary to include in the law what the common law already provides for; so in this case. And there is a further reason for supporting this amendment. In the definition given of "direct" damage reduction in size is stated, but no reference is made to alteration in shape which may equally cause a depreciation in value. We know that people require rectangular pieces of land for building purposes, and therefore change in the shape of the land is a material element.

The Hon. Mr. Macaulay could not see any necessity for the introduction of any reference to altering the shape of the piece of land. You can only alter the shape of a piece of land in such a case by increasing its size or by reducing its size. Here there is no question of increase in size. Consequently the words referring to reduction of size must include alteration in shape.

The Hon. Babu Kali Nath Mitter said in reply:—A threat held out in a particular case should not justify an innovation in the law, on the supposition that the claim made in that case was a just one, and would be allowed by the courts. I do not think we can assume anything of the kind. Under the present law the owner will get what he is entitled to by the Land Acquisition Act, and I do not see why any difficulty should be thrown in the way by introducing the word "direct," and then proceeding to define the word.

The Motions being put, the Council divided:—

Ayes 4.	*Noes* 8.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Moulvie Abdul Jubbar.
His Honour the President.	The Hon. Sir Alfred Croft.
	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.

So the Motions were negatived.

The Hon. Babu Kali Nath Mitter moved that, after section 212, the following new section be inserted:—

"212A. It shall not be lawful for an owner or occupier of a house, which does not front, adjoin, or abut upon a public road, street or lane, to lay out a new street, lane or pathway leading to such public road, street or lane, without obtaining the written sanction of the Commissioners, who may, before granting such sanction, call upon such person to submit a plan showing the intended level and width of such street, lane or pathway, and the arrangements made for draining it. If the Commissioners approve of the plan, they shall, within thirty days from the date of the receipt of such plan, accord such sanction; but if they do not approve of the plan, they shall refuse such sanction."

He said:—To my mind the provisions of section 213, if properly worked, will be quite sufficient for all purposes, but that section has hitherto not been worked in that way, and therefore it is necessary that a provision of this sort should be introduced. Persons purchase land in the interior, not on the side of any street; they build houses, and leave small paths as streets or passages; other houses are built without leaving adequate paths for streets; the place becomes insanitary, and they ask the Commissioners to improve the locality. Precisely such a case happened in Sukea's Bagan, and it had to be improved at the expense of Rs. 30,000. It was sparsely inhabited at first, but afterwards became crowded with habitations. But if under the law a person having a house would be precluded from opening a street leading to

a public street without permission, then the Commissioners would have full control as to the width of the street and the drainage. This amendment would render many of the sections providing building regulations unnecessary; because if the Commissioners have power in the first instance as to the opening out of streets, a great deal of the difficulty which at present arises will be overcome. Another case of the same sort recently came up in Rajah Bagan; small houses were built in promiscuous places without obtaining permission as to the opening out of lanes and pathways; the place got into an insanitary condition, and the residents applied for improvement. The late Officiating Chairman suggested the opening out of two large streets, and the result is that the Commissioners will have to spend about a lakh of rupees to improve the locality. All this will be prevented if the amendment which I now propose is adopted.

The Hon. Sir Henry Harrison said:—The hon. member has admitted that all he wishes to do is to make more clear what section 213 is intended to do. I have no objection to the wording of the proposed section, but I do not see any necessity for it. The inconvenience which is felt is not as to the laying down of a new street, but to the building of houses here and there without reference to any proper street, but with only small tortuous paths here and there. The object which this section is intended to meet will be better obtained under the building sections which come later on.

The motion was put to the vote and negatived.

The Hon. Babu Kali Nath Mitter moved that, in line 1 of section 213, for the words "Every person who" the words "Whenever a person, being desirous of selling any land belonging to him in small parcels, or otherwise" be substituted.

He said:—The object of this amendment is to widen the scope of the section in order to prevent the very cases which generally happen, viz., that of persons who sell lands in small parcels, leaving only narrow pathways.

The Hon. Sir Henry Harrison said:—The only objection I have to this amendment is as to its wording which is not clear.

The Hon. Mr. Reynolds asked what test the hon. member proposed, to show that a person is desirous of selling land in small parcels? The words proposed appear to be unnecessary.

The Hon. Babu Kali Nath Mitter said in reply:—To my mind section 213 is sufficient; but notwithstanding that section the Executive has not been able to control the cases which have happened; therefore I am desirous of seeing whether or not the section can be so improved as to deal with such cases. I wish to reach the person who in the first instance sells land in small parcels, instead of those who have purchased small plots of land, and subsequently build upon them.

The Hon. Sir Henry Harrison said:—The object my hon. friend wishes to attain can best be secured by prohibiting the building of any house without the site being first approved. He wishes that owners should be prohibited from selling land in small parcels without warning the purchasers that they cannot build upon the land until a street is first laid out. I ask, is it the object of the owner of land to lay out roads? If asked, he will say he does not wish to lay out a new street.

The Hon. Babu Kali Nath Mitter said in reply:—In every case certain portions of the land are left for streets. If those streets are constructed with the approval of the Commissioners there will be no difficulty. If the site is objectionable the sale will be objected to at the beginning, instead of punishing the persons who have bought the land in small parcels, by refusing them permission to build on it.

[His Honour the President thought the wording of section 213 covered all the ground of the amendment and more.]

The Motion was then, by leave, withdrawn.

The Hon. Sir Henry Harrison moved that, in the last paragraph of section 224, for the words "shall not apply to any portion of the area by this Act added to the Town of Calcutta" the words "shall not apply to the area by this Act added to Calcutta, or to any area hereafter included in it under section two hundred and fifty-seven" be substituted.

The Hon. Mr. Allen said :—I think this section prohibiting the roofs and external walls of huts being made of inflammable materials is already in force in a considerable part of the area which is to be added to Calcutta.

The Hon. Sir Henry Harrison said:—In such portions of the added area where this section is already in force, its provisions will at once be applied by the Commissioners in meeting, and it will be extended thereafter as they think fit.

The motion was put to the vote and carried.

The consideration of the further clauses of the Bill was postponed till the next sitting of the Council.

The Council was adjourned to Saturday, the 21st April, 1888.

Calcutta,
The 3rd May, 1888.

WILLIAM GRAHAM,
for Asstt. Secretary to the Govt. of Bengal,
Legislative Department.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

The Council met at the Council Chamber on Saturday, the 21st April, 1888, at 11 A.M.

Present:

The HON. SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding*.
The HON. G. C. PAUL, C.I.E., Advocate-General.
The HON. H. J. REYNOLDS, C.S.I.
The HON. C. P. L. MACAULAY, C.I.E.
The HON. T. T. ALLEN.
The HON. SIR HENRY HARRISON, KT.
The HON. SIR ALFRED CROFT, K.C.I.E.
The HON. MOULVIE ABDUL JUBBAR.
The HON. BABU KALI NATH MITTER.
The HON. DR. MAHENDRA LAL SIRCAR, C.I.E.
The HON. C. H. MOORE.
The HON. DR. GOOROO DASS BANERJEE.
The HON. H. PRATT.

CALCUTTA AND SUBURBAN MUNICIPALITIES AMALGAMATION BILL.

The HON. SIR HENRY HARRISON moved that the clauses of the Bill to consolidate and amend the Law relating to the municipal affairs of the Town and Suburbs of Calcutta, as further amended, be further considered for settlement in the form recommended by the Select Committee.

The motion was put to the vote and carried.

The HON. BABU KALI NATH MITTER moved that section 235 of the Bill be omitted.

He said :—This section gives power to the Commissioners to approve of, or to reject, any building site upon which any person wishes to build. The section provides that the person shall submit a plan showing the position of the house with reference to—(*a*) some existing public street, or (*b*) some projected public street, or (*c*) some existing private street, or (*d*) some proposed private street; and the plan has also to show the position and approximate height of all other houses within 40 feet of the proposed site. These provisions are not in the existing law; and when the Bill was before the Council on the last occasion, these innovations had not been introduced. Then the existing law was modified to some extent, and it was considered sufficient to leave it in that position; but since then the hon. member in charge of the Bill has thought fit to introduce this section, and it was adopted by a large majority of the Select Committee. The members of the British Indian Association have taken exception to this section. A memorial has also been submitted to your Honour on behalf of a public meeting recently held, and in Select Committee I also took exception to it. My objection to the section is that the power given to the Commissioners is a very extensive one, and unless it is exercised with very great discretion, it is likely to be abused and a good deal of injury done to owners who want to build on their lands. Take, for instance, a case of this kind. A man has, say, 3 bighas of land which he wishes to sell in building lots; a man of ordinary means purchases 3 cottahs out of it, and then applies to the Corporation for permission to build. Under this section the Commissioners will be entitled to require him to show them where the proposed street is to be. This man having purchased only 3 cottahs out of the 3 bighas of land is not in a position to say where the proposed street will be; all he can say is that he is willing to leave some portion of his land which may be necessary for a street to be here-

after constructed. The rest of the land may not be sold for a year to come, and this man will in the meantime be kept from building on his land. This is perhaps an extreme case, but the power being conferred in the Commissioners, it may for aught we know to the contrary be exercised in this way. The proper safeguard is to require the owner of any land, before he sells it in building lots, to lay out proper streets with the sanction of the Commissioners. That is the real remedy. Such a provision will not only be just, but it will have the desired effect. But in the case I put of the purchaser of 3 cottahs of land out of 3 bighas, the land will be valueless to him, and yet he will have to pay rates and taxes in respect of it Subject to correction by the learned Advocate-General and the Legal Remembrancer, I submit that an owner of land has an inherent right to make a legitimate use of his land as long as he does not cause any injury to his neighbours, and one of the legitimate uses to which he can put his land is certainly the building upon it of a suitable house for himself. I am quite willing, and I have never objected to power being vested in the Commissioners, to regulate the construction of buildings, but I object to any further power being given. The Select Committee in justifying the introduction of this section say in their report that a good deal of mischief has arisen from the absence of the power proposed to be conferred by this section, and that this power exists in the model bye-laws and in the Bombay Act. If the Commissioners consider that those model bye-laws should be followed, having regard to the manners and customs of this country, by all means let them make such bye-laws; but the circumstances in England and in this country are so different that the fact of the power existing under the model bye-laws in England is no justification for its introduction here. I have given notice of motion for the introduction of the following section in lieu of section 236 of the Bill, regarding the information to be given by a person before beginning to build a house:—

"Before beginning to build any new house, or to rebuild or materially alter the structure of any house, the person intending so to do shall give to the Commissioners notice thereof in writing, and shall accompany such notice with a plan of the site and the proposed buildings drawn to the scale of not less than one inch to every eight feet, showing the following particulars:—

(a) the position, form and dimensions of the several parts of such building, and of every water-closet, privy, urinal, cesspool, well and other appurtenances;

(b) the width and level of the street, if any, in front, and of the street, if any, at the rear of such building, the level of the foundation, and the lowest floor of such building, and of any yard or ground belonging thereto;

(c) the drainage of such building and of the intended size, depth, and inclination of such drain."

I submit that if this information is given, it will be ample for all practical purposes: it will enable the Commissioners to exercise sufficient control over buildings, and it will be unnecessary to give the further power of approval or disapproval of the site. As far as I have been able to look into the English Acts on the subject, the limitations apply to sites falling within proposed streets and over sewers. These are the sites which are principally referred to in the English Statutes: the rest of the regulations are entirely as regards the nature of the buildings, the thickness of the walls, the open spaces to be left, and so forth. In the Bombay Bill section 340 provides as follows:—

"Every person who shall intend—

(a) to make any addition to a building; or

(b) to make any alteration or repairs to a building, not being a frame-building, involving the removal or re-erection of any external or party-wall thereof or of any wall which supports the roof thereof, to an extent exceeding one-half of such wall above the ground level, such half to be measured in superficial feet; or

(c) to make any alteration or repairs to a frame-building, involving the removal or re-erection of more than one-half of the posts in any such wall thereof as aforesaid, such half to be measured in superficial feet; or

(d) to remove or reconstruct any portion of a building abutting on a street which stands within the regular line of such street;

shall give to the Commissioner, in a form obtained for this purpose under section 342, notice of his said intention, specifying the position of the building in which such work is to be executed and the nature and extent of the intended work."

The other sections of the Bombay Bill refer to the foundations and so forth, and I do not think they touch the point we are now discussing. The provisions in the Bombay Bill are very different from the sections in the Bill before the Council. They limit the power to sites which have not been built upon at all, and the first limitation is that where there is to be a new street it must be levelled and paved, and the opening of a new street may be dispensed with by the consent of the Standing Committee, so that in Bombay power has been given to the Corporation to control the discretion of the Municipal Commissioners. Here nothing of the kind is proposed. With every deference to the hon. member in charge of the Bill, I say that no controlling power is here given to the Corporation. I am fully aware that under the general supervising power of the Corporation over the proceedings of the Chairman, a motion may be brought forward in any particular case, and that the matter may be discussed. But that is a totally different thing: it is quite a different thing from first giving a power to refuse, and then leaving the aggrieved person liberty to have the matter brought forward by a Commissioner. The two things are totally different to my mind. As I have said, in Bombay there are the two things which the Bill provides regarding the approval of building sites; and as regards new streets, if there is to be one, it must be metalled and channelled: if there is to be no street, the matter is to be placed before the Standing Committee, and with their consent approval may be given. That is very different from the power to be taken here, for section 135 provides that until the approval of the site is signified in writing, the house shall not be constructed, so that I am quite correct in stating that in the case I have put the executive officers will be perfectly justified in refusing to grant permission. How then is the individual to utilise his land? Is he to wait till the whole of the 3 bighas has been sold, and a private street has been opened out before he can get permission to build? That is certainly not equitable. The memorialists say in the memorial presented to your Honour:—

"The building regulations (sections 235, 236, 237, 238, 241, 242, 243, and 244) invest the Corporation with preliminary powers, to refuse or to permit the erection of buildings. These sections are an unheard of innovation in the law of the land, and while they without fail to be a source of oppression to the people, they will, it is feared lead to the depreciation of the value of land in Calcutta, and open a wide door to corruption."

I am quite prepared to support that statement, and I would add that if the building regulations are passed in the form in which they have been presented to the Council, they will open a wide door to corruption so far as the subordinate officers of the Corporation are concerned; and furthermore if the requirements are not modified in the way proposed there will be also this difficulty, that it will be impossible for a person to get sanction in less than six months. He must first get the site approved, then the position and the nature of the building must be approved, then all the materials must be approved. Before all this can be done, it seems to me that at least six months will elapse before a person will be able to obtain the sanction of the Commissioners. After having the site approved he has to submit plans and sections of every floor of the intended building, which shall show the position, form, and dimensions of the several parts of such building and of every water-closet, privy, urinal, cesspool, well, and other appurtenance; and in the case of a building intended as a dwelling-house for two or more families, or for carrying on any trade or business in which a number of people exceeding twenty may be employed, or as a public resort, the means of ingress and egress; he has also to give a description of the materials of which the building is to be constructed, of the thickness of the walls and roof, and of the intended mode of drainage, the means of water-supply, and means of ventilation; and if the building is to adjoin or abut on a street, the intended means of access from such street. To satisfy the Commissioners as to all these particulars must take a long time. As to the materials, the man may get his lime and his sand and the officer might not approve of them; he will have to pay for them, and yet he cannot make use of them. All these things in my opinion are not necessary in order to exercise proper supervision over the building. I do not think the Commissioners have anything to do with the internal arrangements of the house. I think it will be sufficient if control is exercised as to the level and the drainage of the intersected house and its position with reference to any street,

and that the privy and cesspool are in a suitable place. A person may be building a house for his own residence, but he might fall into difficulties and wish to let it out to others. It will therefore be impossible for him to say whether it is to be a dwelling for two or more families, and the like. Well, having obtained all this information, the Commissioners may disapprove of the building for any of the following reasons: that it will be unsafe; that it encroaches on or over municipal land; or that its construction contravenes some specified provision of the Act or some specified bye-law made under the Act; and then the building shall not be proceeded with till such modifications have been made as will satisfy the requirements of the Commissioners. In place of these several provisions, I have read to the Council the provisions I propose. The second section which I propose runs as follows:—

"Within thirty days after receiving such notice as is mentioned in the last preceding section, the Commissioners shall see whether the proposed buildings are in accordance with such bye-laws as may be prescribed in this behalf. And if they are so, shall signify their approval of the proposed buildings; and if they are not, they shall, within a like period, point out such modification as to them may seem desirable."

The advantage of what I propose will be this. The Commissioners in meeting have first to pass certain bye-laws, and before they can be operative they must have the sanction of the Local Government. There will be the safeguard, first, of the Commissioners in meeting, deciding, and then the approval by the Local Government of the proposed bye-laws. Whereas if these regulations are provided in the Act in the manner proposed, there will be great difficulty in the way of persons building on their own land. I do not think the object of legislation should be to depreciate the value of land in Calcutta. The value of land now is very high, and that means the prosperity of the town and a high assessment by the Commissioners. But if there is any doubt whether sanction will be given to building on any particular land, the value of land will decrease, and that is certainly not desirable. The policy of the sections in the Bill seems to be to punish persons who have purchased lands, and not the person who has received the purchase-money. If, on the other hand, the hon. member in charge had proposed sections to prevent persons selling land in such a way as to place the purchaser in the awkward position of being unable to utilise it for building purposes, I could understand it. I pointed this out in Select Committee repeatedly, but I was not able to convince the Committee that that was the right position to assume in respect of this matter.

The HON. SIR HENRY HARRISON said:—This matter is one of considerable difficulty and importance, and I would ask the Council to give it their best attention, and not to start with any prejudiced idea that the sections in the Bill are unnecessarily embarrassing or harsh. I will first remind the Council that we have to consider the suitability of the procedure proposed in the Bill as compared with the alternative procedure now proposed. It is useless for the hon. member to refer to the law in Bombay or in England, unless he is ready to move its adoption. In Calcutta the procedure is for the Executive as representing the Commissioners to act in the first instance, but they are under the control of the Commissioners at every stage. In Bombay, the Commissioner, who is the executive officer, is not under the control of the Corporation, except in matters in which it is definitely prescribed in the law that he shall be so. But after allowing for this difference of system, I believe there is no substantial difference between the procedure in this Bill and that at Bombay. The question is, can the procedure in the Bill be improved without materially affecting its efficiency? If that can in any way be done, I shall be glad to adopt any such proposals. But we must not lose sight of the circumstances under which the question comes before the Council. The Select Committee gave their special attention to the question as to sites for building, because Dr. Simpson, the Health Officer of the Corporation, stated that the health of the town and the possibility of its conservancy were seriously jeopardised by the way in which houses are now built, so as to make straight and wide streets impossible; and two of the public bodies in the town also drew special attention to the question. The Trades' Association writes:—

"*Section* 195. This section, which deals with the laying out of new streets, appears to be susceptible of improvement. It requires that the level and width of every new street

shall be fixed or approved by the Commissioners, but it should also, the Committee consider, fix their minimum width, which should not, in the case of main streets, be less than 36 feet. As regards bustee lanes and back bustee lanes, their width should not be less than 12 and 9 feet, respectively, from eaves to eaves. It is in the opinion of the Committee, of the utmost importance, in view of the facts contained in Mr. H. J. S. Cotton's note on Raja Bagan Bustee, that the new Act should deal with this subject in a thorough manner. Mr. Cotton but represents the feelings of the public when he states that 'the superabundance of narrow lanes in the respectable inhabited portions of this city is an intolerable nuisance,' and the Committee of the Association are convinced that there will be no abatement of the nuisance until the Commissioners are vested with the necessary powers for dealing with it."

The Health Society similarly writes:—

"The insertion of four new sections is recommended after section 196 of the Bill. While on this subject the Secretary would invite the special attention of His Honour's Government to the remarks made by the Health Officer to the Corporation, Dr. W. J. Simpson, at pages 24 to 27, both inclusive, of his Annual Report for the year 1886, on the need of building regulations in this city. It would also draw special attention to a valuable memorandum on Raja Bagan Bustee which was drawn up by the late Officiating Chairman, Mr. H. J. S. Cotton, and to the Proceedings of the Fourth Meeting of the Special Committee apointed by the Corporation to consider the amended Bill. The Council would only add that they are in complete accord with the views of the late Officiating Chairman and of Dr. Simpson; and they would urge, for the reasons which appear in the documents referred to, that building regulations applicable to both houses and huts should be embodied in the new Act."

With these recommendations before us, together with the special remarks of Dr. Simpson, we did what reasonable men would do who are convinced by the force of the arguments urged upon them. One of the most serious evils in Calcutta is the way in which new suburbs spring up and houses are built in the most chaotic manner so as to render conservancy impossible, and therefore it became incumbent on me to devise some means of regulating their construction in future. After full consideration I thought the form of dealing with the subject which this Bill proposes the best, namely, to give the Corporation the fullest control over the sites in the first instance, inasmuch as it will be impossible to provide an adequate remedy afterwards except at an enormous cost. If we can devise any means of making the person who sells land in building lots responsible in respect of the proper laying out of streets, I would be entirely in accord with my hon. friend; but I can see no way to do it. Suppose it was proposed that no person shall be allowed to sell his land in building lots until he satisfies the Commissioners that he has made proper provision for the opening of streets and the like. That a person is not to be allowed to sell his land without stating the purpose to which the land is to be applied; that the sale is to be invalidated unless the object is declared, and unless the Corporation is satisfied that these evils will not occur, would that be tolerated? I see no other way of doing it. If the hon. member can draft a better procedure, he should do so. Either you must leave the evils uncured, or you must have some such provisions as those contained in the Bill It is impossible to intervene between the vendor and the purchaser at an earlier stage. We cannot take action until the use to which the land will be put is declared. It is unfortunate, no doubt, that an innocent purchaser should be the person who suffers, but we cannot put in our oar until it comes to the point of some one saying, I want to build on that land.

Now let me describe the procedure, and ask the Council to say whether it is harsh or dilatory. My hon. friend's proposal is that the site should be indicated and certain details given in all cases, whether the building is to be an addition to an existing house, or a new house; and further he proposes that within thirty days after receiving the notice, the Commissioners are to see whether the proposed buildings are in accordance with the bye-laws. Is it not obvious that that procedure does not meet the difficulty? If the Commissioners do pass bye-laws, how will it be better for the person? Would the bye-laws not say that the mode of access to the house must be shown, and the way in which it would be a mode of access to other houses in the neighbourhood so as to form a continuous street? If the bye-laws shirk this, then they will be of no use at all. The sections in the Bill have been specially drafted with a view to give the minimum of trouble. We avoid the hardship of going through the same forms in the case of an addition to an existing building, which may be only a godown or a coach-house, or stables, or some minor alteration. We do not make the question of site apply

unless to a new house. In such cases the person has only to send in a very brief summary of what he proposes to do, in a printed form, to be prescribed by the Commissioners. Great value attaches to the use of a printed form. If people are allowed to send in the information according to their own ideas, they are most likely to put in things which are not wanted, and to leave out information which is essential; so we require that a printed form, to be supplied by the Commissioners free of charge, shall be used. Then a uniform scale is prescribed, because in that case you can file all these plans street by street, and can make out a complete plan of the whole street. These provisions require very little indeed; they comprise the information which is always required in ordinary cases. But if a new house is to be built, then the person must get sanction to the site, and the Commissioners may ask for information on a vast number of points copied from the Bombay Bill. But we have an alternative procedure. Applications for buildings of a simple kind can be passed without difficulty and in a short time; but if it is a large building of two or three stories which it is very desirable to watch and supervise properly, then a great deal more information is necessary. There is, however, nothing to prevent the builder sending all the requisite information at once—the plan of the site and the further information regarding the building in one and the same application, and of necessity there is nothing to prevent the whole being carried through in a fortnight without difficulty, because, though the Commissioners have a right to thirty days' time for the approval of the site and thirty days to give sanction for the building—not six months as the hon. member apprehends—if the proposed construction is put into the hands of a proper builder under circumstances which raise no difficulty, there is nothing to prevent the whole thing being passed in a week.

As regards the provisions relating to the site, they have been made as lenient as possible. All that is wanted is that the house shall not be built in such a way as to make it impossible to make it fit in with any proper street If there is any existing public street leading to it, it must be shown. If there is no public street, but there is a projected public street in the locality in which new buildings are springing up, then the position of the site with reference to such street must be shown. If there is no public street either existing or projected, then the position with reference to an existing private street or projected private street must be given; and lastly, suppose no provision can be made for any such street, then for special reasons the Commissioners may accord sanction without reference to any street, public or private. The objection that it will lead to corruption and abuse of authority is an objection that may be taken to any Municipal Bill, but in framing a law we are bound to assume that the power will be exercised in a fair and reasonable manner, and there is moreover a special safeguard, inasmuch as the Executive are at every stage subject to the control of the Commissioners. Any person aggrieved can go to any Commissioner or to the ward Commissioner, and draw his attention to any proceeding of the Executive, and have the matter investigated by the General Committee or the Commissioners in meeting; and if anything unreasonable or harsh has been attempted, he can get it set aside. My hon. friend has argued as if these regulations are particularly harsh or at least stringent, and as if they might easily be relaxed without inconvenience. In Select Committee we were precisely of the opposite opinion. The Health Officer at every stage insisted that we were doing nothing; that the law would not be nearly sufficient; that we were leaving everything to the discretion of the Commissioners and to the bye-laws, and were not providing proper safeguards by legislative enactment. This was uniformly the burden of the position he took up before the Select Committee. We felt that what we were doing was the minimum; we were perfectly alive to the contention of my hon. friend that India was very different from England. We refused to introduce a number of provisions that are to be found in the Bombay Bill, although we were pressed by Dr. Simpson to insert them, because we felt that we had not sufficient knowledge of the circumstances of Indian life to justify the enactment of hard-and-fast rules of that kind. After all I am satisfied that in this Bill very little has been put in; we have put in the minimum of what seemed absolutely necessary; and unless this control over building sites is given, it will be impossible to prevent in future those evils which now exist, namely, the evil of persons

building houses as they choose without reference to any regular street or to the other requirements of sanitation. My hon. friend has referred to the case of a person buying for building purposes a plot of 3 cottahs out of a piece of land 3 bighas in extent. That is just one of those instances of the idea which prevails in Calcutta that the interests of the community must be sacrificed to the convenience of the individual; that to avoid hardship to an individual the community must suffer; and it is extremely difficult to induce the people to understand that the individual should be placed under restrictions, having regard to the interests of the community in general. When a man is about to purchase a piece of land, he ought to bear in mind, in the first instance, that he should build upon it in a way that will enable houses in the neighbourhood to spring up in regular lines of streets. That is a most necessary discipline, and unless we are prepared to make people learn that the individual must so manage his own affairs that they shall be consistent with the well-being of those around him, we shall not have made any step in advance. Therefore, as regards the general principle of these sections, I submit that they are preferable to the provisions proposed by my hon. friend. He gives no control whatever over building sites and buildings except through bye-laws to be hereafter made by the Commissioners. Till such bye-laws are made, and when made if they are not as stringent as the provisions of this Bill, there will be no power to prevent the overcrowding of buildings without reference to the requirements of sanitation. The provisions he proposes lay down one hard-and-fast rule applying to the case of a small addition to a house and to a very large new building. The Bill makes a clear distinction between the two cases, and seems more convenient in this respect. There are one or two other matters to which I desire to refer, but they have reference more particularly to subsequent amendments on the list.

The Hon. the Advocate-General said:—There is one matter which I think should be pointed out. The section provides that the position of the house must be given with reference to certain streets. It says that the Commissioners shall either signify their approval of the site, or for reasons recorded their disapproval thereof as not being a proper site with reference to the street shown in the plan. That leaves it entirely to the caprice of the Commissioners as to what is a proper site. I can understand a rule which states that a building must be so many feet from a street. A. says:—I propose this site. The Commissioners say, we do not think that a proper site. Having given no proper test of judging what is a proper site, it rests with the Commissioners to say what is or is not a proper site. I consider that such an extensive power which might be exercised arbitrarily should not be given. My hon. friend in charge of the Bill says, if you object to the provision in the Bill, draw a better one. It may be that another person may not be able to draw a better provision on the lines of the section; but I say that that is no argument at all. In section 238 special reasons are given which shall justify refusal in respect of a building; that it will be unsafe; that it encroaches upon municipal land, or that its construction contravenes some specified provision of this Act. Three special reasons are given upon which the Commissioners may refuse their approval of a building. Unless those who have thought about it are able to suggest some appropriate way of providing a test which will justify the Commissioners in disapproving of a proposed site, I shall not be able to give my assent to section 235. If the Commissioners say a site is not proper, the individual is completely without remedy.

The Hon. Sir Henry Harrison said:—I should be glad to see a provision introduced such as my hon. and learned friend the Advocate-General suggests, but I think it will be very inconvenient to lay down any hard-and-fast rule. The tribunal which is to judge will be a most lenient one, and there will be infinitely more danger of too much leniency than over-stringency. First, the Engineer will approve, then it will come before the Chairman, and then it may be taken before the Town Council and the Commissioners in meeting; and these will be found to be the easiest tribunals possible. Whereas if the distance from a street is fixed at 10 or 20 feet, it may be found not to work at all. The object is to make it possible to get some street in, so that it may be a proper site with reference to such street and the adjacent buildings. The Commis-

sioners will be bound to show that it is not a proper site with reference to some existing or projected street or to the adjacent buildings. Can we go further than that without leading to harshness and inconvenience?

The HON. BABU KALI NATH MITTER said in reply:—My hon. friend has asked what alternative proposal I would make in order to have proper regulations on the subject. The answer is quite evident. If the sections which were discussed on the last occasion regarding the laying out of new private streets are properly worked, cases such as those of Rajah Bagan and Sukea's Bagan could never have happened. The parties opened out several streets before the buildings were erected, and if the owner was prosecuted for doing so without sanction, the mischief would have ended; but that was not done, and those narrow and irregular streets were allowed to be opened. Then applications came for building, and as under the existing law there was no power to refuse, the buildings were sanctioned. But had there been a power to frame bye-laws in regard to buildings, with power to the Commissioners to refuse sanction to buildings not in accordance with such bye-laws, the remedy would have been at once found. That is a complete answer to the challenge of my hon. friend. Then he said that if these sections are not passed, the difficulty will only be postponed. I submit not. The circumstances of the country have to be taken into consideration. The Health Officer to the Corporation is no doubt a very competent officer; but he has no experience of this country. He comes fresh from England with English notions, and he naturally wishes all the provisions of the English Statutes to be introduced here; but it seems to those who live here that the provisions of the model bye-laws in England are not suitable to the manners and customs of the people here. Therefore it will be best to leave the framing of bye-laws to the Commissioners, and as they will require the sanction of the Local Government, the objection of my hon. friend will be minimised. So far as I have been able to gather, the English provisions have reference to buildings falling within certain streets or projected streets or constructed over sewers. I again submit that if the matter is left in the way I propose it will serve the purpose, more specially if proper attention is paid to the provision referring to private streets, and a prosecution instituted for its infringement. Reference has been made to what was urged by the late Officiating Chairman regarding Rajah Bagan. That is precisely one of the cases to which I referred when I addressed the Council before. A man purchased a large tract of land and resold it in small lots after leaving out certain passages. The Commissioners took no exception to the opening out of those streets without sanction; the purchasers of the building lots then applied for permission to build, and there being no power of refusal, sanction was given. The buildings were raised; the streets or passages were narrow and tortuous, and necessarily the place was reduced to a very insanitary condition. It would have been unfair to visit with punishment the purchasers of the building lots by refusing them permission to build: the person who should have been attacked was the man who sold his land in small building lots without making provision for the opening out of proper streets, and this could have been done under the existing law. I therefore submit that there will be no difficulty in working the provisions which I propose.

The motion to omit section 235 was put to the vote and negatived.

The motion to substitute the following for section 236 was also put to the vote and negatived:—

"Before beginning to build any new house, or to rebuild or materially alter the structure of any house, the person intending so to do shall give to the Commissioners notice thereof in writing, and shall accompany such notice with a plan of the site and the proposed buildings drawn to the scale of not less than one inch to every eight feet, showing the following particulars:—

(a) the position, form and dimensions of the several parts of such building, and of every water-closet, privy, urinal, cesspool, well and other appurtenances;

(b) the width and level of the street, if any, in front, and of the street if any, at the rear of such building, the level of the foundation, and the lowest floor of such building, and of any yard or ground belonging thereto;

(c) the drainage of such building and of the intended size, depth, and inclination of such drain."

The Hon. Babu Kali Nath Mitter's motion to omit section 237 was also put to the vote and negatived.

The Hon. Babu Kali Nath Mitter's motion to substitute the following for section 238 was also put to the vote and negatived:—

"Within thirty days after receiving such notice as is mentioned in the last preceding section, the Commissioners shall see whether the proposed buildings are in accordance with such bye-laws as may be prescribed in this behalf. And if they are so shall signify their approval of the proposed buildings; and if they are not, they shall, within a like period, point out such modification as to them may seem desirable."

The Hon. Babu Kali Nath Mitter's motion to omit section 239 was also put to the vote and negatived.

The Hon. Babu Kali Nath Mitter, by leave, withdrew the following motions of which notice had been given:—

(1). That section 240 be omitted.

(2). That for section 241 the following be substitued:—

"If any building or alteration, such as is referred to in section two hundred and thirty-six, be commenced without the notice and plan required by that section being sent to the Commissioners, or before the expiration of the thirty days, or at any levels different from those fixed by the Commissioners within the said thirty days, or in contravention of any lawful orders issued by the Commissioners under section two hundred and thirty-eight, the Commissioners may cause such work as has been done to be demolished or altered in such manner as they may think fit, and the expenses thereby incurred shall be paid by the person failing to comply with the requirements of the Act."

The Hon. Dr. Gooroo Dass Banerjee moved that, after the fourth paragraph of section 235, the following new proviso be inserted:—

"Provided that where any site is disapproved by reason of its falling wholly or in part within the lines of any projected public street, the owner of such site shall be entitled to reasonable compensation if the site or the portion thereof that falls within such lines be not acquired by the Commissioners in meeting under section two hundred and four of this Act within one year after the date of such disapproval."

He said:—Under the existing law the Commissioners have power to refuse sanction for a building if they disapprove the levels and foundation or it is otherwise contrary to the provisions of the Act; but they have no power to disapprove the site. Section 235 gives this additional power of disapproving of a site altogether for building purposes. Whether this large power should be given to the Commissioners or not is a question with which my present amendment has nothing to do. Conceding, however, that this power ought to be given, yet seeing that the exercise of it involves serious interference with private property, it seems desirable that the grounds of the exercise of this power should be narrowly examined, and that care should be taken to guard against any possible hardship or injustice in any case. Now referring to section 235, you will observe in lines 6 and 7 of paragraph 4 that amongst the grounds on which the Commissioners may disapprove any particular site is this, viz., the fact of the proposed site falling wholly or in part within the lines of any projected street. If the Commissioners find, on examining the plan, that the applicant proposes to build on land which falls within the line of any projected street, not an actual street, they may disapprove the site. The Commissioners under section 208 are authorised from time to time to prepare plans of proposed public streets, and it may happen that the Commissioners may anticipate the work of years and propose plans which are not likely to be carried out in the course of one or two years, but may take 10 or 20 years to complete. They may disapprove a site for building purposes which they may find they will have shortly to acquire for a public street, and which will cost much more money to acquire if built upon. In the interests of the Municipality there may not be anything very inequitable if they do so. That is the Corporation's side of the question. But it is necessary also to examine the rate-payers' side of the question. Where land is acquired or is about to be acquired the rate-payer loses nothing, for he gets the value of the land, and he may buy other land to build upon. Where, however, the site is disapproved because it is likely to be taken up by some projected street, and it is not likely the projected street will become a reality until 10 or 20 years, it is hardly fair to deprive the owner of

the legitimate use of the land without paying him compensation. Under the Land Acquisition Act, if the land is acquired, he will be entitled only to the value of the land: it does not provide any compensation for any interdict laid upon the owner prohibiting the use of the land until it is acquired. It is therefore, I submit, very necessary in the interests of the public to prescribe some limit of time within which the land should be acquired. My amendment allows a whole year's time to the Municipality. If they do not acquire the land within a year, then only will they have to pay compensation.

The HON. SIR HENRY HARRISON said:—This is not an unreasonable proposal, and I cannot say I think it necessary strongly to oppose it. But there is some disadvantage from a public point of view; and the question for consideration is the balance of advantages and disadvantages. The disadvantage from the public point of view is that it puts a somewhat unfair pressure on the Commissioners to anticipate action which may be reasonable. Suppose the neighbourhood of some street running in a certain direction becomes a building neighbourhood, the Commissioners mark the continuation of the street as the line of the new projected street. This is quite evidently the line the street ought to follow as soon as buildings spring up in the neighbourhood. Suppose some one proposes to build on a portion of the line of that street, which may be done for the purpose of forcing their hands, then the Commissioners may be compelled to take up the land and construct the street long before it is wanted, simply on account of the pressure put if the proposal to build is refused. On the other hand, I quite admit the hardship to the individual if he has no other place to build upon; but it may happen that although the line of street has been marked, there may be so much delay that the Commissioners may not be prepared to go on with the street within the year. I shall, however, raise no objection to the amendment if the Council think it a necessary act of justice.

The HON. THE ADVOCATE-GENERAL said:—There ought to be no power to undertake the making of a street unless there is a reasonable prospect of making the street within a reasonable time. Here the demand is for compensation if you do not allow the man to build. I think the proposed provision is a reasonable one.

The motion being put, the Council divided:—

Ayes 8.

The Hon. Dr. Gooroo Dass Banerjee.
The Hon. Dr. Mahendra Lal Sircar.
The Hon. Babu Kali Nath Mitter.
The Hon Moulvie Abdul Jubbar.
The Hon. C. P. L. Macaulay.
The Hon. H. J. Reynolds.
The Hon. the Advocate-General.
His Honour the President.

Noes 5.

The Hon. H. Pratt.
The Hon. C. H. Moore.
The Hon. Sir Alfred Croft.
The Hon. Sir Henry Harrison.
The Hon. T. T. Allen.

So the Motion was carried.

The HON. DR. GOOROO DASS BANERJEE moved that the last paragraph of section 23 be omitted.

He said:—In the earlier part of this section thirty days is the period within which the Commissioners must signify their approval or disapproval of the site, or pass any other order they may think fit. And thirty days is time enough for an efficient public body like the Calcutta Corporation to take proper action in the matter. But if the last paragraph of the section stands, it nullifies the operation of the first portion, and gives an unlimited time within which to pass orders. It is hardly fair to provide an indefinite prohibition.

The HON. SIR HENRY HARRISON said:—This is a matter of some difficulty, and I am free to say that the proposal of the hon. member is the identical one which I put before the Select Committee in the first instance. It is the general rule that unless disapproval is signified, approval is assumed, and that has been the rule hitherto in Calcutta. At the same time the Select Committee purposely put in the provision for reasons they considered sufficient. They considered it absolutely necessary that the builder should get approval. In such matters there is great room for manœuvring. In general a person who proposes to build on a site to which there can be no objection will send in the

papers in the usual way and orders will easily be passed. But suppose he does not wish orders to be passed within thirty days, no doubt there are various means by which that can be manipulated; for instance, by sending in the papers a day or two before the Poojah vacation, and arranging that it should not be laid before the superior officers for that day or two, or by arranging with a subordinate that it shall lie in his desk, and be overlooked for a time, or last of all, by somehow evading receipt of the disapproval, because the receipt of the order of disapproval must be proved; consequently it is of the highest possible importance that approval should be obtained. If you make an order of approval necessary, it is more likely to be pushed on. On these grounds it seemed desirable that approval should be insisted on before beginning to build. There may be only two or three out of a hundred cases in which the proposal to build will by no possibility have sanction; and though the omission to pass orders within the prescribed time may happen in only a small percentage of cases, it is precisely in that small percentage of cases that the danger will happen. For these reasons the Select Committee thought it better to put in this provision.

The HON. DR. GOOROO DASS BANERJEE said in reply :—The hon. member in charge of the Bill has been pleased to point out that the necessity for inserting this paragraph of section 235 arises from the fact that the applicant may by manœuvring prevent the Municipality from taking up the matter within thirty days. That amounts almost to a confession, coming as it does from the Chairman of the Corporation, that the subordinate officers of the Municipality are amenable to such improper influences; if so, there is all the more reason why not only this paragraph of this section, but the whole of the building regulations should be done away with. Because just as there may be reason for the Municipality being taken advantage of by the action of their own officers, there is greater reason for the rate-payers being harassed by the action of these people. It becomes the Corporation to reform their own house before imposing building regulations for improving the houses of the ratepayers. I submit that what has been stated is no reason why we should have such a clause to the prejudice of the people. If its omission operates to the prejudice of the Corporation, the Corporation can take care of itself.

The motion was put to the vote and negatived.

The HON. SIR HENRY HARRISON moved that, for the first eight lines of section 237, the following be substituted :—

"On receipt of such notice, the Commissioners shall, within thirty days, by a written order, either sanction the building of the new house, or for any one or more of the reasons set forth at the next succeeding section, disallow it, or call for further information on all or any of the following details."

He said :—This is not intended to alter the sense. The alteration was suggested by the Secretary. Section 237 is identical with a certain portion of section 235, and the Secretary asks me to move this amendment, so that the wording of section 237 may be in accordance with the wording of section 235.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON moved that, in the last paragraph of section 237, for the words "competent surveyor" the words "competent builder or surveyor" be substituted.

He said :—This is a mere verbal alteration.

The motion was put to the vote and carried.

The HON. BABU KALI NATH MITTER moved that section 242 be omitted.

He said :—The Commissioners have the power of demolition, and that is sufficient. To prosecute a man after demolishing his house is a heavier punishment than is necessary. The demolition of the building would be at the man's expense, and it is not necessary that the man should be further punished.

The HON. SIR HENRY HARRISON said :—Generally the Commissioners exercise the ordinary power of rectifying what has been done wrong; but there are some cases in which special *malâ fides* are shown, and in such cases the man should be prosecuted. It is quite in accordance with the spirit of the existing Act, and has been acted upon in at least half a dozen cases.

HIS HONOUR THE PRESIDENT said:—The last part of the section is very important; you prosecute him and compel him to demolish the building at his own expense.

The HON. BABU KALI NATH MITTER said in reply:—The effect of the section is very different from what the hon. member in charge of the Bill describes it to be. I am not aware that under the existing law the power is precisely the same. It does seem to me to be a very harsh proceeding.

The motion being put, the Council divided:—

Ayes 3	*Noes* 10.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft.
	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	The Hon. the Advocate-General.
	His Honour the President.

So the Motion was negatived.

The HON. DR. GOOROO DASS BANERJEE moved that, in lines 1 and 2 of section 242, the words "in addition to or" be omitted.

He said:—Section 242 prescribes a penalty for building contrary to the orders of the Commissioners in addition to the demolition of the building under the preceding section. It is clear that the Commissioners do not require both these powers. It is not necessary to demolish a building, and at the same time to prosecute the person for contravening the orders of the Commissioners. If the object of the prohibition has been attained, there should be no further punishment. The object will be fully gained, if we leave out the words "in addition to or."

The HON. SIR HENRY HARRISON said:—I have no objection to the motion, except that it is wrong in principle. I think there may be cases in which the Commissioners should have an alternative procedure. This is a power which will be exercised very rarely, but in some cases it ought to be exercised, though it is of no great practical importance.

The HON. THE ADVOCATE-GENERAL said:—I also think the principle wrong for which the hon. mover of this amendment contends. If a man constructs a building illegally, the proper remedy is to pull it down, and to prosecute the offender. I think both the remedies should exist, and not one substituted for the other.

HIS HONOUR THE PRESIDENT said:—The offence is the building of a house without sending a ground plan and giving the notice required, and the punishment is a fine of Rs. 100 with a further fine of Rs. 20 for every day during which the offence is continued after conviction. Which part of the operation constitutes the offence? Is the penalty for every day during which he does not send in the building plan or during which he goes on with the building?

The HON. SIR HENRY HARRISON said:—Under the existing law the provision regarding the erection of huts is exactly the same. The Commissioners may pull down the hut, and the person who erects it contrary to the law is liable to a daily fine until the hut is removed. In the present case the penalty is a fine for every day the building is kept on

The motion being put, the Council divided:—

Ayes 3.	*Noes* 10.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft
	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	The Hon. the Advocate-General.
	His Honour the President.

So the Motion was negatived.

The Hon. Babu Kali Nath Mitter, by leave, withdrew the motion, of which notice had been given, for the omission of section 243.

The Hon. Babu Kali Nath Mitter moved that, for section 244, the following be substituted :—

"If the Commissioners fail to pass orders within thirty days, as required by section two hundred and thirty-eight, the person giving such notice may, notwithstanding anything hereinbefore contained, proceed to build or rebuild the house therein referred to according to such plan."

He said :—Here my hon. friend's favourite legislation fails him. In the Bombay Bill the provision is precisely the same as in this amendment of mine. The section there is—

"If within thirty days after receipt of any notice under section 335 or 340, or of the plan, section, description or further information, if any, called for under section 336, 338 or 341 as the case may be, the Commissioner fails to intimate in writing to the person who has given the said notice, his disapproval of the building which the said person proposes to erect, or of the work which he proposes to execute;

or if, within the said period, the Commissioner signifies in writing to the said person, his approval of the said building or work;

the said person may at any time within one year from the date of the delivery of the notice to the Commissioner, proceed with the said building or work in accordance with his intention as described in the notice or in any of the documents aforesaid, but not so as to contravene any of the provisions of this Act or any bye-law made under this Act at the time in force."

An individual who wants to build complies with everything which the law requires, and if then the Commissioners fail to give sanction, under the present Bill the Commissioners must pay compensation. This is no satisfaction to the individual. He wants to build, and if the Commissioners do not give sanction within the time prescribed, he should be entitled to build. That is the law here and in the Bombay Bill, and why should there be any departure from that principle? My hon friend said in reference to another amendment that it was a matter of great importance as to whether a person should build or not. A man gives notice that he wants to build, and if the Commissioners do not do their duty they are to blame, but the man should not suffer. I submit that the man should be entitled to build if within the time the Commissioners give him no answer.

The Hon. Sir Henry Harrison said:—In voting on this amendment some care is necessary, because a part of it covers ground which has already been rejected. The section comprises three cases. Section 235 respecting sites, section 237 regarding buildings, and section 238 which refers to the demolition of buildings. With regard to the site, the view of the Select Committee was upheld that assent to a site is necessary, but as your Honour remarked, what applies to a site might not apply to a building. That is a distinction which may be drawn. The English law, the existing law here, and the Bombay law make the same provision in all cases, and my proposal in the Select Committee was made accordingly; but the Select Committee saw the danger, and introduced the very strict rule that as far as the site is concerned approval must be obtained. But as regards the building, I think there will be less danger. In cases in which no site is in question, or where the site has been sanctioned, and the objection is only as to the details of the building, there will be no harm done. The only question is whether any compensation is necessary with reference to the site. If we accept the remedy as regards the building, there will be no remedy as regards the site. If we say that consent should be assumed as regards the building, we shall have no remedy as to the site.

The Hon. Babu Kali Nath Mitter said in reply:—As regards the site, that has been already disposed of. The section provides that until the site is sanctioned in writing, the house shall not be constructed. The reference in my amendment can only apply to buildings, because as regards the site that has been discussed and settled. It will not be necessary to refer to section 235 in this section because that has already been passed.

His Honour the President said:—We have already passed the last paragraph of section 235, that until the approval of the site in writing, the house shall

not be constructed. The next step is that when the site is settled the Commissioners ask for plans and details of the house. Section 244, providing compensation if the Commissioners fail to pass orders, applies to both the site and the building. The Hon. Dr. Gooroo Dass Banerjee's amendment applies only to the building. I think when you have secured the requirements as to the site, the question in regard to the building is one of very much less importance; and if the Commissioners fail to pass orders within thirty days, the assumption should be against them, and the man should be allowed to proceed with his building. I think that not altogether unreasonable. But the hon. member in charge of the Bill thinks the wording of the section as it stands leaves open the whole question as to the delay the Commissioners may make as to passing orders in regard to the site. If the Commissioners do not pass the site within thirty days, the Bill provides a small penalty on them. But if you cut out section 244, you leave no penalty as to the site.

The Hon. Babu Kali Nath Mitter said in reply:—My idea as to this compensation is that it will never work, and I think it is very objectionable. The Bill authorises the Commissioners to call for plans in respect of buildings, and they can take proper care with regard to their own officers.

The Hon. Dr. Gooroo Dass Banerjee moved that, in the first paragraph of section 244, for the words "they shall pay to the person intending to build compensation for such delay at the rate of Re. 1 per diem for every day in excess of thirty days" the words "their approval shall be presumed" be substituted.

He said:—My amendment is practically identical with that of my hon. friend. I think we may have both the sections providing against delay as regards approval of the site, and also a section providing for presumption of assent in regard to the building.

The Hon. Babu Kali Nath Mitter's amendment was put to the vote and carried.

The Hon. Dr. Gooroo Dass Banerjee's motion was then, by leave, withdrawn

The Hon. Dr. Gooroo Dass Banerjee also, by leave, withdrew the following motions of which notice had been given:—That, in the event of amendment No. (17) not being carried, in line 8 of the first paragraph of section 244, for the word and figure 'Re. 1' 'Rs. 5' be substituted; that in line 2 of the proviso of section 244, for the words and figures "Rs. 2, Rs. 5, Rs. 10, or Rs. 20," the words and figures "Rs. 10, Rs. 15, Rs. 20 or Rs. 25," respectively, be substituted.

The Hon. Sir Henry Harrison, by leave, withdrew the following amendment of which he had given notice:—

That, for the second paragraph of section 237, the following be substituted:—

"If further information is called for, no steps shall be taken to build the house until orders have been passed upon receipt of such information."

He said:—If the Commissioners call for further information, and no information is given, then the previous notice would be of no value at all.

The Hon. Babu Kali Nath Mitter moved that, for section 247, the following be substituted:—

"It shall not be lawful for any person to erect a hut or shed, or any range or block of huts or sheds, or to add to any hut or shed, or to any range or block already existing at the commencement of this Act without thirty days' previous notice to the Commissioners; and the Commissioners may, within thirty days of the receipt of such notice by them, require, in the case of a single hut or shed, that it be built in the manner approved of by them; and, in the case of a range or block of huts or sheds, that they be built so that they may stand in regular line with a free passage or way in front of and between any two lines of such width as they may think proper for ventilation, and to facilitate scavenging, and with such number of privies and with such means of drainage as to them may seem necessary, and of such a level as will admit of such drainage, and with a plinth at least two feet above the level of the nearest public street:

Provided that no hut or shed shall be built within twenty feet of a tank without the leave of the Commissioners."

He said:—I should very much like to shorten the discussion, because the arguments will be very much the same in all these cases; therefore it will save the time of the Council if I make one speech for all. My object is that the

sections of this chapter should be left in the same position as they were when the Bill was before the Council on the last occasion. One discussion can be had from this section up to section 249 almost on the lines on which they have already proceeded. When we come to the standard plans, &c., a separate discussion will be necessary. Many of those huts do not cost more than from Rs. 40 to Rs. 50 to build, and to expect the owners of such huts to submit plans will put them to an expense which they cannot afford; it will besides be very difficult for these persons to submit a plan containing all the information required. My object is to make the procedure as simple as possible. In respect to a single hut or shed, the information necessary is of a very limited character. As regards a block or range of huts, a little more information will be needed. Under the existing law a lane or passage is left between every two lines of hut; but if, as the Select Committee consider to be the meaning of the existing law, and, as has been provided in the Bill, a passage of sufficient width is to be left after each line of huts, a great deal of the bustee land will be taken up for the purpose, and the owners of bustee land will have to pay in rates and taxes the whole of the rent which they derive from the bustee, they will not be able to build upon more than one-third of the land. As regards section 248, it provides for the submission of plans which these persons will be unable to give. Instead of that, my amendment proposes that they shall give notice and conform to the rules and regulations framed by the Commissioners. If they build without notice, the huts may be pulled down. My amendment on section 248 runs thus, that for section 248 the following be substituted:—

"If any hut or shed be built, re-built, or added to without giving to the Commissioners such notice as is required by the last preceding section, or otherwise than as required by the Commissioners, the Commissioners may give notice to the owner or occupier thereof by affixing a notice to some conspicuous part of such hut or shed, to take down and remove the same within one month, or to effect such alterations as they may deem necessary; and it shall be lawful for the Commissioners, if they shall think fit so to do, to cause the same to be taken down and removed, and the expense incurred thereby shall be paid by the said owner or occupier thereof, and shall be recoverable as hereinafter provided."

And I propose to omit section 249, which provides that in addition to the demolition of the hut a prosecution may be instituted.

The HON. DR. GOOROO DASS BANERJEE moved that, in the first paragraph of section 247, the words "such form shall require a ground plan of the hut drawn to the scale of eight feet to the inch, and such other details as the Commissioner may prescribe" be omitted.

He said:—This is a much more restricted amendment than any of those which have just been moved by my hon. friend. My object is to have section 247 so framed as to prevent poor people from being placed in any difficulty. It will very often be very difficult for them to procure the services of a competent surveyor. I also move that in line 11 of the first paragraph of section 247 for the word "thirty" the word "fourteen" be substituted. Under the existing law 14 days is the time within which the Commissioners are to state their approval or disapproval in the case of a pucca building; and if that time has hitherto been sufficient for a pucca building, it ought to be considered sufficient in the case of huts. People have to take a lease of the land before they can submit an application to the Commissioners for permission to erect a hut; the rent will begin to run, and yet they will not have the benefit of the lease until sanction is obtained to erect a hut; and they must in the meantime occupy some other land for which they have to pay rent. This will be a hardship. I have, therefore, reduced the period from 30 to 14 days. I have also to move that clause (*d*) of section 247 be omitted. That clause provides that a hut shall not be erected within 30 feet of a tank. It is well known that in the suburban area which will be amalgamated with Calcutta, tanks are situated so close to one another that there will be in many cases a difficulty to leave a clear space of 30 feet between a hut and a tank. With every regard for sanitation, we must have regard to the existing state of things. If it is thought undesirable that a hut should be built on the margin of a tank, in that case I will move that 10 feet be substituted for 30 feet. Practically huts are built much closer than that; and if we have a clear space of 10 feet from the edge of a tank to the edge of the hut, it would for all practical purposes be sufficient.

The HON. SIR HENRY HARRISON said:—The question of bustees has for a long time embarrassed the town of Calcutta. These new sections have been drafted

with a view to give practical effect to what has long since been decided upon as the proper course to adopt. It has long since been decided that the present custom of building huts one jumbled up with the other is utterly wrong. Till a few years ago it was found impossible to do anything with them; but during the past few years we have had narrow roads made to enable conservancy carts to pass through. But in the condition of the huts there has been very little improvement. Section 277 of the present Act provides that the Commissioners "may require a free passage or way in front of and between every two lines (of huts) of such width as they may think proper for ventilation and to facilitate scavenging." Attached to several of the mills around Calcutta you will find excellent bustees for the workmen built under the supervision of intelligent managers, especially one which I recently went over built under the supervision of Mr. Yule at Garden Reach, and there can be no comparison of their immense superiority to the Calcutta bustees. The difficulty is how to bring a proper system into operation. A project comes in the shape of an application for the building of a single hut, and you have to deal with it without any means of working it into a proper system. The officers of the Corporation urge that it is quite impossible to work out any system from such separate proposals, and the object of this part of the Bill is simply to make some improvement feasible; and therefore we compel the owners to interest themselves in laying out their bustee, and to submit a plan of the whole bustee, on which the site of every hut shall be marked, and this plan when approved by the Commissioners shall be taken as the standard plan of the bustee. It is a radical measure intended to deal with a radical disease, and I cannot see how anything short of that will deal sufficiently with the evil. As regards isolated objections, I quite admit that the Suburbs are so honeycombed with tanks that people have been accustomed hitherto to build their huts within even three feet of a tank, but this is considered by all sanitary authorities to be the worst of all insanitary evils. Tanks should, as far as possible, be obliterated, but it will take a long time to do so, and therefore we have provided a space of 30 feet as the minimum distance from a tank. As existing huts disappear or tanks are filled up there will be improvement; there may be some harshness in fixing that limit, but it appears to me to be necessary. For these reasons I am emboldened to ask the Council to adopt the principle on which the Bill proceeds.

The HON. MR. ALLEN said:—In the progress of these sections through the Select Committee, I particularly protested against all exaggerated notions of what is called sanitary science being brought into operation in Calcutta or the Suburbs without regard to all the surrounding circumstances. My whole contention was against the importation of such, and I certainly felt that in agreeing to the provisions which have been embodied in this Bill, I was acting with the least hardship to the people that was possible in a law of this kind. The hon. member on my right, who has moved an amendment as to the distance at which a hut might be allowed from a tank, entirely forgets that the law in the Suburbs at present provides a minimum distance of fifty feet from a tank. The hon member declares stoutly against the hardship of poor people not being allowed to put up a shanty according to their own convenience; but he forgets that the interests of the whole of Calcutta are too important to be sacrificed to the convenience of poor people. One of the greatest evils which has hitherto existed is the facility which has been given to these poor people to put up their shanties in the best parts of the town. There is one bustee at the present moment to the south of Theatre Road which is considered to be an improved or reformed bustee, and I have seen such sights along that Theatre Road, when the filth of the bustee has been thrown into the road for removal in the morning, that the wonder is, not that there has been disease in Calcutta, but that any person in that neighbourhood can live at all, and this is called an improved bustee; but the sights that are to be seen of a morning in the neighbourhood of bustees are enough to make any person sick. Therefore, I consider that it is necessary to make some provisions for the proper laying out of bustees, and I agreed to these provisions as imposing the least restrictions compatible with the health and safety of the town. The hon. member thinks that these poor people will not be able to get plans made for them, but in saying so, he forgets the spread of education, which will enable them easily to get applications written, and plans made at very little cost.

HIS HONOUR THE PRESIDENT said:—It is one of the points most frequently taken exception to, that the people who live in these huts build them, and not the owners of the bustee land. The hon. member in charge of the Bill has shown very clearly that the object is to make the owners of bustee land take an interest in the laying out of their bustees beforehand. Good; but the law as it stands at present is not that the owner of the bustee land, but the person who wants to build a hut, has to submit a plan; that is the real subject of complaint. It seems the most desirable thing in the world that landlords should be compelled to submit plans carefully drawn to scale, showing how they wish to lay out their lands. But it seems rather hard that a poor man, who builds his hut not with the aid of a proper contractor, but with ordinary hired labour, should be required to submit a plan. There is something in that objection, but I daresay that what is required of him is a mere rough plan which cannot cost him very much to get prepared. The other points to which exception is taken indirectly are in connection with the amount of space between a hut and a tank and between lines of huts. Without venturing to say what the present section does mean, I would concur with those who for the sake of sanitation would impose a certain amount of inconvenience on those who build in bustees. The point on which stress is practically laid in the public memorial is that under the general scheme for bustee building provided in the Bill, two-thirds of the land in a bustee will lie unoccupied; and the Commissioners may practically refuse to approve of any plan that does not leave two-thirds of the land for roads and open spaces. This, I think, is very unlikely, but it is an objection which has been taken, and I shall be glad to have it removed if possible. In regard to the space required between tanks and huts, we have just been told by my hon. friend, Mr. Allen, that the law in the Suburbs requires a space of fifty feet; that I think is quite sufficient justification for the space of thirty feet required by the Bill.

The HON. BABU KALI NATH MITTER said in reply:—The hon. member in charge of the Bill has told us that these sections have been framed with the express desire of compelling owners of bustee lands to submit standard plans, and so forth. But that is what he has absolutely failed to do. He forgets how bustee lands are laid out. For instance, a man has 3 bighas of land; a person wants to rent 3 cottahs of that land for a certain period; the rent is fixed and the land is marked out and given to him; another person takes 7 cottahs in the same way, and so on. The only way in which the owner of the land would be touched is by the framing of bye-laws expressly declaring that the owner of any land who wishes to let it out in small parcels to different persons must in the first instance submit a plan as to the sites to be built upon, the roads and open spaces to be left, and so on, and must obtain the sanction of the Commissioners to such land. If a provision of that sort were introduced, it would have a very good effect. It would prevent the owner from letting out small parcels of land to different individuals at a monthly rent for the purpose of building huts upon it as they think proper. My hon. friend asks why I do not introduce an amendment to that effect. I have repeatedly pointed out to him that if his object is to control the owners of bustee lands, this is the only way in which it can be done. Section 252 of the Bill, to which I have been referred by my hon. friend, authorises the Commissioners to call upon the owners of a bustee to prepare and submit a plan showing the manner in which the bustee should be laid out, and this plan, when approved by the Commissioners, shall be taken as the standard plan of the bustee. But the provisions of this section can be evaded by the owner saying I do not want to build upon the land; I have simply let it out. The section would be unassailable if the owner of the land wishes to build huts upon it. But the fact is not so: the huts are built by the tenants, and not by the owner of the land. The owner has nothing to do with the building sites; he simply lets out the land, and it is for each tenant to say how much land he wishes to take. That being so, the section will practically remain a dead letter. But if the law is framed in the manner I have suggested, it will prevent owners of land from converting their lands into bustees without submitting a plan of the way in which the bustee is to be laid out and obtaining the sanction of the Commissioners to the plan. Such a provision would effect the object in view, but the object with

which section 252 has been framed must ultimately fail. On this point the memorial which has been presented to your Honour says:—

"The regulations relating to the erection of huts are cumbrous and unsuitable to the circumstances of the people, who will often be prevented from erecting huts, though at the same time they may be paying rent in respect of the land which has been let out to them, and upon which the huts are proposed to be built. The provision which makes it obligatory upon owners of bustee land to pay the rates leviable from their tenants, and then to realise them, is a proceeding which will entail hardship and loss upon owners, and will at the same time relieve municipal employés from the performance of their legitimate duties. Further, under section 263 owners will be required to set apart as much as two-thirds of bustee lands for roads, &c., for purposes of bustee improvement. The section would really amount to confiscation of private property, and your Honour's memorialists would beg to record their earnest protest against it."

If this section is carried out to the extent to which it is proposed to do, owners of bustee land will have to pay in rates and taxes nearly the same amount which they will realise as rent, because they will get no rent for two-thirds of the land, but they will notwithstanding have to pay rates and taxes upon it. They will be considered to be the occupiers of all lands left vacant for sanitary purposes: they will be able to realise rent on only one-third of the land, and will have to pay 23 per cent. in rates at the maximum. Therefore it is very necessary that these sections should be carefully considered. I submit that the powers conferred by the existing law are ample for all purposes. If a bustee is not properly constructed, you can have it medically examined, and then compel the owner to do what is required; therefore you have plenary powers at present, and I submit that the effect of these sections of the Bill will be only to harass the ryots instead of putting such pressure upon the owners of land as is desirable.

The Hon. Dr. Gooroo Dass Banerjee said in reply:—My hon. friend, Mr. Allen, was pleased to observe that under the existing law in the Suburbs no hut can be erected within fifty feet of a tank. I was not aware of any such law, and I therefore asked him to be good enough to point out to me the provision to which he referred; and it appears that the section to which my hon. friend alluded does not refer to the construction of huts, but of latrines. Section 236 of the Mofussil Municipal Act provides that no latrine shall be constructed within fifty feet of a tank, and section 238 regulates the position of latrines in regard to holdings; so that these two sections do not bear the construction which has been put upon them, and upon which my hon. friend based his argument.

The Hon. Babu Kali Nath Mitter's motions that new sections (given above) be substituted for sections 247 and 248 of the Bill being put, the Council divided:—

Ayes 2.	*Noes* 10.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Babu Kali Nath Mitter.	The Hon. C. H. Moore.
	The Hon. Dr. Mahendra Lal Sircar.
	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft.
	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	The Hon. the Advocate-General.

So the Motions were negatived.

The Hon. Dr. Gooroo Dass Banerjee's motion that, in the first paragraph of section 247, the words "such form shall require a ground plan of the hut drawn to the scale of eight feet to the inch, and such other details as the Commissioners may prescribe" be omitted, being put, the Council divided:—

Ayes 5.	*Noes* 8.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Moulvie Abdul Jubbar.
The Hon. C. P. L. Macaulay.	The Hon. Sir Alfred Croft.
His Honour the President.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. H. J. Reynolds.
	The Hon. the Advocate-General.

So the Motion was negatived.

The HON. DR. GOOROO DASS BANERJEE'S motion that, in line 11 of the first paragraph of section 247, the word "fourteen" be substituted for "thirty" being put, the Council divided :—

Ayes 7.	*Noes* 6.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
The Hon. H. J. Reynolds.	The Hon. T. T. Allen.
The Hon. the Advocate-General.	The Hon. C. P. L Macaulay.
His Honour the President.	

So the Motion was carried.

The HON. DR. GOOROO DASS BANERJEE'S motion that clause (*d*) of section 247 be omitted, was put to the vote and negatived.

The HON. DR. GOOROO DASS BANERJEE'S motion that in clause (*d*) of section 247 the word "ten" be substituted for "thirty," was put to the vote and negatived.

The HON. DR. GOOROO DASS BANERJEE moved that, in lines 1 and 2 of section 249, the words "in addition to or" be omitted.

He said :—This point has already been considered in reference to the construction of pucca houses. The only additional argument, which can be brought forward in reference to the unauthorised construction of huts, is the poverty of the owners of these huts. It is enough that the power of demolition is exercised: we do not require a prosecution in addition. I am quite aware that I have to meet the powerful opposition of the learned Advocate-General, who remarked that on principle when the provisions of a law have been infringed a penalty is incurred, and the offender should be liable to punishment. But these are not offences against any moral law, or any law for the protection of person or property; they are merely offences against certain municipal regulations; and though on strict principle the offenders may have become guilty of an offence, there is no reason why they should be prosecuted in addition to the exercise of the other power of demolition which secures the object in view.

The HON. SIR HENRY HARRISON said :—This is a matter of no practical importance. There are scarcely any prosecutions in such cases, but the principle should be maintained.

The Motion was put to the vote and negatived.

The HON. BABU KALI NATH MITTER, by leave, withdrew the motion of which he had given notice, that section 249 be omitted.

The HON. BABU KALI NATH MITTER moved that, for section 250, the following be substituted :—

"If the Commissioners fail to pass orders within fourteen days as required by section two hundred and forty-seven, their consent shall be presumed."

He said :—This motion stands precisely on the same footing as in the case of the building regulations.

The HON. SIR HENRY HARRISON said :—This provision is of much less importance in the matter of huts than it is in regard to houses. The present law prescribes a period of 14 days, and if within that time the building is not disallowed, consent is presumed. It is somewhat inconvenient to admit that presumption, but as the principle has been accepted in regard to houses, I must accept it in the case of huts.

The Motion was put to the vote and carried.

The consideration of the further clauses of the Bill was postponed till the next sitting of the Council.

The Council was adjourned to Wednesday, the 25th April 1888, at 11-30 A. M.

CALCUTTA;
The 7th May 1888.

WILLIAM GRAHAM,
For Asst. Secy. to the Govt. of Bengal,
Legislative Dept.

LIBERALITY OF BABOO GUNGA PERSHAD OF DURBHUNGA.

No. 1544P, dated Calcutta, the 4th May 1888.

From—J. WARE EDGAR, Esq., C.S.I., Chief Secretary to the Government of Bengal,
To—The Commissioner of the Patna Division.

I AM directed to acknowledge the receipt of your letter No. 165G, dated the 3rd ultimo, reporting that Baboo Gunga Pershad, son of the late Roy Bunwari Lal, of Durbhunga, has offered to contribute Rs. 9,000 towards the construction of a charitable dispensary at Laheria Serai, and that of this sum Rs. 4,000 have already been advanced by him.

2. In reply, I am to request that you will be good enough to convey to Baboo Gunga Pershad an expression of the Lieutenant-Governor's satisfaction at this proof of his public spirit and liberality. The correspondence will be published in the *Calcutta Gazette.*

No. 165G, dated Bankipore, the 3rd April 1888.

From—JOHN BOXWELL, Esq., Offg. Commissioner of the Patna Division,
To—The Chief Secretary to the Government of Bengal.

I HAVE the honour to report that Babu Gunga Pershad, son of the late Roy Bunwari Lal, of Durbhunga, has offered to give Rs. 9,000 for the construction of a charitable dispensary at Laheria Serai, and that he has already made an advance of Rs. 4,000, promising the remainder when required.

2. The town of Durbhunga is nearly 7 miles in length. The medical requirements of the nothern part of the town are fully met by the Raj Hospital.

The present handsome gift by the above Babu may be utilized in setting up a dispensary in the southern part of the town, which will enable the Municipal Commissioners of the place to offer medical relief to the poor of that quarter who are unable to attend the Raj Hospital.

3. The Municipal Commissioners have got at present a dispensary in somewhat central position of the town, but it is not conveniently situated.

4. I shall be glad if the Government acknowledge the gift in suitable terms.

GIFT OF A GOLD MEDAL BY BABOO DOWLAT CHANDRA RAY.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 5th May 1888.

RESOLUTION.

READ—

The following communications from the Director of Public Instruction regarding the gift of a gold medal by Baboo Dowlat Chandra Roy :—

Endorsement No. 789, dated the 16th February 1888.
Letter No. 2531, dated the 28th April 1888.

In commemoration of the Jubilee year of the reign of Her Majesty the Queen-Empress, Baboo Dowlat Chandra Roy, of Cassipore in the northern Suburbs of Calcutta, has offered to award annually a gold medal to the student gaining the highest senior scholarship at the disposal of the Education Department in Bengal, and has accordingly deposited Government Promissory Notes for Rs. 2,000 at 4 per cent. to cover the annual cost of this reward. The Lieutenant-Governor is pleased to accept this donation, and tenders his thanks to the donor for his liberality.

ORDER.—Ordered that a copy of this Resolution be published in the *Calcutta Gazette*, and that a copy of it be forwarded to the Director of Public Instruction for information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 5th May 1888.

Division	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.		*Western Districts.*			
BURDWAN DIVN.	1	Burdwan May 5,	'88	0·75	Weather—exceedingly hot with south-east winds. State of crops is fair, but rain is badly wanted. Common rice is again a little below 22 seers per rupee on the average.
		Culna	...	0·75	
		Cutwa	...	0·62	
		Raneegunge	...	0·15	
	2	Bankoora „ 5,	'88	0·18	Weather—cooler for the season and cloudy. The plantation of sugarcane still continues. Cotton and *khoshla til* are in pods. Fields are being ploughed for the *bhadoi* crop. No change in the rice market.
	3	Beerbhoom „ 5,	'88	0·21	Weather—very hot and stormy. The rain has done good. Ploughing and sugarcane planting is going on actively.
		Rampur Haut	...	0·85	
	4	Midnapur „ 5,	'88	0·27	Weather—high winds and some clouds which seem now decreasing. The *boro* crop mostly reaped. The lands generally being prepared for *amun*.
	5	Hooghly „ 5,	'88	1·02	Weather—stormy and seasonable. Ploughing and sowing now progressing satisfactorily.
		Serampur	...	2·60	
		Jehanabad	...	0·87	
		Howrah „ 5,	'88	1·01	Weather—rain fell during first part of the week. *Boro* harvest nearly finished. The ploughing of lands continues.
		Oolooberiah	...	2·24	
		Central Districts.			
PRESIDENCY DIVN.	6	24-Perghs. May 8,	'88	2·07	Weather—sultry and cloudy, with occasional heavy thunder-storms. Sowing of jute and *aus* has commenced. Sugarcane thriving well.
	7	Nuddea „ 5,	'88	0·01	Weather—seasonable; very sultry; night breezes strong. The rain has done much good; extensive sowings of early rice reported. Indigo is doing well.
		Kooshtea	...	1·46	
		Meherpur	...	0·99	
		Chooadanga	...	1·28	
		Ranaghat	...	0·16	
	8	Khoolna „ 5,	'88	1·07	Weather—cloudy with occasional light showers. Cultivation for *aus* crop is going on. More rain is desirable for the purpose.
	9	Jessore „ 5,	'88	1·05	Weather—fair. Sowing of *bhadoi*, indigo and jute going on. Prospects of *boro* and sugarcane good.
		Jhenidah	...	1·	
		Magurah	...	2·36	
		Narail	...	1·76	
		Bongong	...	1 6	
	10	Moorshedabad „ 5,	'88	0·30	Weather—clouds disappeared; last two days hot and sultry. Sowing of *amun* and *aus* rice crops has commenced.
		Kandi	...	0 19	
		Lalbag	...	...	
		Jungipur	...	...	
RAJSHAHYE DIVN.	11	Dinagepur May 5,	'88	1·32	Weather—cloudy and hot. The rain has been favourable to the crops, but sunshine is now wanted.
		Thakurgaon	...	2·31	
	12	Rajshahye „ 5,	'88	1·04	Weather—stormy, but hot after the rain. Rain has done good to standing crops. Condition of all crops good. *Aus* and *amun* paddy being sown.
		Nattore	...	1·73	
		Nowgong	...	1·27	
	13	Rungpur „ 5,	'88	1·88	Weather—hot and cloudy with occasional rain. Prospects of crops continue very good.
		Nilphamari	...	1·80	
		Kurigram	...	6·29	
		Gaibanda	...	2·43	
	14	Bogra „ 5,	'88	1 73	Weather—first half of week cool; second half muggy. Sowings of *aus* and jute under very favourable conditions.
		Sherpur	...	1·35	
		Nowkhilla	...	1·38	
	15	Pubna „ 5,	'88	1·91	Weather—cloudy and stormy; the latter part of week hot. State of crops continues good.
		Serajgunge	...	1·10	
	16	Darjeeling „ 5,	'88	0·95	Weather—hot. Rain general. State of crops good.
	17	Julpigoree „ 5,	'88	0·14	Weather—cool during early part of week, now very hot and sultry. Prospects of crops continue good.
		Eastern Districts.			
DACCA DIVISION.	18	Dacca May 5,	'88	1·21	Weather—hot. *Boro* paddy and *kaoni* being harvested. The sowing of *aus* and *amun* paddy has been to a certain extent retarded on account of incessant rain. Rivers are rising fast. Some rice and jute plants have been damaged by being submerged.
		Manickgunge	...	2·74	
		Munshigunge	...	2·78	
		Narainjunge	...	3·21	
	19	Furreedpur „ 5,	'88	1·40	Weather—stormy and cloudy. Sowing of *aus* and *amun* is nearly completed. Prospects of crops fair.
		Goalundo	...	0·45	
		Madaripur	...	4·18	
	20	Backergunge	..	......	Not received.
	21	Mymensingh „ 4,	88	4·05	Weather—hot, but was cool for the greater part of the week. Heavy rain during the past week. The excessive and continuous rains, it is reported have damaged the *boro* crop in Kishoregunge and Netrokona sub-divisions. Prospects of crops otherwise good.
		Jamalpur	...	3·22	
		Kishoregunge	...	8·97	
		Attia	...	3·93	
		Netrokona	...	4·65	

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
		Eastern Districts—concld.		
Chittagong Divn.	22	Chittagong May 8, '88	0·28	Weather—hot and oppressive. Prospects of crops fair. Prices stationary.
	23	Noakholly „ 4, '88	5·59	Weather—rainy and cloudy. The late heavy rain has deterred the sowing of *aus* and caused some damage to *rubbi* crops.
		Fenny ...	8·24	
	24	Tipperah „ 3, '88	8·43	Weather—abnormally rainy and wet. Rain has now apparently ceased. It is feared that some injury will have been done by the heavy rain to the standing crops, such as they are. Agricultural operations have been completely stopped owing to the heavy downpour day after day.
		Brahmanbariah ...	8·14	
		Chandpur ...	6·50	
	25	Chittagong Hill „ 1, '88 Tracts.	5·87	Weather—rainy throughout the week with strong rotatory storms. Sowing in *jums* continues. Planting of sugarcane still continues in some places.
		Hill Tipperah „ 2, '88	8·49	Weather—rainy and stormy. Planting of sugarcane continues. Chillies have suffered from rain.
BEHAR.				
Patna Divn.	26	Patna May 5, '88	Nil	Weather—hot; easterly winds with slight showers on two occasions. *Rubbi* threshing still going on. Prices of food-grains almost stationary.
	27	Gya „ 5, '88	Nil	Weather—excessively hot. Threshing of *rubbi* finished. Sugarcane being irrigated.
	28	Shahabad „ 5, '88	Nil	Weather seasonable. Threshing of *rubbi* crops almost over. Sugarcane and *cheena* coming on well.
	29	Durbhunga „ 5, '88	1·8	Weather—cloudy in the beginning of the week. The late rain has done much good to the standing crops. *Moong*, paddy and indigo prospects are excellent. Prices continue stationary.
	30	Mozufferpur „ 5, '88	1·13	Weather—cloudy in the beginning, latterly hot and fair. Threshing of *rubbi* almost over. Crops on the ground doing well. Rain has done good. Mango crop severely injured by strong east winds.
		Hajeepur ...	0·20	
		Sitamarhi ...	1·25	
	31	Sarun „ 5, '88	0·1	Weather—seasonable. The little rain that has fallen has done good to the agricultural operations. Sugarcane and *cheena* crops doing well. Fields are under preparation for *bhadoi* and *aghani*.
		Sewan ...	0·53	
		Gopalgunge ...	1·11	
	32	Chumparun „ 5, '88	Nil	Weather—hot. Prospects of all standing crops, including indigo, good. *Bhadoi* and *aghani* sowings going on. Weighment of opium nearly finished.
Bhagulpore Divn.	33	Monghyr May 5, '88	0·26	Weather—hot and sultry; east winds abated. Lands are being prepared for *bhadoi* crops, but more rain wanted for ploughing paddy lands.
		Begooserai ...	...	
		Jamui ...	0·11	
	34	Bhagulpur „ 5, '88	0·29	Weather—heat returned with west wind. The rain in the north has done much good to low land rice and *moong*, and lands are being prepared rapidly for *bhadoi* crop. In south only sugarcane and indigo on the ground. More rain is wanted.
		Madhupur ..	2·02	
		Soopool ..	1·57	
	35	Purneah „ 5, '88	2·52	Weather—rather hot. State and prospect of crops good.
		Kishengunge ..	0·95	
		Arrareah ...	0·28	
	36	Maldah „ 5, '88	0·90	Weather—hot and cloudy with occasional rain and high east wind. Harvesting of *boro* paddy continues. The rain was general throughout the district and has done much good to the *bhadoi* and *haimantic* sowings except in Kaliachak and Manickchack, where the rainfall was scanty. Common rice is selling at an average of 23¼ seers per rupee.
		Chanchal ..	1·14	
		Shibgunge ...	0·64	
		Gazole ...	0·40	
	37	Sonthal Perghs. „ 5, '88	0·63	Weather—west side no rain; cloudy but hot. On east and centre cloudy with east wind and some rain. On west side (Deoghur and Jamtara) sugarcane suffers for want of rain. Rain badly wanted for cane and mangoes. In east *boro dhan* and indigo doing well.
		Deoghur ...	0·03	
		Godda ...	0·13	
		Rajmahal ...	0·55	
		Pakour ...	0·79	
ORISSA.				
Orissa Divn.	38	Cuttack May 4, '88	Nil	Weather—mornings cool; evenings cool with high winds. Middays extremely hot; high winds prevailing from south-east. Ploughing for *beali* and *sarad* rice stopped for want of rain. Reaping of *dalua* rice going on. Common rice is sold at 20 seers per rupee in town.
	39	Pooree „ 3, '88	Nil	Weather—seasonable. Land is being ploughed for the ensuing *sarad* crop. *Dalua* crop is being harvested. Common rice selling at 23 seers 8 chittacks per rupee in the Sudder sub-division and 23 seers 14 chittacks in the Khorda sub-division.
		Khoorda ...	Nil	
	40	Balasore „ 4, '88	Nil	Weather—very hot. Lands being cultivated and sowings of rice begun in some places.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh, May 4, '88	Nil	Weather—seasonable. Sugarcane doing well. Mango promising.
	42	Lohardugga „ 5, '88	0·02	Weather—seasonable. Very hot. No crops on the ground to report on. Prices as before.
	43	Singbhoom „ 4, '88	0·05	Weather—very hot and muggy. No rain at head-quarters, but more or less in the interior. Sugarcane being planted. An 8-anna mango crop expected.
	44	Manbhoom „ 5, '88	0·41	Weather—hot, with slight wind. Sugarcane being planted. Lands are being prepared for cultivation.

STATISTICAL DEPARTMENT,
The 5th May 1888.

P. NOLAN,
Secretary to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of April 1888.

	Inches.	Date.	Hour.
The mean pressure of the month	29·706		
The average pressure of April from 24 years' registers ...	29 752		
The highest pressure in the month	29·920	21st	22h.
The lowest pressure in the month	29·545	29th	16h.
The range of pressure	0·375		
	Hours.		
The total number of hours of bright sunshine during the month	241.9		
The maximum possible number of hours of sunshine ...	378·9		
	⊖		
The mean temperature of the month	85 0		
The average temperature of April from 24 years' registers	84·7		
The highest temperature in the month	102 3	15th	
The lowest temperatue in the month	66 4	26th	
The range of temperature during the month	35·9		
The mean daily range of temperature	18·6		
The greatest range of temperature in one day	27·9	8th	
	Per cent.		
The mean humidity of the month	74		
The average humidity of April from 24 years' registers ...	69		
	Inches.		
The mean vapour tension of the month	0·869		
The average vapour tension of April from 9 years' registers	0·861		
The mean cloud proportion of the month	3·59		
The average cloud proportion of April from 11 years' registers	2·65		
	Inches.		
The total rainfall of the month	3 91		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the guage about 52 feet above the ground)	3·74		
The average fall of April from 48 years' registers ...	2·81		
The greatest fall in 24 hours	1·29	28th	
	Days.		
The number of rainy days in the month	5		
The average number of rainy days in April from 24 years' registers	8		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	151·1		
The mean difference of sun and air temperatures	66·5		
The greatest sun temperature	156 4	22nd	
The greatest excess of sun over air temperature	63·5	20th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	71·1		
The mean depression of the noctural radiation thermometer below the minimum air temperature at 4 feet above the ground	4·9		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	9 0	9th	
	Miles.		
The mean movement of the wind per day	176·7		
The greatest movement of the wind in one day	264·0	24th	
The greatest movement of the wind in one hour	19·0	30th, Noon to 1 P.M.	

The number of hours with winds from each of the 8 points—

N. 1, NE. 9, E. 22, SE. 77, S. 308, SW. 248, W. 28, NW. 14, Calm 13.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·2° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

N. B—In the monthly abstract for April 1888 read 269 for 249 as the number of hours with winds from S. W

A. Pedler,

For Offg. Meteorological Reporter to the Govt. of India.

Meteorological Office, India;
Calcutta, the 7th May 1888.

Explanation. Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number [illegible] means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12 [illegible] in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 4th of May 1888.

Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Rainfall. Of week. Mean for district.	Of week. Normal mean. Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 8th May* 1888.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM FOR THE WEEK ENDING FRIDAY, THE 4TH OF MAY 1888.

AT the close of the previous week disturbed conditions existed over the whole of Bengal, except in Chutia Nagpore, Behar and Orissa, and local storms with rain were numerous in South-West, East and North Bengal. At the commencement of the present week a distinct low pressure area was formed over Chutia Nagpore, which also caused comparatively low pressure over the greater part of Orissa, South and South-East Bengal. The wind systems blowing over the province were also somewhat irregular; south-westerly winds prevailed in Orissa and Chutia Nagpore, southerly winds in South and South-East Bengal, and easterly, north-easterly and northerly winds elsewhere. These winds were also at the majority of stations very moist, and, owing to the rainfall which was occurring, temperature was generally considerably below the normal. Under such conditions weather continued disturbed, and local storms with rain were general in South-West, East and North Bengal, and in the southern parts of Chutia Nagpore up to 1st and in many cases up to the 2nd of May, and even over a large part of Behar, rainfall was general on April 30th; but in the Shahabad, Gya and Patna districts in South Behar and in the Hazaribagh and Lohardugga districts of Chutia Nagpore rainfall was practically absent throughout this period, and also until the close of the week. A slight change, however, commenced in the meteorological conditions of the province on the 1st, inasmuch as the easterly element in the wind directions became less strongly pronounced. These moist easterly winds again diminished in force on the 2nd, and by the 3rd they had practically retired from Bengal, and westerly and south-westerly winds, accompanied by a decided decrease in the humidity, obtained in their place. In Assam, however, moist easterly winds were still reported, and this district continued to receive rain until the close of the week. Thus from the 2nd to the end of the week, therefore, fairly settled weather obtained over the whole of Bengal, and rainfall was practically absent, and at the close of the week ordinary settled hot weather conditions again obtained.

Pressure.—A general fall of pressure was reported for the first two or three days of the week, the fall being particularly noticeable over the western parts of the province in connection with the feeble depression before referred to. On the 1st May, however, an extremely rapid rise of pressure took place, the increase equalling 0·15 inch at Hazaribagh, and thus to a great extent causing the depression to disappear. The increasing pressure usually continued on the 2nd instant, but on the 3rd a moderate fall set in, which was largest along the foot of the hills, and pressure became comparatively low in North Behar and North Bengal; on the 4th pressure rose, but still it was slightly low in the two districts last named and in Assam. Taking into consideration only those stations from which records have been received for a number of years, and which therefore yield reliable averages, the mean pressure for the week has been 0·033 inch in defect in Bengal and 0·03 in defect in Assam. As might be expected, the defects are largest in the districts affected by the depression, and at Hazaribagh the defect was 0·045 inch, at Ranchi 0·049 inch, and at Cuttack 0·048 inch.

Temperature.—During the general rainfall in the first half of the week temperature was low, but with the cessation of the rainfall about the 1st, temperature began to rise rapidly in all districts, and by the close of the week again very high temperatures were recorded. For the whole week, therefore, the mean temperature of Bengal was only 0·7° below the normal, though in Assam, where rainfall continued till the close of the week, the defect was no less than 2·6°. The distribution of temperature in Bengal has been rather unequal, and thus while North Behar registers a defect of 4·0°, East Bengal one of 2·0°, and North Bengal one of 1·6°, on the other hand Orissa and Chutia Nagpur record excess temperatures of 2°. At the close of the week some very high maximum temperatures were recorded, the highest being—

110·7°	at Chyebassa	on the	4th May.
109·6°	,, Gya	,,	3rd ,,
109·4°	,, Cuttack	,,	4th ,,
109·1°	,, Bankoorah	,,	4th ,,
108·4°	,, Dehree	,,	4th ,,
107·6°	,, Bankipore	,,	4th ,,
107·4°	,, Arrah	,,	4th ,,

Rainfall.—The heaviest rainfall has been received in East Bengal, the stations in which averaged nearly four inches during the week. In North Bengal the fall has averaged about one-and-a-half inches, and in South-West Bengal and North Behar the amounts equal an average amount of about an inch. The fall in South Behar has been very small, averaging only a little more than a tenth of an inch, while in Orissa and Chutia Nagpur the falls have been exceedingly small. Particularly heavy falls have been received in the Comilla district of East Bengal, but in most other cases the falls have been fairly well spread over the various districts in each division, except in the cases noted in the general summary.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 4th of May 1888 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of April.		Since 15th May 1887.

The total fall from 1st January to 5th May 1888	9·09
The average fall of the corresponding period for 24 years, S. G.'s Office ...	5·33

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h. 10h. 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, p passing temporary showers, t thunder, K lightning.

	°
The mean temperature of the seven days	85·0
The extreme variation of temperature	26·0
The maximum temperature	97·0
	%
The mean relative humidity	83
	Inches.
The total fall of rain from 29th April to 5th May 1888	1·63

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;

The 7th May 1888.

A. PEDLER,

For Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

From the annexed table, exhibiting the vital statistics of the principal Municipalities in Bengal for the week ending 21st April 1888, it appears —

1. That during the week in question births and deaths were registered in the proportions, respectively, of 19 9 and 29·3 per 1,000 of population, as opposed to 19·3 and 29·8 per 1,000, respectively, during the preceding week ending 14th April.

2. That these events were returned at the highest rates by the following Municipalities :—

Births.	Ratio per *mille.*
Narainganj	66·2
Bhagulpore	38·9
Comillah	38·5
Monghyr	38·0
Beauleah	34·1
Durbhanga	33·0

Deaths.	Ratio per *mille.*
Beauleah	94·6
Narainganj	66·2
Serampore	53·0
Suburbs of Calcutta	50·0
Comillah	46·2
Jessore	42·8
Chittagong	42·3
Gya	39·0
Hughli	33·6
Bali	31·6
Durbhanga	31·5

3. That the casualty-rates from the principal diseases specified below exhibit no noticeable variations in comparison with the death-rates from the same diseases in the preceding week :—

	Ratio per *mille* during the weeks ending— 21st April 1888.	14th April 1888.
Cholera	9·5	9·8
Small-pox	·3	·1
Fever	9·5	9·9
Bowel-complaints	2·4	3·1
Injury	·5	·5
Other causes	7·1	6·4

4. That of the diseases above-named, cholera, fever and maladies coming under the head of "Others causes" proved conspicuously fatal in the following Municipalities, and small-pox only in the Durbhanga town, where the death-rate from it stood at 2·3 per 1,000 of population :—

Cholera.	Ratio per *mille.*
Beauleah	55·1
Narainganj	37·2
Serampore	31·4
Suburbs of Calcutta	26·2
Jessore	24·5
Comillah	19·2
Bali	17·5
Chittagong	16·4
Hughli	13·4
Howrah	9·7
Dacca	4·5
Patna	2·9

Fever.	Ratio per *mille.*
Beauleah	36·8
Purneah	20·8

Other causes.	Ratio per *mille.*
Narainganj	20·7
Gya	16·4
Comillah	15·4
Midnapore	13·9
Bhagulpore	12·7
Puri	10·5

It is gratifying to find that the severity of cholera had abated considerably in Jessore, Beauleah Narainganj and Serampore, in comparison with its incidence during the preceding week.

5. That under the heads of *Sex*, *Class* and *Age*, the mortality stood as follows :—

According to Sex.	Ratio per *mille.*
Males	33·0
Females	25·0
Ratio of male deaths to every 100 female deaths	149

According to Class.	Ratio per *mille.*
Christians	17·4
Hindus	27·3
Mahomedans	34·0
Other classes	109·2

According to Age.	Ratio per *mille.*
Under 1 year	207·5
1 and under 5 years	42·7
5 „ 10 „	19·0
10 „ 15 „	13·6
15 „ 20 „	21·9
20 „ 30 „	22·1
30 „ 40 „	19·8
40 „ 50 „	24·0
50 „ 60 „	31·1
60 years and upwards	51·7

R. Lidderdale, M.D., *Deputy Surgeon-General,*
Sanitary Commissioner for Bengal.

The 7th May 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community taken in February 1881 was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. [illegible] have consequently been calculated on the revised [illegible] under all heads in the above table, except "Age," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

CONTENTS.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

The Council met at the Council Chamber on Wednesday, the 25th April, 1888, at 11-30 A.M.

Present:

The HON. SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding*.
The HON. H. J. REYNOLDS, C.S.I.
The HON. C. P. L. MACAULAY, C.I.E.
The HON. T. T. ALLEN.
The HON. SIR HENRY HARRISON, KT.
The HON. SIR ALFRED CROFT, K.C.I.E.
The HON. MOULVIE ABDUL JUBBAR.
The HON. BABU KALI NATH MITTER.
The HON. DR. MAHENDRA LAL SIRCAR, C.I.E.
The HON. C. H. MOORE.
The HON. DR. GOOROO DASS BANERJEE.
The HON. H. PRATT.

HOWRAH BRIDGE ACT, IX OF 1871, AMENDMENT BILL.

The HON. MR. MACAULAY moved for leave to introduce a Bill to amend Act IX of 1871 (an Act for the construction of a bridge across the river Hooghly between Howrah and Calcutta).

He said:—In order to make the object of the motion perfectly clear to the Council, it will be desirable that I should, with their permission, refer briefly to the history of the discussions and proceedings connected with the construction and administration of the bridge. When the Act, which it is now proposed to amend, was before the Council in 1871, a great divergence of opinion was manifested as to the sources from which the revenue which was to provide for the maintenance of the bridge, the payment of interest on the loan from Government, the extinction of debt, and the creation of a Reserve Fund, should be derived. The original scheme of the Bill was that what I may call the basis of the revenue of the bridge was to be a terminal charge upon goods which enter or leave the Howrah Railway station by the East Indian Railway, whether they cross the bridge or not. The local tolls, that is the tolls on the persons and goods actually crossing the bridge, were to be a sort of supplementary source of revenue, which it was hoped would be ultimately abandoned. The mercantile community, the Port Commissioners, and their representatives in the Council, strongly dissented from this proposal. They urged that to make goods which did not use the bridge pay for it was wholly indefensible in principle, and that the proper people to pay for the bridge were those who made use of it. I need not enter into any details regarding the arguments used on both sides, because Sir George Campbell, who was then President of the Council, brought the question to a very plain issue. He pointed out that it was not a question between different sources of revenue for the bridge, but between accepting the terminal charges and doing without the bridge altogether, inasmuch as the Government of India had insisted on having collateral security for their loan before they would consent to give it. The principle of the levy of the terminal charges was accordingly adopted by a majority of the Council. Sir George Campbell, however, made a concession to the opposition which had been raised. He changed what I have called the basis of the revenue of the bridge, from the terminal charges to the local tolls. Accordingly, section 3 was made to prescribe the levy of local tolls, while section 4 made the levy of terminal charges discretionary, and in this form the Bill passed the Council. Since the bridge was constructed until recently the terminal charges have been levied, except that on coal which was remitted in 1877. Some two years ago, however, when it was seen that the period was at hand when, under section 22, it would be necessary to revise the revenue so as to bring it down to the actual expenditure to be incurred, several proposals were brought forward. The Port Commissioners, abandoning the view they had expressed in 1871, proposed the abolition of local tolls. The Agent of the East Indian Railway, who might have been expected to prefer the removal of the terminal charges, first supported this view, and reported to his Board in London, and they agreed with him, that the toll-bar by which the local tolls are collected is so great a source of vexation and irritation to the public, that he would wish to see these tolls abolished. At the same time he proposed that the terminal charge on wheat should be remitted. In this opinion the Port Commissioners concurred, and they proposed the abolition of both. These questions were referred for the opinion of various local bodies. The Howrah Municipal Commissioners were, of course, in favour of the abolition of the local tolls. The Trades' Association believed that people had become accustomed to the terminal charges, and considered that the local tolls should be abolished The Calcutta Corporation would have the tolls maintained, and the proceeds equitably divided between the Municipalities of Calcutta and Howrah for purposes of improvement. The Chamber of Commerce maintained their opposition of 1871, and urged that the terminal charges should be abolished before the local tolls are interfered with. In view of these differences of opinion Sir Rivers Thompson decided to remit the terminal charge on wheat from 1st April 1887, leaving the other questions for settlement when the debt of the bridge should be actually extinguished. With this view His Honor, the present Lieutenant-Governor of Bengal, recently appointed a representative Committee to consider the whole matter. Of that Committee my hon. friend, Mr. Reynolds, as Chairman of the Port Commissioners, was President; the Chamber of Commerce were represented by the hon. Mr Steel, their Chairman, and the Trades' Association by their Master, Mr. Hallett; the East Indian Railway were represented by their Agent, Colonel Campbell, the Municipalities of Calcutta and Howrah by their Chairmen, and there were official members to represent the Government

of Bengal and the Accounts Department. In view of the nature of the constitution of the Committee, and, as I will show, of their unanimity on the main question before them, I think the Council may safely adopt their recommendations, and recognise that the differences of opinion which had existed have been reconciled. The report of the Committee will be circulated to the Council. I may say that they were unanimous in recommending, first that the local tolls should be abolished, and secondly that some terminal charges should be retained. The terminal charges recommended for remission are those on rice and grain, pulses of all sorts, seeds of all sorts, and salt. This will represent a relief to trade of about Rs. 1,60,000 in addition to about Rs. 66,000, the amount of the charge already remitted on wheat. The retention of the charge on certain articles with the interest on the Reserve Fund, the rent of bridge lands, and the earnings of the tug steamer, will provide an income sufficient to cover the necessary expenditure. Then as regards the disposal of the surplus, the Committee, with the single dissentient voice of Colonel Campbell, proposed to make over two lakhs of rupees to the Calcutta Municipality to help it in making a road to lead from the bridge towards the Sealdah station. Should the Council accept these proposals, they will require the amendment of three sections of the Act. As I said, section 3 prescribes the levy of local tolls. The Lieutenant-Governor has power to regulate them, but he has no power of exemption It will be necessary to give him this power of exemption. Then under section 4, though the Lieutenant-Governor can reduce the terminal charges on goods, or exempt goods altogether, he has no power to re-impose them. However remote may be the contingency of their re-imposition, I think it will be prudent for the Council to provide for such re-imposition should unforeseen circumstances require it. Finally, section 18 requires that any surplus must be devoted to the purposes of the Act, and the section must be amended to admit of the grant being made to the Calcutta Municipality. These are the provisions of the Bill which I ask the leave of the Council to introduce.

The motion was put to the vote and carried.

CALCUTTA AND SUBURBAN MUNICIPALITIES AMALGAMATION BILL.

The Hon. Sir Henry Harrison moved that the clauses of the Bill to consolidate and amend the law relating to the municipal affairs of the Town and Suburbs of Calcutta, as further amended, be further considered for settlement in the form recommended by the Select Committee.

The motion was put to the vote and carried.

The Hon. Babu Kali Nath Mitter moved that sections 252, 253, 254, 255, and 256 be omitted.

He said:—The Council has already provided by section 247 for notice and plans being submitted to the Commissioners before any hut can be built, and that and the following sections will, to all intents and purposes, be quite sufficient to regulate the building of huts in Calcutta, on land on which huts do not at present exist. If any piece of land is to be converted into a bustee, those two sections give ample power to regulate the erection of huts. No hut can be built without giving the information required by section 247, and therefore the powers given to the Commissioners are quite sufficient in regard to huts to be built hereafter. Sections 252 to 256 introduce a procedure which does not exist at present, and a procedure which is not suited to the requirements of the people, and there will be great difficulty in working it out by reason of the particular method adopted by the owners of land in letting it out. As I understand it, the owners of land let it out in small parcels to various individuals on a monthly rent, and each individual having taken the land he requires, applies to the Commissioners to build, and having got permission builds his hut. If the procedure was that the owner of the land himself built the huts, and let them out to tenants, there would be no difficulty. But that is never done in Calcutta. The huts are in most cases built by the tenants, and the landholder simply lets them the land in small parcels. That being so, the first difficulty to my mind is this: The landlord cannot foresee the requirements of the tenants, he cannot say whether his

tenants will require smaller or larger parcels of land, and therefore it would be impossible for the owner to set apart particular sites for building on. This is a difficulty which I think it will be impossible to surmount. It is of no use to shut our eyes to the existing state of things, for when the landlord is called upon to submit a plan jointly with the adjoining bustee owner, he will say I do not propose to build upon the land; I cannot say what will be the requirements of my tenants, and therefore I cannot possibly select the sites. The objection to my mind seems a very strong one. And having already provided for the regulation of huts, if hereafter huts are allowed to be crowded together or built in irregular lines, the persons who will be responsible will be the Commissioners themselves. The Commissioners have ample power to prevent the irregular building of huts, and therefore, as far as the future is concerned, no difficulty will arise. As regards huts already existing, I submit that the provisions of sections 247 and 248 give ample power to deal with the existing state of things. If huts are crowded together in any bustee, the Commissioners will have power to order certain roads to be opened out and certain sanitary improvements to be made. Section 252 provides for the owners submitting a joint plan. It will be a matter for congratulation if the owners can be made to agree to anything of the kind. Generally their views are so diverse, that it will be very difficult for them to join in a common object. The section provides that if they do not agree, the Commissioners may prepare a standard plan. The Commissioners will no doubt try to prepare it in the best manner possible, but it is difficult to see how any plan prepared beforehand will meet the requirements of persons who may want to build huts for themselves. For instance, one cottah of land may be allotted as a building site, but the tenant may want three cottahs or five cottahs or even ten cottahs: he cannot get what he wants under this procedure. Under section 254 the owners may submit their objections to the plan prepared by the Commissioners, and so long as the standard plan is not completed no hut can be built upon the land. But under the preceding sections provision has already been made against the building of any hut without sanction; therefore sections 252 to 256 are wholly unnecessary. I therefore move the omission of these sections; their omission will not in any way cripple the powers of the Commissioners; they will remain the same, and as I have said before, if they are retained they will not work.
